"Watch For New Openings"

Our Nationwide Toll-Free WATTS Number is: 1-800-433-5700

Please See Page 6 for Local Allied Facility Addresses and Phone Numbers

International Sales and Services (Export Orders)

Minimum export order is $50.00. Write **Allied Electronics International Marketing Dept. at 821 Jones Street, Fort Worth, Texas 76102 U.S.A. (Telex 75-8314, Telephone 817/336-5401)** for a complete quotation including handling, documentation and shipping.

Terms for payment on export orders are cash or irrevocable letter of credit. Credit terms are available to qualified customers—inquire when placing order. Cash orders in U.S. dollars will be accepted for immediate processing. Please include an extra 20% (10% on orders over $500.00) to cover handling, documentation and shipping charges. We promptly refund any excess of payment over actual charges.

We stock all items listed in this catalog. However, in some cases, certain items from our suppliers may require a leadtime of 60 to 90 days. To ensure faster delivery to you, a divisible letter of credit for two (2) shipments is recommended to allow the majority of your order to be shipped immediately. **All letters of credit must be valid for a minimum of one hundred-fifty (150) days.**

For total yearly procurement of U.S. electronic products, as on a contract basis, contact our International Marketing Group, at 821 Jones Street, Fort Worth, Texas 76102 U.S.A. (Telex 75-8314, Telephone 817/336-5401).

Other Services Available For You...

Allied Electronics Offers Basic Services Like *PACK AND HOLD, SHIP COMPLETE, DROP SHIP, QUOTATIONS* and *SCHEDULED DELIVERIES.* Please Contact Your Nearest Allied Facility at 1-800-433-5700 About the Value of These Services and How They Will Help You.

We Invite You To Open An Allied Electronics Credit Account Today!

Open Accounts

We extend credit to Government Agencies and well-rated Industrial and Institutional accounts. Firms without a published rating may apply to Allied for a line of credit by submitting a financial statement with bank and trade references to our Industrial Credit Dept. You'll find a Business Credit Application on the reverse side of the order blank in this Guide. Terms of payment are net, 30 days and 1½% carrying charge over 30 days.

Minimum Billing

Minimum Billing is **$25.00** for the total amount of any order. On Non-Catalog Items, the Minimum Billing is $25.00 per line.

C.O.D. Orders—See Cash, Next Page

APO and FPO Orders

APO and FPO shipments will be routed Parcel Post Insured, with maximum size 100 inches (length plus girth) and maximum weight 70 lbs. For faster delivery, specify Priority Mail (handling similar to First Class Mail). To estimate shipping charges contact your local Post Office.

Prices and Shipments

Prices shown are net, F.O.B. shipping point, and are subject to change without notice. Orders are filled at prices in effect at time of shipment. If prices are reduced, you receive the benefit and pay the lower price. We reserve the right to add any Federal, State or local tax, UNLESS your Tax Exemption Certificate is on file with Allied Electronics. States where UPS cannot deliver to a P.O. Box number, your order **MUST BE SENT VIA PARCEL POST or Priority (First Class Zone Rated) Mail.**

Future Ship/Pack & Hold

All orders for future scheduled deliveries must be confirmed in writing by Purchase Order with specific delivery information. Any changes in delivery schedules must be agreed upon by Allied and customer and confirmed in writing.

Large Quantity Quotations and Bids

If you need bids or quotations to place an order, or if you want larger quantities than are listed in our Guide, be sure to contact us. Prices and delivery information will be provided for you immediately. Please address requests for quotations to your nearest Allied Electronics facility.

If You Write To Us

Please include your purchase order number and our invoice number when writing to us on Open Account orders. If a cash order is returned, include your original order papers (these are returned to you after your order is shipped) with Stock Nos. and descriptions of items.

Limited Warranty

Allied is only acting as a distributor of products manufactured by other companies. Thus, Allied expressly limits its guarantees and warranties for products sold hereunder to those extended and allowed by the manufacturing company to be passed through to Allied's customers. There are no express or implied warranties which extend beyond the description on the face hereof. Allied disclaims and excludes from any sale of products herein any implied warranties of merchantability, or of fitness or suitability for any particular purpose or use. All goods sold by Allied are purchased by the buyer "AS IS." Since Allied cannot control the manner or use of its products after their sale, Allied will not be responsible for any direct, consequential or indirect damages to the purchase or any third party or ultimate user of the products. Allied will, at its option, either replace the goods sold or refund the purchase price should a product defect be brought to its attention within a reasonable time after sale.

Merchandise Return

If you want to return all or part of your purchase for any reason other than damage or shortage, call the Allied facility where you placed the order within 30 days after receiving your order for complete instructions and a return authorization number. Return authorization numbers are valid for 30 days only. Parts returned without prior authorization may be subject to a restocking charge, or may not be accepted. Product returned for credit is subject to inspection by Allied prior to any credit being issued. Merchandise should be returned in original containers.

Damaged Products—See Shipment Damage, Next Page

Shortages

All claims for shortage or shipment errors must be made **WITHIN 10 DAYS** after receipt of shipment.

Precious Metal Surcharge

Because of the extremely volatile nature of precious-metal pricing with rapid fluctuations in market conditions, a surcharge may be included in our price on certain electronic devices. The precious-metal surcharge is based on prices in effect at time of shipment. Products listed in this Guide which are subject to the surcharge include connectors, relays, switches, Integrated Circuits and Discrete Devices. Current pricing is always available at your nearest Allied facility listed above.

Non-Catalog Items

Merchandise not listed in our catalog, if available from our regular suppliers, may be subject to minimum order quantities and/or special handling charges. Shipment is made as quickly as deliveries are received from our source. Special order products are sold on a nonreturnable basis.

Cash Orders

Be sure to include all transportation and insurance charges. Allied will ship your order the best way possible (see chart for United Parcel Service charges). Minimum order $25.00 Any order less than $25.00 will have a $5.00 handling charge added to the total price. No Back Orders will be made on Cash Orders. Please re-order in 45 days.

C.O.D. Orders

The minimum C.O.D. order is $25.00. Payment must be by cash, money order or certified check to delivering carrier. An advance deposit of 40% of the total value is required with order. NO BACK ORDERS WILL BE MADE FOR ANY C.O.D. ORDER.

Sales Tax

Allied Electronics is required by law to collect Sales Taxes imposed by the state you live in. As rates vary from state to state, please remit the correct percentage for your locality. If you have a State Sales Tax Exemption Certificate, make sure a copy is on file with Allied if you purchase Open Account. For Cash or Credit Card orders, insert your Certificate number as provided on the Cash Order form.

Truck Shipments

Truck is the most economical way to ship items weighing approximately 50 pounds or more. Shipments weighing between 50 to 99 pounds will be charged at the minimum 100 pound rate as specified by truck carriers. Consult your local agent for truck rates.

Air Freight Shipments

We will ship your order Air Freight at your expense with your instructions. Contact your local Air Freight Carrier for Air Freight charges.

Shipment Damage

Merchandise we ship is carefully packed or prepackaged by our suppliers in compliance with carrier requirements. Claims for loss or damage in transit must be made with the carrier by the customer. All shipments should be unpacked and inspected immediately upon receipt.

Concealed Loss or Damage. If damage does not become apparent until shipment is unpacked, make a request for inspection by the carrier's agent and file claim with the carrier.

Visible Loss or Damage. Any external evidence of loss or damage must be noted on the freight bill or carrier's receipt and signed by the carrier's agent. Failure to do this will result in the carrier refusing to honor the claim. For your protection our billings include insurance for damage or loss in transit.

Merchandise Return

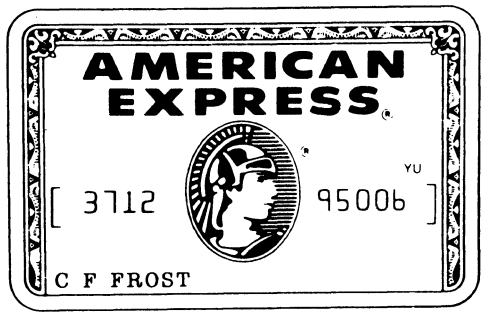
If you want to return all or part of your purchase for any reason other than damage or shortage, call the Allied facility where you placed the order within 30 days after receiving your order for complete instructions and a return authorization number. Return authorization numbers are valid for 30 days only. Parts returned without prior authorization may be subject to a restocking charge, or may not be accepted. Product returned for credit is subject to inspection by Allied prior to any credit being issued. Merchandise should be returned in original containers.

Method of Shipment

All terms are F.O.B. shipping point.

UPS shipping charges on next page are those in effect at the time of printing— they are subject to increase at any time.

Credit Cards



ORDER THE EASY WAY...Use Your American Express, Visa, or MasterCard When Ordering From Allied Electronics.

Allied Electronics will accept current (unexpired date) MasterCard, Visa, or American Express Credit cards. Be sure to sign your name, and Account Number on the Order Blank in the space provided. Unsigned or expired date requests will be returned.

Any Fraction of a pound over the weight shown takes the next higher rate. †48 States. ‡Hawaii. *Delivery to Hawaii requires one additional day except for shipments from portions of California, Nevada, Washington and Oregon.

Next Day Air Letter $9.00

When recording a UPS Next Day Air Letter in the UPS Pickup Record Book, use the appropriate zone as shown above, and show "LTR" in the AIR LBS column.

Additional Charges

For each COD received for collection: $3.30. **For each Address Correction:** $2.75. **For each Acknowledgment of Delivery (AOD):** .45 cents. **For each Interstate Call Tag received:** $1.35 (95 cents if submitted in electronic transmission format). **For each package with a declared value over $100:** 25 cents for each additional $100 or fraction thereof. **Weekly service charge:** $4.50.

Weight and Size Limits

Maximum Weight Per Package
70 pounds Next Day Air, 70 pounds 2nd Day Air, 70 pounds Ground Interstate, 50 pounds Ground Intrastate.

Maximum Size Per Package
Ground Service: Out of State—130 inches in length and girth combined, with a maximum length of 108 inches; In State—108 inches in length and girth combined. **Air Service:** 130 inches in length and girth combined, with a maximum length of 108 inches. Minimum charge for a package measuring over 84 inches in length and girth combined will be equal to the charge for a package weighing 25 pounds.

Air Restrictions

The maximum value for an air service package is $25,000 and the maximum carrier liability is $25,000. No Call Tag service provided in Air Service. **Hazardous materials are prohibited in Air Service.**

Note: Some Air Shipments may be shipped by Surface Transportation.

Insurance on Freight or Air Shipments

We also insure for your protection, all freight or air shipments. Allow an additional 10% of shipping charges for insurance.

We Will Ship Your Order UPS Next Day Air or 2nd Day Air upon Your Request, or By Any Other Shipment Method You Request. Please Specify When Ordering.

Insurance On Parcel Post And United Parcel Shipments

To protect you, we insure all shipments. Allow for insurance charges at the following rates:

If Shipping Charges Are	Add for Insurance
.01 to .50	.40
.51 to 1.00	.50
1.01 to 2.50	.70
2.51 to 5.00	.90
5.01 and Up	1.10

Allied Precision Tools
Choice of nine types and sizes of high quality, low cost precision ground cutting tools, with high resistant orange elastic PVC resin handles anatomically shaped to offer a safe and comfortable grip. Also available a high quality industrial crimp tool. This crimp tool is full cycle, compound leverage ratcheted to give exact precision to every crimp connection. Frames are made of high-grade steel. All dies are dual nest precision stamped to deliver the proper crimp specifications for oval barrel crimp and insulation support to AWG requirements. This series is designed for plant maintenance, field service, hobbyist, prototype shops and small production runs.

AVX Capacitors
An excellent line of capacitors in conformly coated ceramic (both axial and radial leads), ceramic dual-inline leads, military ceramic CKR series, tantalum in both leaded and surface mount, surface mount chips, wide offering in voltage, tolerances, temperature coefficient, sizes, and lead arrangement or spacing.

Bondhus
The largest manufacturer of ballpoint hex tools. Patented ball design allows for thicker neck diameter, increasing torque capacity up to 100% while maintaining operational angles to 25 degrees. Also featuring "WIHA" precision fastening tools, heat treated, nickel/chrome plated to protect against rust and corrosion with plastic handles molded directly to the blade. Slotted, phillips, torx and hex drivers.

Carlo Gavazzi (Soar)
Test equipment manufacturer providing high quality with modest cost. Line includes handheld and bench type DMM in both 3½ and 4½ digit displays, digital clamp meters, analog multimeters, insulation testers, frequency counters, digital thermometers, and accessories for their units. Warranty for most of the products is one year with certain models having a 3 year warranty.

Collmer Semiconductor
Collmer Semiconductor was founded 10 years ago to serve the needs of the high voltage industry. As well as the manufacturer of high voltage assemblies, Collmer is also the North American agent for semiconductors manufactured by Fuji Electric Company, LTD. This brings a broad line of available products to Allied Electronics including MOSFET power transistors, super high speed switching transistors, diode and bridge modules, as well as a complete stock of standard and fast recover diodes, Schottky rectifiers, bridge rectifiers and high voltage silicon rectifiers.

Dupont Electronics
Dupont's "Berg" family of connectors include PC board, flat cable and wire-to-PC board types. Featured are the dual-metal 0.025 inch PV female receptacles. Over 400 of the best callout items are offered from stock by Allied.

General Instruments
General Instruments is one of the leading producers of discrete semiconductor devices. They include low and medium power rectifiers from standard thru ultrafast recovery, bridge assemblies and transient voltage suppressors. General Instruments offers a wide selection of rectifier package types and junction structures including plastic encapsulated, glass passivated, superrectifier, and super surface mounted. The GI logo printed on every General Instruments device ensures that it reaches the highest level of quality and reliability.

GE/RCA
GE MOV varistors represent the state-of-the-art in metal oxide technology; offering high energy capability and excellent clamping characteristics. These devices are voltage dependent, symmetrical metal-oxide semiconductor devices. Their characteristics enable them to protect against high transient voltage spikes to meet anticipated loads. GE MOV's are available in voltage ratings of from 5.5V to 3500V, and in energy ratings of from 0.1 joules to 10,000 joules. They are available from Allied Electronics in the MA Series—Axial Leaded, LA Series—Radial Leaded, and the ZA Series—Radial Leaded.

Hameg
Test equipment manufacturer supplying oscilloscopes and HM8000 Modular System. The HM8000 system offers a variety of test benches composed of individual instruments that are ergonomically compatible with one another. The instruments fit into the HM8001 mainframe and are powered either by the mainframe itself or from an additional module. Oscilloscopes are offered from 10 MHz to 100 MHz.

Ideal Industries
A broad line manufacturer of electronic and electrical hand tools, power tools and accessories. Ideal has high quality wire and cable pulling equipment, wrenches, wire strippers, commutator maintenance products, wire connectors, and much more.

ITT Power
ITT Power has UPS and power conditioners ranging from 400 VA to 50 KVA in power but at a smaller package size. They have an attractive finish suitable for use within an office environment. These units are designed to meet the needs of small to medium business computer systems, private telephone systems, and local area networks among many other applications.

Kings Electronics
Kings is well known for their coaxial cable connectors. Their families of SMA, SHV, BNC, and Triaxial are the products new to this catalog.

Leecraft
Leecraft offers an excellent line of lamp holders for use with screw base, wedge base, and bayonet type lamps. They also offer indicator lamps designed for panel mounting using neon or incandescent light source.

Paladin
A comprehensive spectrum of modular telephone hardware designed to make the connection between telephone equipment and outside lines easier. All products are manufactured under the license of AT&T in full compliance with FCC requirements, and are 100% tested for uniform reliable high quality.

Serpac/Serco
A wide variety of packaging products that provide functional utility and professional, high quality appearance. Choose from a variety of styles, sizes, and colors. 9 volt and AA battery compartments available in some styles. Card guides for vertical circuit boards, bossing for horizontal circuit boards, protective non-skid elastomer feet; and a perimeter seal kit which provides an effective barrier from an aqueous environment when used in conjunction with their standard enclosures.

S.L. Waber
S.L. Waber offers a wide variety of multiple outlet power strips for use in both office and industrial applications. Many contain a master switch with pilot light and circuit breaker for protection. Most are UL approved. Waber also has a line of surge and noise suppressor outlets and electronic power centers for use with computer and peripheral devices.

Thomas and Betts (T&B) Electrical Division
New items in this catalog are solderless terminals and wire ties in both small packages and bulk. Bulk packages offer a substantial savings over small packages. In both lines, quality materials and exacting manufacture combine to offer high quality products.

WECO
WECO's product line features the European-style of PC board "dead front" terminal boards and blocks. This line contains over 10,000 items—predominantly in the terminal strip/terminal board product family. Products are internationally rated as well as UL recognized and CSA certified.

Xicor
Since its founding, Xicor has developed and placed into production a wide range of system-alterable non-volatile memory devices. These devices, manufactured with Xicor's proprietary state-of-the-art textured triple-poly floating gate process, are available in a variety of architectures, interfaces, densities, and speeds. Xicor's beginning in 1978 has lead to an industry leader in electronic erasable programmable read only memories and non-volatile random access memories. Allied Electronics has a large selection of Xicor EEPROMs in 4K, 16K, 64K, and 256K commercial, plastic DIP devices. Also nibble-wide and byte-wide NOVRAMs as well as serial I/Os and potentiometers.

Wallmount Battery Chargers

Advantages

Automatic Dual Voltage (cylical) Models:

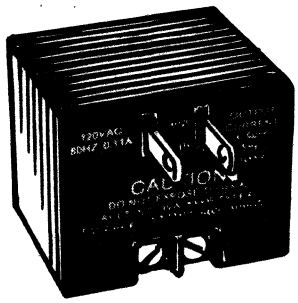
- ► Rapidly recharge batteries without danger of overcharge
- ► For use when batteries are repeatedly being discharged and recharged
- ► Charger is not connected to battery during discharge allowing for remote product use
- ► Typically used for portable instrumentation

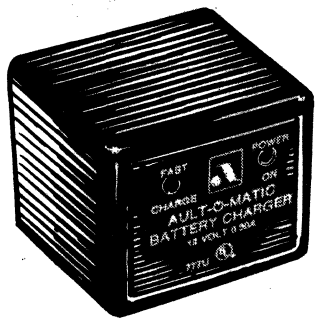
Fixed Voltage (Float) Models:

- ► Provide optimum battery life in standby applications
- ► Maintain fully charged battery at a constant voltage
- ► Used typically in the event of power failure or when charger is always connected to battery during discharge
- ► Some models can be used as a power supply and charger at the same time

Features

- ► Lightweight wall plug-in and desk top styles
- ► Available in automatic dual voltage and fixed voltage models
- ► Available for 6, 12 and 24 volt Gel Cell and Sealed Lead Acid Batteries
- ► Built to UL and CSA standards
- ► Many are designed for medical use—UL 544 Recognized
- ► Thermal overload protected
- ► Available with input and/or output cord(s) and connector
- ► Available with 220 V/50 Hz input for European use
- ► One year warranty





Designed for use with Gel Cell and Sealed Lead Acid Batteries, these Battery Chargers operate as either Automatic Dual Voltage or Fixed Voltage Chargers. Dual voltage chargers are used where the batteries are constantly being discharged and recharged. Fixed voltage chargers are used in battery standby applications.

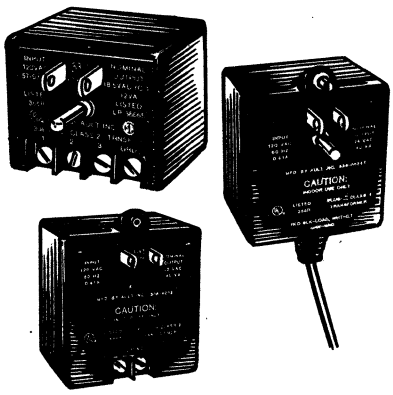
Wallmount Transformers



External AC to AC transformers are used in a multitude of applications, including:

- ► Modems
- ► Medical Products (UL 544)
- ► Telecommunications Products
- ► Security Systems
- ► LED Displays
- ► Home Computers
- ► Data Communications Products
- ► Microprocessors
- ► Battery Power Systems
- ► Low Voltage Lights
- ► Power Tools

Case Dimensions—Inches (mm)

Size No.	Width (W)	Length (L)	Height (H)
3	2.20 (55.9)	1.88 (47.8)	1.96 (49.8)
TR5	2.72 (69.0)	2.95 (74.9)	1.88 (47.8)
7	2.67 (67.8)	4.72 (119.9)	2.22 (56.4)
PS5	2.72 (69.0)	2.95 (74.9)	1.83 (46.4)

Ault's line of wall plug-in transformers are UL and CSA approved. Use of an external transformer reduces weight and size of the system being powered. Eliminate hazardous voltages at the product being powered thereby minimizing agency approval costs. Used in Data Communications, Telecommunications, Microprocessor Based Systems, Medical Applications and Security Systems among many other uses.

Duracell Long-Life Alkaline Batteries

Extra service and long life. Designed for high drain service applications — outperform, outlast standard operating zinc-carbon batteries by up to 100%. Alkaline cells cost less, too. Compare by dividing the initial costs by the many extra hours of service provided.

Procell® Industrial Alkaline Batteries

- Long shelf life with sustained power
- Lasts up to five times longer than regular zinc carbon batteries
- Low battery replacement cost. . .low use cost
- Distinctive industrial label reduced pilferage
- Operate reliably in temperature extremes of –20°F to 160°F
- All Procell Lantern Batteries sealed in steel cases for durability

Super Heavy-Duty Plus® Batteries

The service capacity of a Heavy Duty battery is not a fixed number of ampere-hours because the battery functions at different efficiencies depending upon the conditions imposed upon it. The service varies with current drain, operating schedule, and cutoff voltage. It is also affected by the operating temperature and storage conditions of the battery prior to use.

Lithium Batteries

The Keeper® Series — Power On Demand

Power characteristics allows Keeper® batteries to be permanently mounted as long-lasting primary cells for improved total system reliability. No recharge circuits or components needed. Direct mount P.C. board; no holder required. Features glass-to-metal seals, hermetic welds, and unique electro-chemistry for a design life of up to ten years. Highest available voltage characteristics; remains flat for the entire battery life. Other features include higher energy density than comparable batteries, non-pressurized design for non-vented applications, limited short circuits by internal design, prismatic design for optimum circuit board space utilization, and stainless steel construction for corrosive resistance, hermetic seal, and structural integrity. Short circuits with no adverse effect. Wave solderable within storage temperature limits. Dip solder processable — polarity keyed and pin-outs are 0.1″ spacing. Nominal drain rates from −73° to +125° C. UL Recognized. Meets Federal shipping regulations.

General Purpose Carbon-Zinc Batteries

Long-life carbon-zinc batteries are most popular for portable power. Available in most standard sizes. For use in industrial, electronic, transistor, and many other applications. Specially sealed to provide protection in handling and against corrosive leakage. Sturdy construction. Long dependable service, even over a wide range of temperatures, plus peak performance at all times.

Rechargeable Nickel-Cadmium Batteries and Chargers

Batteries can be stored charged or uncharged. Capacity of Nickel-Cadmium batteries is expressed in average ampere hours, and stays relatively fixed over a wide range of discharge currents. Rechargeable batteries actually cost less to use per ampere hour than throwaway batteries. End of cycle life is considered to be the point where the battery no longer provides 80% of rated capacity. One hour recharge system available. Call for information.

2 Ultralife Lithium Power Cell

Lithium delivers twice the life...The Kodak Ultralife power cell is the world's first 9-volt lithium power cell for use in consumer products. Lithium, one of the most reactive metals known...gives the cell greater electrical capacity than conventional carbon-zinc, zinc chloride or alkaline chemistries...a service life twice as long as alkaline batteries.

A unique design maximizes performance...By incorporating flat-folded ribbon electrodes, the entire interior of the cell is utilized. Weight reduction is accomplished by housing the unit in a molded polypropylene case, ultrasonically welded to retain the cell's strength and resist leakage.

UL recognized...The Kodak Ultralife Lithium Power Cell is safe. It features a proprietory safety shutdown mechanism that prevents overheating and venting in case its short circuited.

1200 Miliampere Hour Capacity...The power cell delivers consistent high operating voltages over most of its service life...and over a wide range of loads and duty cycles.

Superior low temperature performance...A unique organic electrolyte system permits improved performance of a broad range of temperatures; from −40°C to 70°C.

Long life, cost effective and reliable performance... Designed to give maximum performance in medium and low rate applications, even higher operating efficiencies are possible in products with high cutoff voltages. The Kodak Ultralife Lithium Power Cell is the 9-volt powerhouse that gives your products maximum power.

Kodak dependability...longer life expectance...consistent discharge characteristics...and superior low-temperature performance. Kodak Ultralife Lithium Power Cell...the powerhouse that outperforms all other conventional 9-volt batteries today.

Supralife Alkaline Batteries

Improved performance and longer service life...Kodak Supralife Alkaline Batteries are improved. Now they provide even longer service life and more consistent discharge characteristics. Expect every Supralife Battery to last longer than ever...up to 18% longer in AA size.

Unsurpassed shelf life and storage characteristics...Supralife Batteries have excellent shelf life and storage capability. They retain up to 90% of their service life capacity even after four years in storage.

Kodak quality...Improved Kodak Supralife Alkaline Batteries are triple tested to provide the consistent long life you expect from Kodak.

Superior leakage and corrosion resistance...long shelf life...consistent performance...and dependable long service life. Available in D, C, AA, AAA, N and 9-volt sizes.

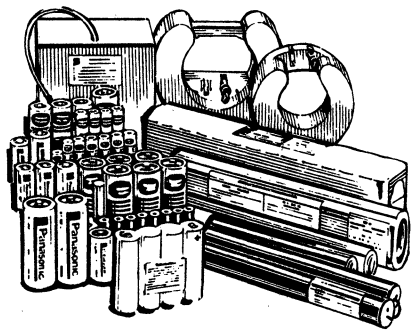
Nickel Cadmium Batteries

The most notable characteristic of these batteries is their ability to be repeatedly used for extremely long periods of time (very often more than five years). The perfect portable power source for this age of energy conservation, Ni-Cd batteries retain most of their initial performance throughout their service life, and are used in an increasing number of ways and fields, including factory, office and home automation systems, information network systems, and others. To satisfy these battery requirements, Panasonic places first priority on high product quality to assure high product reliability. Attention to detail is demanded in this severe quality control system that extends from raw and basic materials procurement to parts and even packaging.



Wide Variety of Cells
- ► Standard
- ► Rapid Charge "R"
- ► High Temperature "H" Memory Backup
- ► High Capacity "E"

Features
- ► Rechargeable Sealed Nickel Cadmium Alkaline Cell
- ► Long Shelf Life
- ► High-Rate Charging
- ► Reliable, Self-Resealing Vent
- ► Cylindrical Construction

Applications
- ► For Cyclic Use
- ► For Trickle or Float Charge Use

Lithium Batteries

- ► High voltage (3 V)
- ► High energy density
- ► Long shelf life
- ► Stable operation
- ► .5% capacity deterioration per year
- ► Excellent durability
- ► Flat discharge voltage and stable internal impedance
- ► High rate discharge
- ► Wide operating temperatures
- ► Strong leakage resistance
- ► Excellent safety

Versatile, long-life Panasonic lithium batteries for leakproof high-energy sources. Designed for a wide range of electronic applications, from cameras and radios to computer memory backup. Safe and chemically and thermally stable. No corrosive liquid or poisonous gas discharge. Two types available: BR (polycarbon monofluoride) provides flat discharge voltage and stable internal impedance. CR (manganese dioxide) gives high discharge rate and high discharge voltage. Panasonic cells are recognized under UL File No. MH12210.

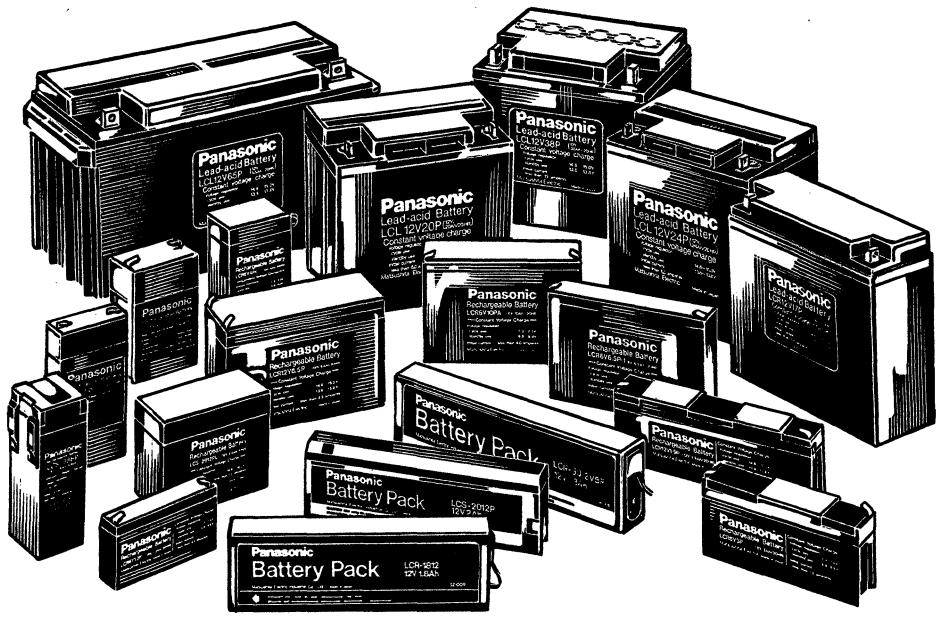
- High Quality
- Sealed Lead Acid Rechargeable Battery System
- Excellent Deep Discharge Recovery
- Long Service Life — Float or Cyclic
- Starved Electrolyte Leakproof Design
- Maintenance-Free Operation
- 100% Factory Tested
- UL Component Recognition
- No Corrosive Gas Generation
- Use for Portable Equipment
- Charge, Discharge, or Store in any Position
- Use for Power Failure Backup, Emergencies
- No Memory Effect
- Approved as "Dry Cell" for Air Shipment By Dept. of Transportation and IATA
- Popular Video & Cellular Phone Batteries



The LCR-Battery is a new type of sealed lead-acid rechargeable battery system developed by Matsushita Battery Industrial Co., Ltd. The lead-calcium rechargeable (LCR) battery, will stand up to tough operating conditions such as overcharge and deep discharge. In field service, troubles due to abnormal, improper operation or misuse are reduced to a minimum. The LCR battery has stable and reliable capacity. It can be easily maintained to permit proper operation of the equipment that it powers. The battery withstands overcharge, overdischarge, vibration and shock, more readily than competitive products, and is capable of extended storage. To assure this high quality and reliability, **LCR batteries are 100% tested on line for voltage, capacity, and seals, And all vents are 100% visually inspected during the final assembly process.** The LCR battery uses an absorbed electrolyte system. All of the electrolyte is absorbed into the positive and negative plates, and the separator material. Coupled with the use of special sealing epoxies, tongue and groove case and cover construction, and long-sealing paths for posts and connectors, the LCR batteries have exceptional leak resistance, **and can be used in any position.** These batteries save installation space, while providing full and reliable power for the equipment, and many have been designed for rapid recharge, or for high power output. As a result, this power is used for applications ranging from VCRs to vacuums, electric tools, engine-start, UPS systems and computers. LCR batteries have exceptional deep discharge recovery and charge acceptance, even after deep or prolonged discharge.

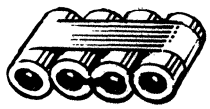
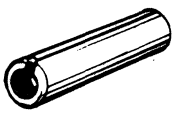
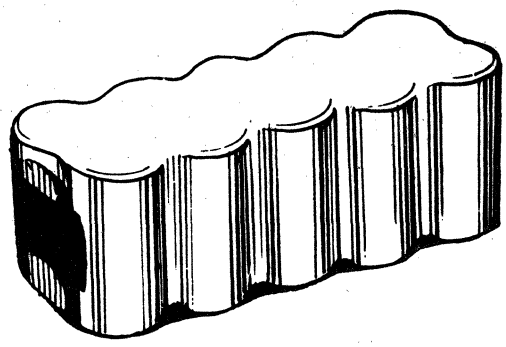
2 Nickel Cadmium Battery Assemblies







Call 1-800-433-5700 For Pricing

Nickel Cadmium Battery Assemblies are packaged to meet your battery power needs. Specify the number of cells, voltage and size requirement, along with the dimensions or description (circular formation, in-line, end-to-end or side-by-side, etc.) of required package size. Your custom battery package will include the basic NiCad battery cell(s) assembled according to your specifications, complete with solder tabs and a tape wrap for rigidity. Color coded wire leads and PVC Shrink Tubing to cover the package are also available. The cost of each NiCad battery package is based upon the number of cells and cost of assembly. Contact your nearest Allied Electronics location for application information, pricing and delivery assistance.

Customer Supplied Drawing Required.

Assembly can be side-by-side, cylindrical, or any other configuration. Allied will issue a custom stock number for each unit.

Battery Packs

1. Packaging Considerations

Ni-Cad cells are frequently used as a battery pack or assembly. There are several items to be considered after the correct cell has been selected, and the number of cells determined, based on the application.

When planning a battery pack, key considerations include:

- **number of cells**
- **intercell connections**
- **configuration**
- **outer package wrap**
- **terminals**

2. Typical Parts for the Battery Pack

(A) Solder terminals and tabs:

High quality nickel plate is used, and formed into the tab shapes.

Material: nickel

Dimensions mm			Applicable battery size	Tab
t	w	l		
0.15	3.6	12.7	AA size or smaller	
0.15	6.4	12.7	SC size	
0.15	6.4	12.7	C size	
0.15	6.4	12.7	D size	

(B) Lead wires:

Lead wires for battery packs usually use heat-resistant vinyl wire conforming to UL1007. Normal color coding is red (+), and black (–). The ends of the wires can be supplied precut, pretinned, or taped. Details are arranged when ordering.

(C) Heat-shrink tube

Heat-shrink tubes made of polyvinylchloride are used on many packs as the external cover. Tube thickness ranges from .05 mm to 0.2 mm depending on battery type and configuration.

(D) Other materials:

Due to the large variation in battery pack requirements, many other types of materials are used in pack construction. This may include various forms of adhesive, insulating material, temperature sensors, thermal protectors and diodes, or special connectors.

3. Inspection of Battery Packs

Battery Packs are subjected to a 100% appearance check and voltage test before shipment.

(A) Appearance check

The following items are checked: scarred or dirty exterior, labeling and external dimensions.

(B) Closed circuit voltage test

Charged batteries are discharged for a brief time with a resistance load at approximately 1 C. The battery voltage is measured during discharge to be sure that it has a voltage of 1.2 V/cell or more.

(C) Open circuit voltage

For discharged batteries, open circuit voltage is measured to be sure that it is 1.0 V/cell or more.

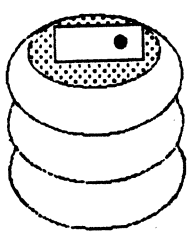
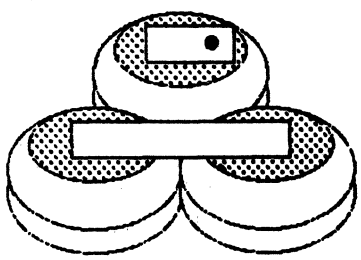
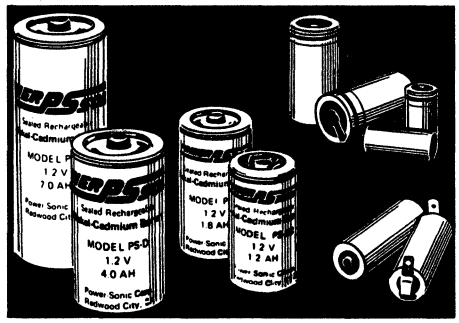
Packaging

POWER-SONIC niCd Button Cells are available with solder tabs. Packaging as assemblies can be done to meet electrical and dimensional requirements. The batteries can be stacked on top of each other, layed side by side, or clustered into groups. The terminations of the packs can be printed circuit board mount pins, solder tabs or wire leads. Each cell pack will be issued a custom part number when ordered. Call Allied for part number, pricing and delivery. A customer supplied drawing may be required. Due to varying customer configurations, these cell packs may not be in Allied stock.





Sealed Rechargeable Nickel Cadmium Batteries



Shipped Discharged
Sealed rechargeable nickel-cadmium batteries are widely used throughout the world in consumer and industrial applications. The positive and negative sintered plate construction offers high discharge rates and stable performance over a wide range of temperatures. The specially designed resealable vent automatically controls cell pressure and thus assures safety and reliability. Cells are tested and electronically selected as to impedance and capacity to provide uniformity—an important feature in cell assemblies.

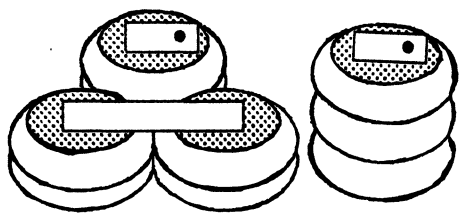
Recommendations and Precautions



Although POWER-SONIC NiCd Button Cells are delivered in a charged state, there might be a time lapse between our factory charging and the customer discharge. Therefore we recommend batteries to be charged before use. It is not recomended to solder lead wires directly onto battery. Always solder lead wires to solder tabs. POWER-SONIC NiCd Button Cells with tabs can be flow soldered in any state of charge with a maximum of 10 seconds. We do not recommend parallel charging or connection. Parallel charging can produce irregular charging currents and back discharge from one battery to the other. Please avoid short circuit, reverse polarity, do not incinerate or open batteries. Cell components may be harmful to skin and eyes.

Storage
POWER-SONIC NiCd Button Cells can be stored for years regardless of charge, however, after a long storage period, i.e., over one or two years, it is recommended to recycle (charge/discharge) for three times to restore full capacity. It is recommended to store at room temperature, in a dry and clean environment. Keep away from dirt and moisture.

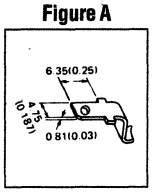
Rechargeable Sealed Lead-Acid Batteries

Battery Breakthrough! Compact and Lightweight with Exclusive Electrolyte That's Sealed, Safe, Maintenance-Free and Takes 500 or More Charge/Discharge Cycles! Ideal for Portable TV, Recorders, VOMs, Burglar/Fire Alarms ... and More!

The very best in reliable, rechargeable, no-maintenance batteries. They outperform and outvalue other systems when used as the power source in almost any portable application. Absolutely safe because a "one-way" relief valve releases any pressure that may build up, then automatically reseals. High-impact polystyrene cases eliminates shorts, rust, fungus or other organic growth. And there's no "memory" problem — these batteries deliver full rated power WHEN YOU NEED IT, regardless of previous use history.

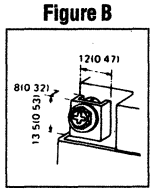
- Truly Leakproof
- Long Lasting
- Use in Any Position
- Long Shelf Life
- No Permanent Cell Reversal
- Usable from −76°F to +140°F
- High Discharge Rate Capability

Figure A



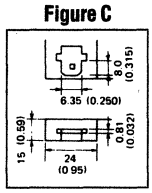
FASTON tabs .187" × .032" mate with AMP. INC. "187" series receptacles or equivalent

Figure B



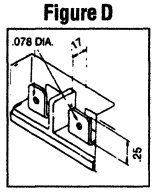
Threaded terminal post with nut and bolt terminal both in 5 mm and 6 mm diameter

Figure C



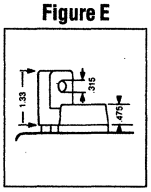
"250" FASTON .250" × .032" mate with AMP. INC. "250" series receptacles or equivalent

Figure D



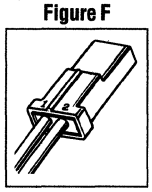
Polarized positive .250" × .032", negative .187" × .032"

Figure E



Heavy duty flag terminals

Figure F



Terminated with AMP INC. part number 1-480318-0 and female pin part number 60619-1

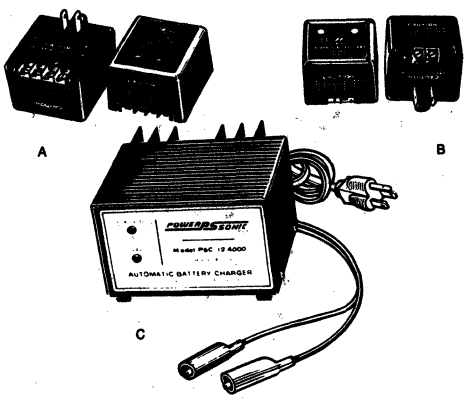
Battery Chargers



Electronically Regulated Battery Chargers For Sealed Lead Acid and Gel-Type Batteries

"F" SERIES: Float Chargers. This series of chargers is designed to provide optimum life for batteries used in standby applications where charging is continuous. The chargers deliver a constant voltage of 2.25-2.3 volts/cell which allows the battery to seek its own current level and maintain itself in a fully charged condition. **"A" SERIES: Automatic Dual Rate Chargers.** These chargers sense battery requirements and automatically switch from the fast charge to float mode, or the float to fast charge mode. In the fast charge mode the chargers are capable of recharging batteries in less than 16 hours without any danger of overcharge. LEDs provide indication that the charger is on as well as an indication of the charging mode.

Rechargeable Nickel Cadmium Batteries

Can be charged and discharged up to 500 times to save you both time and money. Top performance no matter how many times it's been recharged. Both "C" and "D" cells are rated 1.25 V, "AA" is rated 1¼ V and sold in packages of 2.

Stock No.	Mfr.'s Type	Size	Wt. Oz.	EACH

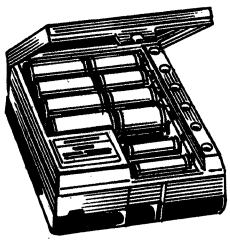
*Per Pkg. of 2.

Battery Charger

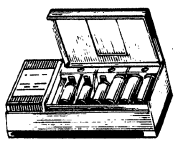


► Automatically Regulated Charging Rate

Type 23-134. Charge up to ten "C", "D" or "AA" batteries at a time in any combination of twos. Also charges up to three 9 V cells. LEDs show when system is charging. UL listed.

910-5180.....EACH 29.95

Nickel-Cadmium "AA" and "AAA" Charger



► Charges Up to 6 Batteries

Type 23-136. Automatically regulated. Charges cells in 14 to 16 hours. See through cover. UL listed.

910-5181.....EACH 11.95

T-Type 9-Volt Battery Clips

Type 270-325. Perfect for replacement use in walkie-talkies, radios, tape players—and battery-powered portable. ½" spacing. Fits transistor radio and other battery holder connectors. Made of sturdy plastic. Offers long life and excellent resistance to battery acid and physical stresses.
910-5205. 5 per Pkg......EACH 1.19

Premium-Quality Alkalines

► Long Shelf Life
► Anti-Corrosion Contacts
► High Output at Low Temperatures
► Cost Less in the Long Run

These exclusive alkalines retain full power during long-term storage and give you top performance even under high current drain. For all standard uses. Non-rechargeable.

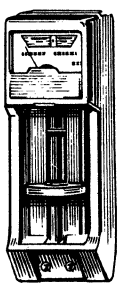
Halogen Flashlight

► Brighter Beam for Better Visibility
► Sturdy Construction for Long Life

300% brighter than ordinary flashlights. Designed for durability, its water-resistant housing and lens are virtually unbreakable. Uses 2 "D" cell batteries.

910-9021. Type 61-2737.....EACH 10.88

Battery Checker



For D/C/9V/AA AAA/N Sizes

Model 22-096. For zinc carbon, alkaline, mercury and nickel-cadmium batteries.

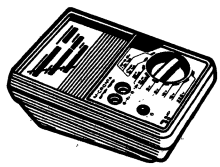
910-2135.....EACH 6.95

Durable All-Purpose 4-Cell Flashlight

Powerful search light beam. Impact and water-resistant housing. Requires 4 "C" cell batteries.

910-9022. Type 68-1040.....EACH 1.98

Battery Tester



Accurately measures almost any type of battery under load conditions ranges: 1.5 volts (1-150 mA), 3, 6, 9, 12, 15, 22.5 volts. **Size:** 1¾" × 3½" × 5¼". For battery tests only.

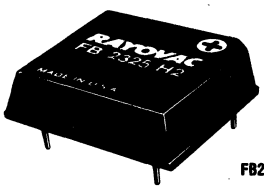
Lifex™ FB Lithium Batteries



FB2325H2

FB1225H2

Rigorous testing has proven that LIFEX FB exhibits outstanding shelf life reliability, and up to ten times the shelf life of crimp seal batteries—at any operating and storage temperature.

Design Flexibility
- ► **Two cells, individually terminated, you select 3V, ±3V, 6V or redundant configurations**
- ► **A superior alternative to crimp or hermetically sealed batteries**
- ► **Significant cost savings over hermetically sealed cells**

Safe and Easy to Use
- ► **Safe and stable Lithium-Carbon Monofluoride system**
- ► **Reduced potential for inadvertent short circuits**
- ► **Stands up to harsh manufacturing and user environments**
- ► **Ideal for automated placement**

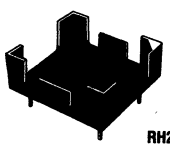
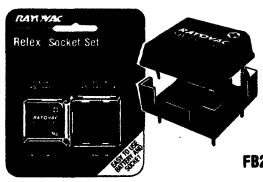
Relex™ Socket



RH23H2



FB235H2R-1

The Relex™ RH23H2 is a printed circuit board mountable battery socket for use with Rayovac FB2325H2 high reliability encapsulated battery. This device provides excellent component retention and a gas-tight, reliable electrical contact. Its self orienting design assures proper polarity installation without desoldering or the use of special tools.

Features
- ► **Improved contact reliability over conventional holders**
- ► **PCB mountable, wave solderable, and process tolerant**
- ► **Self aligning, one way installation**
- ► **Molded in standoff for thorough post reflow cleaning**
- ► **Excellent battery retention in shock and vibration**
- ► **Tin on tin, gas-tight spring contacts**
- ► **Easy hand insertion and removal without desoldering or tools**

Battery Straps

For all standard "9 Volt" batteries (as listed in table below). Corrosion resistant; low electrical contact resistance. Male and female snap contacts are steel, nickel plated. Female contacts are heat treated to spring temper. Maintains constant spring tension. Wires have tinned copper conductors (22 gauge, 7/30 pre-bond with PVC insulation); wire leads firmly soldered to contacts. Rated to 80°C and 150 V. Meets U.L. Style #1568.

"9 Volt Snap-in Battery Holder

For use with standard "9" volt batteries. Battery snaps in place to insure positive contact. For use where severe shock and vibration occur. Available with standard solder lugs or printed circuit lugs. Aluminum frame; brass hot tin solder and PC lugs; steel nickel plate contacts and clips; resin impregnated fibre insulation.

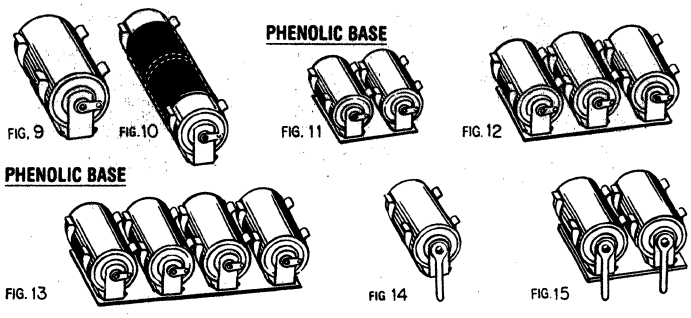
Steel Battery Holders



► Corrosion Resistant Nickel Plated
► Moisture Proof Resin Impregnated, Fibre Insulating Washers
► Stainless Steel Contacts
► Ideal For Ni-Cad Alkaline, Mercury, Carbon, Zinc and Lithium Cells

Available selection styles accommodate 1 to 4 batteries. Made of rugged, nickel plated steel. Batteries held under constant spring tension for low contact resistance. All contacts fully insulated. Insulator tubes supplied for 2-3-4 cells end to end.

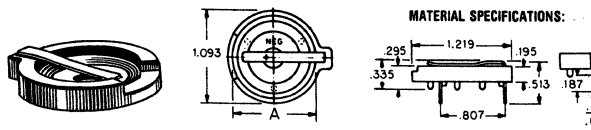
3 Volt Coin Cell Lithium Holders



Direct mount to PC boards. Accommodates cells 20-24 mm diameter by 1.5-3.2 mm height. Quick and easy battery insertion and replacement. Made of Noryl #190, U.L. rated 94-0; nickel-plated spring steel contacts. Polarities clearly marked. Designed for better air circulation around battery and to withstand severe shock and vibration. – 50°C to + 145°C operating temperature range.

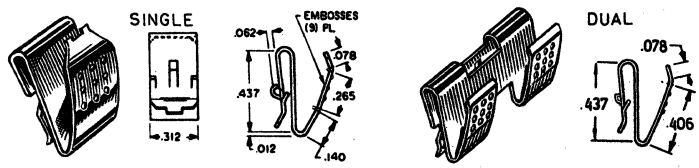
Single and Dual "AA" Cell Snap-on Clips

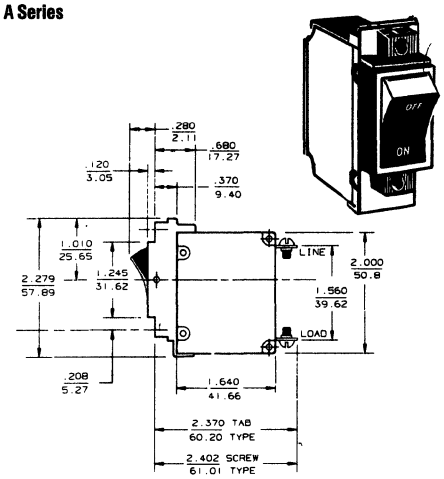
► Ideal For Molded Cases
► Dual Clip Allows Mounting Of 2 Batteries—No Wiring Necessary
► Self-Anchoring—No Need For Special Grooves, Slots, Or Holes



Stock No.	Mfr.'s Type	PER PK./100
839-2033	209 (Single)	8.80
839-2034	210 (Dual)	14.25

Clips over panels .060-.070 thick, and is anchored by sharp barbs. No special grooves, holes, or slots needed. Contact leg utilizes spring-tension for excellent contact. Features snag-free battery insertion. Accommodates any variation of battery length. External solder "ear" holds wire for easy soldering. Snap-On clips made of nickel plated spring-tempered steel. Available in single or dual design.

A Series



VISI-Rocker Circuit Protection

Unique molded-in two-color rocker actuator indicates "tripped" mode when breaker is on or off (per illustrations) series trip, 6-32 threaded mtg. inserts, push on .250 tab terminals. Rated at 250 VAC/65 VDC. Series trip curve-34 (AC-DC tpe) trip point is 135%. Recognized by UL, Inc. and are CSA certified.

BA and CA Series

All "B" and "C" series magnetic circuit breakers are recognized by UL, Inc. and are CSA certified. "B" series products are also certified by VDE under VDE registration number 2495 when the "product type" part number ends in "D". "C" series products are designed in accordance with IEC and VDE requirements and are pending international approvals

All products are of a series trip construction, with 6032 threaded mounting inserts, dual "I-O/ON-OFF" markings on a black toggle actuator, and come with .250" tabl (Q.C.) terminals on the "B" series, and 10-32 threaded stud terminals on the "C" series. All units are supplied with an all purpose medium, AC-DC delay curve #34, rated at 277 VAC/65 VDC with trip times as shown below.

Percentage of rated current with trip time in seconds: 135%—1.8-100; 200%—.60-20; 400%—.15-3; 600%—.03-1.3; 800%—.004-.60; 1000%—.004-.1.

Mini-Mag Hydraulic-Magnetic Circuit Breakers

Rugged construction protects to 30 amps, to 277 volts, 60 Hz AC. Accurately calibrated to carry 100% of rated load and to trip at between 101% and 125% of load. Trip time at 200% of rated load is from 2.2 to 20 seconds. On heavy overloads, a spring-loaded iron piston moves instantly for immedate circuit interruption. Operation unaffected by ambient conditions. Terminals are .250″ Quick Disconnect type. **Humidity Resistance:** per MIL-STD-202. **Dielectric Strength:** 1500 VAC 60 Hz. **Reset Time:** Instantaneous. **Voltage Drop:** less than 1.5 V at 1 A or more. **Shock and Vibration:** tested per MIL-STD-202. **Operating Temperature:** – 40°C to + 85°C. **Insulation Resistance:** 100 megs at 500 VDC. Fungus resistant. **Interruption Capacity:** 5000 amps. **Shipping Weight:** 1 oz. UL recognized and CSA certified.

Toggle Actuated—Model W31

Single pole with toggle trip lever; trip-free mechanism. Wipe-on make contacts lessen voltage drop. Meets MIL-STD 202, method 106—humidity; 202, method 101, test condition B—salt spray. **Endurance Cycling:** 6000 + at 100% of rating. 10,000 mechanical cycles. **Maximum operating voltages: 50 VDC; 250 VAC (to 400 Hz). Weight:** less than 2 oz. UL recognized, CSA certified.

Type 140 Fuse Kit

- 125 and 250 Volt Small Dimension Fuse Assortment
- Fast Acting and Time Delay Fuses
- 1/4' × 1 1/4" Fuses
- In-Line Fuseholders
- Fuse Clips

Type 140 fuse kit contains the most commonly used fuses. Applications and cross-reference data that comes with the kit helps identify correct fuse replacements. Inventory strips for convenient reordering. 31 different products including: 140 fuses in a range of 1/2 to 30 A, plus 2 fuseholders, fuseclips and one fuse puller. Spaces allow customizing contents by user. Sturdy nylon box with sturdy hinge and positive closure make it ideal for factory or service truck use.

740-9140 ..... **EACH 75.00**

MDA Time-Delay 1/4" × 1 1/4"

High performing ceramic body. UL listed through 10 A, UL recognized 12-20 A.

The 32 Models of the Buss HTB fuseholder offer complete design flexibility. Their reduced size permits maximum space utilization. Their appearance is compatible with aesthetically designed equipment. Designed to UL, CSA, SEMKO and VDE standards. The HTB-4 offers high profile while the HTB-2 offers a low profile mounting option. The HTB-6 mounts through rear of panel permitting wire connections to be made to holder before mounting in panel. The HTB-8 provides fast, easy and secure mounting without tools or hardware. Terminal options include in-line or right angle solder 3/16" quick-connect and in-line or right angle 1/4" quick-connect. The HTB will accept both 1/4" x 1 1/4" and 5 mm x 20 mm fuses simply by changing the carriers. 250 volts.

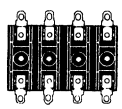
S-8000 1/4" x 1 1/4" Fuseblocks



For tight cluster mounting of 1/4" x 1 1/4" fuses. Single-pole to 12 pole units. Break-away design permits fuseblock to be sub-divided by hand. 300 volt rating. UL recognized. CSA certified.

HFB-HHB In-Line Fuseholders

Both HFB and HHB feature easy assembly. Rated 30 amps, 32 volts. High visibility yellow bodies with raised letters. Accept #12'—#18' wires.

HFB for harsh environments—water, salt spray, ultraviolet, ozone—40°C to 150°C temp. range.

HHB universal holder for normal environments. Accepts 1/4" x 7/8", 1/4" x 1" and 1/4" x 1 1/4" fuses.

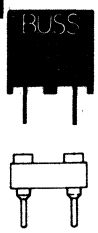
PC-Tron® PC Board Fuses



The PC-Tron™ subminiature fuse offers high short circuit performance which until now could only be found in much larger glass tube fuses. Due to its unique construction the PC-Tron™ limits the I^2t (energy let-thru) to very low levels. .2″ lead spacing. Auto insertable. Standard wave soldering technique will not affect performance. Optional socket available. Long lead .75″ or Short lead .10″ length.

Interrupting Rating	10,000 amperes @ 125 VAC; 1/2—5 amps, 50 amperes @ 250 VAC; 1/2—3 amps

Microtron® Fuses

General Specifications

Typical Opening Times—4 hr. min. @ 100% 5 sec. max. @ 250%

Body Material—High temperature plastic with a U.L. 94VO rating

Lead Pull Force—7 lb. minimum

Agency Approvals—U.L. Recognition and CSA Certification

Units Per Reel—2500.

Packaging—Per E.I.A. Standard RS-296-D. All materials are sulfer free to maintain component solderability.

The Microtron Fuses are designed to safely interrupt 50 amperes at 125 VAC. Maximum short circuit current of 300 amperes fault at 125 VAC.

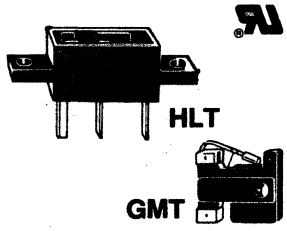
GMT Telecommunication Fuse



For multiple panel mounting in small spaces. Color-coded, spring-loaded flag indicates amp rating, performing visual indication when alarm circuit activates. Opening time @ 100% load is 10 min.; @ 150% load, 5 mins (max.). Amp ratings are 125 Vac, or 60 Vdc. **Size:** 1/4″ × 1 15/32″. HLT holder fits all GMT fuses.

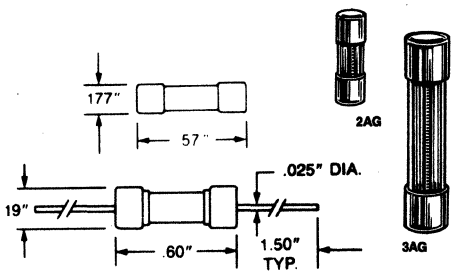
New 2AG Subminiature Fuses — Small Size With 3AG "Fast-Acting" And "Slo-Blo" Performance. Powerful low-density design is ideal for applications where space is an important factor. The new 2AG Series is less than half the size of the 3AG fuses.

These subminiature fuses offer top quality, reliability, and space-saving protection for your new designs. Available with pigtail leads for direct soldering or for use with #111501 mating PCB fuse clips. The 2AG Series is UL and CSA approved.



2AG Fast-Acting Type Electrical Characteristics

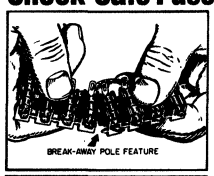
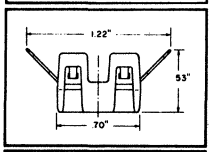
100%	4 hours, minimum
135%	1 hour, maximum
200%	10 seconds, maximum

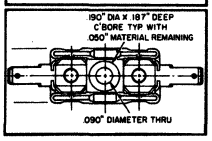
2AG Slo-Blo Type Electrical Characteristics

Rating	Blow Time
110%	4 hours, minimum
135%	1 hour, maximum
200%	3 seconds, minimum
	1 minute, maximum

#286377 2AG Flip-Top, Shock-Safe Fuse Holder







- One Piece Fuse/Clip Terminal Eliminates Resistance Build-Up to Allow For Higher Current Level Operation
- Low Profile Design
- Automatic Self-Alignment of Clip to Fuse
- Individual Pole Barriers Add Clip and Electric Shock Protection
- One Through Eight Pole Break-Away Versatility
- Molded Base with UL-94V0 Flame Rating
- Long Arc Path — 1500 V RMS/min. (7 Amps at 300 V)
- Thermoplastic Glass Reinforced (Black Standard)
- Solder or Quick-Connect Terminals
- UL and CSA Approval Pending

2AG Omni-Block™

- Meets or Exceeds "IEC" Shock-Safe Standards 65 and 257
- UL and CSA Approvals Pending
- Shock-Safe Design Automatically Extracts, Inserts Fuse from Live Terminals
- Unique Fuse Carrier Holds Spare Fuse
- Permanently Attached Fuse Carrier Eliminates Cover Loss
- Spring Loaded Fuse Carrier Unlocks with Press of Finger—Locks into Place to Prevent Circuit Interruption
- Thermoplastic Glass Reinforced 94V0 Flame Rated, Black Standard

SPECIFICATIONS

- 250 Volts; 7 Amps
- Insulation Resistance: 10K Megohms at 500 VDC
- Contact Resistance: less than .005 Ohm
- Dielectric Strength: 2,500 Volts Minimum
- Ambient Temperature: −40°C to +80°C
- Vibration: 10-55-10 Hz at .06 Double Amplitude (MIL-Std-202)
- Copper Alloy, Tin Plate Terminals

Subminiature Microfuses

Only .250″ dia. × .35″ long exclusive of leads. Ideal for printed circuits. Features low resistance and high reliability in ultrafast blowing characteristics. **Series 279000** has 1″ leads for wiring into circuit. Short circuit interrupting capacity 125 volts, 10,000 amps AC. **Series 273000** has .170 leads for plugging into subminiature fuse holder. **Blowing specifications:** 100%—4 hours minimum; 200%—5 second maximum; transparent glass cap. 125 V rating. UL Recognized.

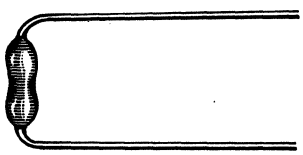
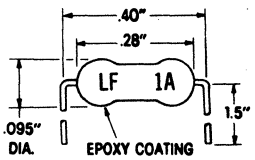
PICO II™ Fast-Acting Subminiature Fuses Radial Leads



NOTE: LF and amperage rating are LASER-MARKED on both sides of all non color-coded PICO II™ fuses.

252 000 Series
(Non color-coded)



For circuits of 125 V or less with ampere rating of 1/16 to 15. **Blow Time:** 4 hours minimum at 100% (1/16-15 amps); 5 seconds maximum at 200% (1/16-10 amps); 10 seconds maximum at 200% (12-15 amps). **Body Diameter:** .095″. **Body Length:** .28″. Leads are solder-coated copper, .025″ diameter for 1/16-10 A, .032″ diameter for 12-15 A. LF and amperage rating laser marked on both sides of fuse. UL Recognized. CSA Certified.

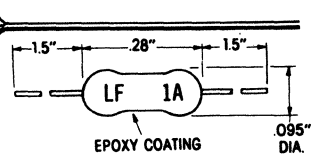
Axial-Lead PICO II™ Subminiature Fuses

251 000 Series
(Non color-coded)



NOTE: Leads are solder-coated copper, .025″ diameter for 1/16 — 10A, .032″ diameter for 12 — 15A.

For subminiature circuit protection where short circuit currents may be as high as 300 amperes. Low resistance values, high-speed action, insulated terminations, encapsulated epoxy-coated body. Will withstand vibrations of 10-55 Hz per method 201 of MIL-STD-202, and of 55-2000 Hz at 10 Gs per method 204, test condition C, of MIL-STD-202, and shock of 100 Gs for 6 milliseconds per method 213, test condition I of MIL-STD-202. **Operating ambient temperature:** −55°C to 125°C. At −55°C current carrying capacity is 110% of rating; at 25°C, 100% of rating; at 125°C, 80% of rating. Fuses will withstand an axial pull of 7 pounds. **Voltage Rating:** 125 V on 1/16-10 amps; 32 V on 12-15 amps. **Body Length:** .280″. **Lead Length:** 1.50″. **Body Diameter:** .0955″. **Lead Diameter:** .025″ on 1/16-10 amps; .032 on 12-15 amps.

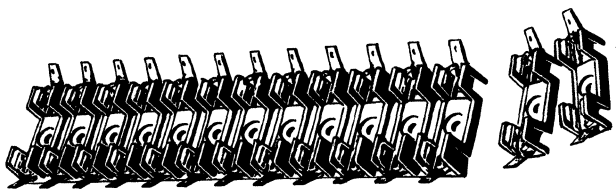
Omni-Block™ Fuse Mountings



One piece self-aligning fuse clip/terminal design. Breakaway poles for easier stocking and ordering. Protective pole barriers surround each clip to provide greater protection against clip damage and electrical shock. Low profile design. UL recognized and CSA certified at 300 V. Molded of glass filled polyester. UL 94 VO flammability rating. **Clip/terminal:** High tensile spring brass, electro-tin plated. Standard gray color.

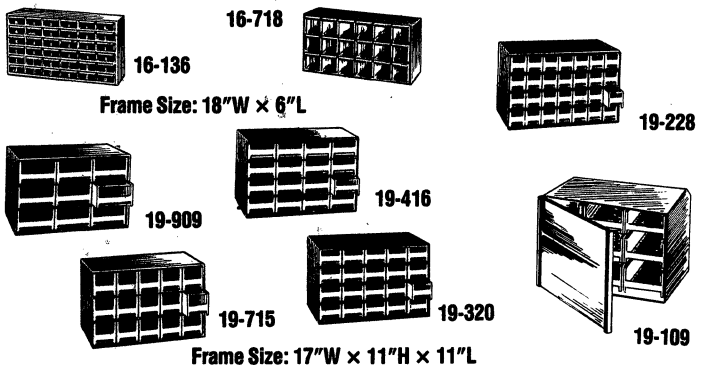
Modular Cabinet



Stores small parts, electronic components and anything else you need to locate instantly. Cabinets can be stacked horizontally or vertically wall mounted or placed on carts or shelves. Heavy duty steel frame with charcoal gray baked enamel finish, steel drawer supports, nesting "feet" for stability in stacking. Molded styrene drawers have transparent windows (models 16-136 and 16-718 in ABS plastic frames have all transparent drawers) and retaining tab to hold drawers open.

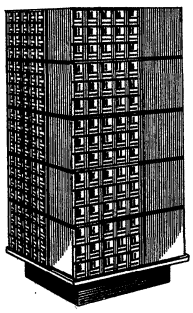
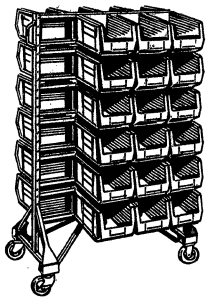
Storage-Go-Round



Unique concept in storage systems. Combine up to 20 Modular Cabinets on a turntable base for a complete 360° rotating storage center. Stabilizer clips hold it all in place. Assembled size is 31" W x 60" H x 31" D (comes unassembled). The Storage-Go-Round package includes base and clips only. Cabinets need to be ordered separately. **Shipping Weight:** 37 lbs.

723-9832. Model 98-320 ..... **EACH 216.95**



Double Bin Rack Assemblies

Stationary or mobile double-sides rack accommodates up to 192 AkroBins. This versatile storage rack system makes organization of part, components, hardware, etc., convenient. Simple to use bins are easy to remove, access, or relocate (bins must be ordered separately). Rack is made of heavy-duty all-steel construction with an enamel finish. **Dimensions:** 57 x 36 x 20". **Load Capacity:** 1,000 lbs.

Mobile Kit. Converts stationary bin rack to a mobile rack.

The All-American Rack

Design Features

- **Frame: Heavy-duty aluminum alloy extrusions, aluminum corner brackets. Steel supports.**
- **Pontoon: 14 guage steel. 1" diameter knock-out holes for cable access. Caster brackets for RC-7758 casters and RL-7766 or RL-7767 levelers.**
- **Removable Sides: 18 gauge steel.**
- **Shipped completely assembled.**
- **Mounting Rails: Two pairs of fully adjustable panel mounting rails tapped 10-32 on E.I.A. universal spacing.**
- **Rear Door: Spring loaded pin hinges allow easy removal. Can be mounted left or right. Fitted with cam lock.**
- **Finish: White textured (WH) frame. Sand textured (S) sides, door and top.**

The All-American Rack features a unique combination of steel and aluminum components which provide an optimum blend of strength and economy. The frame is constructed of heavy-duty aluminum extrusions with die-cast aluminum corner brackets and steel supports. The sides, top and doors can be removed from the outside in seconds to provide complete interior accessibility. Available in five panel heights and a choice of 24" or 30" depths, the All-American Rack also offers a wide range of accessories including plexiglass doors for front or rear. An Add-A-Rack system, used to combine two or more racks into one integral system, is also available. For complete engineering data, Form No. AA-87, and to order, contact your local Allied facility.

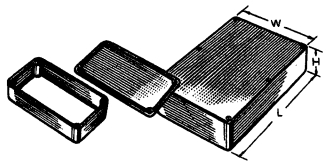
Econoboxes



Versatile die-cast utility boxes for applications requiring a sturdy structure. Especially desirable for concealed or other interior use where safety enclosure is required. Feature close-fitting flanged lids fastened to bosses in the body. The close fit of the lids and the thickness of the aluminum alloy combine to provide excellent screening properties. Cast of LM-380 aluminum.

Aluminum Two-Piece Miniboxes

Self-contained units for use where shielding as well as protection from dust and dirt is desired. May be used for phono amplifiers. VHF and UHF converters, low-pass TVI filters, test and measurement units, etc. Two-piece construction permits installation of components or wiring modifications. Flanges assure low RF leakage and provide high rigidity. Choice of snap-lock fastening or screw fastening; all hardware supplied. Made of high-quality aluminum—Smooth Gray (SG) or Natural Finish (NF). Easy to cut, punch and drill.

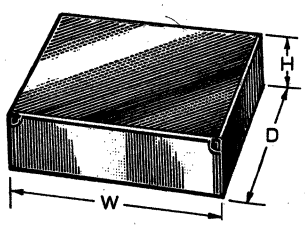
Aluminum Chassis Bases



Offer outstanding strength and rigidity for construction of amplifiers, meters and other components. Made from one piece of sheet metal. Welded on government-approved spot welders developed for aluminum. All sides folded in at the bottom for additional support assuring strength and durability. Natural finish aluminum alloy 5005 H-14. 18 gage.

Rak-Mount Chassis

Design Features
- **Front Panel: 1/8″ thick mill finish aluminum with "Surface shield" protection.**
- **Side & Rear Panels: .090″ aluminum.**
- **Finish: Natural. Other finishes available on request.**
- **Shipped unassembled with all necessary assembly hardware.**

Designed-in versatility and economy make Bud's new Rak-Mount Chassis one of a kind. Side Panel mounting holes are punched on 7/8″ grid to allow total flexibility in mounting of components. Rear Panel is fully adjustable from front to rear. Standard 19″ Front Panels feature "Surface Shield" protection which provides surface for laying out drilling and punching positions. A complete line of optional accessories, including internal chassis, handles, solid or perforated tops and slides add to the versatility and value of the new Bud Rak-Mount Chassis.

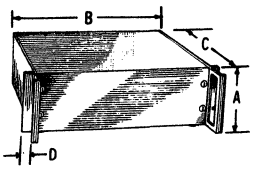
"Valu/Line" Handle Unit



Combines innovative engineering techniques with styling that is both classic and contemporary. Priced surprisingly low. May be used as an independent enclosure or in a standard E.I.A. 19″ cabinet rack. Adhesive paper protective covering of the .090″ brushed aluminum panels provides an excellent surface for indicating position when drilling or punching panel areas. Base, rear and top are .050″ aluminum with smooth white enamel finish. Sides are .090″ aluminum with white textured enamel. Completely assembled unit includes two separate detachable rack mounting brackets and rubber feet.

Panel Mounting Bracket Kit Mfr's Type No. CB-961

Attache-Type Aluminum Cases, Chassis Bases

The Best For Less!

GUARDIAN. . .the industry's finest deep drawn aluminum cases are now available in popular sizes that cover most applications. Smoothly contoured top and bottom shells are .050 inches thick and are ribbed for added strength and protection. Exterior surfaces are polished, etched and silver anodized for both distinctive appearance and maintenance-free protection. Interior surfaces are also etched and anodized. Three digit, tamper-proof combination lock. Strong, durable hardware throughout. All cases feature special edge extrusion to facilitate mounting of panels. Closely matched shells and fully-fitted sealing gasket make every Bud GUARDIAN case a tough barrier against dust, odors and inclement weather.

Blowers

Design Features. Panel heights: 3½", 5¼" and 7". All units are 19" panel width with standard EIA notching for rack mounting. Dust filters removed through front panel, no tools needed. All U.L. approved. Guaranteed for 20,000 hours continuous service. 115 volts.

Model B-23A. Two-speed blower requires minimum panel space. Pressurizes or evacuates cabinet as desired. 1450/1250 RPM, 150/65 watt-shaded pole motor. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 15 lbs.

Model B-25A. Two-speed motor delivers turbulent air distribution to eliminate hot spots in cabinet. Recommended for minimum back pressure. 1420/1075 RPM, 375/200 watt-shaded pole motor. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 28 lbs.

Model B-27A. Two-speed packaged blower. Noise level lower than found in comparable models with equal CFM. Recommended for use where densely packed electronic components require maximum cooling. 1350/1150 RPM, 540/370 watt-shaded pole motor. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 30.5 lbs.

Model B-52. Designed for applications requiring higher back pressure. Two extra-wide, small-diameter centrigugal blower wheels supply a large volume of clean filtered air to pressurize enclosure. 3000 RPM shaded-pole motor. 80 watts. Permanently lubricated ball-bearings. 24" long, 2-wire power cord. 11.5 lbs.

Model B-54. Quiet, efficient with dual, slow-speed, low-velocity centrifugal blower wheels. Noise level below average DB level found in most business offices. 1550 RPM, fan-cooled, rubber-mounted 80 watt shaded-pole motor. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 19 lbs.

Model B-50. Requires only 3½" panel height. Low audible noise level. Air stream delivered vertically through a 12½" wide opening. Air velocity and pressure cool densely packed electronic equipment. 3150 RPM, shaded-pole motor, 80 watts. Permanently lubricated ball-bearings. 24" long. 3-wire power cord. 11.5 lbs.

Plasticase

Offering 3 styles and 10 sizes of these sturdy enclosures constructed of high quality impact resistant ABS material. Molded-in card guides—Styles A and B—and mounting bosses—all styles—provide a variety of mounting options. Housing design allows complete accessibility to internal components.

Design Features for Styles A and B
- ► **Impact Resistant ABS**
- ► **Molded-in Card Guides and Mounting Bosses**
- ► **Easy to Assemble—Comes complete with stainless steel screws and rubber feet**
- ► **Finish—Double-textured PC Bone Gray**
- ► **Shipped Assembled**

PlastiBox

Available in 3 styles and a variety of sizes, these functional utility enclosures are made from UL rated high-impact ABS with scratch resistant finish. All PlastiBox models come with vertical card guides and are bossed for mounting horizontal circuit cards.

Three styles are offered to meet your specific needs:
- ► **Textured body with smooth top for silk screening capabilities—Prefix PS**
- ► **Textured body with textured top—Prefix PT**
- ► **Textured body with smooth top and 9-volt battery compartment—Prefix PBS**

Plastic Cases and Panels

Molded plastic cases (Figure A) and matching plastic panels (Figure B) for mounting test equipment...Meters fit into cases with flanges. Cases accept sizes up to $4\frac{5}{8} \times 4\frac{3}{16}$". Cases have recessed corner bosses—flush mounting with cover. All cases require $\frac{1}{2}$" No. 6 self-tapping screws, except Type 220 which requires 4-36 × $\frac{1}{2}$" screws and Type 280 which requires (6) 6-32 screws. Walls and covers of cases are made of firm $\frac{1}{8}$" thick plastic. **Shipping Weight:** Cases—$1\frac{1}{2}$ lbs.; Panels—1 lb.

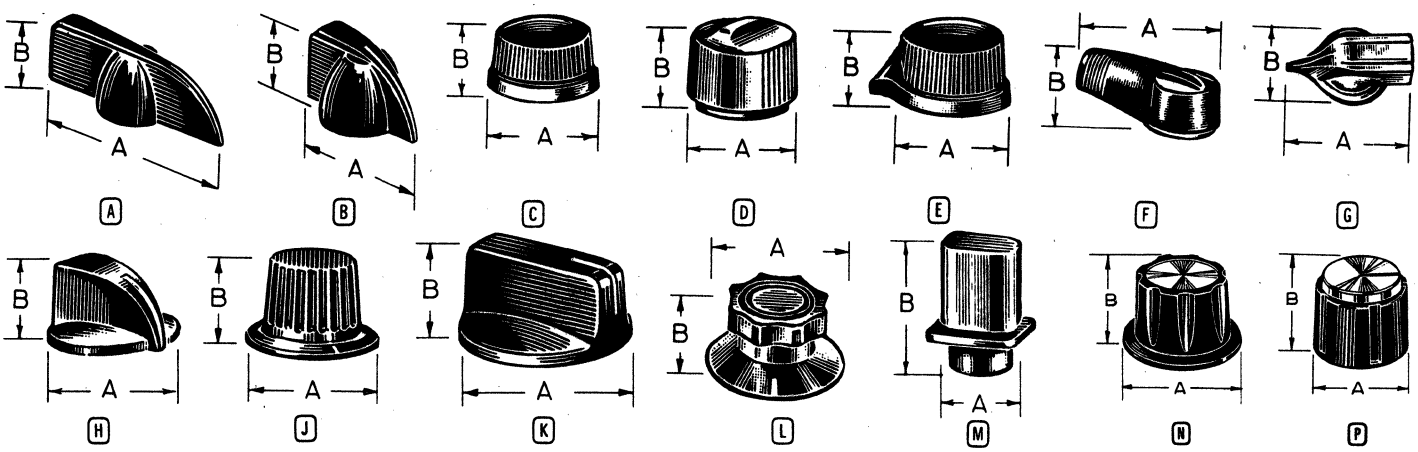
Rotating and Lever Knobs



A full line of high quality knobs for use throughout the industry. This style selection will meet most commercial and industrial applications. Choose from grooved, round, pointer bar. All are quality plastic knobs of sturdy, long-lasting phenolic plastic, with a high gloss finish. Standard setscrew construction provides one cup point slotted head setscrew. All setscrews are hardened steel cadmium plated, iridite finish. Female inserts are half hard brass rod. Mounting keys: *1/4" diameter molded hole and slotted setscrew; §1/4" diameter female brass insert and slotted setscrew; ‡self locating friction fit for use on flat wire shaft. .050 × .187".

Series 150 Storage Systems

Series 150. Space saving storage for virtually any need. Use your stockroom or toolroom to full advantage with these durable storage systems. Flambeau quality features include solid frames with welded shelves to ensure maximum stability. Both large and small-frame cabinets may be mounted easily on a wall or set on a workbench. Small 150 cabinets may be inserted in the Kit Bag 60 to facilitate carrying parts.

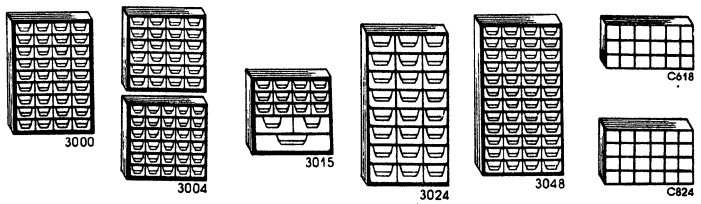
Conductive Storage Cabinets and Boxes



Protect MOS, CMOS, integrated circuits, chips, precision resistors and ESDS components from static damage. Flambeau conductive cabinets will bleed off any static charge at a safe, controlled rate when properly connected to a ground. Flambeau has developed a special design for these electrically conductive storage systems in accordance with the guidelines of DOD-HDT3K-263. A Flambeau static-safe ground cord is provided with a 1 M ohm resistance which protects users against electrical shock. However, if the cabinet is placed on a table which is electrically conductive or connected to ground, the separate ground connection for the cabinet may be left out. Technical Specifications: Surface Resistivity 10^3-10^6 ohm/sq. Volume Resistivity 10^3-10^5 ohm/sq. (Average of range for one order of magnitude.) This material is in compliance with military specification MIL-B-81 705B. GENERAL INFORMATION. The conductivity of the carbon filled polypropylene plastic is a permanent property of the material. Unlike anti-static material, it cannot be altered by use, wear, age, air, humidity or other environmental factors. It is recommended that Flambeau Conductive Systems be connected to a ground connection provided with a pre-resistance of 1 MΩ 0.5 W to protect users against currents of more than 5 mA.

Bin Tower System

The Flambeau Bin Tower System provides maximum storage area in minimum floor space. Designed to hold 144 of the size 60 bins, 96 of the size 120 bins, 72 of the size 240 bins, 64 of the size 480 bins or any of several bin size combinations. A simple, easy way to design and build your own bin system tailored to your specific needs.

This heavy-duty enclosure is available in nine panel heights (from 13U to 49U). Modular sizing insures complete flexibility when choosing both major components and accessories. Choose from a full selection of solid, louvered, and plexiglass doors all designed for front and back mounting.

CONTEMPRA is styled to highlight with a look to the future. To match this new design, the flush side panels utilize a new quick access fastener. A caster base and levelling feet are built right into the corner casting.

3

A complete line of accessories are available to complement the new CONTEMPRA Rack System.

Design Features

Frames: Heavy-duty frames fabricated from formed 14 gauge steel. Cast corner units include a built-in castor mount and four adjustable levelling feet.

Side Panels: Removable flush side panels are formed from 16 gauge steel. These panels feature a recessed "quick release" 1/4 turn cam fastener with an internal locking provision.

Doors: Choose from solid, louvered, or plexiglass doors. All are lockable, completely interchangeable from front to back, and feature a "catch-closing" mechanism.

Tops: All tops fit the standard opening, insuring complete interchangeability.

Mounting Rails: Two pairs of adjustable 14 gauge "Standard" combination rails with mounting hardware, tapped 10-32 on full EIA spacing.

Shipped completely assembled.

Finish: Textured "CONTEMPRA" Grey (CG1).

NOTE: CONTEMPRA Rapid Rack frames are also available from factory stock finished in textured black. Accessories are also factory stocked in textured blue.

Optional Accessories

Flush-mount, solid and louvered, 16 gauge steel doors fit both front and back. The solid door is reversible for both left or right hinge mount. The frame is pre-drilled for hinges and door stops. The "quick-release" hinge design allows for easy installation and removal.

The surface mount plexiglass door allows full access to the equipment mounting area without removal of the door. The aluminum door frame styling allows for maximum viewing area and features a two-point magnetic catch incorporated into the door frame. The plexiglass door is fully reversible for both left or right hinges mount.

Rack configurations are available (order with unique stock number) without side panels and door. When ganging a number of Rapid Racks, order only one rack with a pair of side panels. These panels can then easily be relocated to the proper positions.

Racks with Side Panels and Solid Top

Economy Racks

A knock-down cabinet that couldn't be simpler to assemble—only one bolt in each corner locks the cabinet sides to the top or bottom. The strength comes from the interlocking structure. The four combination panel-accessory rails are fully adjustable. Four adjustable leveling glides are standard on all models. All cabinets are shipped complete except for front and back doors or panels. **Color:** GY2 gray, **Depth:** 24.5."

KJB Plastic Boxes

- Molded in an improved medium impact ABS thermoplastic with flame retardant properties
- Carries a UL flammability rating of 94 V-0 at 1.47 mm thickness and a continuous use temperature rating of 60°C
- Comes in colors: blue, black, gray, and beige
- Interlocking flange on the lid
- Comes with M3 × .5 × 8 mm, Phillips head screws, countersunk lid, and tapped integral brass bushings
- Integral card guides accept .062" p.c. cards
- Cat. No. 1591E has removable center brace
- Comes with ABS lid in matching color. Optional clear plastic or metal lids are available

1591 Styrene Plastic Cases

- A rugged small case molded in high impact Styrene Plastic
- Comes with four self-tapping #4 × 1/2 flat head screws countersunk into the lid
- Standard stock items available in black only
- Custom colors available on volume orders
- Optional RF shielded version available on special request
- Lid ads 4.0 mm/.156" to overall depth of box

1414 Series Oil and Dust-Tight Enclosures

Built to CEMA/NEMA Type 12 specifications. Conforms to JIC standard EGP-1-1967. CSA certified, LR21001, for use with industrial control equipment in ordinary locations. UL Listed. Panel included. Door closing clamps and piano hinge are welded to outside of box. Steel clamps and screws included. All seam welded. Wall mounting brackets welded on back of all models. Suitable 10/32 weldnuts for mounting inner panels. Recoatable gray finish.

PFT Special Features

- Rack ships knockdown in four cartons
- Frame is 14 gage steel; corner posts are 13 gage steel
- Removable side panels made from 18 gage steel
- Lift-off rear door; 18 gage steel mounts L.H. side of frame
- Royal blue texture finish on rear door and side panels
- Ash white texture finish on the frame
- Multi-bay capability
- Knockdown concept saves up to 66% on freight cost

Unique Corner Post Design. PFT combines two unique design features to provide strength and rigidity associated only with expensive welded units. Interlocking tab and slot construction in the corner joints omits torsional movement of the corner posts. A heavy-gage mounting plate is welded (slightly recessed) into the top and bottom of each corner post. Thus, when the corner bolt is tightened, the cabinet base (or top) flexes slightly, ensuring that the joint is always preloaded in tension, providing additional rigidity.

Fig. G—Fixed Writing Shelf
Smooth ash white 16 gage cold rolled steel shelf measures 22.00″ wide by 16.25″ deep and is rated for more than 200 pound loads. 14 gage CRS brackets mount to EIA spaced holes in MVE corner posts. Uses 6″ of panel mounting height. Brackets must be assembled to shelf prior to installation. Brackets and hardware included.
724-1234. FWS19 ..... **EACH 79.50**

Fig. H—Flat Filler Panels
.125″ Aluminum flat panels finished in textured Ash White. Six sizes.

Fig. J & K—Drawers
Drawers rated for 200 pound loads are made from 18 gage cold rolled steel. Drawers mount to 14 gage zinc plated brackets and plated ball bearing slides provided. Front panels are oven baked textured ash white, all other surfaces smooth ash white. Front panel widths are 19.00″. Drawers are 15.67″ wide × 16.00″deep. All hardware is included. Assembly of drawer to brackets and slides required. Smooth finish ash white painted shelf lifts up for access to drawer. Writing shelf measures approximately 16.25″ wide × 15.00″deep.

*Includes a hinged 16 gage writing shelf attached to rear of drawer.

Fig. L—630 CFM Blower
Utilizing just 1¾″ vertical panel space, this tray blower features six 105 CFM precision ballbearing fans. Blower mounts to EIA spaced holes in corner posts or tapped rails. Zinc plated housing, six foot long 115 V power cord. All hardware included.
724-1244. FN630 ..... **EACH 381.60**

Fig. M—315 CFM Blower
Three 105 CFM low noise precision ball bearing fans are mounted into zinc plated clear iridite steel housing. Unit requires 5.25″ of standard 19″ rack space and provides 315 CFM airflow, drawing just 45 W. Six foot long 115 V power cord supplied. Washable aluminum air filter mounts behind bright nickle plated 5.22″ × 19.00″ grille.
724-1245. FN315 ..... **EACH 222.60**

Fig. N—Electrical Outlet Strip
PFT offers two types of power outlet strips in silver gray. Enamel aluminum housing comes complete with three snap in mounting clips and hardware for installation to MVE corner posts. Six foot grounded power cord attached. Grounding type 15 A, 125 V receptacles. All components UL approved.
724-1246. 056006. 6 outlet, 60″ long ..... **EACH 102.85**
052408. 8 outlet, 24″ long ..... **EACH 75.00**

Fig. P—T-Door Handle
Zinc plated knurled head T bar eases entry without locking feature. No allen wrench (as supplied with standard MVE door latch) required. Universal adjustment feature assures snug closure of door. Fits all steel and vented doors. Plexidoors must be modified to accept T-door handle.
724-1247. TDH01 ..... **EACH 7.95**

Fig. Q—Lock Assembly
Quality key lock assembly features adjustable latch for vibration free closure of any steel door. Chrome plated steel lock fits all front and rear steel and vented doors. Note: plexidoors must be modified to accept lock.
724-1248. LK01 ..... **EACH 15.90**

Fig. R—Casters
3.5″ diameter heavy duty hard rubber casters are rated for 200 pounds each. Mount onto each set of four threaded studs welded into MVE bottom frame. Assembly hardware included.
724-1249. CA200 ..... **PK/4 36.60**

Fig. S—Touch-Up Paint
Brush applied touch-up paint can be purchased to provide a compatible finish. Quick drying. No mixing required. 3 ounces.

Stock No.	Mfr.'s Type	Color	EACH
724-1250	TUBR	Royal Blue	14.35
724-1251	TUBH	Ash White	14.35

Note: Other colors available. Call Allied for price and delivery.

Fig. T—Leg Levellers
Threaded 3″ nickle plated steel levellers provide stable mounting of MVEs even on uneven surfaces. Levellers mount into threaded plates welded into bottom frame of Modular Vertical Enclosures.
724-1252. LL03S **PK/4 7.95**

Fig. U—1⅛″ Cup Head Screws
10/32 × 1⅛″ Phillips washer head panel mounting screws. Nickle plated steel screws with nylon washer. Recommended for mounting most equipment, filler panels, and panel mounted accessories.
724-1253. CHS1032K **PK/20 3.20**

Fig. V—Clip Nuts
10/32 plated U-type clip nut to be used with MVE 1046 or MVE 1049 panel mounting screws. Used in conjunction with 3/8″ EIA spaced holes on MVE corner posts. These clip nuts enable easy installation of equipment and panel mounted accessories without the expense of tapped mounting rails.
724-1254. CLP1032 ..... **PK/20 4.80**

Fig. W—Cage Nuts
For applications requiring greater load bearing strength than that afforded by clip nuts, 10/32 plated U-type clip nuts are used with panel mounting screws as with MVE 1047 clip nuts above.
724-1255. CAC1032 ..... **PK/20 12.75**

Fig. X—⅝″ Cup Head Screws
10/32 × ⅝″ Phillips washer head panel mounting screws. Nickle plated steel screws with nylon washer.
724-1256. CHS1032F **PK/20 3.20**

Modifications

PFT does a significant amount of modifications to its standard moduline chassis and modubox instrument cases (pages 64 and 65):

- **25 piece minimum quantity**
- **Cut outs, rounds, squares**
- **Connector openings**
- **Lead times generally 5-6 weeks after receipt of order.**
- **Press in studs, standoffs**
- **Weld in studs, standoffs**
- **Silkscreening**
- **Special paint capability**
- **Dimensional Changes**

Send your documentation to Allied for immediate price and delivery information!

Design Features

- ► Knockdown—UPS shippable assembles in minutes
- ► Freight savings
- ► Top, bottom, and internal side panels made from .060″ aluminum
- ► External dress sides—.125 aluminum
- ► .060 internal cross bars are zinc plated with gold chromate finish
- ► .060 mounting rails are adjustable front to back on 1″ increments.
- ► ABS plastic handles provided
- ► Non-marring rubber feet
- ► Black oxide screws for assembly
- ► 16 clip nuts and cup head screws are provided

PFT Modubox Enclosures

Construction. Modubox enclosures are of high quality construction. Each enclosure has two parts: a sturdy texture painted wrapper of .090″ aluminum and a smooth finished insert of .062″ aluminum. The inserts are typically modified with cut-outs and silkscreening. Part numbers reflect the basic shapes offered. **MBK:** Modubox Keyboard style. **MBS:** Modubox Sloped front style. **MBL:** Modubox Linear (rectangular) style. Part numbers follow the rough outside dimensions. For example, an MBS030706BW is a Sloped front Modubox 3″ high, 7″ wide, and 6″ deep with a Blue wrapper and White insert.

- ► EPA approved polyurethane finishes
- ► Venting, cutouts, other modifications, and silkscreening available

Mod-U-Line Venting

Moduline cabinets can be ordered with three venting options. To specify a vented top panel use the part number suffix **"VT"**. Use **"VB"** to order a MCLS with vented bottom panel. When both top and bottom panels are to be vented, use the suffix **"VTB"**. In each case a 1" wide strip of ventilation holes .125" diameter on .25" centers is provided. Ventilation can be provided to customer specifications also. Please refer to MODIFICATIONS section on page 63. Add 4.90 to the cost per vented panel.

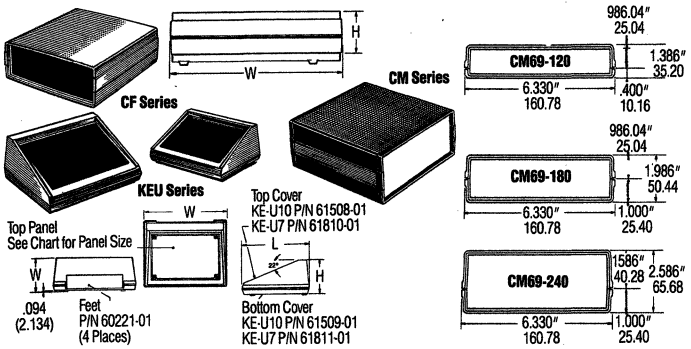
NOTE: The chassis plate is typically used as a substrate to mount power supplies and printed circuit boards.

Electronic Enclosure Kits

PacTec Series Instrument Enclosure Kits have been designed to meet the ever-expanding needs of today's electronic industry. Versatile and durable, they are made of molded ABS (ACRYLONITRILE BUTADIENE STYRENE — 94HBSTD - 1/8" thick). They feature integral mounting boxes and vertical card slides. The kits are individually packaged and include fillers, spacers, and break-away panels, as well as all necessary assembly hardware. The Kits are available in Tan, Grey, Black and PC Bone colors.

To order desired color, insert number of color where N appears in stock number: 1 - Black; 2 - PC Bone; 3 - Tan; 4 - Gray.

Designer Series Enclosure Kits



CF — Designer Series

This versatile series of enclosures offers sizes to fit analytical instrumentation, modems, personal computer peripheral equipment, medical electronics plus a myriad of other applications.

Prototyping kits are individually packaged and include front and rear panels, sized to fit, and necessary assembly hardware.

Stock No.	Mfr.'s Type	Inside Dimensions Inches			EACH	
		Height	Width	Length	1-9	10-Up

508-680N	CF-275	2.57	7.80	8.00	**41.50**	**36.99**

CM — Desk Top Miniature Enclosures

The Series CM is a smartly styled desk top miniature enclosure, featuring lightweight and exceptional durability.

This versatile series of compact enclosures offers sizes to fit analytical instrumentation, modems, personal computer peripheral equipment—in short, any small-footprint, low-profile product you have in mind.

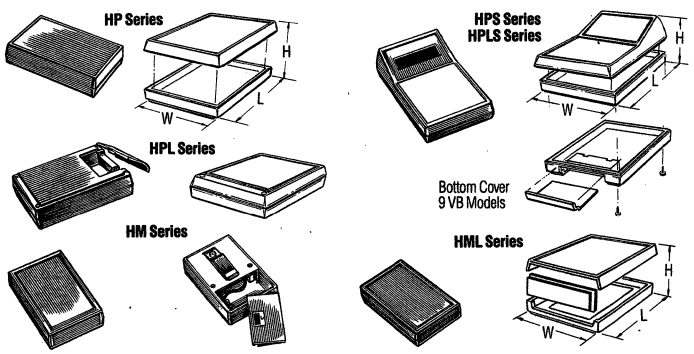
KEU — Sloped Top Enclosures

These new, sloped-top enclosures are a projection screen for your imagination. Create a system expansion—a specific-function keyboard, a joystick to trackball-based input device, a miniature printer, even a miniature-CRT output device. Or bring a new instrument to life—KEU enclosures are perfect for medical instruments, audio-electronics, strip-chart recorders, lighting dimmer controllers, and so much more.

Stock No.	Mfr.'s Type	Inside Dimensions Inches			EACH	
		Height	Width	Length	1-9	10-Up
508-630N	KE-U7	3.10	7.00	5.00	**26.11**	**24.76**
508-640N	KE-U10	4.20	10.00	8.03	**35.55**	**32.92**

The H-Series Enclosures



H series are ideal for keypads, programmable controllers, pocket pagers, computer input interfaces, and more. A selection of three basic sizes, plus variations with sloped displays and/or battery compartments, ensures a tailored fit for the device you have in mind.

The Model HP is the standard, while the HPL is an elongated size, and the HM is a mini version. All can be modified and customized inexpensively. And a wide variety of options is available to add the finishing touches to make your product useful and attractive in the field. Blank slope panels and bezel slope panels are provided with the HPS and HPLS models while the HM kit contains a blank end panel. All models with -9VB in part number has a 9VB compartment. Models with BC in part number has a belt clip included. Models with 9VB-BC in part number has both.

Stock No.	Mfr.'s Type	Inside Dimensions Inches			EACH	
		Height	Width	Length	1-9	10-Up
508-780N	HP	.92	3.37	5.52	**8.41**	**7.98**

508-800N	HP-9VB	1.08	3.37	3.97	**11.33**	**10.74**
508-810N	HP-9VB-BC	1.08	3.37	3.97	**15.33**	**14.54**
508-840N	HPL	.92	3.78	7.28	**11.40**	**10.81**
508-850N	HPL-BC	.92	3.78	7.28	**15.50**	**14.69**
508-860N	HPL-9VB	1.08	3.78	5.75	**13.83**	**13.11**
508-870N	HPL-9VB-BC	1.08	3.78	5.75	**18.21**	**17.27**

The HPS and HPLS Series Enclosures

In the field, on the factory floor, even in the office, your electronics device is often judged by how it looks and feels. The HPLS has the look and feel of competence. It's light in weight, but substantial in appearance and feel—a no-nonsense enclosure.

The HPLS can be modified to give a custom look to programmable controllers, test instruments, or anything that needs either a sloped display, a good-sized keypad, or both. This off-the-shelf enclosure can be custom modified—inexpensively—for display bezels, openings for controls and keypads, logos and markings, cost-saving assembly features, or whatever you require. There is even a version that includes a 9V-battery compartment.

Stock No.	Mfr.'s Type	Inside Dimensions Inches			EACH	
		Height	Width	Length	1-9	10-Up
508-820N	HPS	.92	3.37	5.52	**10.36**	**9.83**
508-830N	HPS-9VB	1.08	3.37	3.97	**11.85**	**11.23**
508-880N	HPLS	.92	3.78	7.28	**12.56**	**11.91**
508-890N	HPLS-9VB	1.08	3.78	5.75	**15.36**	**14.57**

The HM and HML Series Enclosures

Model HM is just the package you need to extend control capabilities or add options to your larger systems. Whatever your application, the cost-effective features and off-the-shelf availability of the HM are advantages you can use. Plus the HM can be fully customized to your electronic and aesthetic requirements.

The unit is composed of three pieces: top cover, bottom cover, and front panel. The covers and front panel can be inexpensively custom molded for controls or LED readouts. They can also be screen printed for custom identification. Additional options include a belt clip and 9V battery compartment.

Stock No.	Mfr.'s Type	Inside Dimensions Inches			EACH

Electronic Enclosure Kits

PacTec Series Instrument Enclosure Kits have been designed to meet the ever-expanding needs of today's electronic industry. Versatile and durable, they are made of molded ABS (ACRYLONITRILE BUTADIENE STYRENE — 94HBSTD - 1/8" thick). They feature integral mounting boxes and vertical card slides. The kits are individually packaged and include fillers, spacers, and break-away panels, as well as all necessary assembly hardware.

The Series C and CL Enclosures

Modular units with expandable sides. By changing combinations of side expanders, filler panels, spacers and front and real panels you can build more than 64 different models from either a C or CL enclosure.

With these enclosures, you can use a kit to design and build a prototype. And your prototype can be customized easily and inexpensively with PacTec options, accessories, and panel modifications to give your final product the personality you want it to have.

Model C is a basic case. The H in the model number is a basic case with handle. The B in the model number is a basic case with tilt stand. To order desired color, insert number of color where N appears in stock number: 1 - Black; 2 - PC Bone; 3 - Tan; 4 - Gray.

SERPAC's wide variety of packaging products provide functional utility and a professional, high tech appearance. Choose from an inventory of 9 colors. To provide a complete line of versatile enclosures, we offer models with or without 9-volt battery compartments, card guides for vertical circuit boards, bossing for horizontal circuit boards; protective non-skid elastomer feet; and a Perimeter Seal Kit which provides an effective barrier from an aqueous environment when used in conjunction with our standard enclosure.

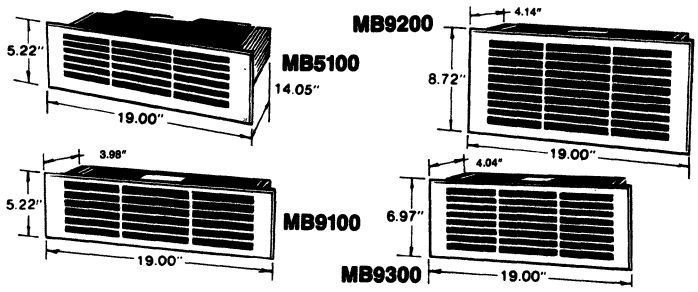
Modular Cabinet Blowers



Designed for use in EIA 19″ racks. Each blower includes grill, cleanable airfilter, and finger guards. **Model MB5100** is powered by 2 Feather fans; continuous duty life of 6 years at 25°C. **Model MB9100** is powered by 3 Muffin fans; continuous duty life of 10 years at 25°C. **Model MB9200** is powered by 2 Feather fans; continuous duty life of 6 years at 25°C. **Model MB9300** is powered by 2 Major fans; continuous duty life of 5 years at 70°C. All operate from 115 VAC 50/60 Hz.

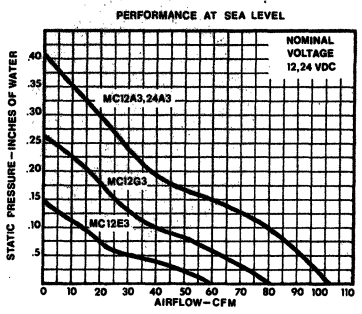
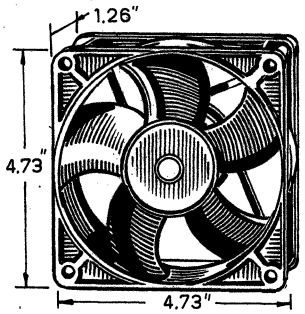
Muffin® DC Fans





Muffin fans feature low noise, electronic locked rotor protection, and polarity protection. 58 to 102 CFM (27 to 48 L/Sec.); 12VDC nominal. For ambients of – 10°C to + 60°C. Encased in black plastic UL 94V-0 housing. Meets FCC and VDE EMI requirements. 4.73″ square × 1.26″ deep; 8.5 oz. (.24kg). 4.125″ mounting hole centers. Ball bearing and sleeve bearing versions available.

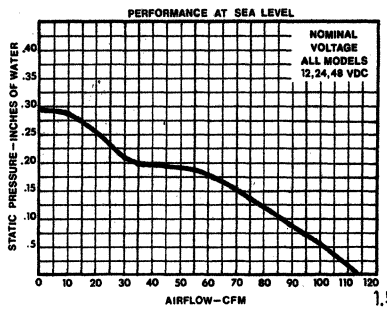
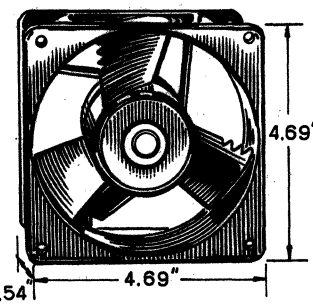
*Airflow will vary proportional to voltage.

Muffin XL® DC Fans





These ball-bearing fans feature the famous Feathered Edge™ blade design for lower noise. Electronic locked rotor protection; polarity protected. 4.125″ mounting hole centers. For ambients of – 10° to + 70°C. Cased in a die-cast zinc housing. Meets FCC and VDE EMI requirements. UL Yellow Card Recognized; CSA Certified. **Weight:** 21.5 oz (.61kg).

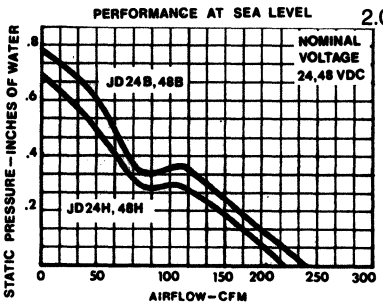
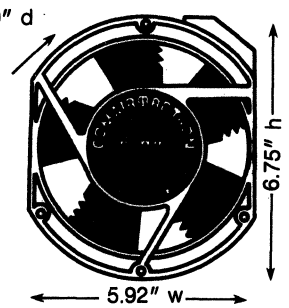
Major® DC Fans





Featuring Feathered Edge™ blade design for lower noise with rugged die-cast aluminum housing and electronic locked rotor protection. Polarity protected. Ball bearing construction. Meets FCC and VDE EMI requirements. UL yellow card recognized and CSA certified. 210 to 240 CFM (99.1 to 123 L/Sec.). 6.375″ mounting hole centers. **Size:** 6.75″ × 5.92″ × 2″ (171.5 mm × 150.4 mm × 50.8 mm). **Weight:** 1.84 lbs. (.84kg). **Temperature Range:** – 10°C to + 70°C.

FLIGHT® DC Fans

Solid-state circuitry for brushless electronic commutation. Features stainless steel ball bearings, 100% dielectric (tested at 600VAC/1 sec., 500 microamps maximum leakage), low noise, electronic locked rotor protection, and polarity protection. UL recognized and CSA certified. **Operating Temperature Range:** – 10 to + 60°C. 12/24VDC nominal. **Venturi:** PBT with glass; black; meets UL94V-0. **Propeller:** PBT; black; meets UL94V-0. Designed to EMI standards per FCC Part 15, Subpart J of Docket 20780, Class A and B radiated and conducted emissions, and per VDE Specification 0871/6.78 for category A and B requirements.
FLIGHT 60. 8 to 21 CFM (3.7 to 9.9 L/Sec.); 2.36″ square × 1.00″ deep; 3.5 oz. (.10 kg).
FLIGHT 80. 20 to 40 CFM (9 to 19 L/Sec.); 3.15″ square × 1.00″ deep; 4.3 oz. (.12 kg).
FLIGHT 120. 45 to 95 CFM (21.2 to 44.8 L/Sec.); 4.73″ square × 1.00″ deep; 7.1 oz. (.20 kg).

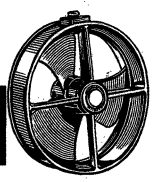
Saucer® Fan



Delivers both high volume and high pressure from a minimum of fan space. .280 cfm (132 L/Sec) free air delivery. Generates pressures up to .5″ (12.7 mm) H_2O. Features driving motor entirely within hub for minimum depth 2.50″ (63.5 mm), diameter 7″ (177.8 mm). Withstands ambients from −60° to 257°F (−54° to +125°C). With prelubricated stainless steel ball bearings and clamping rings at venturi ends for easy mounting. Meet all applicable military specifications. See selection guide on page 75 for specifications.

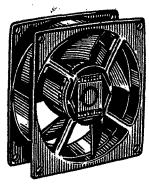
Spartan Fan and Invertafan® Spartan



This MIL SPEC version of the famous Muffin fan gives 113 cfm (53 L/Sec) free air delivery, up to 188 cfm (89 L/Sec) for some 400 Hz models. Offers an efficient multi-slot motor, double shielded stainless steel ball bearings, and high pressure characteristics of up to .8″ (20.3 mm) H_2O. These fans are dimensionally interchangeable with the Muffin fan, 4.71″ sq. × 1.50″ (119.6 mm × 38.1 mm). Venturi, spiders, and hub are single aluminum casting for shock and vibration resistance. Withstands ambients from −60° to +212°F (−54° to +100°C). Some models are lower. Lubricated for life. Meet all applicable military specs. Invertafan models run off 12, 24, and 48 VDC, and are brushless. See selection guide on page 75 for specifications.

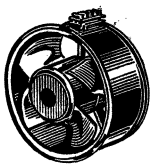
Propimax® 2, 3, 3B, and 3BM



Made for airborne equipment, these large volume, high pressure air movers offer free air delivery from 22 to 225 cfm (10.3 to 106.2 L/Sec), and pressures as high as 7″ (177.8 mm) H_2O at cut-off. For 115 VAC, 1 phase, 400 Hz; 200 VAC, 3 phase, 400 Hz; 115 VAC, 1 phase, 60 Hz. Life expectancies of 10,000 hours at 72°C, at 22,000 RPM. Withstands ambients up to 257°F (125°C). Meet all applicable military specs. **Size and Weight:** Propimax 2—3 1/4 × 1 1/2″ (82.5mm × 38.1 mm), 6.5 oz. (184.3g); Propimax 3 and 3B—3 3/4 × 2″ (95.3 mm × 50.8 mm), 15.2 oz. (431 g). Optional Altivar® motors automatically increase speed with altitude. See selection guide on page 75 for specifications.

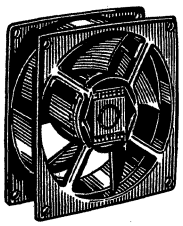
MIL Grade Brushless DC Fans

These Electronically Commutated Direct Current (ECDC) fans are designed to meet the tough requirements of defense and aerospace users, as well as others requiring top caliber performance. There are no brushes to wear out, so you get long life and low maintenance. Features low power consumption, low EMI/RFI, and high operating temperature capability (to 100°C on some models). The rotational speed (RPM) change is accomplished by simply varying the voltage. Included as a built-in, standard feature, the performance sensor monitors fan rotation. This, coupled with the optional Low Speed Warning Detector, ensures state of the art reliability.



Spartan ECDC

These fans give up to 135 cfm (65 L/Sec) free air delivery at 12 VDC and 180 cfm (86.5 L/Sec) at 26 VDC. Designed to meet applicable military specs, these 12 and 26 VDC models withstand ambients from −54°C to 100°C. Dimensionally interchangeable with Muffin and Spartan AC and DC fans. Features built-in performance sensor and the same housing, ball bearing suspension system, and lubricant in proven high reliability AC designs. Low maintenance because there are no brushes to wear out. See the Selection Guide on page 75 for specifications. **Call your nearest Allied facility for pricing.**

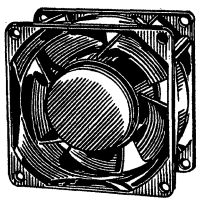
MIL 80 ECDC



Dimensionally interchangeable with Sprite and MIL 80 AC fans, the MIL 80 ECDC models provide up to 65 cfm (28.8 L/Sec) free air delivery at 12 V and 26 VDC; and 38 cfm (18.3 L/Sec) at 48 VDC. 12, 26 and 48 VDC models are designed to meet all applicable military specs. Feature built-in fan performance sensor and low maintenance (without any brushes to wear out). Withstand ambients from −54°C to 100°C. Housing, ball bearing suspension system and lubricant are the same as those supplied in high reliability AC designs. See the Selection Guide on page 75 for specifications. **Call you nearest Allied facility for pricing.**

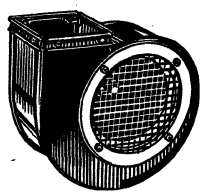
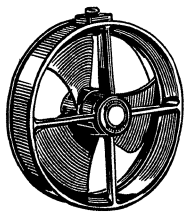
*Non-stocking item at Allied—allow for extra lead time.



Model D Blower

Model DRFPI (X)/KS-505-CW-329XF. This rugged centrifugal blower, designed for defense/aerospace applications, provides free air delivery to 130 cfm (61 L/Sec). Features pressure building capability up to 2.0″ (50.8 mm) H_2O at cut-off. Handles pressure building with relatively less noise than fans. QPL accepted under MIL-B-23071/9-001 and -002. Allow for extra lead time—not a stocking item. See the Selection Guide on page 75 for specifications. **Call your nearest Allied facility for pricing.**
598-1430. Type 033461.



Saucer ECDC

12, 26, and 48 VDC models give 250 cfm (120L/Sec) free air delivery at 12 VDC and up to 325 cfm (156.3 L/Sec) at 26 V or 48 VDC. These fans are dimensionally interchangeable with Feather and Saucer AC fans and meet all applicable military specs. There are no brushes to wear out for low maintenance. Withstand ambients from −54°C to 100°C. Feature built-in fan performance sensor and the same housing, ball bearing suspension system and lubricant found in high reliability AC designs. For specifications see Selection Guide on page 75. **Call your nearest Allied facility for pricing.**

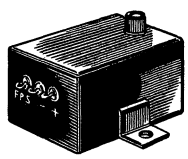
Low Speed Warning Detector



The Low Speed Warning Detector (LSWD) is designed for use with ECDC airmovers equipped with fan performance sensors. Housed in a defense/aerospace system "black box." If your airmover stops operating or falls below the required RPM output, the LSWD will warn you with an LED warning signal or contact closure. This early warning system is optional.

Stock No.	Mfr.'s Type	Model No.	Description	EACH

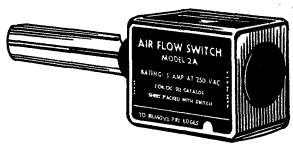
598-1425	LSWD	034054	For 16-48 V ECDC Fans*	**212.90**

*With LED Display.



Airflow Interlock Switch

Model 2A. This SPDT 5 amp, 250 VAC switch features 8 velocity ratings and interchangeable actuating vanes. Mounts on round and flat ducts with a single screw. Life expectancy is 500,000 operations. **Weight:** 4.5 oz. (0.13 kg).

*Also used on Aximax and Propimax .3 per fan required.

The Globe Motors commercial cooling fan product line provides cooling solutions for industrial applications from office copiers, micro-computers and laboratory instrumentation to industrial control cabinets.

Through the use of CAD/CAM and strict statistical process controls (SPC), our fans have a life expectancy of 60,000 hours and a 0.005% field failure rate (50 parts per million).

Special care has been taken to design-in long operating life and low acoustical noise. All fans use precision, life-lubricated ball bearings.

Cyclohm Series Fans

Deliver large volumes of air over a wide angle with whisper quiet performance. Designed for 10 years of continuous use without lubrication. Airflow reversable by turning fan end-for-end. Rugged cast aluminum venturi block for durability. Lexan molded impellers.

Special Features

- **3.15" × 3.15" × 1.5" (80 mm × 80 mm × 38 mm)**
- **17 to 30 CFM**
- **Impedance protected**
- **Zinc die cast venturi**
- **Thermoplastic impeller—UL Rated 94 VO**
- **Sleeve bearing construction**
- **12" 22 AWG leads or .110" quick connect terminals**

Brushless DC Fans

Features include high-strength thermoplastic impellers and venturi for improved aerodynamic and acoustic properties, lower noise under load, higher pressure versus flow characteristics and lower power requirements than equivalent AC fans. Variation of input voltage over a ± 25% range will increase or decrease nominal airflow.

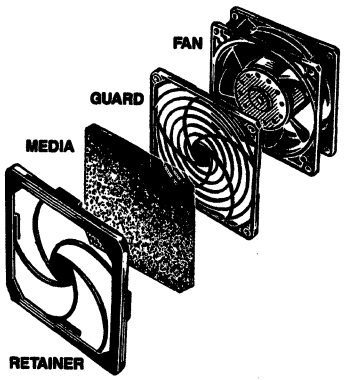
Plastic Fan Filter Assemblies



General Description. Fan-S offers a unique fan filter package consisting of a guard, foam filter media and media retainer, manufactured with UL listed 94-V0 material for 80 mm - 3 1/8", 92 mm - 3 5/8" and 120 mm - 4 1/2" tubeaxial fans for the removal of dust and contaminating particles. Installation is quick and simple: four mounting screws secure the guard portion, then snap on the retainer and filter media with no extra hardware or brackets required.

The two major features of our filter package are safety and low down time. When the filter media requires maintenance, simply taking the retainer off, the media is exposed for cleaning or replacement thus leaving the guard attached to the fan assuring employee protection and eliminating possible damage of the fan component during handling. Leaving the fan operational during servicing thus eliminating down time.

Aluminum Fan Filters

General Description. These tested and proven filters provide maximum airflow with effective filtering. Mill and irridite finishes are offered to enhance EMI/RFI shielding as well as an anodized finish for esthetic purposes. The tightly woven aluminum corrugated mesh screen is encased in a formed aluminum frame built for ruggedness and durability. The units are easily washed in a solvent or degreaser and can be mounted directly to the fan or to a panel.

Wire Form Fan Guards

General Description. The 08 series wire form fan guards are designed for use with tubeaxial fan sizes 40 mm - 1 1/2", 50 mm - 2", 60 mm - 2 1/2", 80 mm - 3 1/8", 92 mm - 3 5/8", 120 mm 4 1/2", 127 mm - 5", 150 mm - 6" and 254 mm - 10". Our 3/16" and 1/4" maximum ring spacing designs were developed to assist our customers in complying with domestic and international safety agency requirements that are in effect today or that may develop in the future. We maintain the highest level of quality control by insuring that we use only the highest grade of materials that must pass a very stringent level of incoming inspection prior to being accepted to our manufacturing inventory. All wire form fan guards are inspected during the manufacturing process to assure compliance to our rigid specifications. They receive an additional final inspection prior to shipment that insures compliance with both mechanical and esthetic parameters.

Stepping, Geared, SAS Series

Geared SAS Series motors have step angles ranging from 0.0125 to 0.75 and torque ratings from 200 ounce inches (maximum gear train loading) to 35 ounce inches. All at 200 p/s. Gear trains are industrial quality throughout. Dual sleeve bearings. **Input Power:** 8 Watts. **Winding Resistance:** 36 ohms. **Weight:** 16 oz.

Stock No.	Mfr.'s Type	Step Angle	Output Speed @ 200 p/s (rpm)	Torque @ 200 p/s* (Oz.-In.)	Steps Per Rev.	EACH 1-24	EACH 25-Up

Stepping, Direct Drive, SAS Series

Industrial quality, economical SAS Series direct stepping motors have excellent torque/size ration: 7.5 ounce inches at 4-5 p/s. Unipolar operation at 12VDC is standard. Step angle is 7.5°. Dual sleeve bearings. 48 steps per revolution. **2-Phase Holding Torque (oz-in):** 10.5. **Winding Resistance:** 36 Ohms. **Weight:** 8 oz.

Stepping, Linear Actuator, SLS Series

Stepping SLS Linear actuator has a reversible, permanent magnet rotor with unipolar operations. Rotor assembly features sintered bronze nut for extended life. Nut accepts 1/4" diameter, .048 pitch Acme screw that provides linear motion for pushing, pulling, lifting and positioning applications. Standard 8" screw with maximum travel of 6.75" and maximum thrust of 25 pounds. Ball bearings. **Winding Resistance:** 25 ohms. **Weight:** 10.5 oz. (with screw).

Stepping, Geared, AS and ABS Series

Geared AS and ABS stepping motors have a die cast housing, hardened steel gears and pinions running on ground, and hardened steel studs. No plastic or fiber parts are used. These dependable motors are used in precision instruments and computer peripherals. **Winding Resistance:** Models 3004-001 and -008, 100 ohms; Models 3008-005, 53 ohms.

Stepping Motor Control With Display

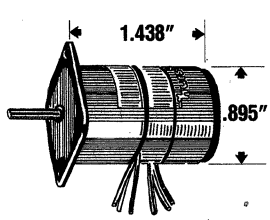
Model EPC-015. General purpose controller with step frequency display. Operates from a single external 6-24 VDC power display. Will drive 4-phase stepping motors requiring up to 1.0 Amp per phase. Also includes adjustable step frequency, and phase driver disable control. Continuous, single step, or jog operation. Bi-directional control.
542-0060 .....**EACH 150.00**

SUPERSMALL Synchronous Motor

This instrument-grade, SUPERSMALL, synchronous motor is reversible and operates at 720 rpm on 115 VAC, 60 Hz. It weighs just 2.1 ounces and is less than an inch in diameter.

The new BA Series synchronous motor is a practical solution to control problems in equipment where space is at a premium. It also is suited to products employing variable frequency AC controls. **Note:** Capacitor is furnished with motor, 115 V.

Model: BA. **Speed at Output Shaft:** 720 rpm. **Rated Torque:** 0.625 oz-in. **Input Power:** 1.5 watts. **Capacitor Value:** 0.15 ± 10%, 400 VDC. **Full Load Temperature Rise:** 30 °C. **Weight:** 2.1 oz. **Shaft Bearing:** Sleeve.
542-0200. Type BA 4201-001 .....**EACH 26.80**



Synchronous, Direct Drive, A and AB Series

A and AB Series permanent magnet, reversible motors have speeds of 300 or 600 rpm at 60 Hz. Sleeve bearings are standard. Capacitor furnished. Designed for heavy-duty applications, these motors are very popular. **Full load temperature rise:** A Series, 21°C; AB Series, 36°C. **Weight:** 6.8 oz.

Globe Motor Division

Globe Motor Division approved modification centers in Dallas, Texas and San Jose, California are staffed with Globe factory-trained personnel, some of whom have been meeting customer needs for more than 20 years.

This experience allows us to provide additional services in the following areas:

- **Computerized motor performance data under load and temperature conditions**
- **Machine shop capabilities**
- **Inventory support for small and large product needs**
- **Custom configuration of any Globe Motor**
- **Design assistance**

While serving customers through 32 nationwide locations, we also provide engineering assistance through our Motorvation Hot Lines at **1-800-541-4105** or (in Texas only) **214-343-5000.**

Give us a call. Hundreds of satisfied customers do each day. We're the company that cares about your needs.

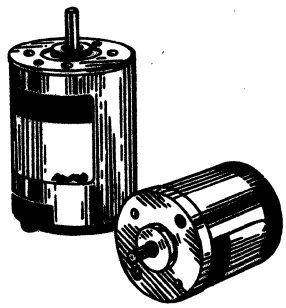
Motors for Industrial Applications

For computer peripherals, machine tools, instrumentation, robotics, office equipment and medical equipment.

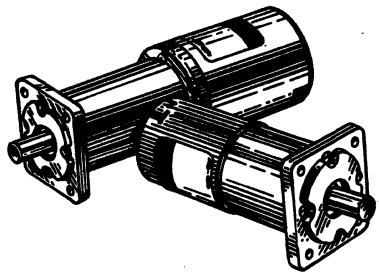
Manufacturers of everything from handheld tools to robotics are finding Globe is a competitive source for quality miniature motors, gearmotors and blowers.

When you need precise, reliable motion in minimum space, Globe can give you the design options and the quality you need to meet rigid material and testing standards.

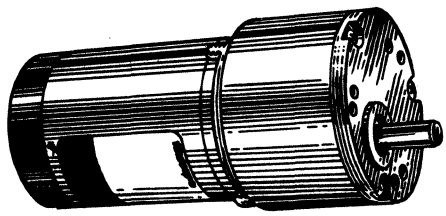
Strategically located distribution modification/assembly centers can make thousands of variations from our basic motor modules, including options in EMI filters, special mounting, tachometers, special couplings and lubrication. With 48-hour delivery of standard units direct from our distributors.



FRACTIONAL HP DC PLANETARY GEARMOTORS
Standard Gear Ratios: from 4:1 to 46,656:1
Continuous Torque: from .75 oz. in. to 1,250 oz. in.

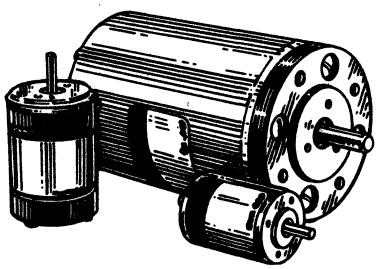


FRACTIONAL HP DC MOTORS
Continuous Torque: from .25 oz. in. to 43.0 oz. in.
Diameter: from 1.3" to 2.6"
VDC: 4, 6, 12, 24, 50, 115

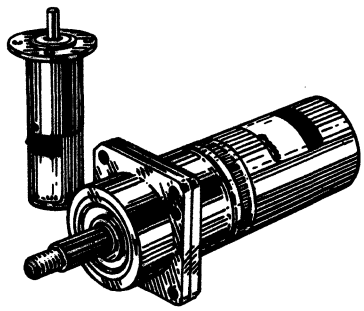


IM-13 SPUR GEARMOTORS
Standard Gear Reduction: from 3.97:1 to 1,276.09:1
Continuous Torque: from 3.0 oz. in. to 60.0 oz. in.

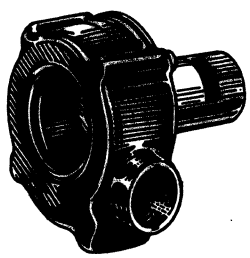
Motors for Military Applications

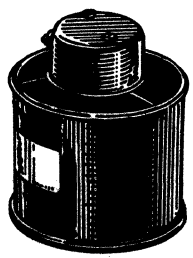


FRACTIONAL HP DC PM MOTORS
Continuous Torque: from 0.20 oz. in. to 16.0 oz. in.
Diameter: from .75" to 2.25"
VDC: 5, 12, 27, 50, 115



FRACTIONAL HP DC PM GEARMOTORS
Standard GEar Ratios: from 3.82:1 to 36,873:1
Continuous Torque: from 1.0 oz. in. to 550 lb. in.





MINIATURE FANS AND BLOWERS
CFM: from 6 CFM to 600 CFM

For missile guidance and control systems, missile fin actuation, aircraft instruments, control systems, aircraft actuation systems, land track vehicles-in-line fuel pumps—transfer and bilge pumps—cabin ventilation.

Globe can help you meet rigorous quality, material and testing standards for motors, gearmotors, and blowers.

We can give you custom capabilities and options in actuators (linear and rotary), pumps with leakproof magnetic couplings, torquers, and blowers.

Strategically-located distribution modification/assembly centers can make thousands of variations from our basic motor modules, including options in EMI filters, special mounting, tachometers, special couplings and lubrications. with 48-hour delivery of standard units direct from our distributors.

Contact Your Motorvation Hot Lines For More Information—1-800-541-4105. In Texas, Please Call 214-343-5000.

*K = ± 10%; M = ± 20%. **NOTE:** Use last three digits in failure rate column as last three digits to complete stock number. Example: for CKR11BX100KR, Stock Number will be 881-2001.

MIL-C-39014/Radial Leads

General purpose ceramic dielectric fixed capacitors. **Temperature Range:** – 55°C to + 125°C. Available on tape and reel (2500 pieces per reel) as special order item. Call for price and delivery.

Size Specification

Per Mil Spec	Case Size—mm (In.)				
MIL-C-39014	Length (L)	Width (W)	Thickness (T)	Lead Spacing (L.S.)	Lead Diameter (L.D.)
CKR04	4.83 ± .25 (.190 ± .010)	4.83 ± .25 (.190 ± .010)	2.29 ± .25 (.090 ± .010)	2.54 ± .38 (.100 ± .015)	.64 ± .05 (.025 ± .002)

*K = ± 10%; M = ± 20%. **NOTE:** Use last three digits in failure rate column as last three digits to complete stock number. Example: for CKR04BX100KR, Stock Number will be 881-0201.

Radial Leads/SkyCap

General Information
AVX SR Series
- ► Conformally Coated Radial Leaded MLC
- ► Temperature Coefficients: NPO, X7R, Z5U
- ► 50, 100 volts (200 V available on request)
- ► Case Material: Epoxy (Flame retardant to UL Bulletin 492, Par. 280)
- ► Lead Material: Solderable
- ► NOTE: Other tolerances available. Call for price and delivery.

Tantalum Surface Mount Capacitors

Standard EIA Surface Mount Technology Solid Tantalum Chip Capacitors

The four case sizes of the TAJ conform to the sizes most required by the major OEMs throughout Europe and America. These sizes conform to the Electronics Industry Associations of U.S. and Japan recommended standards for Tantalum Chip Capacitors. These sizes are now accepted as standard by nearly all major manufacturers worldwide.

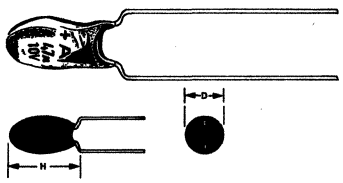
Resin Dipped Radial Capacitors



TAP Series Solid Tantalum Resin Dipped Capacitors

TAP is a professional device manufactured with a flame retardant coating and featuring ultra low leakage current and impedance, very small physical sizes and exceptional temperature stability. It is designed and conditioned to operate to +85°C without derating and is available loose or taped and reeled for auto insertion. The 15 case sizes with wide capacitance and working voltage ranges means the TAP can accommodate almost any requirement.

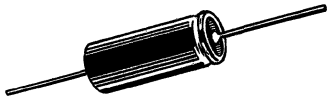
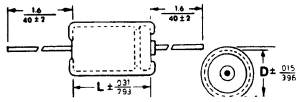
NOTE: Replace * in Mfr.'s Type with "K" or "M". Replace "X" in Stock No. with 1 for K (± 10%) or 2 for M (± 20%).

Tiny Tubular Aluminum Electrolytics





Quality capacitors made from very high purity aluminum foil, deep-etched to provide maximum capacity per unit of volume. Etched cathode construction; exhibits exceptionally low DCL and ESR. Supplied in aluminum case with insulating sleeve; wire leads 2" lg. (±1/4"). **Temperature Range:** −40°C to +85°C. **Tolerance:** −10%, +75%, 1-100 WVDC; −10%, +50%, 100 WVDC and up.

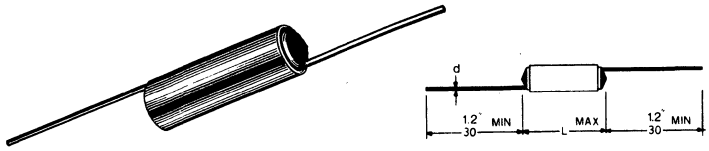
*Radial Lead Capacitor.

Axial-Lead 630 VDC Polystyrene Capacitors



Capacitors are stretched polystyrene dielectric fused to high-purity aluminum or tin foil—produces excellent humidity barrier. Excellent where utmost capacitance stability versus temperature and time are required, due to high insulation resistance and power factor of less than .05%. Capacitance change from −10°C to +70°C is less than 13% total and is negative. **Temperature coefficient:** −150 ppm/°C. **Tolerance:** ±5%. **Temperature range:** −40°C to +85°C. **Cleaning solvents:** alcohol is best, freon will discolor only. **Warning:** chlorinated solvents will attach polystrene.

Low-Voltage Ceramic Disc Capacitors

Working voltage is 50 VDC to 150 VDC. Tolerance of type SE-0753 is −30% to +80%. Tolerance of type SE-0430 is ±20%. Tolerance of SE-0760 is −40% to +60%. Tolerance of all others is −20% to +80%. Dielectric strength is 250% of rated marking voltage. **Operating Temperature Range:** −55°C to +85°C. All have Z5 V characteristic +22% to −82% max. capacitance change from +25°C reading over temperature range of +10°C to +85°C. **Weight:** 2 ounces.

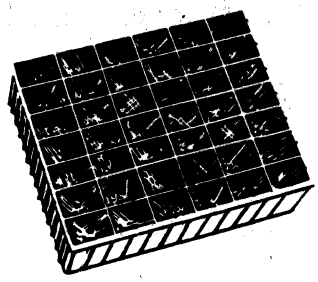
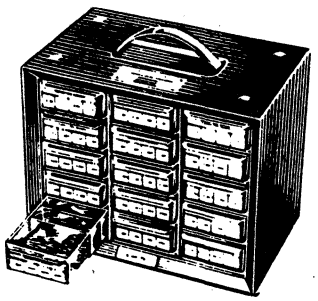
Capacitor Kits



A) Low Voltage Ceramic Disc Capacitor Kit
A popular assortment of 20 pieces each of 18 different values and/or tolerances (from .1 mf @ 12V to .01 mf @ 150V; ± 20%, – 20% to + 80%; all are Z5V). Packaged in individual compartments in an easily accessible storage container.
285-9099. LVCK-099 ..... **EACH 39.95**

B) High Voltage Ceramic Disc Capacitor Kit
Perfect for RF and many other prototyping applications. A complete range of 18 different values from 15 pf to 3900 pf. All are 1000V. Tolerance is ± 10% (* = ± 20%). 25 pieces of each value! Capacitors are housed in a durable polystyrene container.
285-9098. HVCK-098 ..... **EACH 29.95**

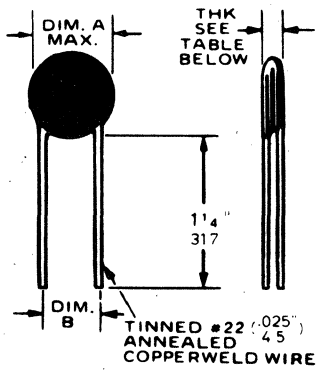


C) Aluminum Electrolytic Capacitor Kit
Contains a broad range of 10 each of 18 values from 100 mf @ 10V to 450 mf @ 50V. Tolerance is – 10% to + 75%. All are axal leads (except where indicated by *, radial) Housed in a handy 18 drawer cabinet.
286-9099. (AECK-099) ..... **EACH 52.95**

D) Polystyrene Capacitor Kit
10 pieces each of 18 different values of the most popular polystrene capacitors. Capacitance ranges from 150 pf to 10,000 pf. All are 630V, tolerance is ± 5%. Conveniently housed in an 18 drawer cabinet.
233-9099. (PSCK-099) ..... **EACH 49.95**

E) Master Capacitor Kit
A total of 635 pieces, 50 different values. 12 Aluminum Electrolytic, 13 Low Voltage Ceramics, 13 High Voltage Ceramics, and 12 Polystyrene. Great for prototyping and MRO purposes. Housed in a handy 50 drawer cabinet.
299-0001. (MCK-001) ..... **EACH 79.95**

High-Voltage Ceramic Disc Capacitors



Specifications

Operating Temperature Range: – 55°C to + 85°C. **Dissipation Factor:** 2% maximum at 1 kHz. **Flash Test Voltage:** 1800 VDC for 1000 WVDC units. **Working Voltage:** 1000 WVDC. **Tolerance: ± 10% except as indicated by * ± 20%. G in Type Number — Guaranteed Minimum Value.**

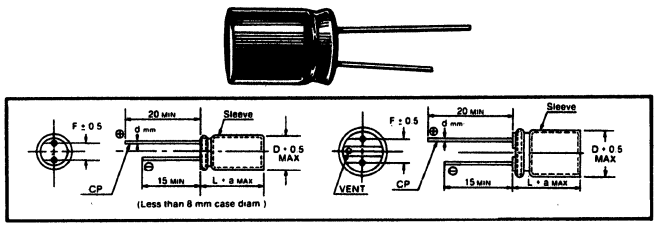
Radial Lead Electrolytic Capacitors



Compact, electrolytic capacitors for original equipment or replacement use in all kinds of communications equipment. **Operating Temperature:** −40° to +85°C. **Capacitance Tolerance:** ±20%. **Life:** 2000 hours at +85°C. **Rated Working Voltage Range:** 10 VDC to 50 VDC. **Capacitance Range:** 0.1 mfd to 15,000 mfd. Straight leads. Solvent proof units available. Call for pricing and availability.

SAE Series Radial Lead Electrolytic Capacitors

- ► High Temperature/Long Life
- ► Radial Lead Electrolytic Capacitors
- ► Same Lead Spacing and Lead Diameter as MA Types
- ► Temperature Range: −40°C to +105°C
- ► Life: 1000 Hours at 105°C; 4000 Hours at 85°C
- ► Capacitance Tolerance: ±20%

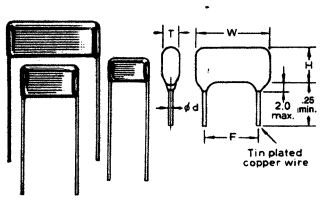
Type MDD Capacitors

- Non-Inductive Construction
- Non-Combustible, Epoxy Coated
- Capacitance Tolerance ±10%
- 250 VDC Rated (150 VAC), 400 VDC (200 VAC), and 630 VDC (250 VAC)



These resin coated metalized polyester film capacitors are rated 250 VDC and 150 VAC at 60 Hz. Capacitance tolerance is ±10%. **Operating Temperature:** −40°C to +85°C. Non-inductive construction. Non-combustible and epoxy coated. **Insulation Resistance:** less than 0.33 μF ≥ 10,000 MΩ × μF. **Dissipation Factor:** ≤1% at 1 kHz. **Stress Voltage Test:** rated voltage × 1.5 for one minute.

Epoxy Coated Polyester Film Capacitors

Design and Construction

- Dielectric: Polyester Film (Polyethylene Terepthalate Film)
- Electrode: Aluminum Foil — Inductive Wind — Welded Tabs
- Winding: Fully Automatic
- Terminals: Copper plated steel wire with solder coat (straight leads)
- Coverage: Coated with Epoxy Resin (dipping method)

Rated Values and Characteristics

- Nominal Capacitance: 0.001 mfd. to 0.47 mfd.
- Capacitance Tolerance: ±10%
- Rated DC Voltage: 100 V
- Temperature Range: −40°C to +85°C
- Test Voltage: 200% of rated DC Voltage for 60 sec.
- Insulation Resistance: More than 9,000 ohms, Avg. 100,000 M ohms at 20°C
- Dissipation Factor (tan theta): Below 0.8%, Avg. 0.4% at 1,000 Hz, 20°C

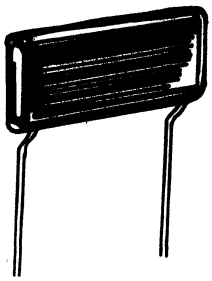
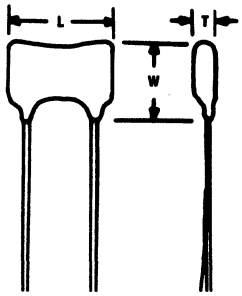
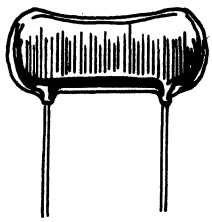
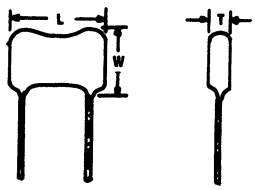
Dipped Mica Dielectric Capacitors









Small size, highly resistant to moisture, all leads are copper-weld for improved solderability. The miniature sizes are ideal for use in delay lines and IF transformers.

Note: 1% and 2% tolerances available as special order items with 100 PC mult. 100 pF-Up (50-100 pF 2% only).

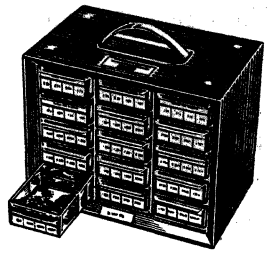
Allied Capacitor Kits

Call Allied For Replacement Parts



TSD-150, TSD-300 Tantalum Capacitor Kits. Both kits contain high quality Hitachi resin dipped tantalum capacitors. TSD-150 has 5 pieces each of 30 values — total 150 pieces. TSD-300 has 10 pieces each of 30 values — total 300 pieces. All in 15 quick select drawers. Kit Dimensions: 10 × 8 × 6-1/2". Kit includes: 10 V, 16 V, 20 V and 35 V in .1 MFD thru 47 MFD capacitance ranges.
777-0150. TSD-150 ..... **EACH 192.95**
777-0300. TSD-300 ..... **EACH 259.94**

CEC-410 Low Leakage and Sub-Miniature Capacitor Kit. Features include: 10 pieces per type. High quality Nichicon product. Tantalum like performance levels. The 10 × 8 × 6-1/2". Kit includes: 10 V, 16 V, 25 V, 35 V, and 50 V Super miniature lytics. 35 V and 50 V Super miniature low leakage lytics.
777-0410. CEC-410 ..... **EACH 145.95**

CC-540-12 Multi-Layered Ceramic Chip Capacitor Kit. 10 pieces each — 54 values. Ultra-miniature size, light in weight and thin body thickness. Highly reliable performance. 9 × 7.5 × 1.6" styrene case with chip types clearly marked. Includes: EIA 1206 case sizes, NPO, X7R and Z5U types, 5 pF — .1 MFD capacitance ranges at 50 volts.
777-5412. CC-540-12 ..... **EACH 174.95**

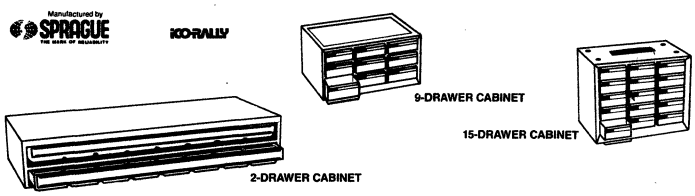
NAC-400 Capacitor Kit. Includes: Miniature aluminum electrolytic, ceramic disc and film capacitors in 15 clearly labeled drawers. 120 × 8 × 8 × 6-1/2" kit holds Aluminum Electrolytics Axial 17 values, 16, 25, 35, 50 VDC. Radial 16 values. Ceramic Disks 11 values .001 pF — .1 MFD 12 V, 50 VDC, Polyester Film 9 values 100 VDC. Metalized Film 9 values 250, 400, 630 V. 400 pieces.
777-0400. ..... **EACH 169.95**

TC-150 Tantalum Chip Organizer Kit. 9 × 7.5 × 1.6" styrene case with 150 pieces. Kit Features include: Highest quality tantalum chip capacitors in Ultra small case sizes. High soldering heat resistance: 30 Values of tantalum chips. x8/x16 magnifying glass and specially designed Chip tweezers.
777-1500. ..... **EACH 189.95**

CC-540-08 Multi-Layered Ceramic Chip Capacitor Kit. 10 pieces each — 54 values Ultra-miniature size. Thin body thickness, light in weight with highly reliable performance 9 × 7.5 × 1.6" styrene case with see thru locking lid, and clearly marked chip types.
777-5408. ..... **EACH 174.95**

CEC-360 Surface Mount Kit. One of a kind organizer kit containing 360 pieces of surface mount electrolytic capacitors. 4 - 50 VDC; 0.1 - 220 MFD. Packed in compartments in clear plastic polystyrene case.
777-0360. CEC-360 ..... **EACH 182.95**

CEC-112 Surface Mount Wound Chip Inductor Kit. Surface mount inductor chips designed for hybrid circuits, high-density circuits and microelectronic devices. Kit offers 7 pieces each of 16 popular values. Kit includes x8/x16 magnifier and special tweezers. All supplied in molded styrene case.
777-0112. CEC-112 ..... **EACH 108.95**



Sprague/ICO-Rally Kits

ICO-Rally and Sprague put convenience at your fingertips. These electrolytic capacitor kits are cased in handy 2, 9 or 15 drawer cabinets, all neatly labeled and filled with a variety of the most popular, frequently-used ratings capacitors. Buying in assortment packs also provides substantial savings as compared to buying individual components. **CABINET SPECIFICATIONS. 2-Drawer Cabinet:** Heavy-gauge steel, blue baked-enamel finish. Blue shatterproof plastic drawers. Pre-printed divider index cards. Measures 30-3/4"W × 5-1/2"H × 13"D. **9-Drawer Cabinet:** Stackable sturdy blue plastic. Clear plastic drawers with adjustable dividers. Pre-labeled index drawer fronts. Measures 9-1/8"W × 4-3/8"H × 6-1/2"D. **15-Drawer Cabinet:** Durable blue metal. Clear plastic drawers with adjustable dividers. Pre-labeled index drawer fronts. Retractable handle for carrying. Measures 10"W × 8"H × 6-1/4"D.

Kits

J-157

Type GA, HK, TS and HY ceramic capacitors. 705 capacitors in 64 ratings in a 2-drawer cabinet. Contains the following: **GENERAL APPLICATION TYPES — 20 5GASS10** (.01μF, 500 WVDC), **10 5GASS20** (.02μF, 500 WVDC), 15 **5GAP10** (.1μF, 500 WVDC), 10 **5GAQ10** (10pF μF, 1000 WVDC), 5 **5GAQ20** (20pF μF, 1000 WVDC), 10 **5GAQ33** (33pF μF, 1000 WVDC), 5 **5GAQ47 (47pF μF 1000 WVDC), 20 5GAT10** (100pF μF, 1000 WVDC), 15 **GAT15** (150pF μF, 1000 WVDC), 5 **5GAT20** (200pF μF, 1000 WVDC), 15 **5GAT22** (220pF μF, 1000 WVDC), 10 **5GAT33** (330pF μF, 1000 WVDC), 15 **5GAT47** (470pF μF, 1000 WVDC), 5 **5GAT50** (500pF μF, 1000 WVDC), 20 **5GAD10** (.001μF, 1000 WVDC), 5 **5GAD15** (.0015μF, 1000 WVDC), 15 **5GAD20** (.002μF, 1000 WVDC), 10 **5GAD22** (.0022μF, 1000 WVDC), 5 **5GAD30** (.0030μF, 1000 WVDC), 5 **5GAD33** (.0033μF, 1000 WVDC), 10 **5GAD47** (.0047μF, 1000 WVDC), 15 **5GAD50** (.005μF, 1000 WVDC), 20 **5GAS10** (.01μF, 1000 WVDC), 20 **5GAS20** (.02μF, 1000 WVDC), 5 **5GAS50** (.05μF, 500 WVDC); **HIGH K TYPES — 10 5HKD10** (.001μF, 1000 WVDC), 10 5HKP10 (.1μF, 500 WVDC), 10 **5HKS10** (.01μF, 1000 WVDC), 10 **5HKS50** (.05μF, 500 WVDC), 15 **5HKSS10** (.01μF, 500 WVDC); **TEMPERATURE STABLE TYPES — 15 10TSD10** (.001μF, 1000 WVDC), 5 **10TSD22** (.0022μF, 1000 WVDC), 5 **10TSQ10** (10pF μF, 1000 WVDC), 5 **10TSQ33** (33pF μF, 1000 WVDC), 5 **10TSQ47** (47pF μF, 1000 WVDC), 5 **10TSQ50** (50pF μF, 1000 WVDC), 10 **10TST10** (100pF μF, 1000 WVDC), 5 **10TST15** (150pF μF, 1000 WVDC), 5 **10TST22** (220pF μF, 1000 WVDC), 5 **10TST27** (270pF μF, 1000 WVDC), 5 **10TST33** (330pF μF, 1000 WVDC), 10 **10TST47** (470pF μF, 1000 WVDC), 5 **10TST50** (500pF μF, 1000 WVDC), 10 **10TST56** (560pF μF, 1000 WVDC), 5 **10TST68** (680pF μF, 1000 WVDC); **MINIATURE GENERAL APPLICATION TYPES** — 25 **TGD50** (.005μF, 100 WVDC), 25 **TGS10** (.01μF, 100 WVDC), 25 **TGS20** (.02μF, 100 WVDC), 25 **TGS50** (.05μF, 100 WVDC), 25 **TGP10** (.1μF, 100 WVDC); **ULTRA MINIATURE TYPES** — 15 **HY520** (.01μF, 25 WVDC), 5 **HY525** (.022μF, 25 WVDC), 5 **HY530** (.033μF, 25 WVDC), 10 **HY534** (.047μF, 25 WVDC), 15 **HY550** (.1μF, 25 WVDC), 5 **HY570** (.20μF, 25 WVDC), 20 **HY735** (.047μF, 25 WVDC), 5 **HY740** (.068μF, 25 WVDC), 15 **HY750** (.1μF, 25 WVDC), 10 **HY820** (.01μF, 25 WVDC), 5 **HY825** (.022μF, 25 WVDC), 5 **HY835** (.047μF, 25 WVDC), 5 **HY838** (.05μF, 25 WVDC), 15 **HY850** (.1μF, 25 WVDC).

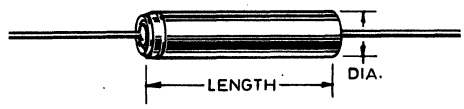
Type TT Tubular Electrolytic Capacitors



TT capacitors are made from very high purity aluminum foil, deep-etched to provide maximum capacitance per unit of volume. Etched cathode construction assures long hum-free operation. Utilizes all-welded construction; exhibits low DCL and ESR. Supplied in aluminum case with insulating sleeve; wire leads 1.25″ min. **Capacitance Tolerance:** ±20%. **Operating Temperature:** −40°C to +85°C.

TA Miniature Aluminum Electrolytic Capacitors

These TA miniature aluminum electrolytic capacitors from Mallory are single section metal tubulars. The TA capacitors are fitted with a rubber anode seal at one end protected by an insulating sleeve. **Specifications. Capacitance Range:** 10 μF to 10,000 μF. **Capacitance Tolerance:** ± 20%. **Operating Temperature:** – 40°C to + 85°C. (Sizes shown are bare; add .02″ to diameter and length for sleeved part).

TC Aluminum Electrolytic Capacitors

TC capacitors are single section metal tubulars with plastic insulating sleeve. Sizes are for bare unsleeved cans; add .015″ to the diameter and .062″ to the length to allow for plastic sleeve. TC capacitors have etched cathode construction and 1.25″ min. tinned leads. **Specifications. Operating Temperature:** – 20°C to + 85°C. **Tolerance:** – 10% to + 100% up to 350 WVDC, – 10% to + 50% for 450 WVDC.

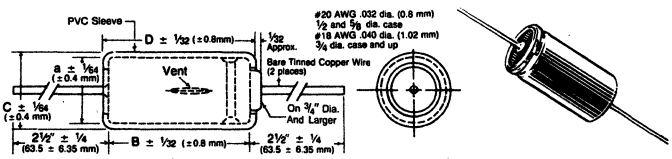
TCG Series



Long Life, Axial Leads. The TCG is a small tubular version of the Mallory Type CG capacitor. The TCG features long life and low ESR and utilizes a PVC insulating sleeve as well as a safety vent on diameters .5 inches and larger. 7th digit of part number indicates tolerance. Lead length is 1.25 inches minimum. **Specifications. Capacitance Range:** 5 to 10,000 μF. **Voltage Range:** 6 to 450 WVDC. **Capacitance Tolerance:** M = ± 20%; T = – 10%, + 50%; U = – 10%, + 75%. **Operating Temperature:** – 40°C to + 85°C.

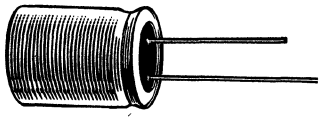
Type VTL Miniature, Single-Ended Electrolytic Capacitors



Miniaturized aluminum electrolytic, single-ended capacitors used a newly developed, high quality aluminum foil. Maximum capacitance in low profile case size. Excellent stability over entire temperature range. – 40°C to + 85°C. **Tolerance:** ± 20%.

Type LP Low Profile Snap-In

Aluminum electrolytic capacitors are designed for quick and easy snap-in insertion in PC board power supplies. Designed specifically for switching power supply applications. Can be utilized in other applications requiring high CV. Low ESR. High ripple capability. **Voltage:** 6.3 WVDC through 250 WVDC. **Tolerance:** ± 20%. **Operating Temperature:** – 40°C to + 105°C.

Monolithic Ceramic Capacitors

CK06

CK05

These Molded Case Monolithic Ceramic Capacitors are constructed to MIL-C-11015. Tolerance ± 10%. **Operating Temperature Range:** – 55°C to + 125°C. Capacitors are .09 ± .01" (2.29 ± .25 mm) thick; lead spacing is .2 ± .015" (5.08 ± .38 mm); lead length is 1.25" (31.75 mm) minimum. Made from ferroelectric, barium titanate material.

CGS Computer Grade Capacitors

High performance computer grade capacitor. Long life expectancy available in high or low post configurations. **Operating Temperature:** – 40°C to + 85°C. Low ESR high ripple capabilities. **Voltage Range:** 10 WVDC 450 WVDC. **Tolerance:** – 10% + 75% up to 150 WVDC, – 10% + 50%, 200-450 WVDC.

CGR Computer Grade Capacitors

Low ESR high ripple current power supply filtering capacitor. Low DC leakage current plus high ripple capability over broad temperature and frequency ranges. The CGR has been successfully utilized as an output capacitor in high frequency switching regulated power suplies. Operating Temperature: – 55° to + 85°C. Tolerance: – 10% to 75% up through 50 V and – 10% + 50% 75 through 100 V.

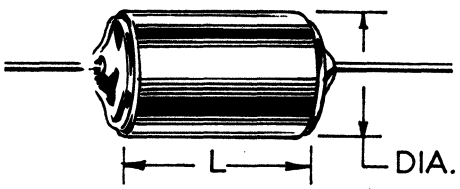
Polystyrene Film Capacitors



WORKING VOLTAGE. SX Types: rated voltage at +40°C, 630 WVDC; rated voltage at +85°C, 500 WVDC. **SXK Types:** rated voltage at +40°C, 33 WVDC; at +85°C, 25 WVDC. **SXL Types:** rated voltage at +40°C, 63 WVDC; at +85°C, 50 WVDC. **SXM Types:** rated voltage at +40°C, 160 WVDC; at +85°C, 125 WVDC.

SX types are manufactured from a unique form of stretched and fused polystyrene to provide the ultimate in temperature stability and humidity protection. Can be used to replace mica, film, paper and ceramic types in most applications. **Insulation Resistance:** SXK and SXL types greater than 100 megohms; SXM and SX types greater than 100,000 megohms. **Power Factor:** Less than .05%. **Dielectric Absorption:** Less than .02%. **Temperature Coefficient:** 33 WVDC, −125 PPM/°C ±75 PPM/°C; 63, 160 and 250 WVDC, (<500 pF) −175 ±75 PPM/°C; (>500 pF) −125 ±75 PPM/°C. **Temperature Range:** −40°C to +85°C; for best operating stability, −25°C to +70°C. **Capacity Tolerance:** SX types, ±5%, SXK, SXL and SXM types, ±2.5%. **Inductance:** Between 10 and 30 nH dependent on length of capacitor body, additional inductance for the leads of about 10 nH/cm depending on the lead diameter. **Leads:** Tinned copper wire; the lead closest to the color band indicating the working voltage is connected to outer foil. Lead length is 1.18″ minimum. Lead diameter is shown in table.

Metallized Polycarbonate

The Series LP66N is an axial leaded metallized polycarbonate capacitor with a flame retardant polyester outer wrap and epoxy endseals. **Temperature Range:** −55°C to +125°C without voltage derating. Series LP66N is commonly used for applications in military and aerospace equipment, in computer systems, industrial control apparatus, radio communications systems, etc. **HIGHLIGHTS. Capacitance:** .01 μF to 10 μF (other cap values available on special order). **Voltage:** 50 V, 100 V, 200 V. **Tolerance:** ±5%, ±10% (other tolerances available on special order).

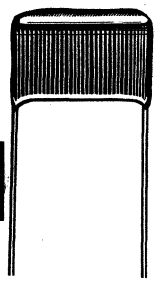
Type M60 Multilayer Ceramic Capacitors



Mallory now offers a new type of Multilayer Ceramic Capacitor. The M60 Series has a very high volumetric efficiency and excellent performance. Newly developed niobium oxide base Y5U (or X7V) dielectric material has twice as high dielectric constant compared to conventional dielectrics.

Features
- ► Highest CV value in compact size
- ► Excellent capacitance stability
- ► Small DC Bias voltage dependency
- ► Ultra high insulation resistance at high temperature

Application
- ► Surge Suppressor for ICs
- ► Filtering for switching power supplies
- ► By-Pass decoupling
- ► Small size electronic equipment

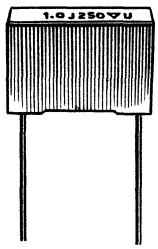
Series 160 Metallized Polyester



The Series 160 is a radial leaded, metallized polyester capacitor, non-inductively wound that is housed in flame retardant preformed case with epoxy fill. Operating temperature is −55°C to 125°C with voltage derating above 85°C.

Highlights
- ► Capacitance: .001 μF to 4.7 μF (Other cap values available on special order)
- ► Voltage: 160 V, 250 V, 400 V, 630 V, 1000 V
- ► Temperature: −55°C to +125°C (With voltage derating above +85°C)

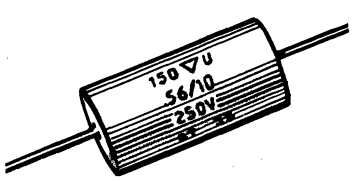
Series 150 Metallized Polyester



The 150 Series is an axial lead, metallized polyester capacitor, non-inductively wound, that is tape wrapped with epoxy end sealed. Temperature range is −55°C to 125°C with voltage derating above 85°C. Suggested applications are blocking, bypass, decoupling, smoothing, timing and tuning.

Highlights
- ► Capacitance: .001 μF to 3.3 μF (Other cap values available on special order)
- ► Voltage: 100 V, 250 V, 400 V and 630 V
- ► Temperature: −55°C to +125°C (With voltage derating above +85°C)

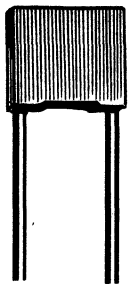
Series 158X Metallized Polyester Suppressor



The Series 158X is a radial leaded metallized polyester, AC line suppression capacitor, housed in a flame-retardant pre-molded plastic case with epoxy resin fill. Temperature range is −55°C to 125°C with voltage derating above 85°C. Capacitors range from .047 μF to 1.0 μF. Lead configuration long 1.18″. Suggested applications are energy storage, filtering, pulse discharge, discrimination, and suppression.

Highlights
- **Capacitance: .01 μF to 1.0 μF (Other cap values available on special order)**
- **Voltage: 250 VAC**
- **Temperature: −55°C to +125°C (With voltage derating above +85°C)**
- **International agency approvals**
- **Short leads available as special order item. Add "S" to part number**

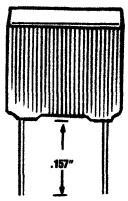
Series 168 Metallized Polyester



The Series 168 is a radial leaded metallized polyester film capacitor. Non-inductively wound. Housed in a molded, flame-retardant case with epoxy fill. Temperature range is −55°C to 125°C with voltage derating above 85°C. Suggested applications are blocking, bypass, decoupling, smoothing, timing and tuning.

Highlights
- **Capacitance: .001 μF to 1.0 μF (Other cap values available on special order)**
- **Voltage: 50 V, 63 V, and 100 V**
- **Temperature: −55°C to +125°C (With voltage derating above +85°C)**

PVC capacitors are made from the highest grade aluminum for the plate material and ample plate separator thickness is used to provide trouble free service. Combinations of polyester film and polypropylene film dielectrics are utilized and wound under controlled atmospheric conditions. Capacitors are conformally coated with a flame retardant epoxy that protects the capacitor from heat of solderring irons and flow soldering. The coating also protects the capacitor from chlorinated cleaning solvents. The outer foil is identified by the black stripe on the body of the capacitor. The wire leads are crimped in swaged end foil. This type capacitor is adaptable to all electronic circuit applications calling for a bypass and coupling. Uses non-inductive winding design. Tinned copper clad steel leads are .032″ (20 AWG). Life test at +85°C is 500 hours with 1.5 times rated VDC.

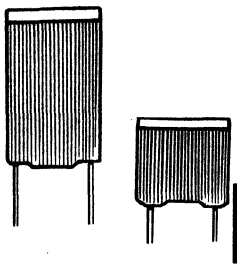
Series 167 Metallized Polyester



The Series 167 is a radial leaded metallized polyester film capacitor, non-inductively wound, that is housed in a pre-molded, flame retardant plastic case with epoxy fill. Temperature range is −55°C to 125°C with voltage derating above 85°C.

Highlights
- **Capacitance: .001 μF to .56 μF (Other cap values available on special order)**
- **Voltage: 63 V, 100 V, 250 V, 400 V, 630 V**
- **Temperature: −55°C to +125°C (With voltage derating above +85°C)**

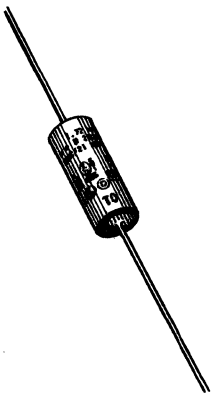
Series 172Y Film-Foil Polypropylene Line to GND Suppression



The Series 172Y is an axial leaded film-foil polypropylene capacitor, with a polyester tape outer wrap and epoxy end fill enclosure. The dielectric material is polypropylene with the electrode being aluminum or tin foil, non-inductively wound. The temperature range is −55°C to +105°C with voltage derating above 85°C. Suggested applications are energy storage, pulse discharge, and suppression.

Highlights
- **International approvals**
- **Capacitance: .0015μ F to .047μ F (Other cap values available on special order)**
- **Voltage: 250 VAC**
- **Tolerance: ±20% (Other tolerances available on special order)**
- **Temperature: −55°C to +105°C (With voltage derating above +85°C)**

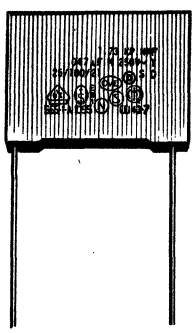
Series 173Y Film—Foil Polypropylene Line to GND Suppressor



The Series 173Y is radial leaded, film-foil polypropylene capacitor, housed in a pre-molded flame retardant case with epoxy end fill. The dielectric material is a polypropylene with the electrode being aluminum or tin foil, and is non-inductively wound. The temperature range is from −55°C to 105°C with voltage derating above 85°C. Suggested applications are energy storage, pulse discharge and suppression.

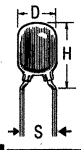
Epoxy Dipped Solid Tantalum Capacitors



Type TDC capacitors offer the long life electrical stability characteristics of solid tantalum at low cost. The tough epoxy coating provides uniform lead spacing and protection against mechanical damage and moisture. These capacitors are ideal for industrial and consumer applications where premium performance, minimum size, and low cost are essential. **Operating temperature:** −55°C to +125°C. The TDC dip-coated solid tantalum capacitor had leads 0.187″ maximum in length. A tolerance of ±20% is indicated by an "M" in the Mfr.'s type number; a tolerance of ±10% is indicated by a "K" in the Mfr.'s type number.

Capacitor Kits In Plastic Storage Cabinets

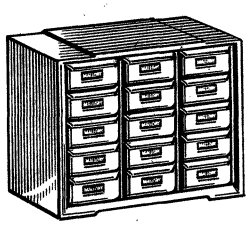
MONO151A Monolithis Capacitor Mallobin
A collection of Monolithic ceramic capacitors with voltages to 200 WVDC. Values from 10 pf to 1 µf.
852-2610. MONO151A ..... **EACH 120.00**

SX301 Polystyrene Capacitor Mallobin
Kit containing two mallobin cabinets with polystyrene film capacitors. Values range from 5 pf to .01 µf.
852-2605. SX301 ..... **EACH 67.23**

SX301A
Assortment of 150 polystyrene film caps in 15 ratings.
852-2606. SX301A ..... **EACH 76.26**

TT151A Mallobin
A selection of axial leaded miniature electrolytic similar to TT151. Voltages to 50 WVDC. Capacitances to 1000 µf.
852-4711. TT151A ..... **EACH 31.27**

TC151A
Assorted axial leaded aluminum electrolytic capacitors with voltages to 600 WVDC. Values from 1 µF to 5,000 µF.
852-2601. TC151A ..... **EACH 36.67**



TDC151A
An assortment of epoxy dipped solid tantalum capacitors. Voltages to 35 WVDC. Values from 1 µF to 150 µF. **Tolerance:** ±10%.
852-2602. TDC151A ..... **EACH 96.22**

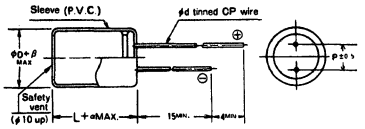
VTL151
A selection of single ended aluminum electrolytic capacitors with voltages to 100 WVDC. Values to 1 µF to 3,300 µF.
852-2603. VTL151 ..... **EACH 49.75**

MTC151
An assortment of horizontal and vertical mount miniature trimmer potentiometers. Values from 100 ohms to 5 megohms.
852-2615. MTC151 ..... **EACH 54.32**

TAC151A Solid Tantalum
An assortment of 78 axial leaded molded solid tantalum capacitors. Six each of 24 popular ratings from 1 µf to 39 µf. Voltages to 50 WVDC.
852-2620. TAC151A ..... **EACH 120.15**

TSC151 Solid Tantalum Surface Mount
An assortment of solid tantalum surface mount devices. Ten each of 20 popular ratings from 1 µf to 68 µf. Voltages to 50 WVDC. Manufactured to EIA IS28.
852-2625. TSC151A ..... **EACH 187.98**

UVX Series Capacitors



UVX miniature electrolytic capacitor for general purpose features reduced case size anti-solvent through 100 volts. The VX series is most suitable for electronic equipment where a smaller case size is required. The small case size makes it ideal for use with high speed automatic insertion equipment. Load life of 2000 hours at 85°C. Units with ϕ 6.3 mm or more are provided with our unique safety case vent. **Capacitance Tolerance:** ±20% at 120 Hz. 20°C. **Operating Temperature Range:** – 40° approximately + 85°C.

TLB Series Capacitors

LB Compact Series miniature aluminum electrolytic capacitors provide higher component density in solid-state circuitry. Features further miniaturization of both body length and diameter for greater CV density when compared to conventional type aluminum electrolytic lines. **Capacitance:** ±20%. **Operating Temperature Range:** – 40°C approximately + 85°C.

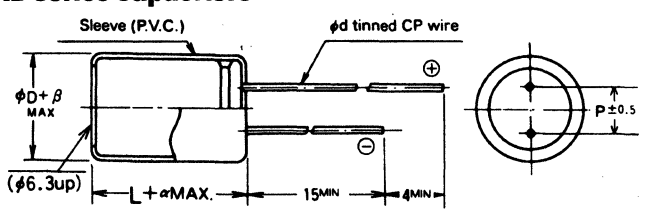
UKB Series Capacitors



UKB low leakage current electrolytic capacitor features anti-solvent. The KB series will exhibit only a slight increase in their leakage current when subjected to no load at high temperature or shelved for long periods of time at normal temperature. Standard units have a capacitance tolerance of ±20%, but units with ±10% tolerance are also available on request. The Nichicon Safety Vent is standard on capacitors with diameters ≥ 10 mm. **Capacitance Tolerance:** ±20% (M) at 120 Hz. 20°C **Leakage Current:** After 2 minutes of application at rated voltage, leakage current will be no more than 0.002 CV or 0.4μA, whichever is greater. **Operating Temperature Range:** – 40 approximately + 85°C.

Capacitors

Centralab General Purpose capacitors provide a wide choice of 1000 Volt DC rated units for general purpose applications. These high dielectric ceramic discs offer small physical size, tighter tolerances and a rugged humidity resistant coating. Capacitors are primarily designed for non-critical coupling, bypass and filter applications found in all types of entertainment, industrial and medical equipment. **Capacitance Tolerance:** ±10%, (*) ±20% or (†) +100 −0% (GMV) or (‡) +80 −20% as listed. **Working Voltage:** 1000 volts DC except (‡) 600 DC. **Dielectric Strength:** 200% of rated working voltage. **Operating Temperature Range:** −55°C to +85°C. **Encapsulation:** Phenolic coated, wax impregnated. **Insulation Resistance:** 10,000 megohms minimum. Tested at 500 volts DC maximum. **Marking:** Centralab diamond, capacitance value, capacitance tolerance or code letter (D = ±0.5 pf, K = ±10%, M = ±20%, P = +100 −0%) working voltage and EIA temperature characteristic code as space permits.

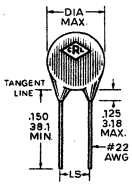
Series DD High-Voltage Disc Ceramics



Designed for noncritical coupling, by-pass and filter applications. **Operating Temperature Range:** −55° to +85°C. Tinned wire leads. **Encapsulation:** Phenolic coated, wax impregnated. **Dielectric Strength:** 200% of rated working voltage. These high dielectric ceramic discs offer small size, tighter tolerances and a rugged humidity resistant coating. **Weight:** 2 oz.

Low-Voltage Ceramic Disc Capacitors

Working voltage is 50 VDC to 150 VDC. Tolerance of type DDA is −30% to +80%. Tolerance of type CK is −20% to +80%. Tolerance of type DC is ±20%. Tolerance of type DDM is −40% to +60%. Dielectric strength is 250% of rated marking voltage. **Operating Temperature Range:** −55° to +80°C. All have Z5V characteristic +22% to −82% max. capacitance change from +25°C reading over temperature range of +10°C to +85°C. **Weight:** 2 oz.

UK Miniature Disc Capacitors

Centralab's Ultra-Kap capacitors provide many advantages when compared to ordinary ceramic capacitors. Their unique semiconductor design allows for the maximum in capacitance while retaining the miniature size required for today's low voltage applications. Dissipation factor at 1 kHz, 5-10%. **Tolerance:** 10 and 20 WVDC, −20% to +80. 12, 16, 25 and 50 WVDC tolerance is ±20%. Tinned wire leads #22 AWG. **Weight:** 1 ounce.

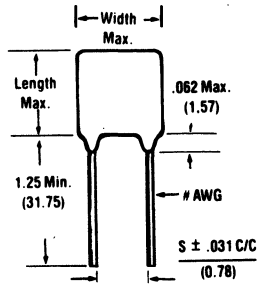
* Size Chart. Code based on first 2 digits in Mfr.'s Type No.



The CW-Series capacitors are designed to provide reliable temperature stable performance over an extremely wide temperature range in bypass, coupling and blocking operations. The CY- and CZ-Series capacitors are ideally suited for a wide range of non-critical general purpose bypass, coupling and filtering applications. **Note:** CN types have COG (NPO) temperature characteristic and are ideally suited for RC network, pulse and RF tuned circuit applications where extremely stable performance is required.

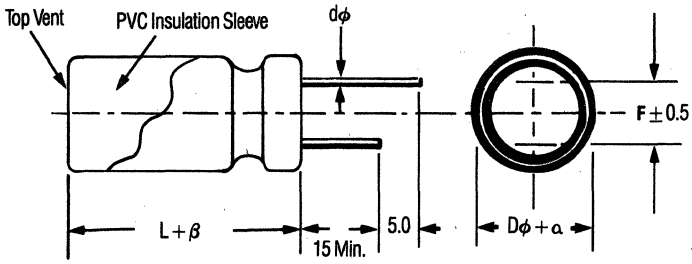
Ceramic Disc Capacitor Kit With Metal Storage Cabinet

Kit — 60D Disc Capacitor Kit. Contains 245 of the most widely used general purpose disc capacitors in 600 and 1000 WVDC units. For bypass and noncritical coupling applications. Includes five each: 5, 10, 15, 20, 22, 25, 33, 47, 50, 68, 120, 150, 180, 220, 250, 270, 300, 330, 390, 470, 500, 680, 820, 1500, 2200, 3000, 4700, 6800, 20,000, 50,000 pF. Ten each: 100, 200, 2000 pF. Fifteen each: 5000 pF. Twenty-five each: 1000, 10,000 pF. Sturdy 15-drawer cabinet.

748-0765 ..... **EACH 150.00**

NRSA

NRSA industrial grade miniature aluminum electrolytic capacitors cover a wide variety of applications with economical pricing. The NRSA series features the latest generation of miniature sizing, anti-solvent end seals and long operating life at 85°C (2000 hours for 5-8 ϕ sizes and 4000 hours for 10 ϕ sizes). Capacitance tolerance is ±20% at 120 Hz and operating temperature range is −40°C to +85°C.



Case Dia. (Dϕ)	Leads Dia. (dϕ)	Lead Spacing (F) (Nominal)	Dim. α	Dim. β

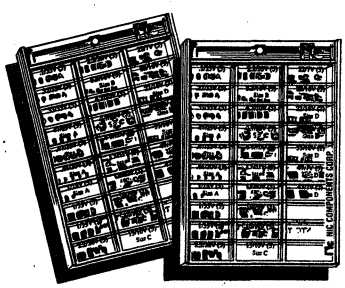
Surface Mount Capacitor Kits



NIC's Kits offer a wide variety of values, sizes and characteristics in convenient Kit format. These Kits are ideally suited for designing and prototyping your circuit boards, as well as testing component performance during your production processing. Each Kit comes with product specifications and easily identifiable compartments.

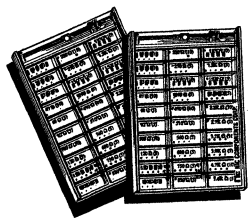
NMC 1206 Kit
Multi-layer ceramic chip capacitors in 1206 sizes. **Capacitance Range:** 10pfd to .22mfd. **Working Voltage:** 50WVDC. **Temperature Characteristics:** NPO, X7R, Y5V. **Terminations:** Nickel barrier. **Quantity:** 200 pieces total. 5 each—22pf, 33pf, 150pf, 330pf, 680pf, .0033mf, .0068mf, .033mf, .068mf, .22mf. 10 each—10pf, 47pf, 100pf, 220pf, 470pf, .0022mf, .0047mf, .022mf, .047mf. 20 each—.001mf, .01mf, .1mf
874-0010 ..... **EACH 35.00**

NMC 0805 Kit
Multi-layer ceramic chip capacitors in 0805 sizes. **Capacitance Range:** 10pfd to .1mfd. **Working Voltage:** 50WVDC. **Temperature Characteristics:** NPO, X7R, Y5V. **Terminations:** Nickel barrier. **Quantity:** 200 pieces total. 5 each—22pf, 33pf, 150pf, 680pf, .0033mf, .0068mf, .033mf, .068mf. 10 each—10pf, 47pf, 100pf, 220pf, 470pf, .0022mf, .0047mf, .022mf, .047mf. 20 each—.001mf, .01mf, .1mf
874-0015 ..... **EACH 35.00**

NFC Kit
Molded, metallized polyester film chip capacitors. **Capacitance Range:** .01mfd to .22mfd. **Working Voltage:** 25WVDC to 630WVDC. **Temperature Range:** −40°C to +85°C. **Tolerance:** ±10% (K). **Quantity:** 60 pieces total. 10 each—.01mf, .022mf, .033mf, .047mf, .1mf, .22mf
874-0020 ..... **EACH 60.00**

NTC Kit
Resin molded solid tantalum chip capacitors. **Capacitance Range:** 0.1mfd to 47mfd. **Working Voltage:** 7WVDC to 35WVDC. **Temperature Range:** −55°C to +125°C. **Tolerance:** ±20% (M). **Quantity:** 150 pieces total. 5 each—.1mf, .22mf, .33mf, .68mf, 3.3mf, 6.8mf, 15mf, 33mf, 47mf. 10 each—.47mf, 2.2mf, 22mf. 15 each—10mf. 20 each: 1mf, 4.7mf.
874-0025 ..... **EACH 135.00**

Surface Mount Resistor Kits



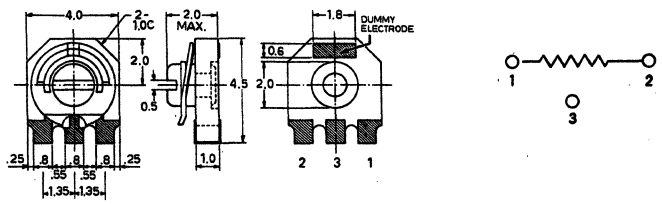
NIC's Kits offer a wide variety of values, sizes and characteristics in convenient Kit format. These Kits are ideally suited for designing and prototyping your circuit boards, as well as testing component performance during your production processing. Each Kit comes with product specifications and easily identifiable compartments.

NSMN-C Kit
Thick film resistor network in small-outline package, 16 pins. **Circuit Type:** Common. **Resistance Range:** 100 ohms to 220 K ohms. **Power Rating:** 1/2 watt package. **Maximum Working Voltage:** Rated power × resistance value or 50 V whichever is less. **Tolerance:** ±2% (G). **Quantity:** 50 pieces, 20 resistance values.
874-0030 ..... **EACH 72.00**

NSMN-I Kit
Thick film resistor network in small-outline package, 16 pins. **Circuit Type:** Isolated. **Resistance Range:** 100 ohms to 220 K ohms. **Power Rating:** 1/2 watt package. **Maximum Working Voltage:** Rated power × resistance value or 50 V whichever is less. **Tolerance:** ±2% (G). **Quantity:** 50 pieces, 20 resistance values.
874-0035 ..... **EACH 72.00**

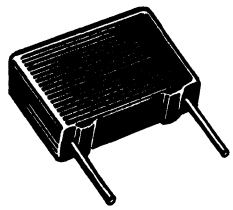
NRC 18 Kit
Thick film chip resistors in 1206 size (in two plastic cases). **Resistance Range:** 10 ohms to 1 Megohm. **Power Rating:** 1/8 watt at 70°C. **Working Voltage:** 200 V. **Tolerance:** ±5% (J). **Quantity:** 365 pieces, 60 resistance values.
874-0040 ..... **EACH 48.00**

NRCT 43BM Cermet Trimmer Resistor Kit



Cermet Trimmer Resistor Chips: 3 terminals minus driver. **Power Rating:** 1/2 watt at 70°C. **Tolerance:** ±25%. **Temperature Coefficient:** ±300 ppm/°C. **Resistance Range:** 500 ohms to 2.2 megohms. **Quantity:** 36 pieces of 12 popular values.
874-0050 ..... **EACH 48.00**

MKT Metallized Polyester Series

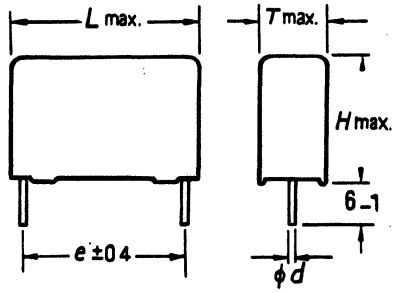


- **Excellent pulse handling characteristics**
- **Superior current absorbtion during prolonged spike periods**
- **Tighter tolerances**
- **Enhanced protection from voltage/current/temperature overloads even if they occur simultaneously**
- **High capacitance-to-volume ratio**

Self-healing capacitor with polyethyleneterephthalate dielectric. Encapsulated in a flame-retardant rectangular plastic case (in accordance with UL 94 V-0). Epoxy resin sealed for humidity resistance. For improved solderability, the package is provided with spacers. Connections: parallel leads, tinned, plug-in in the lead spacing. Particularly suited for spacesaving assembly at high packing density on any pc board.

Today's voltage-sensitive electronic designs require capacitors that can stand up to the rigors of overload punishment and keep on performing. That's why at Siemens, we've developed a broad line of rugged, self-healing stacked-film capacitors. Our stacked-film capacitors are the high reliability alternative to conventional capacitor technology. Advanced metallized film design ensures consistent, quality performance.

Capacitors with 5 mm and 7.5 mm lead spacing, as well as capacitors with a lead spacing of 7.5/5 mm (leads crimped to a lead spacing of 5 mm) are also available on continuous tape. For taping specifications and ordering information refer to closest Allied Sales Office.



L	Lead spacing "e"	ϕd
7.5	5.0	0.5
10.0	10.0	0.6
13.0	10.0	0.8
18.0	15.0	0.8
27.0	22.5	0.8
31.5	27.5	0.8

Voltage Ratings	
DC	AC
63 V	40 V
100 V	63 V
250 V	160 V
400 V	200 V
630 V	220 V

Solid Tantalum Capacitors, Type 150D

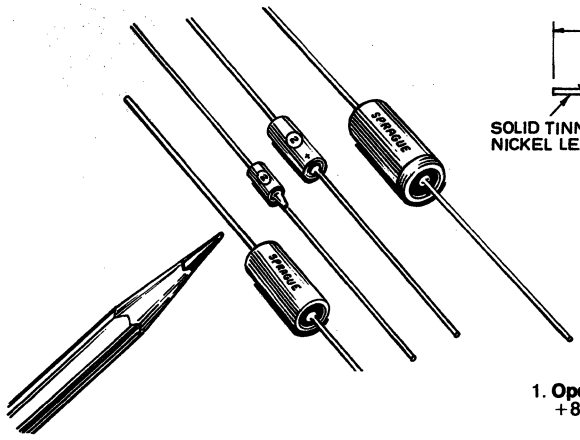
- Hermetically sealed metal cases.
- Recommended for industrial, military, and commercial applications.
- Capacitors listed have outer plastic-film insulation.
- Capacitors listed have capacitance tolerance of ±10%.
- Operating Temperature Range: −80°C to +85°C; to +125°C with voltage derating.

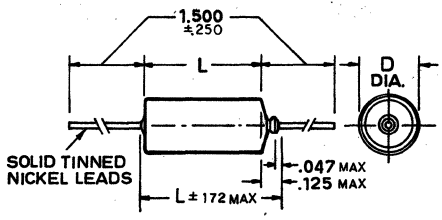
4

Dimensions

Size	D	L
A	0.135″	0.286″
B	0.185″	0.474″
R	0.289″	0.686″
S	0.351″	0.786″

For quantities in excess of 100 pieces, call for pricing and delivery at 1-800-433-5700.





1. **Operating Temperature Range:** −80°C to +85°C; to +125°C with voltage derating.

Cera-Mite® Ceramic Capacitors

Tiny, tough and dependable. Fine replacement for molded micas and tubular ceramics. Heavy moisture-proof insulating coat. For 85°C use.

Hypercon® Ceramic Discs

Ultraminiature discs for transistorized circuitry, bypass and coupling. Especially suited for any low voltage use where high capacitance and low power factors are important.

Type 199D Tantalex® Resin-Coated Solid-Tantalum Capacitors

Designed for use in entertainment and commercial equipment and many other minimum-cost applications. Priced competitively with any other capacitor of this type, domestic or offshore. Capacitors listed below are standard stock items; numbers ending with A1 have lead spacing of .100". Other lead styles available on special order. Drawing below shows those styles available. **Tolerance:** ±20%; for ±10% tolerance, change 9th character in Sprague number from 0 to 9; prices available on request. **Operating Temperature Range:** −55°C to +85°C.

Type TE LITTL-LYTIC Electrolytics

- Proven dependable performance in industrial and electronic equipment with either transistor or modified electron-tube circuits.
- All terminal connections welded, eliminating possibility of "open" or intermittent contacts occassionally found in pressure joints of conventional capacitors
- Superior in size, performance characteristics, shelf life, construction, reliability.
- Metal-encased, with clear plastic outer insulating sleeve.
- Excellent circuit performance when used as coupling capacitors.
- Minimum drain and long battery life when used in battery bypass applications.
- Better performance under life test than most miniature aluminum electrolytic capacitors.

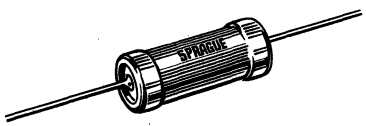
192P Pacer Filmite "E" Capacitors



Extended foil film sections are terminated in end caps with wire leads, to assure the best possible non-inductive section. Protected by heat shrinkable plastic sleeve or epoxy coating. Designed for operation to 85°C. **Tolerance:** ± 10%.

Type 715P Orange Drop Polypropylene Dipped Tubulars

- Conformly coated with flame-retardant epoxy which provides protection from humidity and mechanical damage
- Furnished with 1.250" long "Hockeystick" crimped leads

PERFORMANCE CHARACTERISTICS. Operating Temperature Range: −55° to +85°C; to +105°C with 50% voltage derating. **Capacitance Tolerance:** ±5%. **Dielectric Strength:** Unit rated up to 800 volts shall withstand a d-c potential of 250% of rated voltage for not more than 5 seconds. Units rated above 800 volts—200%.

Type TVA ATOM® Tubular Electrolytic Capacitors

Polarized Single Units

Smallest standard tubular capacitors available. High dependability with lower leakage currents and long shelf life. Withstands high temperatures, ripple currents, and surge voltages. Capacitors rated at 100 WVDC or less operate at – 40° to + 85°C; above 100 WVDC, – 20° to + 85°C. Metal case with thermoplastic outer insulating sleeve. *NOTE: Sizes subject to change without notice.*

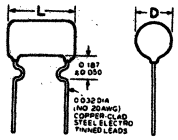
Type PS Orange Drop Dipped Tubular Capacitors



- Double dipped in bright orange epoxy resin — beats heat and humidity
- Outside foil on all units identified by black striping
- Crimped wire leads for correct spacing when mounted on printed wiring boards
- Dual Dielectric (Polyester Film-Paper) solidly impregnated with exclusive HCX — Produces rock-hard capacitor section
- Other values and voltages available upon request

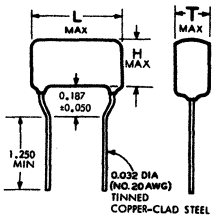
Type 225P Orange Drop® Polyester Capacitors



Type 225 capacitors are designed for PC boards and are furnished with radial leads to facilitate insertions. Used in TV sets, radios, instruments and commercial electronic equipment. Sections are wound from polyester film and thin gauge foil. Wax-free conformal epoxy coating protects against moisture. For operation up to 85°C. Tolerance ± 10%.

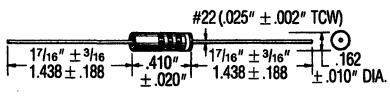
Subminiature Shielded RF Inductors



Epoxy molded and shielded for minimum coupling in high-density package. Meet electrical and environmental requirements of **MIL-C-15305C, Grade 1** (resistance to moisture and immersion). **Class B** (– 55° to + 125°). For altitudes to 70,000 feet. **Tolerance:** ± 10%. **Less than 3% coupling. Low DC resistance. Dielectric strength:** 700 V rms. **Size:** 0.162. ± .010 dia. × 0.410" ± .020 long. AWG #22 leads. **Weight per 100:** 3-1/2 oz.

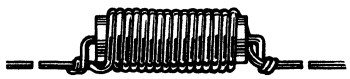
Heavy Duty Hash Chokes



High current hash filter chokes, molded powdered iron or ferrite form for relatively high inductance. Core is 1 1/4" long (31.75 mm). **Tolerance:** ± 20%.

Subminiature RF Chokes

► **Moisture Resistant**

Iron core RF chokes are designed to meet demand for high-reliability ultraminiature components. Suited to network and filter design, delay lines, and computer applications.

RF Chokes With Axial Leads

These chokes cover an inductance range from 1 microhenry to 50 millihenries. Either single layer or 3-pi universal winding is used to insure low distributed capacity. Chokes are wound on low-loss molded phenolic or powdered iron core forms and are impregnated with a moisture and fungus-resistant varnish. Leads are 1-1/2" (38.1 mm) long.

Single Layer Windings

Phenolic Core: 3/16" (4.76 mm) diameter × 3/4" (19.05 mm) long. **Tolerance:** ± 10%-*20%.

5500/5600 Series

High saturation flux density ferrite rods (5500) and ferrite bobbin (5600). Chokes are ideal for all EMI/RFI filtering applications. They are also suitable for energy storage inductors in switching power supplies. Covered with shrink tubing and varnish impregnated. Printed Circuit mounting.

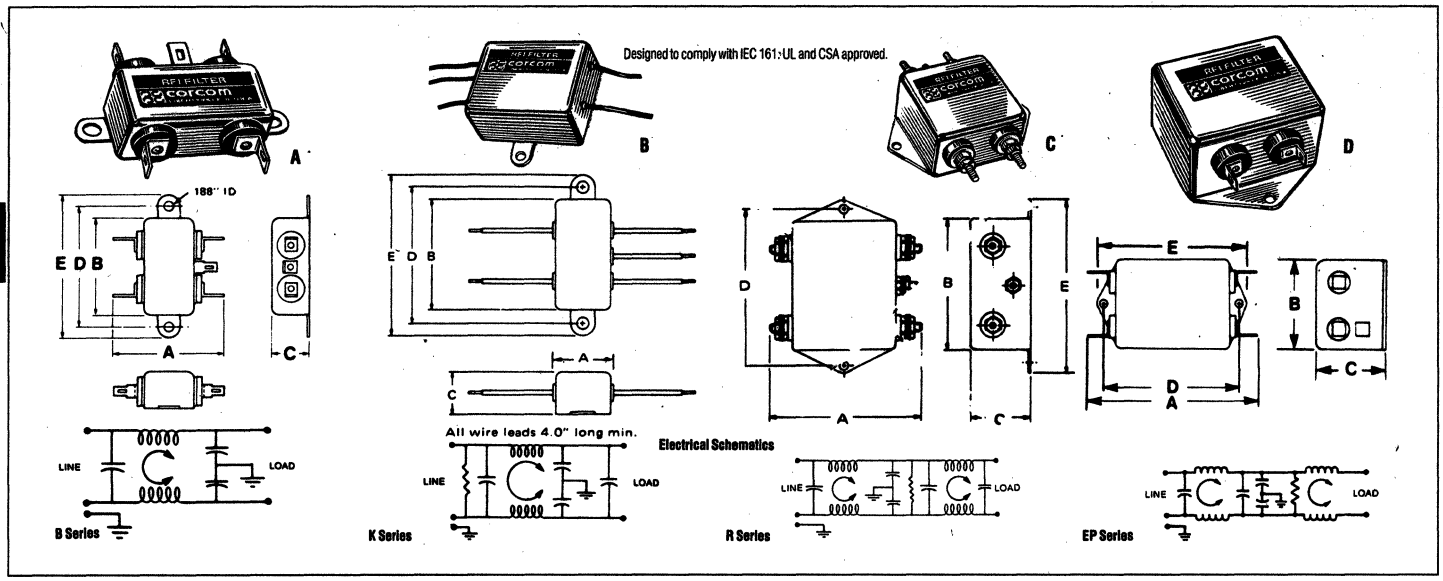
*Inductance measured @ 1 kHz with 0 Amps D.C. current. Typical inductance change is less than 5% @ maximum rated current. Leads: 1" long. Tinned within 1/8" of body.



B Series Filters

1 to 10 Amps; 115/250 Volts AC; 60 Hz

B Series RFI power line filters are general purpose low cost filters which provide effective line-to-ground RFI filtering in most applications. Max. leakage current (line-to-ground) .5 mA at 115 VAC 60 Hz, 1.0 mA at 250 VAC 50 Hz. Hipot rating (1 minute) line-to-ground, 2250 VDC; line-to-line, 1450 VDC. **Operating Frequency:** 50-60 Hz. **Rated Voltage:** 115/250 VAC.

K Series Filters

1 to 20 Amps; 115/250 Volts AC, 50-60 Hz

K Series RFI filters are general purpose filters which provide line-to-line filtering in addition to normal line-to-ground attenuation of RFI. Particularly suited where pulsed, continuous and/or intermittent RF interference is present in your application. Max. leakage current (line-to-ground) .5 mA at 115 VAC 60 Hz, 1.0 mA at 250 VAC 50 Hz. **Hipot Rating (1 minute):** 2250 VDC line-to-ground, 1450 VDC line-to-line. **Operating Frequency:** 50-60 Hz.

R Series Filters

1 to 20 Amps; 115/250 Volts AC; 50-60 Hz

The dual-T filter design of the R Series makes these filters effective with low impedance motor loads. The 1- and 3- Amp versions have an insertion loss as low as 54 dB at 150 kHz. These dual-section filters provide positive RFI control of line-to-line as well as line-to-ground noise. Small in size, designed for computer peripheral and a wide variety of other critical applications. Max. leakage current (line-to-ground) .5 mA at 115 VAC 60 Hz, 1.0 mA at 250 VAC 50 Hz. **Hipot Rating (1 minute):** 2250 VDC line-to-ground, 1450 VDC line-to-line.

EP Series Filters

3 to 10 Amps; 115/250 Volts AC; 50-60 Hz

EP Series provides high insertion losses for both line-to-ground and line-to-line RFI and are specially designed for noise suppression in switching power supply applications. Max. leakage current (line-to-ground) .25 mA at 115 VAC 60 Hz; .40 mA at 250 VAC 50 Hz. **Hipot Rating (1 minute):** 2250 VDC line-to-ground, 1450 VDC line-to-line.

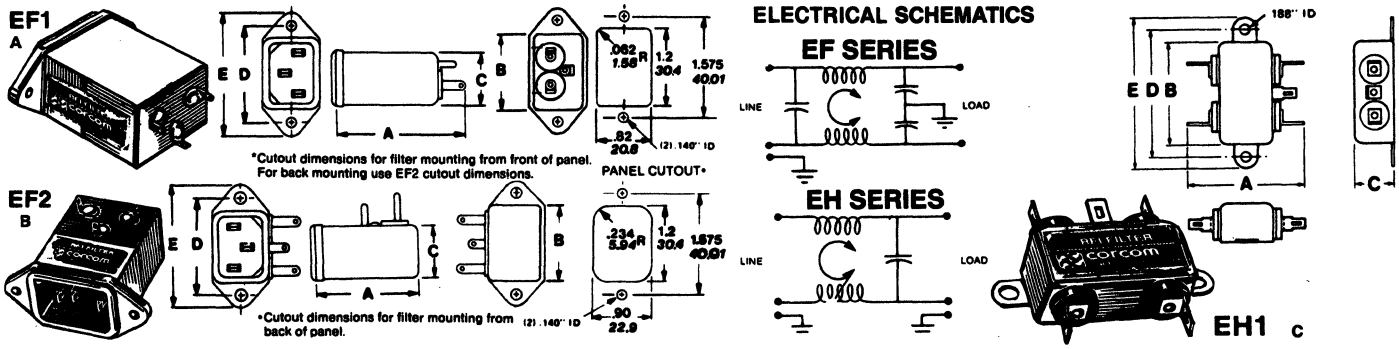
Series Filters



EF Series 1 to 6 Amps; 115/250 Volts, 50-60 Hz

EF Series RFI filters are compact, internationally approved line-to-ground units incorporating the special IEC (International Electrotechnical Commission) power line connector. This connector has 4 mm minimum pin spacing and complies with all current and proposed requirements for use with industrial and test equipment in the European market where a detachable power cord is part of the equipment design. **Max. leakage current (line-to-ground):** .25mA @ 115VAC 60 Hz, .40mA @ 250 VAC 50-60 Hz. **Hipot rating (1 minute):** 2250 VDC line-to-ground, 1450 VDC line-to-line. Meets IEC, BSI, VDE and CSA requirements for data processing equipment. Models with the **F suffix** utilize 2″ fastons on the load side in place of the standard solder terminals. Solder Terminals are shown in the drawings above.

EH Series 6 Amps; 115/250 Volts AC; 50-400 Hz

EH Series filters are extremely low leakage devices designed for health care equipment. All models use 2-inch fastons for load side connections. **Max. leakage current (line-to-ground):** 2 microamps @ 115 VAC 60 Hz; 5 microamps @ 250 VAC 50 Hz. **Hipot rating (1 minute):** 2000 VAC line-to-ground, 2150VDC line-to-line. **Operating frequency:** 50-400 Hz.

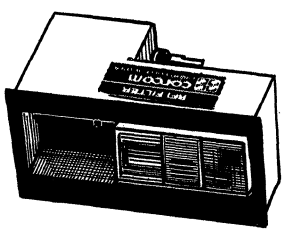
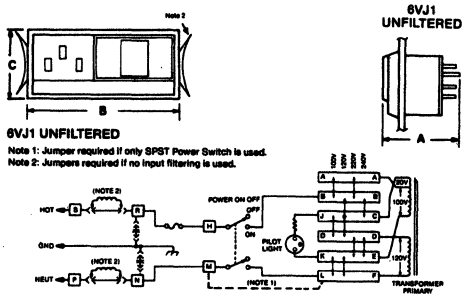
J Series—Voltage Selecting and Fused Connector

Specify line cord #80-1245 to mate with IEC connector.





6 Amps; 100-240 Volts AC, 50-400 Hz

J Series Voltage Selecting and Fused Connector is designed for the equipment manufacturer who markets a product worldwide. While incorporating a fuse holder and a standard IEC power line connector, the J Series also features a unique voltage selector card which enables an easy means to change transformer primary connections. Integral fuse holder, line side, accepts .25″ × 1.25″ fuse. Meets UL/IEC requirements per CEE publication 22 Type VI. Connector back terminals suitable for soldering, wire wrapping or crimp-on lugs such as MOLEX #2123. **Max. leakage current (line-to-ground):** @ 250 VAC 50 Hz, 5 microamps (6VJ1); 0.5mA (6J4). **Hipot rating (1 minute):** 2000 VAC (6VJ1) and 2250 VDC (6J4) line-to-ground; 2150 VDC (6VJ1) and 1450 VDC (6J4)line-to-line. Construction meets IEC 161 category—10/70/21. The J1 version is unfiltered while the J4 model houses a built-in filter.

EMI-Filtered Power Cord: Combicord®

General Description. The Feller Combicord represents a completely new approach to the increasingly important technology concerned with electromagnetic compatibility. The Feller Combicord consists of a shielded detachable cordset incorporating the filter components. It is available as a detachable or permanently wired power cord with NEMA, SCHUKO or SEV line plugs and an IEC 320 female connector on the detachable version. The shielded supply cord is a SVT 3 × 18 AWG on the NEMA version and a HO3VV-F3G on the SCHUKO and SEV version.

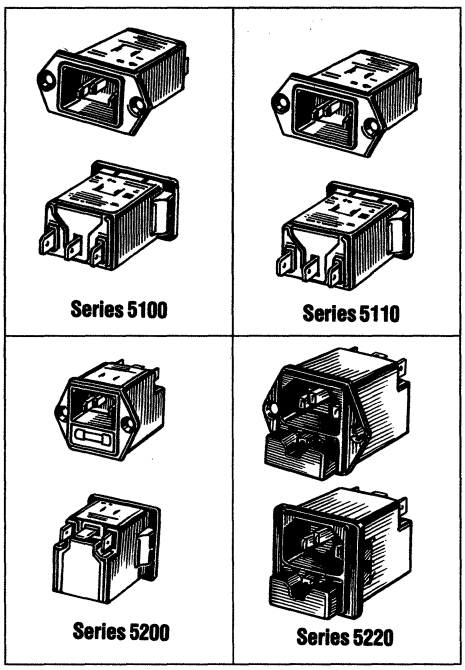
Power Line Filters With AC Inlet



General Description

The new Feller power line filter is based on a modular technology which allows economical production and meets high quality requirements. It consists of a molded filter module which is attached to the appliance inlet and fitted with a rustfree housing. The new filter line includes models for: screw mounting, snap-in mounting for panel thicknesses from 0.8-3.0 mm, and medical applications with low leakage current.

NOTE: Add to Stock Number in place of X: 2 for Screw Mount or 4 for Snap-in. *For Medical Applications.

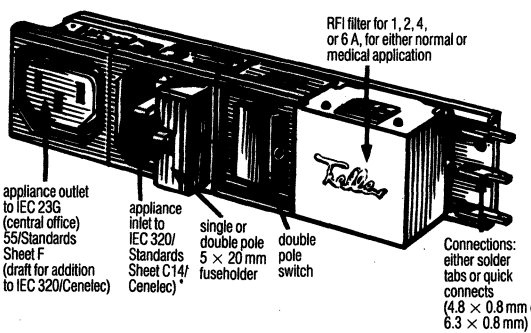
RFI Power Line Filters: FELCOM®



General Description. Felcom (Feller Combination Module) is a combination of efficient individual components. These components are mounted on a printed circuit board which provides the mechanical and electrical connection as well as the connection to the appliance itself. The conductive base of the combination, or printed circuit board, is covered to prevent inadvertent contact. This cover also bears the combination's ratings and schematics. Felcom is available as a snap-in version for six different panel thicknesses. You will only have one component to mount in your equipment. The wiring is already done for you. Felcom...cuts costs, saves time, and is available in any combination.

Requires No External Power, Batteries or Electricity

H5010 Headset With Noise-Shielded Microphone. A push-to-talk switch is located on the microphone shield. Recommended for noise levels to 125 dB. MSHA Approval Number 9B-67.
535-0240. Model H5010 ..... **EACH 295.00**

H5030 Headset With Acoustic Boom. Boom allows hand-free operations. The symmetrical design allows the headset to be worn with boom on either side of head. Recommended for noise levels to 100 dB. MSHA Approval Number 9B-67.
535-0185. Model H5030 ..... **EACH 230.00**

H5090 Headset With Acoustic Boom. Single ear version of model H5030. Recommended for noise levels to 80 dB.
535-0400. Model H5090 ..... **EACH 150.00**

H5020 Headset With Noise-Shielded Microphone. Behind-the-head version of model H5010. Has soft, adjustable overhead strap that fits under safety cap. Recommended for noise levels to 125 dB. MSHA Approval Number 9B-67.
535-6000. Model H5020 ..... **EACH 285.00**

H5040 Headset With Acoustic Boom. Behind-the-head version of model H5030. Has soft, adjustable over-head strap that fits under safety cap. Recommended for noise levels to 100 dB. MSHA Approval Number 9B-67.

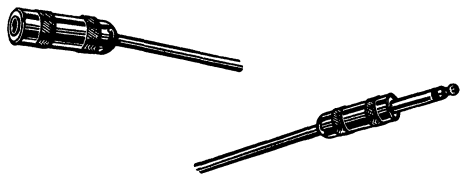
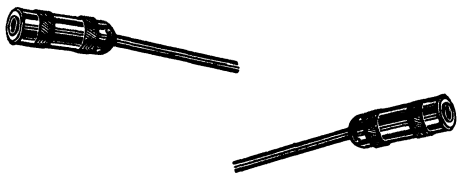
Accessories

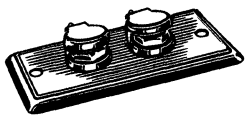
Extension Cords. Two conductor cords with phone plug and phone jacks. Extension cords are used to extend distance from jumper cord, jack plate or junction box. May be coupled for longer length. Number after dash indicates cord length.
535-0012. C51-12 ..... **EACH 39.00**
535-6005. C51-25 ..... **EACH 49.00**
535-0074. C51-50 ..... **EACH 74.00**
535-0075. C51-100 ..... **EACH 121.00**





Jumper Cords. All that is needed to complete a two-man VOICE POWERED System. It is a two conductor cord with 2 phone jacks to plug into each headset. For longer systems, extension cords may be added. Number after dash indicates cord length.
535-0059. C52-12 ..... **EACH 39.00**
535-6010. C52-25 ..... **EACH 49.00**
535-0064. C52-50 ..... **EACH 74.00**
535-0065. C52-100 ..... **EACH 121.00**

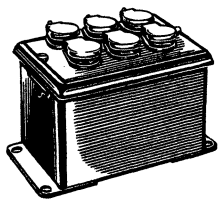
Adapter Cord Assembly. Jack to accept headset plug and terminates in two vinyl insulated clips. Overall length 12 inches.
535-5401. Model C5401 ..... **EACH 32.00**



Jack Plate. Two outlets with C-11 jacks. Receives plug from headset or extension cord. Two outlet faceplate has weatherproof covers and fits standard electrical box. Can be used for permanent, multiple station installations. Electrical box not included.
535-0040. Model M5002 ..... **EACH 28.00**

Six Plug Junction Box. Heavy duty metal box has weatherproof covers and takes up to six plugs from headsets or extension cords.
535-6015. Model M5006 ..... **EACH 126.00**

Amplifier/Belt Station. For use with Models H5030, H5040 and H5090 headsets, The amplifier increases the volume of transmission from the user's headset by up to 30 dB. Includes an adjustable talk level and a Push-To-Amplify switch. Completely portable (comes with self-contained 9 V battery). Adapter cord assembly included.
535-6110. Model M5410 ..... **EACH 325.00**

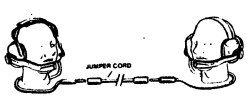


Voice Powered Communication Kit

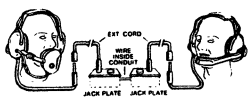
Ready-to-use, easy-to-store, two-man Communication System. Complete with carrying case, kit includes two H5040 headsets, two C5401 Adapter Cords and a C52-50 Jumper Cord. Ideal for use in pulling and pairing wires, continuity checks (ringing out wires), calibrating instrument readings, etc.
535Q6025. Six Piece Kit K5501 ..... **EACH 495.00**

Carrying Case. Headset carrying case (case only) available as a separate item.
535-6020. Model 9143P-26 ..... **EACH 30.00**

Typical Applications

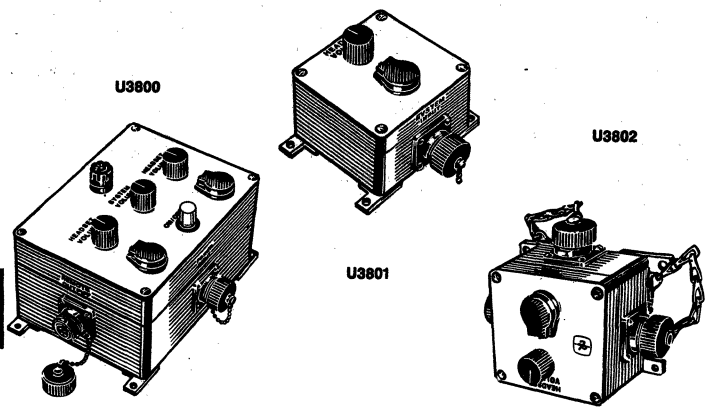


1. Two-Man System. Jumper cord, when used between any two VOICE POWERED Headsets, makes a complete communication system. Extension cords may be added to increase length.



2. Multiple-Station Installation. Using any number, jack plates may be wired with two-conductor, unshielded cable to form a network of fixed stations. Headsets or extension cords plug into these jack plates to complete the system.

Series 3800 Stations



U3800 Master Station
Automatically adjusts to 12 VDC or 24 VDC power source. System On/Off, volume controls, power input, remote outputs, 2 headset jacks. All weather-tight in heavy gauge polycarbonate housing. Less than 300 milliamps current draw.
535Q6030. Model U3800 ..... EACH 495.00

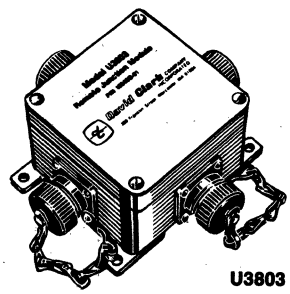
U3801 Remote Headset Station
Receives power from U3800 via C38—jumper cord or other Remote Headset Station. Has headset jack with listen volume control. Same housing and weather-tight design as Master Station.
535Q6035. Model U3801 ..... EACH 162.00

U3802 Remote Headset Station
Same features as U3801 but has two outputs for connecting jumper cords from additional Remote Headset Stations.
535Q6040. Model U3802 ..... EACH 215.00

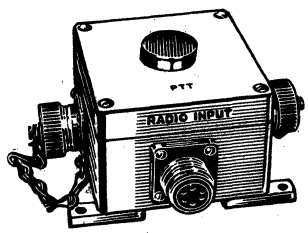
Series 3800 Modules

U3803 Remote Junction Module
Passive Module with one input and three outputs for connecting jumper cord to additional Remote Headset Stations.
535Q6045. Model U3803 ..... EACH 194.00

U3810 Radio Interface Module
Provides interface between mobile radio and intercom system. Has radio push-to-talk button and outputs for remote push-to-talk, plus connectors for Master Station and Mobile Radio.
535Q6050. Model U3810 ..... EACH 240.00

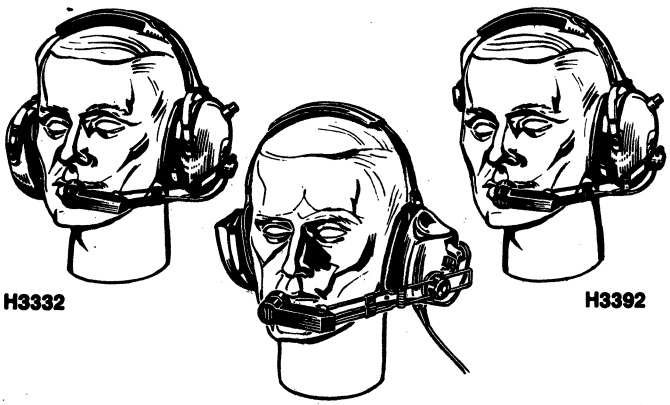


U3803



U3810

Series 3800 Noise Attenuating Headsets



H3332 Headset/Microphone
Over-the-head style with boom mounting noise canceling microphone, On/Off microphone switch, five foot (extended) coil cord. Maximum noise attenuation for hearing protection and clear, isolated reception. For noise levels to 125 dB.
535-6080. Model H3332 ..... EACH 267.00

H3342 Headset/Microphone
Behind-the-head style may be worn with safety hat or helmet. Maximum noise attenuation for hearing protection, and clear, isolated reception. Boom mounted noise canceling microphone with On/Off switch, five foot (extended) coil cord. For noise levels to 125 dB.
535-6085. Model H3342 ..... EACH 267.00

H3392 Headset/Microphone
Single ear version of H3332 with boom mounted noise canceling microphone, On/Off microphone switch, five foot (extended) coil cord. Not to be used in noise level above 85 dB.
535-6090. Model H3392 ..... EACH 236.00

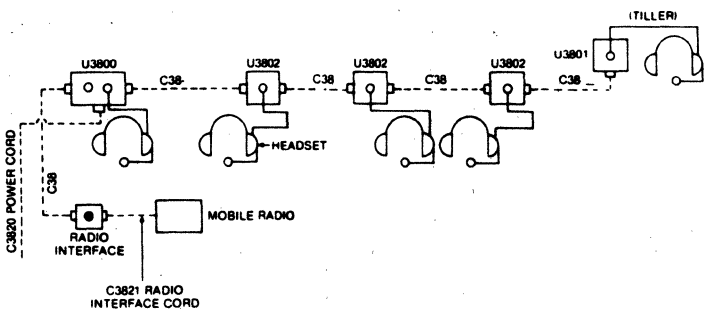
Series 3800 Cords

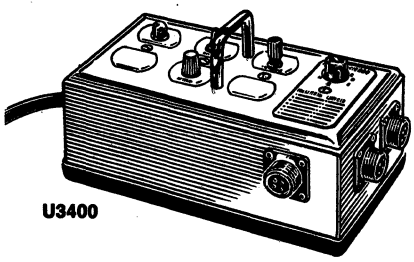
C38-12, -25, -50, -75, -100 Jumper Cords.
Four conductor shielded with MS Screw On (pin) connectors. Connects Master Station and Modules. Number after dash indicates cord length in feet.
535-6100. Model C38-12 ..... EACH 89.00
535-6055. Model C38-25 ..... EACH 102.00
535-6060. Model C38-50 ..... EACH 142.00
535-6065. Model C38-75 ..... EACH 173.00
535-6095. Model C38-100 ..... EACH 205.00

C3820 Power Cord
20 ft., two conductor shielded cord connects U3800 to power source.
535-6070. Model C3820 ..... EACH 60.00

C3821 Radio Interface Cord
Connects U3810 radio interface module to mobile radio. 25 ft., six conductor cord with six pin connector.
535-6075. Model C3821 ..... EACH 86.00

Typical 3800 Applications



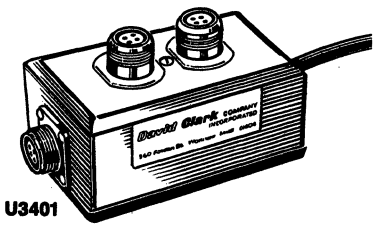


U3400

Series 3400

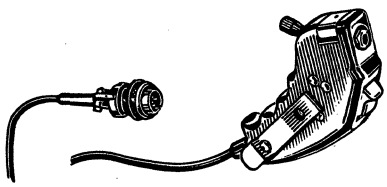
This System operates on standard 110 VAC current and can easily be converted to 220 VAC. Up to 32 Headsets may be connected at one time using belt stations and remote junction modules. Four conductor shielded cables provide shielding from electrical and radio frequency interference.

U3400 Master Station. The heart of the Series U3400 Communication System. It contains the power supply, amplifier and impedance selector in a single, sturdy metal box. There are four output connectors, 12 ft. grounded power cord, roll bar/carry handle, master volume control, and system On/Off switch. Belt Stations connected to four outputs form a four-man communication system. See Application No. 1 below. Remote Junction Modules connected to these outputs may further expand the system. See Application No. 2 below. **SPECIFICATIONS. Input:** 110-125 VAC. 60-50 Hz. **Output:** 24 VDC. **Max. Current:** 1/2 Amp. **Dimensions:** 4 3/4 × 9 1/2 × 4 3/4″.
535Q7000. Model U3400 ..... **EACH 580.00**



U3401

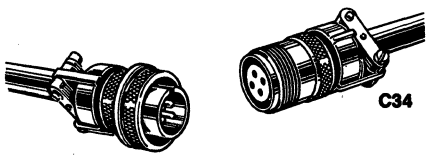
U3401 Remote Junction Module. Used for additional Belt Station connections. Will provide three Belt Station connections or two Belt Station connections plus another Remote Junction Module or extension cord. Your system arrangement will accommodate a maximum of 32 headsets. See Application No. 2 below.
535Q7005. Model U3401 ..... **EACH 195.00**



U3410
V3412

U3410 Belt Station. Serves as a preamplifier and interfaces between Headset and system. EVERY HEADSET MUST BE PLUGGED INTO A BELT STATION. Belt Station then connects to a Master Station or Remote Junction Module, either directly or via extension cords. Unit features headset jack, individual earphone volume controls, push-to-talk or lock microphone button, belt clip, 12 ft. cord with connector.
535Q7010. Model U3410 ..... **EACH 184.00**

V3412 Vox Belt Station. May be used in place of U3410 Belt Station. No buttons to press for hands-free operation. Voice activated start/stop transmission. Has Vox sensitivity control, headset jack, listening volume control, Vox override push to talk button, belt clip and 12 ft. cord. Use with all headsets shown here.
535Q7015. Model V3412 ..... **EACH 265.00**



C34

C34 Extension Cords. With screw-on-type connectors. Four conductor oil resistant cords are used to connect all components: Master Station, Remote Junction Modules and Belt Stations. Number after dash indicates length in feet.
535-7020. C34-12 ..... **EACH 92.00**
535-7025. C34-25 ..... **EACH 110.00**
535-7030. C34-50 ..... **EACH 142.00**
535-7035. C34-100 ..... **EACH 205.00**

Noise Attenuating Headsets For Use With Series 3400

H3330 Headset/Microphone. Over-the-head style with boom mounted noise canceling microphone. For Noise levels to 125 dB.
535-7040. Model H3330 ..... **EACH 220.00**

H3340 Headset/Microphone. A behind-the-head version of H3330 for use with safety cap. For noise levels to 125 dB.
535-7045. Model H3340 ..... **EACH 220.00**

H3391 Headset/Microphone. Single ear version with boom mounted noise canceling microphone. Not to be used in noise levels above 85 dB.
535-7050. Model H3391 ..... **EACH 189.00**

H3140 Headset/Throat Microphone. Designed to be worn behind the head to accommodate safety cap. Removeable electric mike held in place by soft adjustable neck strap.
535-7055. Model H3140 ..... **EACH 258.00**

Belt Station required for each headset. All headsets shown are interchangeable throughout system.

FAA Controller Headsets

MODEL HSO-310-1. The StarSetII Model features a 10 gram, contoured capsule which provides maximum comfort during extended usage. Priority Sound Guard system, incorporating multiple ICs, protects against abrupt loud sound levels. Unlike simple signal limiting circuitry, unique compression amplifier maintains acceptable levels without signal distortion. The non-metallic clothing clip provides an easy, safe attachment to clothing. The reliable three-position volume control permits rapid adjustment for difficult-to-hear or excessively loud calls. This model uses a 10-foot coil cord.

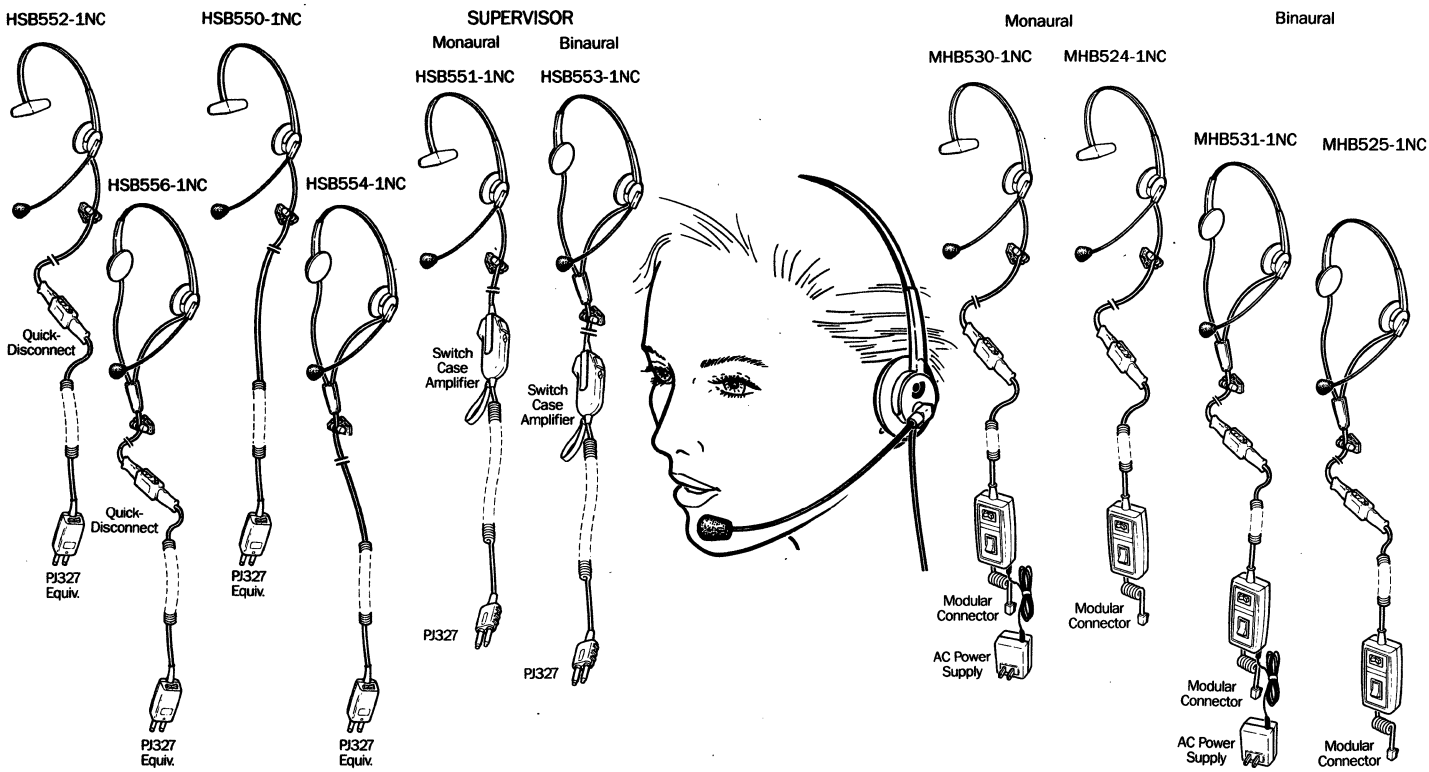
Supra NC Noise Cancelling Headsets



Plantronic's new Supra NC Headset is designed for people in an active or noisy environment. The Supra NC features a unidirectional noise cancelling microphone that effectively reduces unwanted background noise. The Supra NC is available in both PJ327 plug prong and user-installable modular connection. These over-the-head models are available in monaural and binaural headsets. User-installable headsets come with an adapter that will work with your phone system. All have quick disconnect, in-line mute switch and 10 foot coil cord, except *. All in gloss black color.

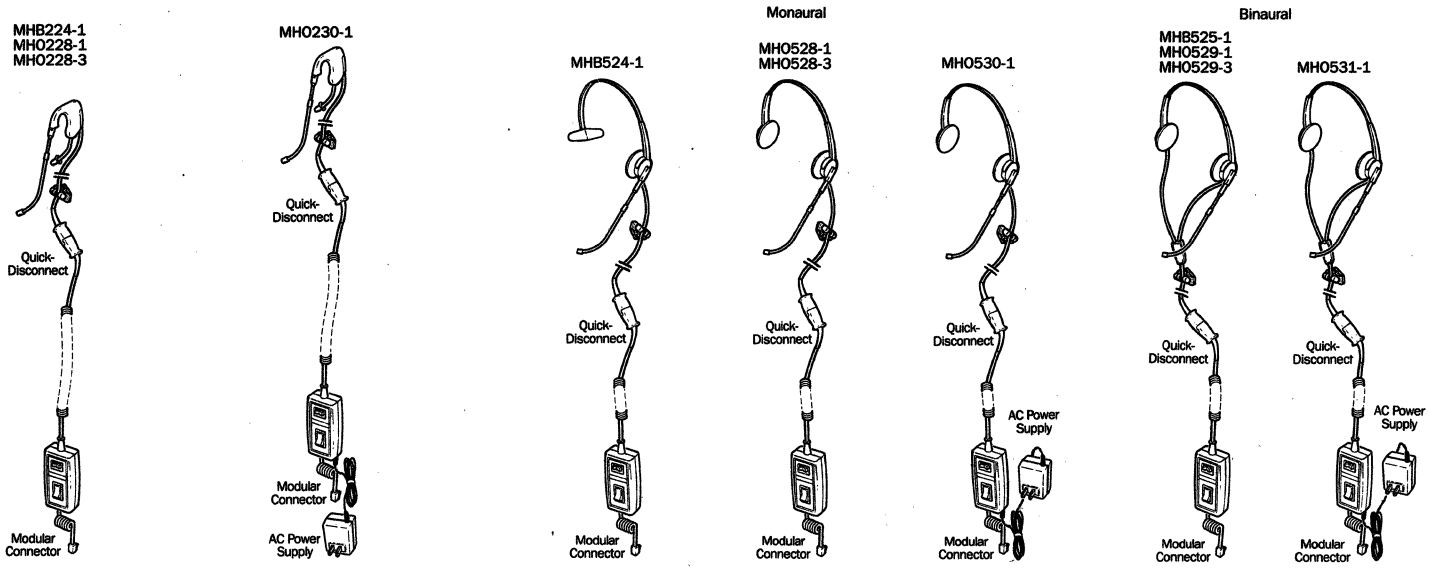
Starmate Customer-Installable Headset



Plantronics Starmate Series Headsets allow "hands-free" convenience in either behind the ear style (Starset II) or over-the-ear style (Supra). All have quick-disconnect on 10 foot coil cord. All Starmate E-plus models come with an AC power supply. Starmate E models MHO228-3, MHO528-3, and MHO529-3 are compatible with AT&T Systems 25, 75/85, and Merlin telephones. All models feature volume control, modular connection and replaceable voice tube.

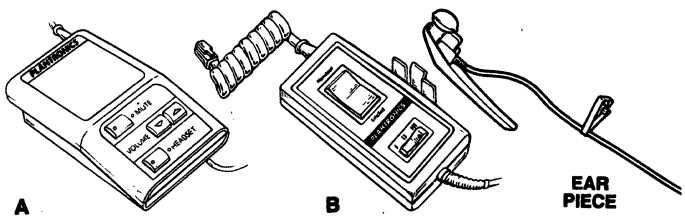
OmniSet™



Plantronics Products Can Help You Communicate Better

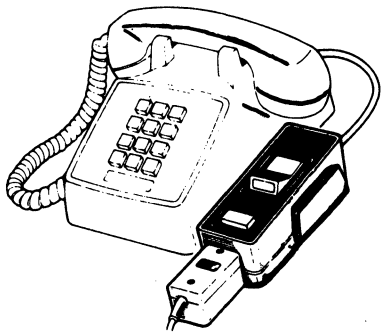
- **It's like a telephone receiver.**
- **It's like a headset.**
- **It's OmniSet.**

Model MH0760-1 (Fig. A): For electronic telephones. Features variable volume control and mute button to turn off microphone for private aside conversations. Battery operated—Batteries included.
888-1002. MH0760-1 ..... EACH 198.00

Model MH0724-1 (Fig. B): For standard telephones. Features 5 position volume control.
888-1001. MH0724-1 ..... EACH 161.00

JackSet® Adapter

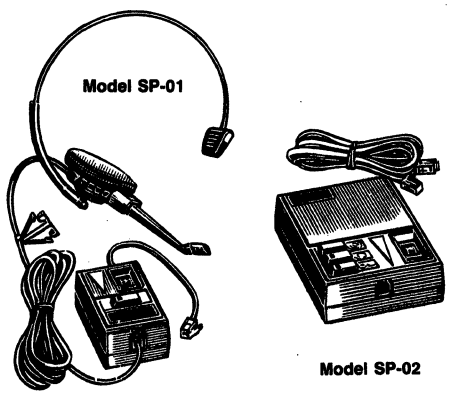
- **Adaptable to most phones**
- **Color compatible**
- **Easy to operate**
- **Convenient cradle clip for storage**



The JackSet Adapter provides a versatile, inexpensive and easy-to-install interface between telephone headsets and a wide variety of telephones. The adaptability of the JackSet eliminates the need to replace a customer's present jack-in base. The JackSet is designed to be free-standing, mounted to either side of the phone or to furniture. Switching from handset operation to the StarSet is accomplished by simply rocking the transfer switch on the JackSet. To restore handset operation, reverse the procedure. To flash the operator, momentarily press the recall button. A handy headset storage cradle clip is located at the side of the JackSet.

888-6300. Type JSO 180-1. For Standard Telephones. **1-4 ..... EACH 97.00**
5-9 ..... EACH 88.33 **10-Up ..... EACH 75.71**

888-6341. Type JSO 180-3. For Met Set Horizon Systems. **1-4 ..... EACH 99.00**
5-9 ..... EACH 91.66 **10-Up ..... EACH 78.57**



SP™ Modular Headset for Standard Telephones

Model SP-01. The SP Modular Headset makes time on the telephone in your office or home a lot easier. It frees both hands so you can write, type, or perform household chores while talking on the phone. SP™ headsets are made by the world's largest supplier of modular headsets for standard telephones. Each headset is user-installable and works with traditional style touch-tone or rotary desk telephones with modular hand-sets. These phones normally have "bell" rather than electronic tone ringers. All headsets feature single, lightweight earpad, adjustable headband and boom-mounted microphone. SP™ gives you superior comfort and performance at low cost.
888-9260. Model SP-01 ..... EACH 64.95

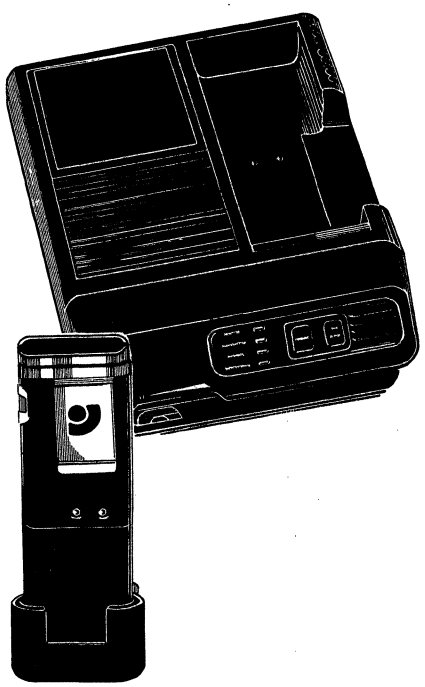
Model SP-02. Similar to Model SP-01, above, except designed for use with electronic telephones.
888-9261. Model SP-02 ..... EACH 79.95

Model SP-03. For all electronic telephones, single or multi-line. Headset/handset switch and mute/hold switch.
888-9263. Model SP-03 ..... EACH 89.95

Model SP-04. Headset with dial pad. Telephone headset. Last number redial, mute/hold. Operates with tone or pulse service. Plugs directly into single line modular phone outlet.
888-9264. Model SP-04 ..... EACH 99.95

Phone Beams and Accessories

- **Remote microphone means hands-free communication and greater mobility**
- **Echo-free**
- **Status indicator lights**
- **On-hook dialing**
- **Mute privacy button**
- **Convenient volume control**
- **Built-in battery charger**



Plantronics has just invented a whole new way of communicating. It's called PhoneBeam™ Echoless Infrared Speakerphone—a revolutionary new device that allows us to talk to one another in a clearer, more natural way. This is because PhoneBeam has solved the "echo" effect by incorporating advanced infrared technology into a remote microphone. The microphone can be worn conveniently in a coat or shirt pocket, allowing the user to move freely around the office.

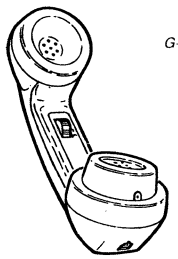
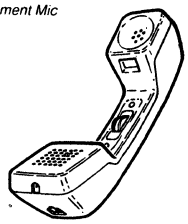
Noise Censor Series

NoiseCensor "NC - 1" G-Style Repacement Mic



Amplified (G-Style) Handset w/NoiseCensor



Amplified (K-Style) Handset w NoiseCensor

Noise censor is a family of noise-cancelling products designed for telephones that are located in noisy or hard-to-hear areas. Available for standard and electronic phones, amplified and unamplified, and in both "G" and "K" styles. The NC-1 is a noise-cancelling microphone replacement for carbon mics in "G" style handsets. All have modular connection.

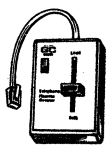
Surface Jack Modular Converter

Converts standard or "hardwired" installations to modular. Screw terminals for easy installation. Modular cover fastens to existing connecting block.
796-9600. Model 30-9600 ..... **EACH 2.49**

Electronic Extension Ringer

This weatherproof ringer is ideal for outdoors. Sound can be heard for great distances. Volume control, built-in modular jack.
796-9820. Model 30-9820 ..... **EACH 24.99**

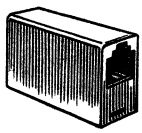
5



Telephone Hearing Booster

Amplified caller's voice; ideal for the hearing-impaired. Adjustable volume control. Designed for fully-modular telephones. Snaps into place between handset and base, no tools required. Comes with Velcro mounting strips.
796-6001. Model 30-6001 ..... **EACH 21.69**

Dual In-Line Coupler



Allows two modular cords to be connected together to lengthen the cord. Simply plug into each end.
796-9678. Model 30-9678 ..... **EACH 1.00**

Modular Handset Coil Cords

Coiled cord with modular plugs at both ends. Available in 6, 12 or 25 foot lengths and 9 color selections. Cords fit between handset and phone base.

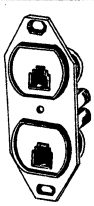
Twisstop™

Prevents handset cords from becoming twisted and tangled by allowing the handset to rotate freely. Compatible with all modular handset cords. Swivel rotary action spins the cord around to its original position, without decreasing sound quality.
796-9310. Type 90-9310 ..... **EACH 6.23**



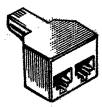
Dual Floor Jack

The floor jack contains duplex jacks and a center tapped mounting hole. Two modular jacks permit use of two telephones at the same location, one telephone and an answering machine or other related equipment. Spring loaded protective doors cover jacks.

796-9711. Type 30-9711-BU. 4-conductor ivory ..... **EACH 2.35**

Tele-Check Modular Line Tester

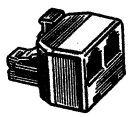
Analyzes modular phone line problems. Tester inserts into modular jack or in receptacle which holds line wire in network interface panel. Provides visual indication of the type and location of the phone line problem. Eliminates costly unneeded telephone service calls.
796-9450. Type 30-9450 ..... **EACH 5.99**



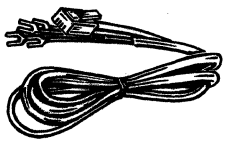
Modular "T" Adaptor

"T" adaptor enables two modular plugs to be used in a single modular jack.
796-9654. Model 30-9654 ..... **EACH 2.49**

Two-Line Adapter



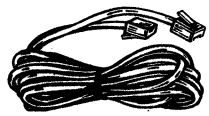
Converts a two-line system into two single line outlets.
796-9655. Model 30-9655 ..... **EACH 3.96**



Modular Telephone Replacement Cord

Use for converting "hard-wired" telephones to modular, or as a replacement/extension. Spade terminals one end; modular plug other end. Silver.
796-9540. Model 30-9540. 6 ft. ..... **EACH 2.99**
796-9542. Model 30-9542. 25 ft. ..... **EACH 4.29**

Modular Plug-To-Plug Extension Cord



Use to extend length of cord between telephone and wall jack or as an extension cord.

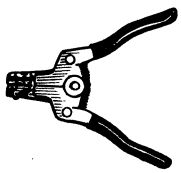
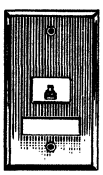
Modular Crimp Tool

Makes it easy to install modular plugs on 4-conductor modular line cord. Has built-in wire stripper.
796-9950. Type 30-9951 ..... EACH 18.29

Automatic Telephone Wire Stripper



Four cutting surfaces handle stripping on both flat line cord or round station wire. For round station wire, a two-step strip first pulls outer jacket off, then strips small conductor wires. For flat line cord, the outer jacket is stripped to exact lengths for assembling modular plugs. An adjustable stop controls stripping length. Other features include built-in cutter; automatic delayed action to prevent crushing inner wires.
796-9925. Type 30-9925 ..... EACH 24.79



Flush Wall Jack

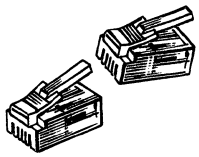
Modular flush wall jack assembly allows flush-mounted connection of plug-ended modular line cords. Ideal for initial installation or conversion from existing wall receptacles. Jacks can be connected in parallel use with 4- and 6-wire systems.
796-9700. Model 30-9700. 6 wire—ivory ..... EACH 3.59
796-9707. Model 30-9707. 4 wire—ivory ..... EACH 2.99

Combination Telephone/Coax Wallplate

Specially designed wallplate allows hookup of both modular telephone wire and coax cable from one location. (4-conductor)
796-9732. Model 30-9732. Ivory ..... EACH 6.89

Outdoor Modular Surface Jack

Designed specifically for outdoor all-weather use. The housing is constructed of rust-proof aluminum and stainless steel. Spring-loaded gasketed cap assures moisture-resistant seal. Extra heavy-duty. Screw terminals for quick installation.
796-9730. Type 30-9730 ..... EACH 16.99



Modular Plugs

Use with flat-line cord for making replacement cables or extension cords. Use modular crimp tool #30-9951, below.

Package of 10
796-9910. Type 30-9910. 4 cond. ..... PER PKG. 3.09
796-9914. Type 30-9914. 6 cond. ..... PER PKG. 4.99

Package of 100

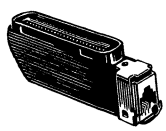
Dual Modular Surface Jack

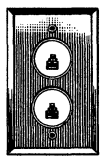
Surface mounts to baseboard or wall. Dual jacks for hook-up of telephone and answering machine, auto dialer. Screw terminals for easy installation.
796-9605. Model 30-9605 ..... EACH 5.59



Multi-Line-To-Modular Jack Adaptor

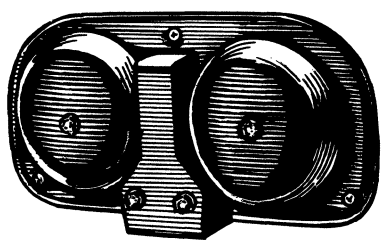
Allows a single-line modular telephone to be connected to an existing 50-pin connector. With this adaptor, installers are able to convert multi-line service, multi-button-equipped telephone stations in minutes.
796-9812. Model 30-9812 ..... EACH 13.99

Modular Duplex Flush Jack

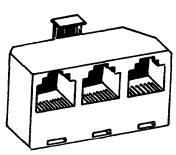


Flush mounted in wall to eliminate external wires. Two modular jacks permit use of two telephones at same location or one telephone and answering machine or other related equipment. Two solderless jacks can be connected independently or in series, utilizing one or two lines.
796-9703. Model 30-9703. 4 cond. ..... EACH 3.99
796-9710. Model 30-9710. 6 cond. ..... EACH 5.89

Outdoor Telephone Bell



The outdoor telephone bell is a loud mechanical bell. Weather resistant molded housing for use indoors or outdoors, ideal for factory, farm, porch or garage or in any noisy environment. This telephone bell is line powered and uses a modular jack for simple installation. FCC registered.
796-9835. 30-9835 ..... EACH 41.95



Modular Triplex Adaptor

Allows three modular plugs to be used in a single modular jack.

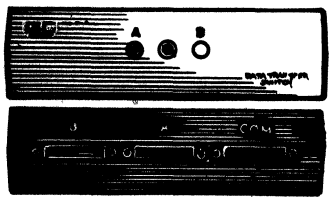
796-9656. Type 30-9656 ..... EACH 2.32

Centronics* Cable Assembly Transfer Switches

Convenient and economical way to access a single printer for more than one Microcomputer. Also, for access to more than one peripheral from one I/O port or access a modem from any of several terminals. Transfer switches save the time of reconnecting cables or the expense of additional printers. 5 year warranty.

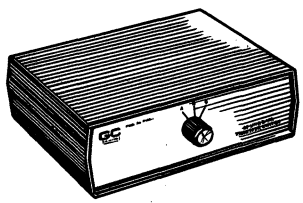
GC Electronics' Data Transfer Switches are assembled using the best materials available to assure completely reliable operation. No external power source is required. Modern beige cabinet blends well with most decors. Five year warranty for all models. Made in U.S.A.

A/B Transfer Switch for Nine-Line Systems



Type 43-600. Switches pins 2 through 8 and 20; pin number 1 is common. Satisfies most systems switching needs and is less costly than units designed to switch all lines. One RS-232 25-pin female connector for input to two RS-232 female output connectors.
796-4000. Type 43-600 .....**EACH 67.06**

A/B Transfer Switch for 25-Line Systems

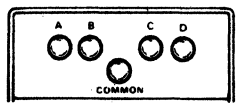


Type 43-610. Switches pins 2 through 24 (pin number 1 is universally common). As all lines are switched, this unit is universally compatible with all RS-232-C industry standard systems. One RS-232 25-pin female connector to two RS-232 female output connectors.
796-4001. Type 43-610 .....**EACH 107.00**

A/B Parallel Transfer Switch for 36-Line Centronic-type Systems
Type 43-608. All 36 lines are switched. One female 36-pin connector for input or output to two 36-pin female connectors. Use with IBM** and IBM-look-alikes to Epson-type parallel printers, etc.
796-4003. Type 43-608 .....**EACH 125.00**

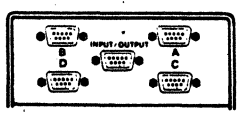
Type Aa/Bb X-Switch Universal, Serial or Parallel.
Permits two separate PCs to share two different peripherals. Either computer may be switched between two peripherals. Four 25-pin "D" connectors on back of unit. All 25-lines are switched to permit use with nearly any system. Completely data transparent in both directions. Five year warranty.
796-4015. Model 43-615 .....**EACH 89.96**

Mini-DIN 8 A/B/C/D



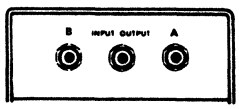
One mini-din 8-pin I/O female up to four mini-din 8 conductor jacks. Used for some Apple® computer systems.
796-2075. Type 45-2075 .....**EACH 47.88**

DB-9 A/B/C/D Switch



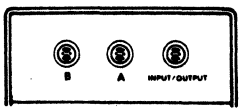
One female DB-9 I/O connector to four female DB-9 connectors.
796-2034. Type 45-2034 .....**EACH 41.99**

BNC A/B Switch



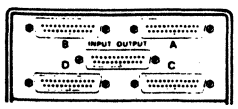
One BNC female to two BNC females
796-2109. Type 45-2109 .....**EACH 30.97**

Twinaxial A/B Switch



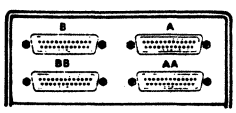
One twinaxial female connector to two female twinaxial connectors.
796-2107. Type 45-2117 .....**EACH 43.99**

RS-232 A/B/C/D Switch



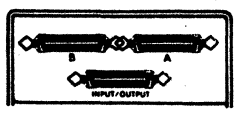
One I/O DB-25 female to four DB-25 females
796-2004. Type 45-2004 .....**EACH 56.94**

RS-232 X-Switch



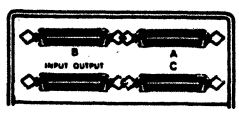
Two I/O DB-25 female connectors to two peripheral DB-25 connectors. Permits either PC to use either of two peripherals.
796-2007. Type 45-2007 .....**EACH 56.94**

Centronics A/B Switch



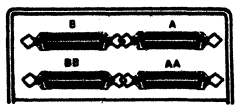
One I/O 36-pin Centronics-style female connector to two 36-pin Centronics females.
796-2020. Type 45-2020 .....**EACH 56.94**

Centronics A/B/C Switch



Like above, but permits use of three peripherals with one computer (or vice versa).
796-2023. Type 45-2023 .....**EACH 44.00**

Centronics X-Switch



Two I/O 36-pin Centronics connectors to two Centronics connectors for parallel peripherals.
796-2027. Type 45-2027 .....**EACH 59.94**

RJ-45 A/B/C/D Switch

For switching voice and/or data communications lines that are terminated with 8-pin RJ-45 style TELCO connectors. One I/O female to four RJ-45 females.
796-2059. Type 45-2059 .....**EACH 47.88**

RJ-11 A/B/C/D Switch

One I/O 4-conductor RJ-11 TELCO jack to four RJ-11 jacks. For switching telephone or data equipment using standard four-conductor telephone style TELCO connectors.
796-2063. Type 45-2063 .....**EACH 45.99**

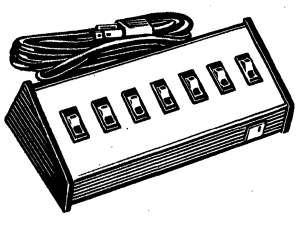
Desktop Power Console with Surge and RFI/EMI Protection



Type 3280. Seven AC outlet, six outlets independently controlled. Seventh outlet is always "ON." Master switch allows user to power down six outlets except the constant "ON." UL listed components used throughout. **SPECIFICATIONS. Maximum Power Capacity:** 15 Amps @ 110-120 VAC. **Maximum Pulse Power Capacity:** 100 Amps @ IMS. **Peak Current Surge Rating:** 6500 Amps. **Peak Power Dissipation:** @ 1 mS 7000 Watts (70 Joules). **Spike Clamping Initiate:** 184 Volts. **RFI Attenuation:** 8.5 db @ 150 KHz, 46 db @ 20 MHz.
796-4005. Type 3280 .....**EACH 67.97**

TV & VCR GlitchGrabber PLUS

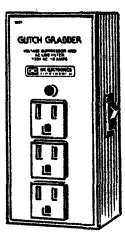
The Glitchgrabber Plus® will protect a TV and/or VCR from damaging voltage surges that are typically present on all 110-120 V AC power utility lines. It will also guard against similar surges on the antenna input. This unit is recommended for use with TVs, VCRs and FM receivers.

Voltage surges are generated by electrical devices such as refrigerators, air conditioners, and electric lights. Lightning strikes, even at considerable distances, often generate numerous surges. This product will sense these surges and destroy them as quickly as they arrive. **NOTE:** This device is not a lightning arrestor which affords grounding protection against direct lightning strikes but does not protect against surges. Glitchgrabber Plus must not be used in lieu of lightning grounding devices.
796-3705. Type 3705 .....**EACH 50.78**

TELCO GlitchGrabber PLUS

The Telco Glitchgrabber Plus® will protect a facsimile machine or a modem from damaging voltage surges that are typically present on all 110-120 V AC power utility lines. It will also guard against similar surges on incoming telephone lines.

Voltage surges are generated by electrical devices such as air conditioners, copy machines, heating systems and electric lights. Lightning strikes, even at considerable distances, often generate numerous surges. This product will sense these surges and destroy them immediately, thereby protecting delicate circuitry.
796-3718. Type 3718 .....**EACH 53.50**



GlitchGrabber AC Line Filter and Surge Arrestor Ground Indicator

Type 3307. For computer security systems in protection against line surges and spikes, plus heavy filtering for eliminating of "Hash" (RFI). Process systems from memory loss, registration of data, data drop-ins or drop-outs. **SPECIFICATIONS. Maximum Pulse Power Capacity:** 100 Amps @ 1 mS. **Peak Current Surge Rating:** 19500 Amps. **Peak Power Dissipation:** @ 1 mS, 21,000 Watts (210 Joules). **Maximum Clamping Voltage:** 340V at 100 Amps. **Clamping Response Time:** 340V at 100 Amps. **RFI Noise Attenuation:** 10 db @ 150 KHz, 50 db @ 20 KHz. **Ground Confirm:** Neon lamp indicate property ground outlet.
796-4007. Type 3307 .....**EACH 59.96**

Economy Surge Protector

Type 3301. Simple MOV surge protector, reduce risk of damage to computer and peripherals from surges and spikes.
796-4008. Type 3301 .....**EACH 3.95**

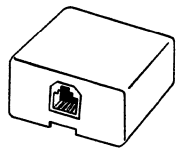
Modular Telephone Hardware (AT&T Licensed)

Paladin introduces a comprehensive spectrum of modular telephone hardware designed to make the connection between telephone equipment and outside lines easier. All products are manufactured under the license of AT&T in full compliance with FCC requirements, and are 100% tested for uniform reliable high quality.

Connects with Paladin for all of your modular telephone hardware needs. You'll get an incredibly wide selection, and dependable performance in every product you select...all at a more affordable price!

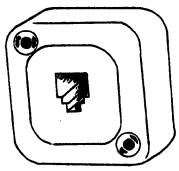
- **Housings are ABS and Polycarbonate**
- **Versatile antique white blends well in any installation**
- **Leadwire are 7-strand, 26 ga. AWG**
- **Polypropylene insulation**
- **Wire colors are standard red, green, black, yellow**
- **Spring wire material is 0.018" diameter phosphorous bronze alloy**
- **Spring wire features hard gold plating over nickel for optimum electrical contact**
- **Insulation resistance is 500 Megaohm**
- **Dielectric strength is 1000 VAC RMS, 60 Hz**
- **Contact resistance is 20 milliohms**
- **1:1.2 AMP current rating**
- **17 pound pull-out strength**
- **4.4 pound crimping strength**

Surface Mount Modular Jack



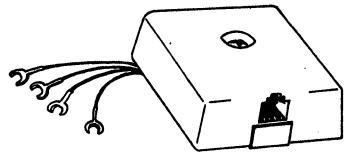
4-contact modular jack for surface mounting. Top cover can be removed and snapped on easily. Screw terminals are provided for station wiring. PA 9634-4 contact.
889-9634. PA 9634.....**EACH 2.37**

Modular Jack



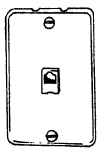
Designed for surface mounting on walls or baseboards where external wire is necessary.
889-9617. PA 9617.....**EACH 2.34**

Modular Jack Cover



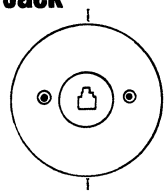
Converts an existing 42A connecting block to accept modular plug-ended line cord.
889-9615. PA 9615.....**EACH 1.50**

Modular Wall Phone Plate



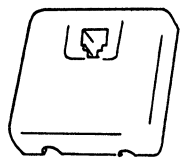
For use with wall phone sets equipped with modular adapters. 4- and 6-contact models available. Fits over standard junction box.
889-9622. PA 9622.....**EACH 3.17**

Round Wall Jack



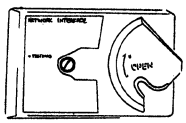
For flush mounting in prewired installation. Mounting bracket included.
889-9620. PA 9620.....**EACH 2.54**

Surface Jack



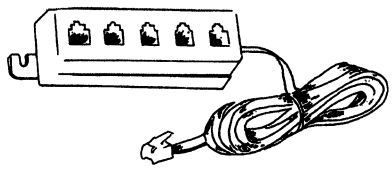
Solderless quick-connect terminals allow wire connection without screws.
889-9621. PA 9621.....**EACH 2.24**

Network Interface Jack with Cover



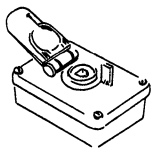
This jack is installed between the leased telephone service and customer-owned premise wiring. Consists of a rotating dust cover and line terminating unit.
889-9638. PA 9638.....**EACH 6.85**

One to Five Adapter



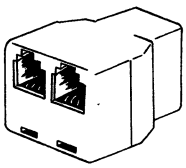
889-9627. PA 9627.....**EACH 8.70**

Plastic Outdoor Jack



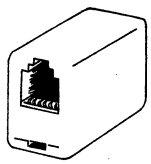
Complete with plastic case and gasket that are weather proof.
889-9640. PA 9640.....**EACH 7.04**

Three-Way Coupler



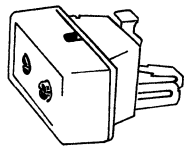
This coupler converts a single line connection into two single-line outlets.
889-9614. PA 9614.....**EACH 2.64**

Modular Cord Coupler



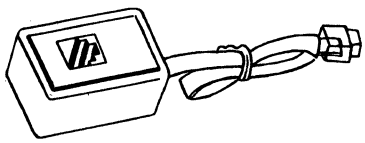
Connects two male-ended modular cords to extend cord length.
889-9612. PA 9612.....**EACH 1.70**

Retro-fit Adapter



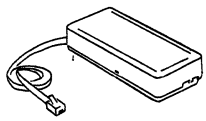
Upgrade non-modular spade- or ring-ended telephone line cord for use with modular jacks.
889-9613. PA 9613.....**EACH 2.17**

Noise Filter



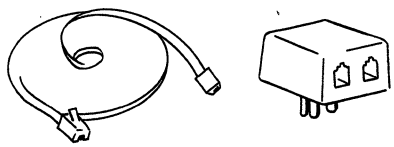
889-9642. PA 9642.....**EACH 8.30**

Wire Junction Box (With Extension Wire)



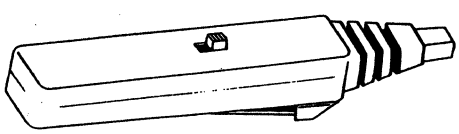
889-9626. PA 9626.....**EACH 5.77**

Lightening Protector



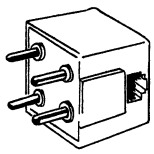
889-9643. PA 9643.....**EACH 11.24**

Two Line Tester



889-9641. PA 9641.....**EACH 13.60**

4 Prong to Modular Adapter

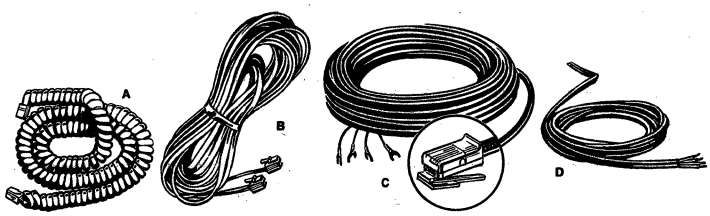


889-9610. PA 9610.....**EACH EACH 2.14**

Modular Jack

889-9636. PA 9636.....**EACH 1.67**

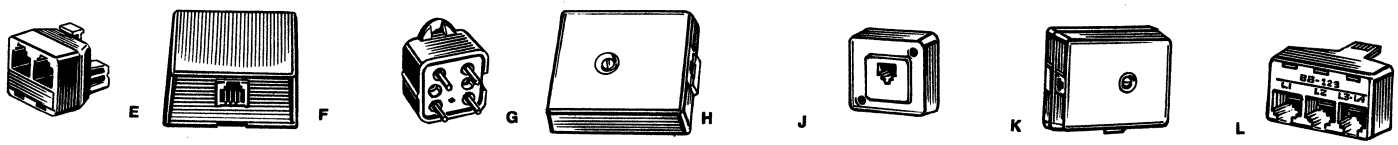
Wires



A Handset Cord. 18′ silver-satin coiled cord for replacement or extension use.
910-9012. Type 279-395 ..... **EACH 5.95**
B Modular-Modular Line Cord. 25′ extension replaces shorter cords. Both ends terminate with modular plugs.
910-7026. Type 279-356 ..... **EACH 6.15**
C 25′ Converter/Extension Cord. Modular end fits modular jacks. Other end has spade lugs.
910-7034. Type 279-364 ..... **EACH 6.15**
D 50′ 4 Conductor Modular Telephone Cable. Silver-satin flexible flat cord.
910-7035. Type 278-365 ..... **EACH 5.49**

Jacks and Plugs

5

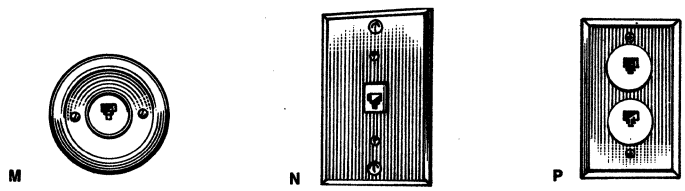


E Duplex Jack. Connects 2 phones, phone and amp or answerer from one jack.
910-7027. Type 279-357 ..... **EACH 4.95**
F 6-Wire Surface Mount Jack. For use as RJ25C 3-line jack and with many electronic PABX telephone systems.
910-9013. Type 279-420 ..... **EACH 4.49**
G Plug. Mates with any standard 4-prong jack.
910-7036. Type 279-366 ..... **EACH 1.49**
H Quick-Connect Jack. Convert wall block for modular plug. Spade terminals.
910-7025. Type 279-355 ..... **EACH 2.19**

Modular Jack. As above, with snap-on clips.
910-0206. Type 279-386 ..... **EACH 2.99**
J Surface-Mount Jack.
910-7023. Type 279-353 ..... **EACH 3.95**
K Modular Jack/Wiring Block. RJ-11/14 modular jack with standard wiring block.
910-0203. Type 279-349 ..... **EACH 3.95**
L Two-Line, 3-Way Jack. Adds two single-line connections (RJ-11) to a two-line telephone jack (RJ-14). Allows for connection of single-line phone devices without losing a connection for two-line devices.
910-0212. Type 279-402 ..... **EACH 6.95**

Wall Plates

M Round.
910-0208. Type 279-392 ..... **EACH 3.95**
N Wall Phone Plate. Standard plate or use with modular wall telephones.
910-0207. Type 279-387 ..... **EACH 5.95**
P Dual Modular Phone Wallplate. Use to provide two jacks with same numbers or four separate lines.
910-0204. Type 279-350 ..... **EACH 5.95**



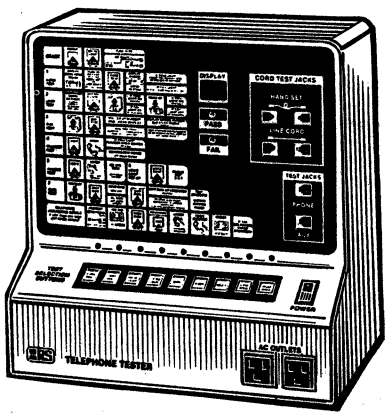
Telephone Line Tester

► **Locates Phone-Line Troubles Instantly!**

Convenient line tester saves you money — no more unnecessary telephone company service calls. Simply plug tester into modular phone jack and it immediately indicates whether your line is operational. Has two LED indicators — one red, one green. Completely safe to use. Phone-line powered.
910-0143. Type 43-101 ..... **EACH 3.49**

Telephone Tester

► **Ideal for Businesses With Telemarketing Departments Or Office Equipment Sales and Service Organizations**
► **Microprocessor-Controlled for Accurate Diagnosis**
► **Tests Both Touch-Tone and Pulse-Dialing Telephones, Cordless Phones and Answering Machines**
► **Easy-to-Follow, Picture-Coded Instructions for Quick and Accurate Step-by-Step Testing**



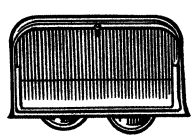
A must for businesses that depend on their phones. Makes it easy to analyze faulty phones and avoid needless outside repairs. Often, a problem is as simple as a defective cord — which can be replaced by anyone. This amazing instrument is designed to check for common problems that occur in most phones and answering devices. Works on all single-line pulse, rotary and Touch-Tone phones, corded or cordless. It can also be used to test 2-line phones simply by adding our optional adapter (279-401). Includes tests for defective plugs, cords, handsets, and loud/soft ringing, plus long/short loop testing. 14 × 13 × 8″. UL listed AC.
910-9011. Type 43-114 ..... **EACH 299.95**

Hands-Free Telephone Headset

► **A must for receptionists, busy executives, anyone who needs to keep their hands free during phone conversations**
► **Works on most any phone with modular handset jack**
► **Quick-disconnect**
ESP Available

DUOFONE 129. Headset with adjustable mike boom frees your hands during phone conversations. Quick-disconnect makes it easy to leave the phone without removing the headset. Amplifier module has volume control. Selectable carbon, electric or dynamic mike settings for use with most types of phones, even office "key" systems. LED battery test indicator. Requires "AA" batteries. Not compatible with some electronic phones, and phones with dial in handset.
910-0172. Type 43-172 ..... **EACH 49.95**

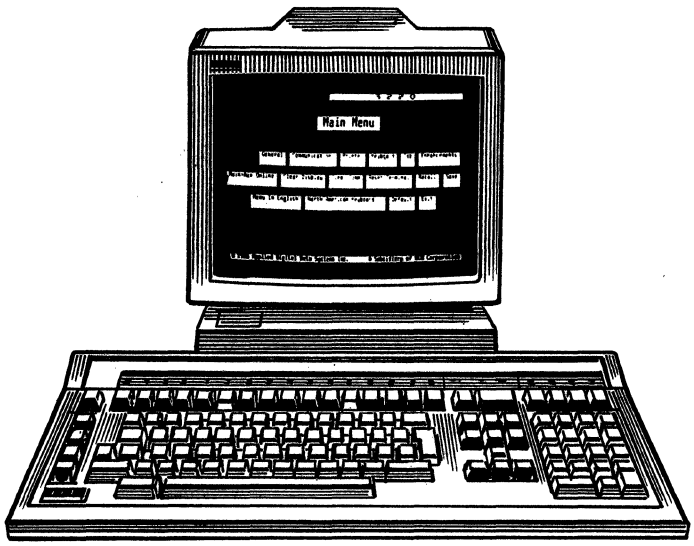
Outdoor Extension Telephone Bell



Outdoor Bell. Handy for porch, patio or garage. Weather-resistance molded housing. Modular jack.

910-9101. Type 43-174 ..... **EACH 29.95**

ADDS-3320



- 14" flat-screen, green CRT etched for reduced glare
- 70 Hz refresh rate—no flicker, stable normal/reverse video
- Selectable 24 lines × 80 or 132 columns
- Split screen capable
- Forms 7 × 11 character with 2 descenders—80 or 132 columns
- 10 × 14—80 columns; 9 × 14—132 columns character cell
- Normal, reverse, blink, underline, bold character highlights
- Select character highlights in any combination (non-stored)
- Cursor selectable as underline/block; blink/steady/suppress
- Double high and double high/wide character presentation
- Screen saver—user selectable
- Smooth 4-speed scroll

Fully compatible with the DEC VT220*, VT100*, VT52* and ANSI x3.64, the ADDS 3320 video display terminal introduces a new standard in DEC compatibility. With 256 bytes of non-volatile memory, local programmability, 7 additional keys, and 22 dynamically-allocated function keys, the 3200 keyboard adds more fingertip useability. Ergonomical, low-profile design with tactile and audible feedback as well as 2-position tilt provide operator comfort. A legend strip is provided for labeling of function keys. Included in 5 character sets are multi-language letters and symbols, line graphics, and special symbols for greater versatility.

Specifications. System/Host: RS-232C serial asynchronous with baud rates from 50 to 19.2 K; X/On-Off and/or DTR handshake; 7 or 8 data bits; odd/even/mark/space/none parity; character mode with full or half duplex and local echo. Female DB-25 connector. **Auxiliary:** Buffered, bidirectional RS-232C serial asynchronous with baud rates from 110 to 19.2 K; X/On-Off or DTR handshake; 7 or 8 data bits; odd/even/mark/space/none parity; copy or passthrough connection. Local screen print. Male DB-25 connector. Auxiliary port can be used to connect a second host (A/B switch). **Voltage:** 100 to 130 VAC, 200 to 250 VAC (jumper selectable). **Line Frequency:** 50/60 Hz. **Power:** 48 watts. **Operating Environment. Temperature:** 10 to 40°C (50 to 105°F). **Relative Humidity:** 0 to 95%, non-condensing. **Altitude:** 2.5 km (8,200 ft.). **Storage Environment. Temperature:** 0 to 50°C (32 to 125°F). **Relative Humidity:** 0 to 95%, non-condensing. **Altitude:** 9.1 km (29,850 ft.). **Dimensions. Monitor/Logic:** 14 × 12.8 × 13.2" (35.89 × 32.82 × 33.84 cm). **Keyboard:** 2 × 21 × 8" (5.12 × 53.85 × 20.51 cm). **Weight. Monitor/Logic:** 25 lbs., 12 oz. (56.77 kg). **Keyboard:** 5 lbs. (11 kg). **Approximate Shipping Weight:** 32 lbs. (70.5 kg). *Trademarks of Digital Equipment Corporation.

- User selectable screen
- Forms 7 × 11 character with 2 descenders—80 or 132 columns
- 10 × 13—80 columns; 9 × 13—132 columns character cell
- Normal, reverse, blink, underline, bold character highlights
- Select character highlights in any combination (non-stored)
- Cursor selectable as underline/block; blink/steady/suppress
- Double high and double high/wide character presentation
- Top status and bottom label lines
- Smooth 4-speed scroll

Compatible with ADDS Viewpoint A1/A2*; Regent 40*; Hazeltine 1500*; TeleVideo 925*, 920*, and 910*; and Wyse 50*—all with enhancement modes. 96-character ASCII set plus single and double line graphics; normal, reverse, blink, underline, half, and suppress tag/field highlights. Up, down, insert/delete line scroll. 100-key keyboard standard with 44 programmable keys; 16/32 programmable function keys; 28/56 reprogrammable edit keys—88 programmable key modes supported by over 2500 characters of non-volatile memory with setup accessible from keyboard or host. Programmable menu system stores function key labels and help messages; bell volume is also programmable from keyboard or host. Keyboard has US/UK English layout and is low profile with tactile and audible feedback, 2-position tilt, and legend strip.

Specifications. System/Host: RS-232C serial asynchronous with baud rates from 50 to 38.4 K; X/On-Off and/or DTR handshake; 7 or 8 data bits; parity selectable; character, line, and page modes with full or half duplex and local echo. Female DB-25 connector. **Serial Printer Port:** Buffered, bidirectional, RS-232C serial asynchronous with baud rates from 110 to 19.2 K; X/On-Off and/or DTR handshake; 7 or 8 data bits; parity selectable; copy or passthrough connection with local display capability. Female DB-25 connector. **Parallel Printer Port:** Buffered, electrically compatible with Centronics* and IBM PC* parallel printers; shares DB-25 with serial printer port. **Voltage:** 100 to 130 VAC, 200 to 250 VAC (jumper selectable). **Line Frequency:** 50/60 Hz. **Power:** 48 watts. **Operating Environment. Temperature:** 10 to 40°C (50 to 105°F). **Relative Humidity:** 0 to 95%, non-condensing. **Altitude: 2.5 km (8,200 ft.). Storage Environment. Temperature:** 0 to 50°C (32 to 105°F). **Relative Humidity:** 0 to 95%, non-condensing. **Altitude:** 9.1 km (29,850 ft.). **Dimensions. Monitor/Logic:** 14 × 12.8 × 13.2" (35.89 × 32.82 × 33.84 cm). **Keyboard:** 2 × 18.25 × 8" (5.12 × 46.79 × 20.51 cm). **Weight. Monitor/Logic:** 25 lbs., 8 oz. (56.22 kg). **Keyboard:** 4 lbs., 6 oz. (9.65 kg). **Approximate Shipping Weight:** 32 lbs. (70.5 kg).

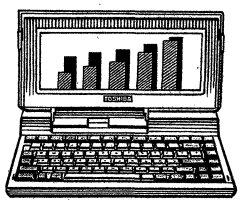
World's Lightest Portable PC!



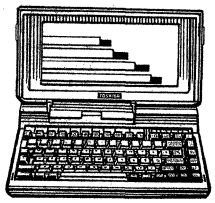
▲T1000

► The smallest, lightest portable PC-6.4 pounds.
► Runs 5 hours on rechargeable NiCad batteries, AC too!
► High-legibility Toshiba supertwist LCD screen.
► Latest technology 720KB 3.5" disk drive.
► Ultra compact & lightweight—compare!
► Seven standard ports for easy, economical expansion
► Exclusive Exceptional Care warranty program.
► Connects to a color monitor, printer, modem, 5.25" drive and more!
► Classic design with convenient center-hinged display.
► With an optional 768KB-EMS memory and you can configure it as a ram disk, allowing faster access to your programs.
► Best of all it's a Toshiba—advanced, reliable and fully supported.

Pick up the T1000 and you'll go far. Presenting Toshiba's most affordable portable. This portable weighs 6.4 lbs. (The price is light, too). Stores in a desk drawer, stows in a book bag. Portable PC power, reasonably priced. IBM® compatibility, Toshiba portability.

592-0001. Type PC-4-PA7027U .....**EACH 999.00**

The Industry Standard Battery-Powered Portable.



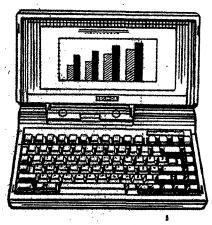
▲T1100PLUS

► Smallest & lightest in its class—under 10 pounds.
► Runs up to 8 hours on rechargeable NiCad batteries, AC too!
► High-legibility Toshiba supertwist LCD screen.
► Latest technology two 720KB 3.5" disk drives.
► Six standard ports for easy, economical expansion.
► Exclusive Exceptional Care warranty program.
► Connects to a color monitor, printer, 5.25" drive and more!
► Classic design with convenient center-hinged display.
► The industry standard in portable PCs
► Options include internal 300/1200 bps modem & IBM-compatible expansion chassis.
► Indispensible in the office, at home and in your travels.

Take care of business anywhere! How to lighten your workload. Smallest & lightest dual disk portable. Toshiba's benchmark portable PC. Runs up to 8 hours on batteries, forever on AC!

592-0002. Type PC-2-PA7042U .....**EACH 2,090.00**

Hard Disk Performance in a Battery-Powered Portable.



▲T1200

► Smallest & lightest in its class—10.9 pounds.
► Runs up to 7 hours on removable, rechargeable NiCad battery packs, AC too!
► High-legibility Toshiba supertwist LCD screen.
► Latest technology 20 MB hard disk & 720KB 3.5" floppy.
► Seven standard ports for easy, economical expansion.
► Exclusive Exceptional Care warranty program.
► Connects to a color monitor, printer, 5.25" drive and more!
► Classic design with convenient center-hinged display.
► Options include internal 300/1200 bps modem & IBM-compatible expansion chassis.
► Indispensible in the office, at home and in your travels.

At last! A battery-powered portable with built-in hard disk. Bring 20MB of hard disk power right along with you. IBM PC/XT® compatibility, Toshiba probability. Hard disk, easy price. And battery-powered portability! The choice of executives and professionals. Toshiba's finest battery-powered portable.

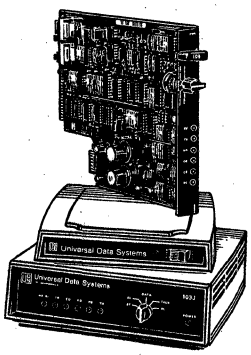
103 Series—300 bps Modems



UDS low speed modems are Bell 103 compatible and provide low-cost asynchronous communications at 0-300 bps over public or private lines. Model 108 diagnostic features which aid in isolating communicating faults to the modem, telephone line or data terminal equipment.

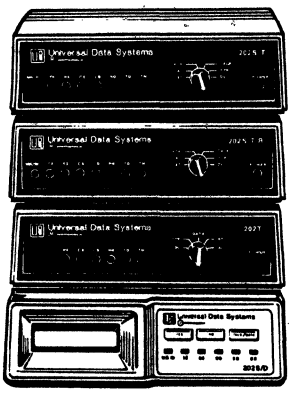
103JLP
Telephone line powered. AC power not required. Low cost.

108
Private line operation over 2-wire or 4-wire telephone facilities. Universal Data Shelf™ compatible.

Features
- ► 0-300 bps
- ► Standalone
- ► Rackmountable
- ► Universal Data Shelf™ Compatible
- ► Full Duplex/4-Wire
- ► Full Duplex/2-Wire
- ► Asynchronous
- ► PSTN
- ► Private Line/2-Wire
- ► Private Line/4-Wire
- ► Auto Answer
- ► Test Modes and Test Parameters: 1. Local Analog Loopback; 2. Local Digital Loopback; 3. Self Test; 4. Test Pattern

Stock No.	Mfr.'s Type	EACH
990-1000	103JLP	165.00
990-1004	108	425.00

201 Series—2400 bps Modems



UDS 201 series modems operate at 2400 bps and are Bell compatible. Integral diagnostic features allow the user to isolate communication faults to the modem, telephone line or data terminal equipment.

201BC/AS
Operates over 2-wire public or 4-wire private lines. Provides synchronous or asynchronous operation.

201C/D
Includes serial synchronous auto dialer which utilizes bisync protocol for DTE/DCE communications.

Sync-Up™ 201C
Combines modem and emulation hardware onto a single expansion card. Cost-effective remote connectivity solution for IBM PC and compatibles. Software support includes BSC and SNA programs.

2140
Integral multi-protocol autodialer. 2400 bps over 2 wire. Supports V.22 *bis* bisync, SDLC.

Features
- ► 0-300 bps
- ► 1200 bps
- ► 2400 bps
- ► Standalone
- ► Rackmountable
- ► Universal Data Shelf Compatible
- ► IBM PC Plug-in
- ► Full Duplex/4-Wire
- ► Half Duplex/2-Wire
- ► Synchronous
- ► Asynchronous
- ► PSTN
- ► Private Line/2-Wire
- ► Private Line/4-Wire
- ► Auto Answer
- ► Auto Dial
- ► Call Progress Detection
- ► IBM Software Available
- ► Antistreaming
- ► Line Equalization
- ► Fast Poll
- ► Test Modes: 1. Local Analog Loopback; 2. Local Digital Loopback; 3. Remote Digital Loopback; 4. Self Test; 5. Transmit Test Pattern; 6. Receive Test Pattern
- ► Full Duplex, 2-Wire
- ► International Dial-up Lines

202 Series—1200-1800 bps Modems

The UDS 202 series consists of Bell compatible modems which provide asynchronous communications at 0-1800 bps. All are compatible with the Universal Data Shelf,™ and all include diagnostic features to aid in isolating communication faults to the modem, telephone line or data terminal equipment.

202S/T
Half duplex dial-up or full duplex on unconditioned 4 wire circuits. Satellite delay option. Optional plug-in card for synchronous operation.

202S/T-R
Includes a 5 baud reverse channel or a 75 or 150 baud secondary channel.

202S/D
Features synchronous and asynchronous operation. Includes a serial auto dialer and call progress monitoring. Modem options are programmable via front panel pushbuttons and LCD display.

202T
0-1800 bps on C2 conditioned private lines. 0-1200 bps on unconditioned private lines. Features antistreaming for use in multipoint networks.

Features
- ► 0-1200 bps
- ► 0-1800 bps

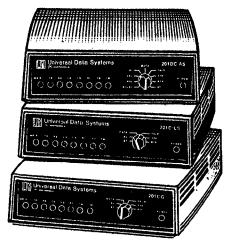
212 Series—1200 bps Modems



The 212 series modems operate asynchronously, full duplex at 1200 bps with automatic fall back to 0-300 bps. All models are Bell 212A and 103 compatible, and include automatic answer.

212ALP
Telephone line powered. AC power not required. Low cost.

FasTalk™ 1200E
Includes Mirror II™ communications software for the IBM PC or compatibles. Extended AT command set compatible. Standalone and PC half card models available.

212A/D
Includes storage for 10 numbers and automatic log-on sequences up to 126 characters.

Sync-Up™ 201C/212A
Like Sync-Up 201C, but with combination 201C/212A modem. Asynchronous, full duplex, and AT command set compatible in 212A mode. Synchronous, half duplex in 201C mode.

Features
- ► 0-300 bps
- ► 1200 bps
- ► Standalone
- ► Rackmountable
- ► Universal Data Shelf Compatible

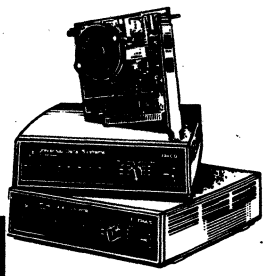
208 Series—4800 bps Modems



The UDS 4800 series includes Bell 208 compatible modems which operate 4800 bps half duplex over 2-wire public or private lines. All models include automatic answer and line equalization, and all except Sync-Up are compatible with the Universal Data Shelf™

208A/B
Additionally operates full duplex over 4-wire private lines. Includes antistreaming to prevent network tie-ups on multipoint networks.

208AB/AS
Transmits asynchronous as well as synchronous data. Also operates full duplex over 4-wire private lines. Includes antistreaming.

208B/D
Includes automatic dialer which utilizes bisync protocol for DTE/DCE communications. Features call progress monitoring for dial tone, busy signal, ring back and answer back tones.

Sync-Up™ 208A/B
Combines modem and emulation hardware onto a single expansion card. Cost-effective remote connectivity solution for IBM PC and compatibles. Software support includes BSC and SNA programs.

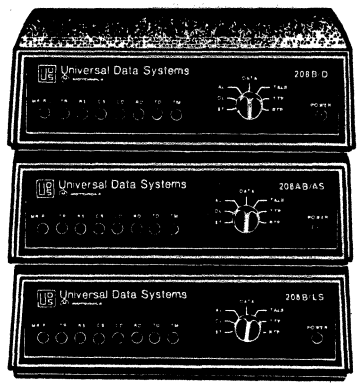
224 Series—2400, 1200, 0-300 bps Modems

The UDS 224 series of modems operate full duplex over 2-wire circuits at 2400 bps with fall back rates of 0-300 and 1200 bps. The units are CCITT V.22 *bis* compatible in the 2400 bps mode and Bell 103 and 212A compatible in the fall back modes.



FasTalk™ 2400 II
Includes Mirror II™ communications software for the IBM PC or compatible computers: AT command set compatible. Standalone and PC half card models available.

224CG
Includes call guard password and/or call-back system to protect against unauthorized connections to computers via PSTN. Optional system allows direct entry with password. Includes MNP error control.

Sync-Up V.22 *bis*
Combines modem and emulation hardware onto a single expansion card. Cost-effective remote connectivity solution for IBM PC and compatibles.

9600 Series—4800 to 9600 bps Modems

Features
- ► 4800 bps/9600 bps
- ► Standalone
- ► Rackmountable
- ► Universal Data Shelf Compatible
- ► IBM PC Plug-in
- ► Full Duplex/4-Wire
- ► Half Duplex/2-Wire
- ► Synchronous
- ► Asynchronous
- ► PSTN
- ► Private Line/2-Wire
- ► Private Line/4-Wire
- ► Auto Answer
- ► Auto Dial
- ► Call Progress Detection
- ► IBM Software Available
- ► Antistreaming
- ► Line Equalization
- ► Test Modes: 1. Local Analog Loopback; 2. Local Digital Loopback; 3. Self Test; 4. Transmit Test Pattern; 5. Receive Test Pattern

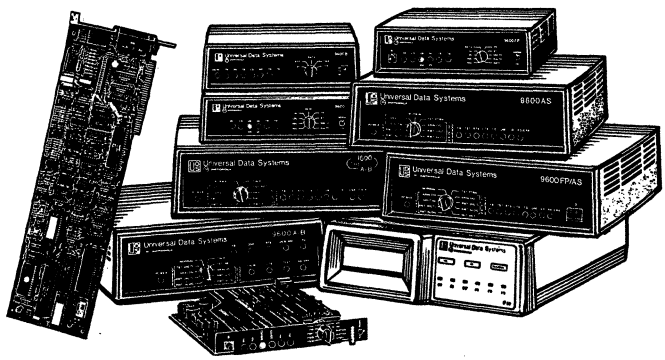
The UDS 9600 series is a broad line of CCITT V.29 compatible modems which operate at 9600 bps and fall back to 7200 or 4800 bps. All models provide fast, accurate synchronous data communications and include extensive diagnostic features. Individual models address special communication requirements with such features as asynchronous operation and trellis coding.

9600
Synchronous operation over 4-wire leased lines. Universal Data Shelf compatible. Antistreaming.

9648T
Asynchronous or synchronous PSTN or private line use. Trellis coded or V.29 compatible at 9600 bps.

9600B/D
Provides the same advantages as the 9600B plus complete autodialing capabilities, including call progress detection.

V.3225
CCITT V.32 and V.22 *bis* compatible with MNP level 5 data compression for communication up to 19,200 bps. Full duplex async or sync.



V.32
CCITT V.32 compatible. LCD packaging facilitates menu-prompted programming at the front panel. Synchronous or asynchronous operation over private or public lines. Includes auto dial, auto answer and call progress detection. AT command set compatible.

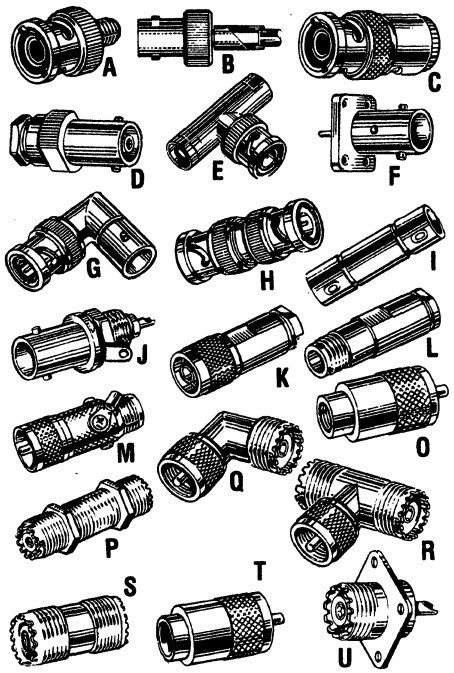
"Crimp" BNC Connectors



Identical to standard solder-type BNC's up to 500 MHz. Connectors may be used with other than 50-ohm cable for non-impedance match. Rated 500 Volts maximum. Impedance, 50 ohms, VSWR, 1.25:1 maximum (Straight Plug and Jack). Cable retention strength equal to cable braid. Center contact is soldered; braid may be soldered or crimped. Delrin dielectric. Connector is brass, center pin is silver plated; other parts nickel-plated. **Note:** These connectors are made to commercial standards — not for MIL use.

Type N Coaxial Connectors

Medium size, threaded coupling units may be used in systems up to microwave frequencies. SWR is consistently low. Rated 500 Volts peak. Impedance, 50 ohms. Plated to take constant handling. Connector installation is easy, especially in tight spots.

UHF Coaxial Connectors

Low in cost, general-purpose connectors. For applications up to 300 MHz, and where constant impedance match is not necessarily required. Peak Voltage rating, 500 Volts.

Banana Plugs and Jacks

All are machined of top-quality materials and carefully inspected. Plugs have sufficient spring tension to assure good holding power and low contact resistance. **Note:** These connectors are made to commercial standards — not for MIL use.

Card Edge Connectors

These connect to the edge of a PC board .035 to .075" thick with contact pads on .100" centers. The cantilevered contacts are spring tensioned. Each contact is bifurcated to ensure no loss of contact if vibration or connector movement occurs.

Coaxial Connectors

Alpha Twist-On Coaxial Cable BNC and TNC Connectors

- ► Reusable, One-Piece Design for Fast and Easy Installation
- ► Captive, Non-Force Fit Center-Contact
- ► High Strength Teflon Insulation
- ► Crimpless Center Contact Design
- ► Self-Centering Conductor Design
- ► No Solder, Heat or Special Assembly Tools Required

Electrical Characteristics

Connector Impedance: 50 Ohms, nominal. **Working Voltage:** 500 V rms at sea level. **Contact Resistance:** Outer contact, 0.2 Milliohms; Center contact, 1.5 Milliohms. **Insulation Resistance:** 5000 Megohms, min. **Dielectric Strength:** 1500 V rms at sea level. **Frequency Range:** TNC, 0-11 GHz; BNC, 0-4 GHz.

Product Description

Pin Contact: High quality, heat-treated beryllium copper (Alloy #25) with gold-over-nickel finish. Exclusive, pre-loaded, crimpless seizing mechanism. **Insulation:** Teflon insulation (M-P-19468) for superior electrical properties. **Outer Body:** Machined brass (QQ-B-626, Alloy 360, 1/2 Hard) with nickel plating. Right-angle connectors are die cast Zamak alloy (QQ-2-363-Comp A) with nickel plating.

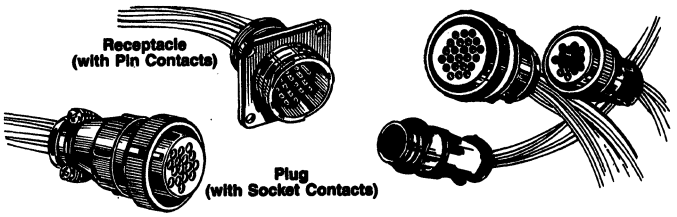
5-Up .....EACH 89.55

Standard Sex CPC Connectors



CPC Connectors provide a substantial savings in weight and cost through the use of a plastic shell and a wide variety of pin and socket contacts. The various sizes and densities are supplied unloaded (without contacts). Recognized under the component program of Underwriters Laboratories, Inc. for 250V service (some are recognized for 600V service). UL File No. E28476. CSA Certified File No. LR16455.

Series 1.
Standard density, multimate contacts for normal unsealed operations. **Materials:** 94V-1 rated, heat stabilized, fire resistant, self extinguishing black thermoplastic. (Contacts not included - order as a separate item).

Standard Sex Connectors are plugs with socket contacts, and receptacles with pin contacts.

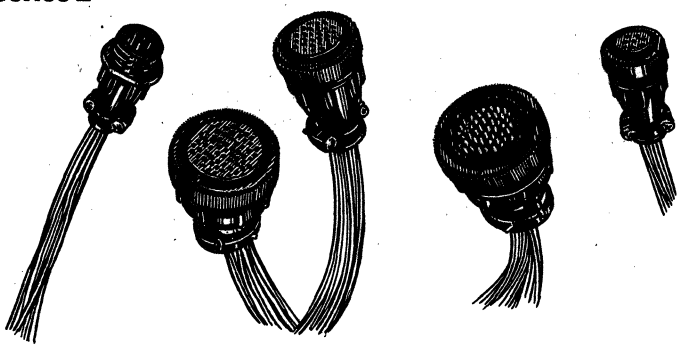
Series 2



High density connectors supplied as Class A for normal unsealed applications. These connectors accept Size 20DM (screw machined) and Size 20DF (precision formed) pin and socket contacts with a .040″ (1.02 mm) diameter that are also used in D-Sub Connectors. Contacts can be either crimp or solder cup types and are sold separately. Cable Clamps are the same as for the same size of Series 1. Contacts, crimp tools, and insertion/extraction tools are listed with D-Subs on page 154.

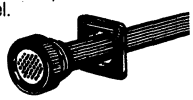
Metal-Shell CPC Connectors

The four series of Metal shell CPC connectors require the same contacts and tools as like series of Circular plastic connectors. As with CPC, contacts are sold separately. Because of the larger size, a different series of cable clamps are offered. **Materials. Insert:** Black thermoplastic. **Shells and Coupling Ring:** Aluminum alloy, zinc-plated. **Retainer Ring:** Stainless steel.



Series 1

See circular plastic connectors for multimate contacts and tools.

Crimping And Extraction Tool

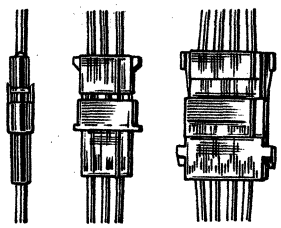
Type 601884-1 (725). Service Hand Tool. Crimps 22-10 AWG.
512-9126 ..... **EACH 47.67**

Type 465644-1 Extraction Tool. For 20-14 AWG Pins and Sockets.
512-9155 ..... **EACH 12.60**

General Purpose Mate-N-Lok Connector Kit

Model 1-601883-6. Kit contains connectors, contacts, extraction tool, and Super Champ FT handheld crimp tool. You get 146 assorted pieces, including 1,2,3,6 and 9-circuit connectors and contacts (20-14 AWG wire size). Contained in a sturdy, see-through case.
512-9315 ..... **EACH 75.95**

Free Hanging Connectors



This version of the Mate-N-Lok Connector provides all the quality features of the panel mount, yet was designed for free-hanging installations. The 2, 3, and 4 circuit configurations feature detent locking housings while the 6, 8, and 10 circuit configurations utilize positive lock housings. A single circuit connector is available with an option of detent or positive lock housings. The multiple circuit connector is available with an option of detent or positive lock housings. The multiple circuit configurations are polarized to assure proper electrical connections.

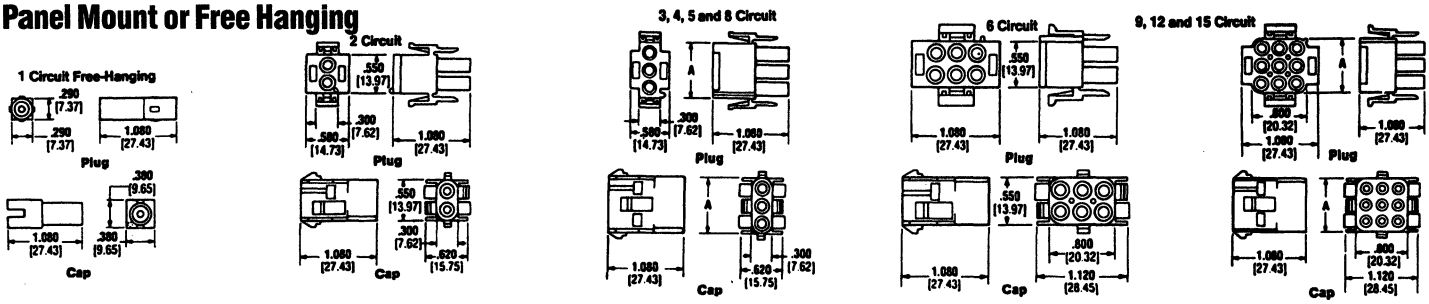
Panel Mount or Free Hanging



Features

- ► Innumerable Keying Combinations
- ► Pins and Sockets Can Be Intermixed in the Same Housing
- ► Positive Polarization
- ► Rear Cavity Identification
- ► Pin or Socket Contact Can Be Hot
- ► Positive Locking Housings
- ► Contacts and Housings Have Dual-Wire Capability
- ► Insulation Capability To .200 (5.08) Diameter
- ► Removable, Crimp Snap-In Contacts
- ► Low Contact Mating Force
- ► Dual Locking Lances Provide Optimum Contact Stability
- ► Panel Mount or Free-Hanging
- ► Available in 94 V-O Flame Retardant Material. Meets the Material Requirements of Table 23.1 of UL Standard 1410 (Television Receivers and Video Products)
- ► Make First, Break Last Capability Using Grounding Pin
- ► Harness to PC Board Capability Using Pin or Socket Header Assemblies
- ► Contacts are on .250 (6.35) centerline Spacing
- ► Recognized Under Component Program of Underwriters Laboratories Inc. File No. E28476
- ► CSA Certified File No. LR 16455
- ► Tested By VDE Under Their Test Report #4751-800-2/A

This series of connectors provides a highly reliable and economical means of grouping multiple-lead connectors in today's computer, computer/peripheral equipment and business machines.

DIPLOMATE® Low Profile DIP Sockets

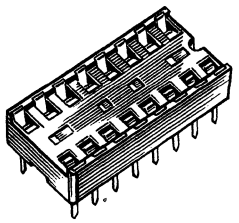
The DIPLOMATE socket family provides high quality at low cost with superior handling characteristics. It is available with dual wiping contacts in tin or gold plating over beryllium copper or economical phosphor bronze. The large target area of the contacts and tapered side ramps in the housing insure easy entry of a DIP package. Internal anti-overstress walls prevent contact damage. The housings are compatible with commercially available automatic insertion equipment for socket-to-board or DIP-to-socket applications. These stackable housings feature a "True Closed Bottom" design which prevents solder or flux wicking at class 1 conditions of EIA 486.

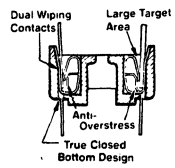
Standoffs provide board clearance for proper cleaning after soldering. Sockets are available with straight solder tails for clinching and are "true positioned" for automatic insertion into the PC board. Solder tails with retention feature, for self-retention in the PC board during handling and flow soldering, are available for hand insertion.

Housings are constructed from self-extinguishing glass-filled polyester, 94V-0 rated material and meet the material requirements of Table 23.1 of UL 1410 Standard for Television Receivers and Video Products.

The DIPLOMATE (DL) DIP socket family meets the requirements of EIA RS415, MIL-S-83734 and the most stringent specifications of main-frame computer manufacturers.

Dual Leaf





PERFORMANCE CHARACTERISTICS. Rating: 250 VAC. **Contact Resistance:** 20 milliohms max. (initial), 30 milliohms max. (after test). **Dielectric Withstanding Voltage:** 1000 VRMS min. **Insulation Resistance:** 5000 megohms min. **Capacitance:** 0.5 picofarad max. **Operating Temperature:** −55°C to +105°C (tin), −55°C to +125°C (gold). **Vibration:** 10-2000-10 Hz in 20 minutes at .06 (1.52) or 15 Gs for 3 sweeps in each of 3 axes. **Shock:** 100 Gs sawtooth, 6 shocks. **Engaging Force:** 340 grams (3.33 N) max. (.013 (0.33) pin). **Separating Force:** 25 grams (.24 N) (.008 (0.2) pin).

*Gold thickness in contact area. Tin-lead plate on solder tails.

These terminals feature color-coded nylon sleeves, funnel ramp entry, serrated inner barrel, a copper sleeve over the barrel, and tin-plated terminals for corrosion resistance.

Terminals meet or exceed the requirements of MIL-T-7928, Type 11, Class 1 and 2.

Ring Tongue Terminals (Fig. A)

Nylon insulation, tin-plated copper terminals.

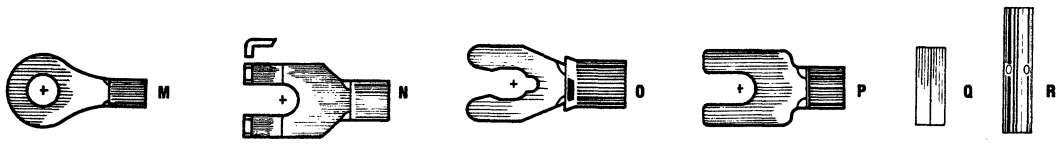
Solistrand Uninsulated Terminals



Constructed of fine grade high conductivity copper (spring spade terminals are constructed of phosphor bronze) and tin-plated. These feature a brazed seam, dimples or serrations inside the barrel and a bell-shaped barrel entrance. Meets or exceeds the requirements of MIL-T-7928, type 1, class 1 and 2. UL listed and CSA certified.

Plasti-Grip® Terminals and Splices

Terminals are constructed of high conductivity copper and are tin-plated. Spring spade tongue terminals are constructed of phosphor bronze and are tin-plated. Color-coded vinyl insulation sleeves with a funnel entry for easy wire insertion. UL and CSA rated for 600 V max. (1000 V fixture or sign.) and 90°C.

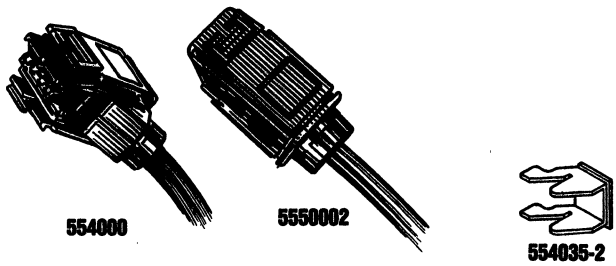
512-5630	554922-1	Panel Mount Kit	9.50

IBM Style Token Ring Data Connector



Designed for the mechanical interface requirements of IEEE 802.5 specification local area networks. The connector is used to terminate 2 twisted pairs of data conductors. This connector mates with another identical connector.

Cable termination is by insulation displacement. Cable braid is held between a ferrule and the connector's integral grounding shield. Termination of the conductors requires only a pair of slip joint pliers.

Remove the appropriate posts for the desired cable exit direction. Completed connectors can be snapped into a panel cut-out or used as free-hanging.

Standard Connector Kits

* To order connectors with cadmium finish (bright metal) instead of the military specification drab olive, include (639) at the end of the description. "639" at the end of the description specifies a bright cadmium shell. Bright finish shells are available in the following sizes: 10SL, 12S, 12SL, 14S, 16S, 18, 20, 22, 24 and 28.

MIL-C-5015 Type A & B

Ordering Information. The 97 Series Connectors are custom-assembled to customer specifications from Allied's large inventory of component parts. The following is required to order: **1 — Select the "insert" and configuration.** The inserts can be either male pin (indicated by a "P" in the assembled part description) or a female socket (indicated by a "S" in the assembled part description). Please note that while an identical size pin insert will mate with the socket, the shells will not mate unless a receptacle is selected to mate with a mating plug. Example: a 3102A-14S-2P doesn't mate with a 3102A-14S-2S because the shells won't mate, but a 3102A-14S-2P will mate with a 3106A-14S-2S. Also, a 3102A-14S-2P won't mate with a 3106A-14S-2P because both inserts have male pins. For safety reasons, the female socket needs to be the connector on the "hot" circuit. **2 — Select the required "Shell" type.** The Shells size (O.D.) and configurations are shown on the previous page. The size identification for the shell also identifies the size of the insert. Insert configurations and contact sizes are shown on the first page of this section. If a connector position other than standard is required, a table on the first page of the section lists available options. **3 — Select the needed contact arrangement.** Alternate positions for inserts are indicated on the first page of this section. Be careful to order the male pin and the female socket with the same alternate position indicator as a socket in the "x" position will mate with a plug in the "x" position, but will not mate with a plug in the "y" position. **4 — Select the desired shell finish — olive drab or bright cadmium.** Olive drab is standard. Bright cadmium finish is indicated by "(639)" at the end of the description. Example: 3102A-14S-2P (639) has a shell with a bright cadmium finish. The listing below has the receptacles and the mating plugs that mate on the same line. **5 — Select the needed accessory items.** Available accessories are listed on the pages in this section. All connectors except 97-3102A-XX need a cable clamp. Call the nearest Allied sales office for quantity pricing. See the previous page for available sizes.

See Preceding Page for Dimension Table

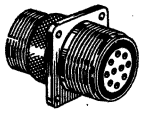
*Available with bright metal shells. The MS Receptacles mate with the MS Plugs that are on the same line in the table above.

97 Series Rear Release Crimp Type



UL, CSA Recognized. High speed termination, closed entry. Reduces fatique failure at wire contact junction. Intermateable and intermountable with 97 Series and MIL-C-5015 type shell styles, both plugs and receptacles. Utilized Standard 97 Series bright cadium plated shells and insert configurations. Designed for use with stamped and formed type crimp contacts. The size 16 contact design features insulation crimp support. Use with standard hardware for 97 Series connector. Order accessories with (693) plating deviation to match connector plating. **Specifications: Standard Shell Finish:** Clear chromate over cadium plate. **Inserts:** Molded 94V-O UL rated material. **Contacts:** Copper Alloy formed, silver plated; gold plating also available. **Wire Sizes:** 12-30 AWG. UL File #E64911. CSA File #LR45516. **Operating Temperature Range:** – 55°C to + 125°C. **Contacts sold separately. (See Contacts and Tools below.)**

Series 165 MS-Type Miniature Solder Connectors

Pressure-proof and completely weather-proof miniature connectors. Widely used in instumentation and miniaturized electronic equipment. These highly reliable connectors are available in both small and large shell sizes providing enough variation for a wide range of applications. Contacts are gold over silver plating. Aluminum shells feature quick bayonet coupling. Small receptacles mount in 13/16″ hole; secure through four 1/8″ holes on 25/32″ centers. Large receptacles require 1-1/16″ hole with four 1/8″ holes on 1-5/16″ centers. Plugs are 2-1/16″ long. Small plugs are 57/64″ dia.; large plugs are 1-9/64″ in dia. Rated 500 volts rms, except *600 volts. All have strain relief clamps. Shells are aluminum with neutral-color chromium finish. Dielectric material is diallyl phthalate. All have 'O' ring seals. **Av. shipping wt.:** 3 oz.

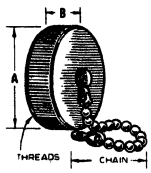
MS Type 9760 Dust Caps

Receptacles



Provides protection against live circuits and keeps out dirt and dust when connector is not in use. Has internal threads especially designed for use with Series MS3100A, MS3101A and MS3102A receptacles. Beaded chain. A soft rubber disc sits on the connector shell forming a watertight joint. Cadmium olive drab finish. **Average shipping weight:** 2 oz.

Amphenol® Microribbon Connectors

These connectors are intermatable amphenol 57 Series and 157 Series connectors. Special contact design allows the use of standard .050" flat ribbon cable for termination. **Contacts:** Copper alloy/gold plating. **Dielectric:** Polycarbonate resin (UL94V-0)/blue. Rated 250 VAC rms, 1 amp. **Test Voltage:** 500 VAC rms at sea level. **Operating Temperature:** −55°C to +105°C.

Right Angle P/C Headers

Type 57L is all plastic. Type 57LE has a metal front shell. Intermatable with Amphenol 57 Series (solder termination). 157 Series (solderless termination), and 57F and 57FE Series (insulation displacement). **Contacts:** Copper alloy with gold plating. **Dielectric:** Blue polybutylene terephalate (PBT). **Front Shell (57LE only):** Brass/nickel plating. Rated 500 VAC rms, 3 amps. **Dielectric Withstand Voltage:** 1200 VAC rms at sea level.

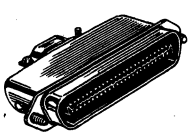
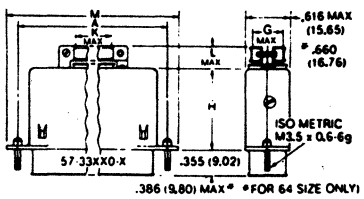
57-Series Connectors





Copper alloy contacts, selectively plated gold-over-copper for excellent current carrying characteristics. UL94 VO rated diallyl phthalate dielectric per MIL-M14F Type MDG, for operation at up to 700 volts DC (sea level) without shorting or flashover. Zinc-plated steel outer shell, with clear chromate finish, for corrosion resistance. Trapezoidal-shape shell assures correct polarity. **Current Capacity:** 5 amps per contact. **Voltage Rating:** 700 volts DC at sea level. **Operating Temperature:** −55°C to +105°C (−67°F to +122°F). **Wire Sizes:** Solid — 22 gauge, max.; stranded — 24 gauge, maximum.

17 Series D Subminiature

Low cost. Conforms to NFC 93-425, EIA standard RS-232-C — RS-449. Two-piece white thermoplastic insulator. UL94 VO rated. Five shell sizes (9, 15, 25, 37 and 50-contact types). Nonremovable contacts. Shell is steel yellow chromated over zinc. Contacts are screw machined (male brass, female bronze). Plating is gold over nickel. Normal voltage is 300 V_{eff} 50 Hz at a current rating of 7.5 A.

Metal Front Nosed, Insulation Displacement D-Sub Connectors

Dual insulation displacement contacts with gold over nickel plating (mating area). Termination with standard .050" pitch round-conductor flat ribbon cable with 28 AWG solid conductors or 28 and 26 AWG stranded conductors. Intermateable plugs and sockets also mate with industry standard D-Subminiature connectors above. **Current Rating:** 1.5 amp, 26 AWG; 1 amp, 28 AWG. **Dielectric Withstand Voltage:** 500 VAC rms.

Spectra-Strip® Protected Headers

The 816 series protected headers are for applications requiring positive connect and fast disconnect capabilities. MIL-C 835031 21B/24A and 25A compatible and have snap-in polarization tabs. Solder plated tails avoid solder bath contamination. Lock and eject latches optional (no tooling required to install). UL and CSA recognized. **Insulation Material:** glass reinforced thermo-plastic. UL flammability rating, 94V-O. **Contact Material:** phosphore bronze. **Contact Area Plating:** 30 μ gold over nickel. **Current Rating:** 1 amp. **Withstanding Voltage:** 1000 V rms at sea level. **Temperature Rating:** – 55°C to + 105°C (– 67°F to + 221°F).

IDC Socket Connectors

MIL-C 83503 compatible. .100x.100″ grid. Two slots for polarization (except 10 and 14 contact sizes). Duplex plated contacts for lower per line cost. Center polarizing position. UL and CSA recognized. **Insulation Material:** glass reinforced thermoplastic. UL flammability rating 94VC-O. **Contact Material:** beryllium copper. **Contact Area Plating:** 15 μ gold over nickel. **Wire Accommodation:** AWG 26 stranded; AWG 28 solid and stranded, AWG 30 solid. **Current Rating:** 1 amp. **Withstanding Voltage:** 1000 V rms at sea level—terminated. **Temp. Rating:** – 55°C to + 221°C.

Polarization Tabs.

75 Ohm BNC Connectors

These connectors can be used in a variety of applications where true 75 ohm performance is needed to insure lower signal distortion. They may be matched with standard 50 ohm BNC without damage or intermittence.

BNC Suretwist® Connectors

Specifications. Electrical Frequency Range: 0-300 MHz typical. **Voltage Rating:** 500 V peak. **Dielectric Withstanding Voltage:** 1500 V rms. **Material Body:** Zinc Die-cast. **Coupling Sleeve:** Brass. **Insulator:** Polyethylene. **Plating:** Contact—Tin Dip; Other Metal Parts—ASTROPLATE®. **ENVIRONMENTAL Thermal Limits:** – 67° to + 185°F(– 55° to + 85°C). Non-weatherproof.

Barrier Terminal Blocks

Barrier

Interposing barriers between each terminal position yields substantially higher electrical ratings and provides an additional safeguard against shorting from frayed wires. The wide size range of "Jones" barrier terminal blocks, plus the several termination options and the available accessories permit flexibility of end use applications.

Marker Strips

Marker strips identify terminal positions on barrier terminal blocks and insulate exposed portions of terminals from a conductive mounting surface. Marker strips for Series 140 are 1/32" thick, flame-retardent material and mount under the terminal strip. **Shipping wt.:** 2 oz. 1/8" white numerals standard.

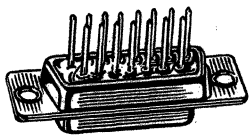
Basic D, D-Subminiature Connectors



This economical series is ideal for commercial applications. **Insulator Material:** Two-piece nylon. **Contact Material:** Machine copper alloy with gold over nickel contact plating. **Voltage Rating:** 1250 VAC rms at sea level. **Current Rating:** 5 Amps. **Operating Temperature:** – 65°F to + 250°F. Non-removable contacts.

Basic D, Series 3 Commercial and Military Connectors

High-reliability connectors with improved heat resistance. An outstanding feature of these connectors is the crimp, snap-in, rear release contacts. They are ideal for field repair and replacement. **Insulation material:** Monoblock glass fiber-filled diallyl per MIL-M-14, type GDI-30-F. **Contact Material:** Copper alloy with gold over copper plating. **Current Rating:** 5 Amps. **Operating Temperature:** – 65°F to + 300°F. Military connectors have all the same features and meet the requirements of MIL-C-24308.

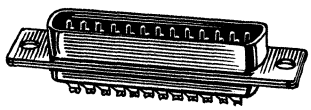
Basic D II Connectors



The low cost version with all the performance characteristics of the Basic D Series. (They cost less because they have stamped instead of machined contacts.) Ideal for commercial applications where cost is a factor. **Insulation Material:** Two-piece nylon. **Contact Material:** Copper alloy (stamped) with gold over nickel plating. **Voltage Rating:** 1250 VAC rms at sea level. **Current Rating:** 5 Amps. **Temperature Range:** – 65°F to + 250°F.

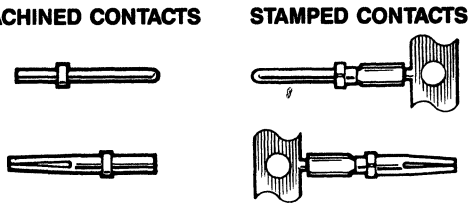
Econo D Connectors



The D*C series has a two-piece insulator as well as crimp, snap-in-rear-relase contacts that can be inserted by hand. An economical connector ideal for commercial applications where field replacement of contacts is required at a lower cost than high-reliability connectors. **Insulator Material:** Two-piece thermoplastic polyester UL-94-V0 rated. **Voltage Rating:** 1000 VAC rms at sea level. **Current Rating:** 5 Amps. **Operating Temperature:** – 65°F to + 125°F. The D*U version is UL recognized with the same specs as D*C series. **Contact Material:** Copper alloy (machined), cadmium copper (stamped) with gold over nickel plating.

All contacts in this column sold each in multiples of 100.

Super D Plastic Connectors

Exclusive new plastic D-Subminiature connector. Available in 9, 15, 25 and 37 contact sizes. Connectors available with plain mounting holes, with threaded bushings, with latch blocks, and with latch blocks and threaded bushings. Connectors are captivated in two-piece, snap-on grey hoods. Hoods are available with latches or with filter ends. **Contact Material:** Copper base alloy. **Contact Plating:** Gold on contact mating area and gold on contact terminating area, with copper underplate. **Termination:** Insulation displacement with one of three TRW Cinch terminating tools. Stranded wire 24-26 AWG with .045″ diameter max. PVC insulation is displaced and wire is driven into termination to form four positive contacts on each conductor. **Metal Stay Band/Strain Relief:** .036″ (9.14 mm) steel. **Polarization:** D or keystone shape insures one way mating. **Hoods:** Molded phenylene oxide. **Wire Strain Relief:** One required for 9 contact size. Two required for other sizes. **Withstanding Voltage Rating:** 1000 volts rms AC—sea level. 1400 volts DC. **Current Rating:** 3 amps. **EIA Standard:** Surpasses EIA STD. RS449 for 9 and 37 contacts interface for DTE and DCE equipment. Also meets RS232 for 25 contact size. **MIL-C-24308:** Super D is designed to meet applicable performance requirements of MIL-C-24308. UL Recognized.

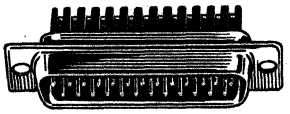
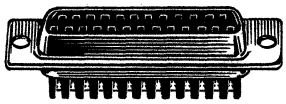
Super D Metal Shell Connectors





IDC Connectors
Used for grounding in applications using shielded cable. **Insulator:** molded glass-filled polyester UL94V-0. **Contact Material:** copper based alloy. **Contact Plating:** gold on contact mating area and gold on contact terminating area with copper underplate. **Termination:** insulation displacement with same tools as the Super D Connector system except an additional nest is required. Stranded wire 24-26 AWG with .045″ diameter max. PVC insulation is displaced and wire is driven into termination to form four positive contacts on each conductor. **Withstanding Voltage Rating:** 100 volts RMS AC at sea level; 1400 volts DC. **Current Rating:** 3 amps.

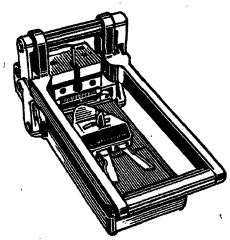
Certi Clinch D Field Termination Tool



Type SD-CC. Designed for mass termination of individual wires, eliminating wire stripping, soldering and crimping. It handles all four Super D sizes, is readily portable and requires no set-up time and little operator time. Rugged, all metal construction affords trouble-free long life.
750Q6931.....**EACH 551.99**
Type SD-CCN. Conversion nest converts SD-CC Certi-Clinch D to SD-CCWN.
750-6932.....**EACH 55.85**

Econo D* A Subminiature Connectors

These subminiature connectors feature crimp-type insulation-grip contact providing increased holding power. Evenly distributed crimp pressure provides consistent termination integrity making them more reliable than conventional rear-relase crimp, snap-in contacts. **Insulator Material:** Two-piece glass-filled thermo plastic. **Contact Material:** Stamped copper alloy/with gold over nickel contact plating. **Voltage Rating:** 1000 VAC, 5 Amps rms at sea level. **Operating Temperature:** – 65°F to + 125°F. For ordering accessories, the second letter in Mfr.'s Type is SHELL SIZE.

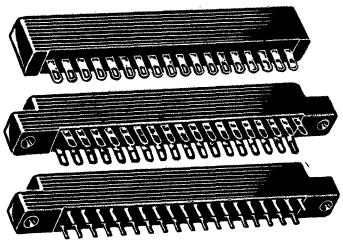
Cardcon® Edge Connectors



For .062" thickness single and double-sided PC boards. Blue glass-filled polyester 94 V-O insulator. Meets requirements of MIL-C-21097. **Contact Style:** Semi-bellows bifurcated. **Contact Material:** Spring brass alloy 260. **Contact Plating:** Gold on contact area and gold flash on tail with copper underplate. **Termination:** Solder eyelet; dip solder with either .200" (5.08 mm) or .140" (3.56 mm) between row spacing. Available with or without mounting ears and .128" holes. **Test Voltage:** 1800 VAC rms at sea level. **Current:** 5 Amps.

.156" Contact-to-Contact Spacing, Dip Solder Tails. Double Readout, w/mounting ears .200" Row Spacing, Tails .156" long.

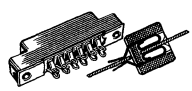
Double Readout Card Extender Edge Connector



For inter-connecting two or more .156" (3.962 mm) contact center 1/16" (.1558 mm) PC Boards. Glass fiber-filled diallyl phthalate per MIL-M-14, type SDG-F insulator. **Contact Style:** Bifurcated bellows of beryllium copper and gold contact plating. Solder eyelet termination. **Rated:** 830 VAC; 5 Amps rms at sea level.

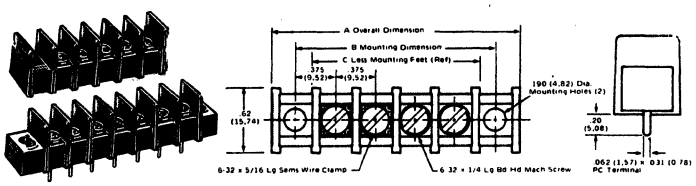
38000 and 38010 Series Terminal Blocks



3/8″ centerline terminal blocks. Available in two surface mount styles — no bottom termination (Type 38000) or printed circuit pin (Type 38010). For wire range of 22-12 AWG. Excellent chemical resistance. 3000 (typical) breakdown voltage; .03% water absorption; 94 V-O flammability rating. 300 V, 20 Amps. Terminals are brass, tin plated. Polypropylene housing.

Ribbon Or Flat Cable Interface Sockets

Features convenient mating, track mounting, and wire clamp on terminal blocks. Rated at 1 Amp, 125 V. **Terminal Blocks:** Break-resistant thermo-plastic. **Terminals:** No. 2-56 screws with clamp, 1/4″ center-to-center spacing. **Wire:** Up to No. 16 AWG. **Headers:** 2 rows of .025″ square tin-plated pins on .100″ centers with hook retainers. Designed to mate with all standard connectors.

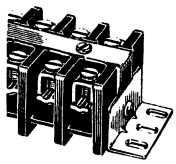
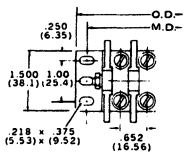
Type H Sectional, High-Power Terminal Blocks





These blocks have a maximum diameter of 2.0″ and .652″ center-to-center spacing. The housing is thermoplastic-polyester with a white fiber circuit marking strip. Rated 75 amps, 600 volts and 130°C (266°F) continuous use temperature. Unique bar and traveling collar design eliminates the lugging of wire. UL recognized for wire sizes 16 AWG to 4 AWG. Copper terminals with high-pressure solderless connectors. Items with 11-30 terminals are available by special order. Special order minimum is 10 pieces for each item.

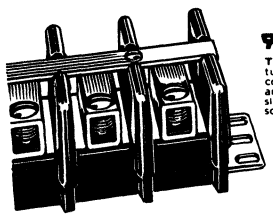
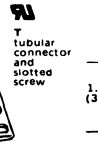
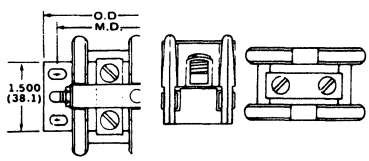
Type T High Current Terminal Blocks







UL Standard 1059, CSA Guide No. 184-N-90. These blocks have a maximum diameter of 2.5″ and 1.169″ ±0.030″ center to center spacing. The housing is black phenolic rated for 125 amps, 600 volts, and for 150°C (302°F) continuous use. Tubular, high-pressure solderless connections of electrolytically pure copper accommodate wire without lugging and provide 100% conductivity. The thermo-set phenolic molding has a white fiber marking strip. Thru-bolt construction. UL recognized for wire 6 AWG to 1/0 AWG. Available in 1-6 terminals. Items not listed are available by special order. A minimum of 10 pieces per item is required on unlisted items.

Type SEP, External Screw Terminal Blocks

UL Standard 1059. These miniature blocks feature 1/4″ center-to-center spacing and a maximum diameter of .531″. Type SES is a representative of a family that contains fifteen terminal and contact variations. Type SES can be mounted on metal surfaces without additional insulation. Blocks are made from thermo-set phenolic. Rated for 5 amps, 300 volts and for 150°C (302°F) continuous use (UL). No. 2-56 plated steel terminal screw accepts wire from 22 AWG to 16 AWG (UL). Available with 1-26 terminals. Items not listed are available by special order. A minimum of 10 pieces per item on unlisted items is required.

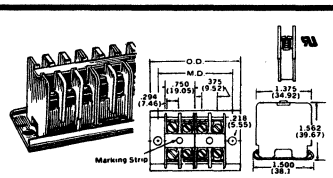
3-Foot Track. Type SW-96.
764-0900. 1-99 ..... EACH 3.97 100-Up ..... EACH 3.69



UL Standard 1059, CSA Guide No. 184-N-90. These modules snap into the 3-foot long zinc dichromate plated heavy steel track, below. The track mounts 32 poles per foot. The blocks have a maximum diameter of 1.5″ and have 3/8″ center-to-center spacing which matches the spacing of the holes in the track. The housing is white polyamide (nylon) rated 50 amps, 600 volts, and 125°C (257°F) continuous use temperature. The modules are complete with a white fiber marking strip and retaining springs. Terminals are solderless electro-tinned tubular connector with no. 10-32 screws. UL recognized for wire sizes 16 AWG to 8 AWG. The series is available in 11-192 terminals by special order.

Feed-Through Terminal Blocks

Rated 20 amps, 300 volts, with a 150°C (302°F) continuous use temperature rating. **Max. Width:** .718" ±0.030". Terminals on 7/16" center to center spacing. The blocks are made from black thermo-set phenolic. The screw terminals have a No. 6-32 plated steel screw which accepts wire from 22 AWG to 12 AWG (per UL).

Type GFTXW — similar to type GFT but the blocks are made from thermoplastic (UL rated for 105° continuous use) and also have wire clamps included. The two items listed are offered at special pricing. 2-26 terminal types are available by special order with a 10 piece minimum required per item.

Snap-In Relay Socket Assemblies

High quality sockets for maximum relay retention and electrical conductivity. Permanent-numbered terminals. Glass epoxy G-10 printed circuit boards. New unitized, thermoplastic sockets with closed-back design eliminates panel insulation, and resists breakage. **RS2** is for 10-pin miniature 2PDT relays with latching coils such as P&B type R-10 and Sigma type 62R. **RS8** and **CUS8** are octal types and can be utilized with standard 8-pin octal-base relays. **RS9** is specially designed for 9-pin Amperite miniature thermal time delay relays. **RS11** and **CUS11** are octal types and can be utilized with standard 11-pin octal-base relays. **RS12** and **CUS12** are for 11-pin square-base 3PDT relays such as P&B type KUP and Sigma type 68R. **RS14** is a 14-pin, square-base miniature type for 4PDT relays. **RS15** is a 15-pin square-base grounded miniature type for grounded 4PDT relays. **RS16** and **CUS16** are 8-pin square-base types for 2PDT barrier type, plug-in relays. UL Recognized and CSA Listed except for.*

Pre-Punched Vinyl Track

48" lengths of track that holds up to 30 socket assemblies. Drilling and tapping is only required for two or three mounting screws. The assemblies above snap in and out without disturbing adjacent units except for dovetail design on CUS12 and CUS16.

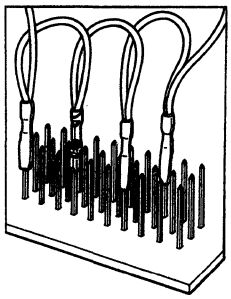
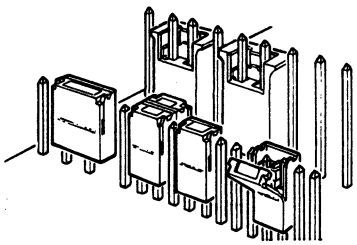
Daisy Chain Jumpers



► **Maxi-PV contacts provide constant high electrical and mechanical reliability after repeated cycles**
► **Board As Shown Not Included With Jumpers**

Eliminate wire measuring, stripping, soldering or hand-tool terminating. Maxi-PV contacts provide constant high electrical and mechanical reliability after repeated cycles. Contact has brass body and beryllium copper spring. **Contact area:** 1 μm (40 μ inch) gold over nickel. **Reminder:** gold flash. **Current rating:** 2.5 A. **Resistance:** 4 mΩ maximum. **Insertion force (max.):** 4,30 N (430 gf) with withdrawal force (min.) 0,75 N (75 gf). **Temperature range:** – 65°C to + 105°C. AWG 28 stranded copper wire conductor with PVC insulation. PVC shrinkable tubing. **Packaging:** 250 contacts per reel.
518-0001. 47254. RL/250 .....**EACH 148.40**

Bergcon® System Mini Jump™ Jumpers



65474 Series. Jumpers feature high density packaging, stackable on 0.100 inches spacing. Offer single row, two positions per row. For bussing, programming and switch replacement. Replace conventional printed circuit board switches. Virtually eliminates accidental de-programming. Mate with 0.025 inch square and round pins. Dual metal PV contact design provides excellent retention after repeated cycling. Available in glass-filled thermoplastic polyester housing, color blue. Gold flash over nickel finish. **Insulation resistance:** 1×10^5 MΩ minimum. **Temperature range:** – 65°C to + 125°C. Contact has brass or cupro nickel body, beryllium copper spring, and gold-plating over nickel finish. Rated at 3A maximum, with initial resistance of 11 mΩ maximum, 15 mΩ maximum after tests. UL recognized, CSA certified.

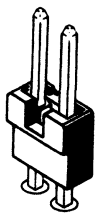
Low Profile Jumper System



► **Pins shown are not included with jumper**

68786 Series. Economy jumper system applicable for bussing, programming, and switch replacement. Low profile permits high-density packaging. Dual beam contact. Offer 0.100 inch spacing and two positions standard. Housed in thermoplastic polyester rated UL94V-0, color black. **Insulation resistance:** 50,000 MΩ minimum. **Temperature range:** – 55°C to + 120°C. **Withstanding voltage:** 750 Vrms. **Contact current rating:** 2.5 A maximum. **Resistance:** 15 mΩ maximum. Mates with 0.025 inch square pin. Contact made of phosphor bronze. **Type 68786-202** is plated 30 μ inch gold; **68786-302, 100 μ inch tin/lead.**

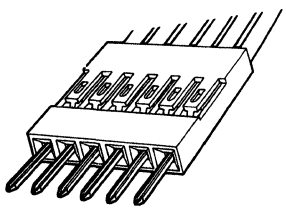
Male Crimp-To-Wire Pins



► **Crimp-to-Wire Pin shown installed in Mini-Latch Housing**

Crimp-to-Wire Pin fits in mini-latch housings. Mates to MiniPV receptacles. 0.100 inch minimum spacing. Brass contact and gold finish. **Current rating:** 3 A continuous depending on wire size. **Resistance:** 5 mΩ maximum. **Temperature range:** – 65°C to + 125°C. Wire size AWG 22-26. UL recognized.

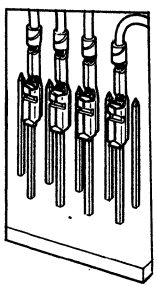
Bergcon® System Crimp-To-Wire MaxiPV™ Receptacles



Two-piere design provides low resistance, high pressure, gas-light connection. Mate to 0.025 inch round or square pins. 0.125 inch spacing. Contact has brass body, beryllium copper spring and gold finish. **Current rating:** 5 A continuous depending on wire size. **Type 46227** accepts AWG 18 or 20. **Type 46237** accepts AWG 22, 24, or 26. **Resistance:** 4 mΩ maximum. **Temperature range:** – 65°C to + 125°C. Come with standard spring force, recommended for Maxi-Latch housing 12 through 56 positions. UL recognized, CSA certified.

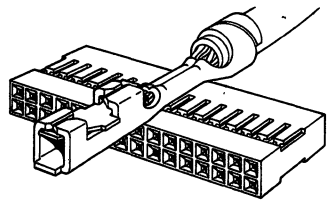
Bergcon® Crimp-To-Wire MiniPV™ Receptacles



► **Mini-PV Receptacle shown with Latch Housing**

Mate to 0.019 inch and 0.025 inch round or square pins. Dual-metal contact design provides constant retention force after repeated cycles. These female receptacles have beryllium-copper spring and brass body. Offer superior electrical and mechanical characteristics. Standard spring force is recommended for use in Mini-Latch housings 40-72 positions. High spring force for Mini-Latch housings 10-50 positions.

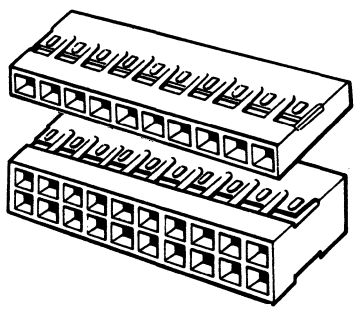
65039/65043 Series Mini-Latch PV™ Housing



For use with dual metal MIni-PV contacts and crimp-to-wire pins. Allows simultaneous connection of Mini-PV terminated conductors on 0.100″ × 0.100″ or 0.100″ × 0.200″ double row, to accommodate Mini-PV receptacles or crimp-to-wire male pins. Accepts crimp-to-wire Mini-PV range AWG 22-36, and crimp-to-wire pin AWG 22-32. Made of modified polyphenylene oxide rated UL 94V-1, color black. **Insulation resistance:** 1×10^5 MΩ minimum. **Temperature range:** – 40°C to + 105°C. **Withstanding voltage:** 1000 Vrms at sea level. **Latching force:** 6.5 lbs. minimum per position. Optional polarization plug.

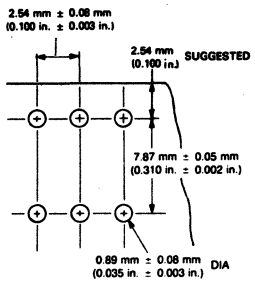
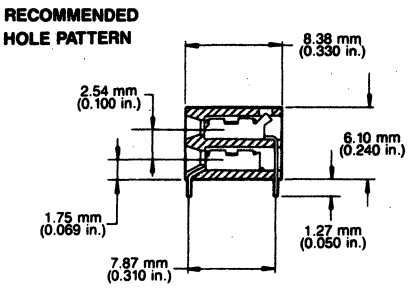
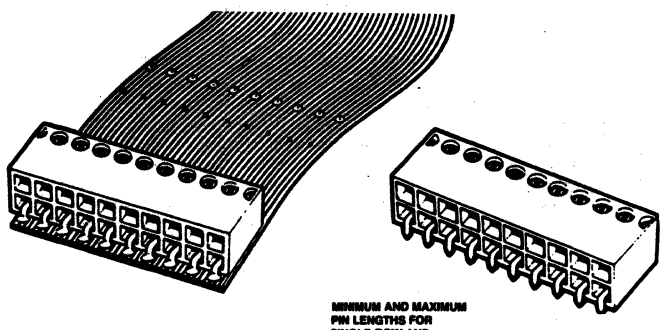
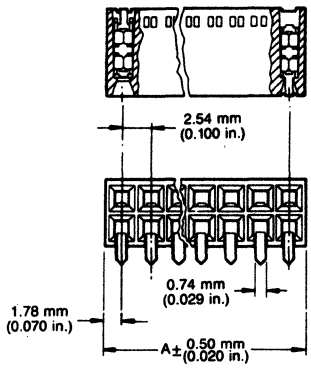
67943 Series Horizontal PV™ Card Connectors For Flexible Circuitry

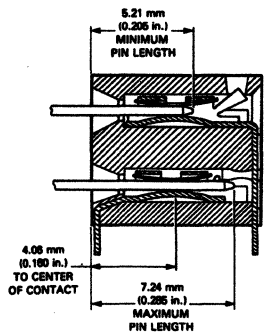






MINIMUM AND MAXIMUM PIN LENGTHS FOR SINGLE ROW AND DOUBLE ROW HORIZONTAL CARD CONNECTORS





6

Housing meets requirements of MIL-P-46184, UL 94V-0. Color black. Insulation resistance of 5 × 10^4 MΩ minimum. Temperature range of −65°C to +105°C. **Withstanding voltage:** 1250 Vrms. Contacts have brass body, beryllium copper spring, and finish of 30μ inches gold with gold flash over nickel. **Current rating:** 3 AΩ maximum. Resistance of 100 MΩ maximum per contact initially, 15 mΩ maximum per contact after tests. **Capacitance:** 2 pF maximum. UL recognized, CSA certified.

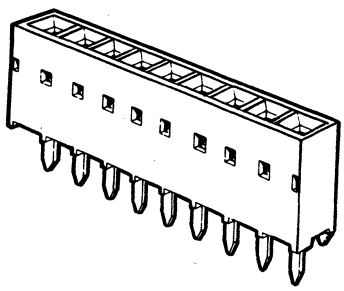
Dual Entry Card Connector

68956, 68046, 68684, 66956, 76314 and **76316** series PV card connectors are housed in glass-filled polyester rated UL94V-0. Temperature range is −65°C to +125°C. **66956, 68429, 76314** and **76316** service feature reliable dual metal PV contact for modular and programming applications. Mate with 0.025 inch square and round pins. Contact has brass body and beryllium copper spring 0.0035 inch thick. 30 μ" gold with gold flash over nickel finish. Current rating of 3A maximum. **Withstanding voltage:** 1250 Vrms. **Insulation resistance:** 1 × 10^5 MΩ minimum. Housing for **68429** series also meets requirements of MIL-M-24519. Come in black. Per contact resistance is 15 MΩ maximum. **Capacitance:** 2 pF maximum. Per contact resistance for **66956, 76314** and **76316** series is 12 MΩ maximum. **Capacitance:** 1,5 pF maximum. **68046, 68682** and **68684** series feature lop profile to allow dense packaging. Contact has preloaded dual beam design and low insertion force. Duplex plating for minimum gold consumption. Duplex-contact area has finish of 30 μ" minimum gold over nickel and solder leg has 100 μ" minimum tin/lead. **Current rating:** 3 amps DC for individual contacts at ambient temperature ≤20°C and 2 amps DC for total connector. Resistance is 15 mΩ maximum initially and 20 mΩ maximum after tests. **Insulation resistance:** 10^5 MΩ minimum. **Withstanding voltage:** 1000 Vrms. **Capacitance:** 1,5 pF maximum. UL recognized, CSA certified.

Single Row, 0.100" Center Card Connectors



- **Dual entry.**
- **Contact features preloaded dual beam design and low insertion force.**
- **Very low profile (only 7,87 mm - 0.310 inch) for dense packaging.**
- **Extensive range both in single row (2-50 pos.) and double row (4-100 pos.).**
- **Floating contacts allows solder legs to self-center on pads.**
- **For parallel and right-angle p.c. board mounting.**
- **Duplex plating for minimum gold consumption.**
- **Stackable End-to-End and Side-to-Side.**

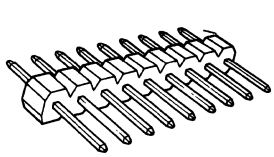
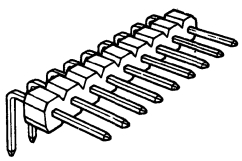
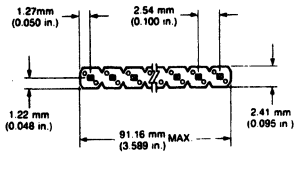
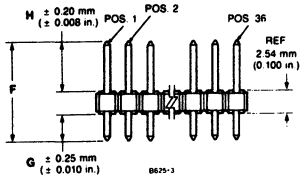
Bergstik® II Headers









RETENTION SOLDER TAIL

STANDARD SOLDER TAIL

"Retentive sticks" headers have optional retention tail that provides 0.5 lb. minimum retention prior to soldering on 0.062 inch thick p.c. boards. Can be manually broken to the desired length. Drawn 0.025 inch square wire presents 4 surfaces suitable for the wrapping. Pins positioned on 0.100" centers. Stand-offs allow cleaning to eliminate soldering contaminates. Header body made of glass-filled nylon rated UL 94V-O, color black. **Insulation resistance:** 500 MΩ minimum. **Temperature range:** −65°C to +105°C. **Withstanding voltage:** 1500 Vrms at sea level. Phosphor bronze pin, current rating, 5A maximum. Retention force to body, 2 lbs. in either direction.

Bergstik™ Surface Mount Headers

"Stick" headers feature small board footprint to save on pc board space. Stable symmetrical footprint allows easy use on surface-mount boards. Available in vertical versions. High temperature 6/6 nylon plastic body remains flexible after soldering to relieve stress on the solder joint caused by vibration or thermal cycling. The glass-reinforced body is rated UL 94V-0. Color black. Suitable for vapor phase soldering.

Insulation resistance: 5000 megohms minimum. **Operating temperature range:** – 40°C to + 105°C. **Withstanding voltage:** 1500 Vrms, 60 Hz at sea level. Phosphor bronze pin. Finish of 30 μinch GXT palladium-nickel alloy with gold flash over 50 μinch nickel. **Current rating:** 5A. **Retention force to body:** 2 lb. minimum in either direction. UL recognized, CSA certified.

Bergstik® I "Railroad Track" Headers

"Railroad track" headers can be manually broken to desired length. Feature pins specially molded in flame retardant plastic. Drawn wire pins provide smooth contact surfaces on all sides. Manual insertion allows on-line production without a machine. Made of 20% minimum glass-filled nylon rated UL94V-0. Colors black, cream, brown, blue or light blue. Phosphor bronze, 3/4 hard in accordance with QQB-750, composition A. **Straight single row:** 0.100 inch centers. **Operating temperature:** 40°C to + 105°C. **Current rating:** 5 amps. **Dielectric withstanding voltage:** 1500 Vrms, 60 Hz at sea level on minimum contact spacing. **Insulation resistance:** 5000 megohms.

The Empire System™

.025" square board-to-board interconnects on .100" centers
The EMPIRE SYSTEM is a family of card connectors, 'stik' headers and shunts that offer a reliable and economical alternative to other modular interconnect systems for high-volume applications. The two-piece interconnection system is on 0.100 inch grid spacing and offers a broad range of components for mother/daughter and parallel printed circuit board packaging for a wide range of electronic products.

Double-row card connectors are available in horizontal- and vertical-entry styles in 4 to 100 positions and feature duplex-plated contacts. Straight and right angle headers feature retention legs that eliminate the need for a clinching operation prior to wave soldering. The shunts are available in two heights. A variety of contact platings are offered to meet specific performance and costs requirements.

Empire System Stik Headers

Empire stik headers have retentive tails that provide 0.5 lb. minimum retention prior to soldering on 0.062 inch thick PC boards. Drawn 0.025 inch square wire presents 4 smooth mating surfaces. Pins positioned in 0.100" centers. Standoffs allow cleaning to eliminate soldering contaminates. Header body made of glass-filled nylon rated UL 94 V-0, color black. **Insulation resistance:** 500 MΩ minimum. **Temperature range:** – 65°C to + 105°C. **Withstanding voltage:** 1500 V rms at sea level. **Phosphor bronze pin, current rating:** 5 A minimum. **Retention force to body:** 2 lb. in either direction.

Quickie™ IDC System Headers, Connectors

Quickie™ III provides "world class" quality at a globally competitive price. This product line is ideally suited for high-volume applications such as small computers, video equipment, instrumentation, office products, and automotive related packaging schemes.

The Quickie™ III system includes a complete line of female connectors, straight and right-angle headers, and edge card connectors. Products are available in a variety of sizes ranging from 6 to 64 positions.

The Quickie™ III female connector features a single-beam, long-wipe contact that provides a highly reliable electrical connection. The contact is made of a phosphor-bronze base material and is available with gold over nickel, tin/lead, or Du Pont's exclusive "better than gold" GXT™ plating system.

The female connector also features a pre-installed bridge-type cover that both protects the contacts during handling and provides precise cover-to-base alignment during installation. It also provides a value-added benefit to the user by reducing the assembly time required during connector installation.

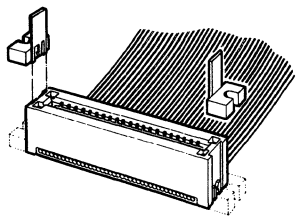
The cover's feed-through design allows the cable to be inserted into either side of the connector for cable-end terminations. It also allows the connector to pass smoothly over the cable for daisy chain applications. Serrated slots in the cover assure accurate positioning of the cable over the contacts during assembly.

Quickie™ III headers feature duplex-plated pins with either gold or GXT™ plating in the contact area. The solder-tail portion of the pin is fully plated with tin/lead.

These headers also feature four-wall shielding that protects the pins when the header is unmated, and dual-function latches that both lock and eject a mated connector. These latches are specifically designed to minimize space requirements on the printed circuit board. Headers have dual polarization and are compatible with virtually all IDC specifications.

6

Quickie™ III Edge Card Connectors



Single-beam configuration provides high contact pressure for reliable electrical performance. Preloaded cover ensures cable positioning and protects contacts. Bridge-type cover enhances connector-to-cable production rates. Molded-in polarization. Housed in glass-filled thermoplastic polyester rated UL94-V-0. **Insulation resistance:** 1 × 10^5 MΩ minimum. **Temperature range:** – 65°C to + 125°C. **Withstanding voltage:** 500 Vrms. Contact made of phosphor bronze, with finish of 30 μ" GXT™ over preplated nickel. **Current rating:** 1A. **Resistance:** 15 mΩ maximum.

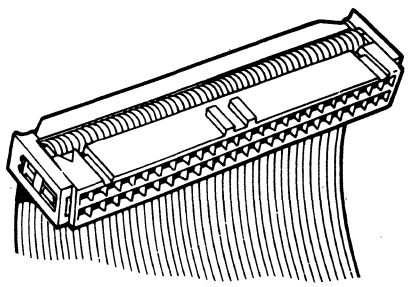
Quickie™ III Female Connectors



Pre-loaded adjustable bridge-type cover suits a wide range of cable. Reduces assembly time, protects contacts and offers precise cover-to-base alignment ensuring reliable termination. Cover's feed-through design allows cable to be inserted into either side of the connector for cable-end terminations. Also allows connector to pass smoothly over cable for daisy chain applications. Serrated slots in the cover assure accurate positioning of the cable over the contacts during assembly. Long wiping action ensures good contact. Polarization by means of polarization plug. Glass-filled thermoplastic polyester body rated UL94-V-0. **Insulation resistance:** 1 × 10^5 MΩ minimum. **Temperature range:** – 65°C to + 125°C. **Withstanding voltage:** 1000 Vrms. Phosphor bronze contact has finish of 30 μ GXT over pre-plated nickel. **Current rating:** 1A. **Resistance:** 15 mΩ maximum.

Quickie™ III Right-Angle Headers

Four-walled shielding protects pins in unmated condition and prevents misalignment. Dual polarization by use of polarization keys. Lock and eject system minimizes PC space required and allows dense packaging design. Feature duplex-plated pins made of phosphor bronze. **Current rating:** 1A. **Finish:** 30 μ" GXT™ over nickel on the two contact sides of the pin and gold flash on the other two non-contact sides. Body is glass-filled thermoplastic polyester rated UL94-V-0. **Insulation resistance:** 1 × 10^5 MΩ minimum. **Temperature range:** −65°C to +125°C. **Withstanding voltage:** 1000 Vrms. Polarization achieved by cutting off pin and adding polarization plug to mating female connector.

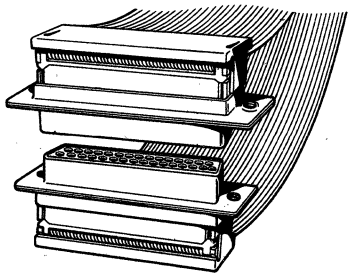
Quickie™ IDC "D" Subminiature Connectors



- **Available in plastic or with metal shell.**
- **Pre-loaded cover provides one-piece cable housing for rapid assembly.**
- **Serrated cable slot facilitates precise cable positioning over contacts.**
- **Industry standard connector configurations allow mating with military and commercial "D" subminiature connectors.**
- **IDC technique enables simultaneous termination, without prestripping, of all conductors of flat flexible, round conductor cable with 1,27 mm (0.050 in.) pitch.**

Grid is a staggered pattern in multiples of 1,38 (0.054 in.). Polarization is achieved by trapezoid shape of the housing. The body is glass-filled thermoplastic polyester (UL 94V-0); black. Metal shell (optional), steel with zinc, yellow chromate finish or steel with tin-over-copper finish with insulation resistance of 2×10^6 MΩ; temperature range of −65°C to +105°C and can withstand voltage of 1300 Vrms, 60 Hz at sea level. The contact material is copper-based alloy with a finish in the contact area: 0,75 μm (30 μin.) or 0,38 μm (15 μin.) gold over nickel. The current rating is 1A DC with resistance of 20 mΩ max. The mating force 1.7 N (6 oz.) max. per contact. Cable termination is 28 AWG stranded or 30 AWG solid, flat flexible, round conductor cable on 1,27 mm (0.050 in.) centers.

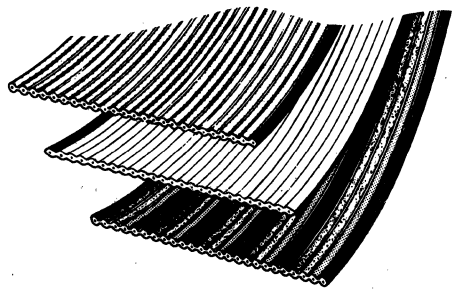
Quickie™ IDC System Flat Cable



Compatible with Quickie™ connectors, flat cable is PVC insulated and features conductors made of soft annealed copper with tin finish and pitch of 0.050". **Type 76177** come with sequentially colored conductors and and are UL listed-style 2884. All others have identification stripe to indicate the first position and are UL listed-style 2651. **Resistance:** >104 megohms/3m. **Temperature:** 105°C maximum. **Dielectric strength:** 1500 Vrms. **Impedance:** 105Ω stranded; 125Ω solid. **Capacitance:** 46 pF/m stranded; 43 pF/m solid. **Voltage rating:** UL 300 VAC. UL recognized, CSA certified.

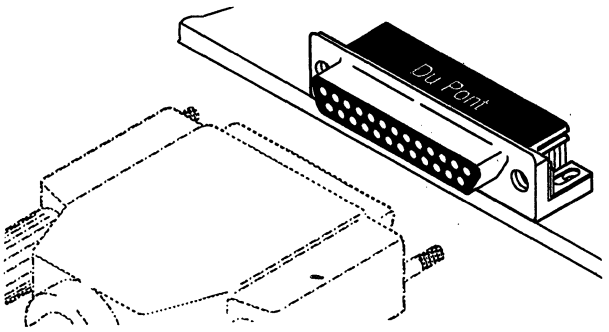
Right Angle D-Subminiature Headers



► **Industry standard connector designs allow mating with both military and commercial D-Subminiature connectors.**
► **Metal shells ensure EMI protection.**
► **Right angle plugs and receptacles are available in 9, 15, 25, and 37 positions. Duplex plating is available in the contact areas with 30 μin. (0.76 μm) of gold over 50 μin. (1.27 μm) of nickel underplate, or gold flash over 50 μin. (1.27 μm) of nickel underplate.**
► **High density versions use 67% less space than standard connectors.**
► **All connectors are offered with PWB grounding and retentive feature. All are available with or without hex standoff.**

Product offering includes the most popular versions used in today's market and state-of-the-art high density versions for new designs. These include the popular right angle short (.318) footprint and the traditional long footprint (.590) in 9, 15, 25 and 37 position versions and a high density version, offering 67% greater packaging density, in 15, 44, 62 and 104 position versions.

The housing is glass-filled thermoplastic polyester (UL 94V-0) with insulation resistance of 2 GΩ min. and a temperature range of – 40°C to + 105°C. Product can withstand voltage of 1000 Vrms min. The shell is a steel strip with a finish of 150 μin. tin-lead plating. Contact base material-male is brass MIL C50 and the base material-female is phosphor-bronze CDA-510 with a finish of gold flash over 50 μin. (1.27 μm) nickel underplate at engagement area, 150 μin. (3.81 μm) tin-lead plate at termination area, or 30 μin. (0.76 μm) gold over 50 μin. (1.27 μm) nickel underplate at engagement area, 150 μin. (3.81 μm) tin-lead plate termination area. The current rating as 2 amps fully loaded with resistance of 30 mΩ max.

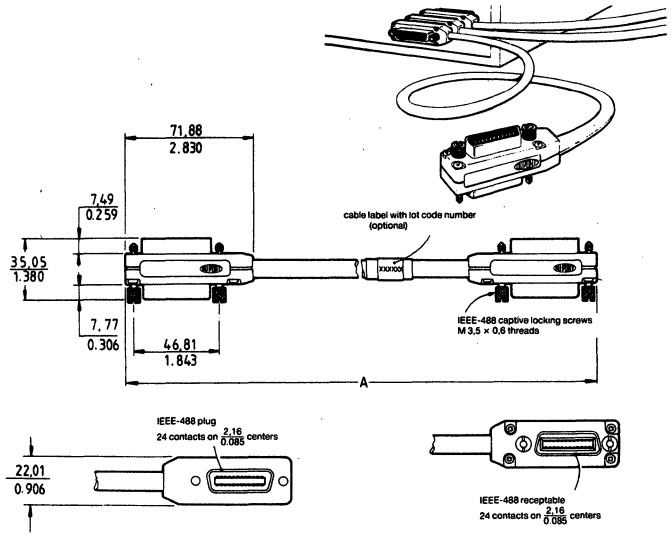
GPIB Shielded Cable Assemblies



General Purpose Interface Bus assemblies feature double shielded cable, metal cast connector housing and shield termination. Pre-loaded cantilever beam ensures low connector insertion force and minimum contact wear. Interface meets IEEE-488 specifications. **Spacing:** 0.85 inch. Connector has insulation resistance of 10 GΩ minimum, 1A maximum current rating, and 1,000 cycles durability. Contact force of 101, 5N per contact, with 24 contacts per connector side. Housed in black glass-filled thermoplastic polyester rated UL94V-0. Contact is of beryllium copper with 30 μinch gold over nickel finish. Shielded cover is of zinc alloy with nickel finish. Black oxidized steel captive locking screw and metric thread. Double shielded cable made of aluminum/mylar polyester film tape with braid and drain wire. Gray PVC insulation. **Material conductors:** AWG 26-7/34. Signal line resistance is 0.14 μ/m maximum, bulk resistance braid is 0.0085 Ω/m maximum. **Capacitance:** 150 pF/m maximum at 1kHz. Impedance of 70-75Ω. **Operating temperature:** 80°C maximum.

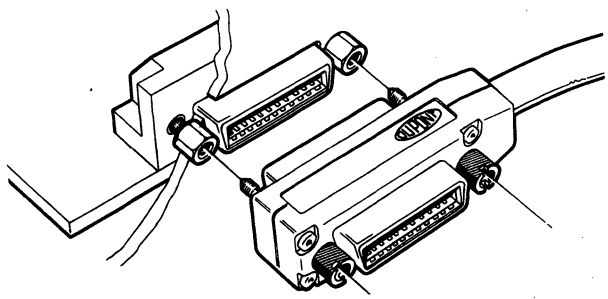
GPIB Headers



General Purpose Interface Bus Headers have 0.85 inch spacing. Connector has insulation resistance of 10 GΩ minimum, contact resistance of 10 mΩ maximum, withstanding voltage of 1000 VAC RMS, and current rating of 1.5A maximum. Contact force is 1-1, 5N per contact and durability is 1000 cycles. 24 contacts. Housed in glass-filled thermoplastic polyester UL listed 94V-0, color black. Contact material is beryllium copper, and finish is 30 μinch gold over nickel in contact area and 100 μinch tin-lead over nickel on the soldertail. Shield and R/A bracket are low carbon steel with nickel finish. Threaded clinching nuts are low carbon steel with cadmium and clear chromate. **Temperature range:** – 55°C to + 105°C.

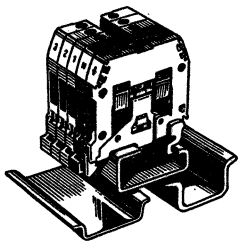
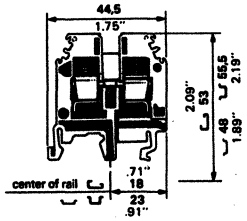
Series 5000 Terminal Blocks





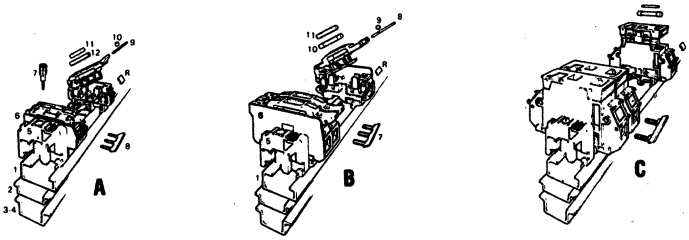
Series 5000 rail-mounted terminal blocks can meet all your needs for modular terminals—from high density to high power. They can reduce your inventory and simplify restocking. Just 3 terminals meet 90% of most user's requirements. (100-10 AWG terminations per foot.) Universal mounting foot "snaps" onto standard DIN and DIN 2 rail profiles. Terminals are positively retained on rails, yet individual units can easily be removed without disturbing adjacent units. Composed of molded thermoplastic. **Color:** Grey. UL Approved up to 600 V.

Model M4/6. Standard 6 mm (.238") block. 22-12 AWG wire.
539-0005. 11511607 ..... **EACH 1.18**

Model M6/8. Standard 8 mm (.315") block. 22-8 AWG wire.
539-0010. 11511811 ..... **EACH 1.77**

Model M10/10. Standard 10 mm (.394") block. 20-6 AWG wire.
539-0015. 11512017 ..... **EACH 2.38**

Fuse Holder Terminal Blocks



All the characteristics of the Series 5000 terminal blocks with the added circuit protection of fuses. Uses many of the same accessories with the same ease of installation and inventory control. Grey body, UL Approved to 600 V.

Model M4/8—Fig. A. For 5 × 20 and 5 × 25 mm fuses. Standard 8 mm (.315") block. 22-12 AWG wire. 6.3 Amps.
539-0020. 11513106. Basic block ..... **EACH 5.81**
539-0025. 11516924. With neon lamp fusion indicator. 110-220 VAC ..... **EACH 10.55**
539-0030. 11522023. With LED diode fusion indicator. 24 V ..... **EACH 12.31**

Model M10/13—Fig. B. For 1/4 × 1 1/4" fuses. Standard 13 mm (.512") block. Up to 10 AWG wire. 10 Amps/250 VAC. (Not UL Approved).
539-0035. 11104315 ..... **EACH 9.12**

Model MB10/22—Fig. C. For 13/32 × 1 1/2" fuses. Standard 22 mm (.866") block. 18-6 AWG wire. 32 Amps.
539-0040. 11630324 ..... **EACH 9.98**

PR1 (DIN 1) and PR3 (DIN 3) Rails

For Series 5000 terminal blocks. Blocks "snap" to rails. PR1 in compliance with EN50035 standard (DIN 46277-1/NFC63018). PR3 in compliance with EN50022 standard (DIN 46277-3/NFC63015). Supplied in 78" lengths.

Model PR1—Fig. D. Bichromated zinced steel.

Comb-Type Jumper Bars

Can be used only on terminal blocks with at least one compression clamp connection. Permits electrical connection of 2 to 10 blocks. Interconnection of non-consecutive blocks is possible by removing teeth opposite the blocks not being used. Bars can be cust with saw or pliers. Use partition on end plate between two series of interconnected blocks to preserve insulation. Comb is placed in compression clamp before tightening screws.

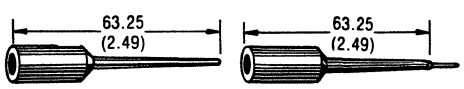
Connector Test Adapters



An ideal test adapter for rapid testing of the hard-to-get at contacts of multipin/socket rack or panel connectors. Flexible tip allows testing of adjacent contacts. Flexibility and full insulation protects against shorting or contact damage. The model 4690 also fits .635 mm (.025) sq. pins. **Upper:** Banana jack. 4.22 mm (.166) dia., brass, nickel plated. **Insulation:** Polyvinyl chloride (PVC). **Lower:** Socket type, copper. Pin type, brass. Gold plated. See tab block. **Rating:** 2500 WVDC, + 50°C. (+ 122°F.) Max.

SMD Products

Do-It-Yourself SMD GRABBER™

Fig. P. This do-it-yourself test clip is especially suited for testing surface mounted packages on centers as small as 0.76 mm (.030). Pincer-like contact grasps individual legs of SMD's such as the SOIC, SOJ, PCC, etc. Its circular design and small size have been developed for easy use and handling. **Material:** Contact, stainless steel. **Finish:** Selectively gold plated on tip. **Insulation:** Glass filled nylon. **Rating:** 1000 WVDC; 0.5 Amp;l +102°C. (+216°F.) Max.
885-5200. 5243-0 (Black) ..... **EACH 1.65**

SMD MICROTIP™ Test Probe

Fig. S. The microtip is specially designed to probe SMD contacts. It features a stainless steel needle point tip that is flexible to help prevent damage to the SMD lands. The microtip is curved to aid in probing of hard to reach areas. **1st End;** SMD MICROTIP™ Test Probe, Chuck, brass, nickel plated. Replacement microtip, stainless steel. Insulation; nylon. **Wire:** 20 AWG, 41 × 37 t.c. PVC insulation 2.21 mm (.087) O.D. **2nd End:** Stacking Banana plug. Brass body, beryllium copper spring, nickel plated. Insulation; polypropylene. **Rating:** 1200 V AC/DC; 7 Amps; +55°C. (+131°F.) Max.

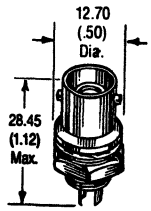
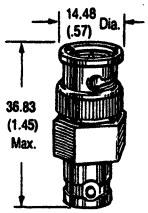
Female Triaxial Bulkhead Receptacle

Shell: Brass, tarnish resistant plated. **Insulation:** Teflon. **Center Contact:** Male, brass. Female, beryllium copper. Gold plated per requirements of MIL-C-49142. **Rating. Operating Voltage:** 500 VRMS Max. **Frequency Range:** DC to 500 MHz, −65°C (−85°F) to +165°C (+329°F).



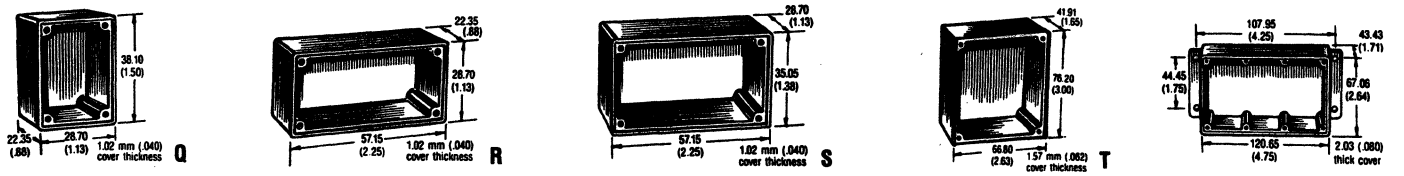
885-0850. 3580 ..... **EACH 12.85**

BNC Feed-Thru Termination
Ideal for terminating pulse, microwave or UHF instruments in their characteristic impedance. Termination metal film resistor, deposited nichrome over ceramic core, 2 W. Resistance value marked on white nylon anti-roll sleeve. **Shell:** Brass, tarnish resistant plated. **Insulation:** Teflon. **Center Contact:** Male, brass, Female, beryllium copper. Gold plated per requirements of MIL-C-39012. **Rating. Operating voltage:** 500 VRMS Max. **Frequency Range:** DC to 500 MHz; +102°C (+216°F) Max.



885-4119. 4119-50 (50 Ohms) ..... **EACH 39.95**

Utility Boxes



Diecast Aluminum Boxes
These boxes are available either with a blue baked enamel finish or with no finish at all. When used with the included cover, the boxes provide excellent RFI/EMI protection. **Housing:** Die cast aluminum, alloy A380 or A384. Blue baked enamel per Federal Standard 595 #25109 over primer wash per DOD-P-15328 or no finish. **Cover:** Aluminum 1100-H14, with clear anodized finish per MIL-A-8625. Includes cover screws.

Although all four series use bayonet-type coupling, they are not intermateable.

SHV-Series Connectors

Manufactured to National Bureau of Standards specification NP 545. These connectors feature an improved interface over MHV connectors. Center contacts are recessed to prevent shock hazards when the connectors are unmated. **Material Bodies and Fittings:** brass, QQ-B-626, Alloy 360 ½H. **Insulators:** Teflon, MIL-P-19468. Bodies, Fittings and Outer Contacts Finish: TR-5® except where noted. **Ratings at Sea Level:** Operating—3500 VAC or 5000 VDC; Test—5000 VAC, 10,000 VDC.

MHV Connectors

This forerunner of the SHV-series was designed for high voltage applications of BNC connectors. They aren't intermateable with BNC connectors. **Ratings:** 3500 VAC, 5000 VDC operating; 5000 VAC, 6500 VDC test.

TRIAXIAL/DATA BUS Coaxial Connectors TRB/TRT Series

TRIAXIAL/DATA BUS connectors are used where shielding or isolation of the standard coaxial connector is insufficient, particularly in areas where the high harmonic content of digital pulses fall in the rf region, causing interference to other equipment and cables. TRB series connectors are triaxial connectors designed to meet MIL-C-49142 and have a 3 stud bayonet coupling. TRT series connectors are triaxial connectors designed to meet MIL-C-49142 and have a threaded coupling.

Jacks and Plugs

These connectors are rated for 500 V rms and a nominal impedance of 50 Ohms. The standard finish is silver-plated on bodies reinforced by TR-4™ electrolytic chromate treatment. The connectors listed below meet or exceed the requirements of MIL-C-39012.

KR, KS, KB and KRM Series terminal blocks feature a high-density modular screw-clamp wire connection system designed for PCB applications. Each contact is wire-protected for clean, safe connections. KR Series available in vertical, horizontal, and 45° angle mount with 15 A current rating. KB and KS Series available in vertical and horizontal mount with 10 A current rating. KRM Series available in vertical mount with 15 A current rating. UL, VDE approved. **Torque:** 9.0″ lbs. **Wire Stripping Length:** 5 mm (.197″). Also available in models with .2 center-to-center spacing. Contact the nearest Allied facility for items not shown.

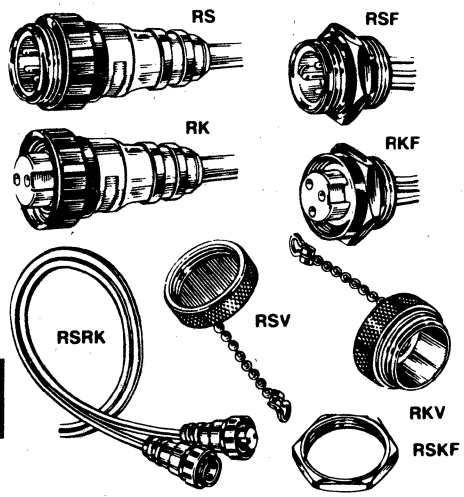
Waterproof Connectors



Circular threaded water and oil resistant connectors. Designed for proximity sensors and limit switches. Connectors are submersible to 300 feet underwater. **Current Rating:** 12 A for 2 and 3 poles, 9 A for 4 and 5 poles. **Temperature Rating:** – 40 to + 90°C. Approved for VDE 0110, UL and 1P68 environmental specifications, Ford Motor Co., and General Motors. Crosses to Brad Harrison, Joy and Cam-lok available. **Contact your nearest Allied facility for additional information.**

Circular Din and Lock-Ring Connectors

Designed for a wide variety of applications — ideal for new designs and replacements. Modern streamlined appearance. Precision-built to exacting standards; outside metal housing and locking ring. All contacts soldered for insured quality. Available in 3 to 12 contacts; black chrome finish available upon request. **Contact your nearest Allied facility for items not shown.**

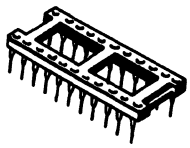
Dip Socket Series



Solder Tail

3 Level Wire Wrap Tail

- ► Open Frame: For easy inspection of solder joints and better air flow
- ► Closed Bottom: Prevents flux intrusion and solder wicking
- ► Stackability: X and Y Stackable
- ► BeCu Intercontact: For optimal electrical and mechanical performance
- ► Accommodates: 6-64 Dip ICs with .015" to .022" diameter leads

Contact Specification

All types on this page have an inner clip of beryllium copper alloy 172 with a plating of 30μ" gold over 50μ" nickel. The outer sleeve is 1/2 hard brass alloy with a plating per the table below.

Contact Type	Tail Style	Length Inches	Outer Sleeve
001B	Solder tail	.125	200μ" tin over 50μ" nickel
002B	Solder tail	.125	10μ" gold over 50μ" nickel
054B	Solder tail	.180	200μ" tin over 50μ" nickel
410B	Wire wrap	3-level	200μ" tin over 50μ" nickel
411B	Wire wrap	3-level	10μ" gold over 50μ" nickel

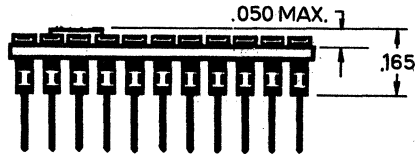
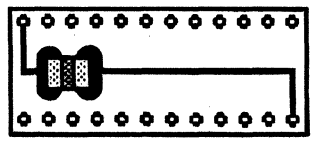
DIP Socket with Integral Decoupling .1 μF Capacitor

► **High reliability sockets with built in decoupling capacitor.**
► **Allows greater board density by integrating decoupling capacitor with socket.**
► **Improved noise reduction due to shortened electrical path.**

TYPICAL LAYOUT





24 PIN X.300 DIP SHOWN

Contact (001B). Outer Sleeve: 1/2 hard brass alloy 360. Plating 200 μ" tin over min. 50 μ" nickel. **Inner Contact:** Beryllium copper alloy 172. 4-finger, 30 μ" gold over min. 50 μ" nickel. Solder tail length .125", diameter .020". **Insulator:** Glass epoxy (FR4) UL 94 V-0 with integral installed. 1 μF surface mount decoupling capacitor. **Capacitor Specification. Working Voltage:** 50 V. **Tolerance:** 10%. **Dielectric Code:** X7R. **Temperature Range:** −55°C to +125°C. **Electrical Characteristics:** current. **Rating:** 3 a max. **Insulation Resistance:** 100 K megΩ min. at 25°C. **Dielectric Withstanding Voltage:** 250% × VDCW ± 15%.

.300/.600 and .600/.300 DIP Adaptor Sockets

► **Problem Solver**
► **Greater Design Flexibility**
► **Allows the installation of .300 pitch chips in .600 patterns and vice versa.**
► **Insulator: FR4, glass epoxy, 1 oz. copperclad per MIL-P-13949F, .062 thick with plated thru holes.**
► **Contact: 001B**

PLCC

► **Conforms to EIA Jedec outline (Type A) for Plastic Leaded Chip Carriers.**
► **Polarization indicators assure positive chip carrier alignment.**
► **Closed bottom prevents solder wicking.**
► **Open center and standoffs provide for cooling and thorough cleaning after soldering.**

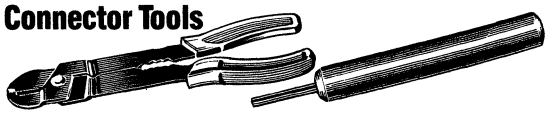
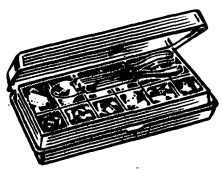
Nylon Connector Tools



Prototype Crimping Tools. Balanced and weighted, machined from hardened steel.
Type W-HT-1919. For .093" pin terminals.
863-0520 ..... **EACH 12.95**
Type W-HT-1921. For .062" pin terminals.
863-0500 ..... **EACH 12.95**
Production Crimp Tools.
Type W-HTR-1031-E. For .093" terminals, 14-22 AWG wires.
863-0560 ..... **EACH 105.00**
Type W-HTR-1719-C. For .062" terminals, 18-24 AWG wires.
863-0565 ..... **EACH 133.12**
Type W-HTR-2262-A. For .062" terminals, 24-30 AWG wires.
863-0550 ..... **EACH 115.00**
Extractor Tools. Remove terminal from connector housing without damage.
Type W-HT-2038. For .093" pin terminals.
863-0530 ..... **EACH 9.95**
Type W-HT-2285. For .062" pin terminals.
863-0510 ..... **EACH 9.95**

Nylon Connector Designer Kits

Polarized nylon connector kits include male and female housings in all circuit capacities, terminal and tools, in individual compartments. Lightweight, unbreakable; snap-lock.
Type WM-72 Miniature Kit. 56 connectors using .062" terminals, crimp & ejector tools.
863-0600 ..... **EACH 39.95**
Type WM-50 Standard Kit. 45 connectors using .093" terminals, crimp & ejector tools.
863-0610 ..... **EACH 39.95**



.156 Series Crimp Terminals

Rated 250 VAC Maximum.
7 Amps Maximum (with 18 AWG wire) per UL

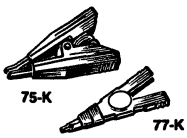
Kelvin Clips



The Kelvin clip is used for 4-wire resistance measurement systems. The two jaws of a Kelvin clip are electrically isolated from each other when open and shorted to each other through the component lead under test when closed. One jaw provides a current path for the source while the other provides a circuit path for the sense. **Specifications: Contacts:** 75-K—Copper/Silver; 77-K—Gold Plated Copper. **Handles:** 75-K—Glass Filled Nylon; 77-K—Glass Filled Nylon. **Maximum Jaw Opening:** 75-K—5/16"; 77-K—1 1/8". **Maximum Wire Size:** 75-K—#18 AWG; 77-K—#16 AWG. **Fulcrum:** 77-K—Slotted Screws; 77-K—Allen Head Set Screws. **Std. Pk.:** 75-K—10; 77-K—1.

"Pigmy Hippo" And "Hippo" Clips

41A

46A

High quality, lead-coated springs are carefully designed for maximum strength and long life. Maximum jaw spread, minimum handle spread. Jaws clamp solidly on terminal, stud or bare battery post. Furnished with tough vinyl insulators in red or black. Steel, bright copper-plated.

Hippo-Clip Type 41-A. For fast chargers, battery booster cables. Cable attaches quickly and securely with built-in solder strap and cable clinching ears. Detachable lug also available. Marked for polarity (+ and −). Length 6". Jaws open 19/16". Shpg. wt. per 100, 41 lbs.

Pigmy-Hippo Clip Type 46-A. For trickle chargers, battery operated devices, automotive test. Choice of high solder strap on one leg for larger wires, lower strap on other leg. Matched clinching ears grip wire securely at end of leg. Won't "squirt away" when squeezed. Length 3". Jaws open 1 1/8". Shpg. wt. per 100, 5 3/4 lbs.

Test Clips

"Mini-Clipper" Test Clips To Stackable Double Banana Plug

Features exclusive nine-leaf phosphor bronze, nickel-plated spring. Shielded coax cable RG-58C/U, MIL-C-17D, 50 Ohm.

Stock No.	Mfr.'s Type	Length	Color	EACH		
				1-9	10-99	100-Up
860-5000	1170-C-24-0	24" (609.6 mm)	Black	12.84	11.04	9.63
860-5001	1170-C-36-0	36" (914.4 mm)	Black	12.84	11.04	9.63

"Mini-Clipper" Test Clip To Stackable Banana Plug

Features exclusive nine-leaf phosphor bronze, nickel-plated spring and plug. Wire #20 AWG High Temperature Insulation.

860-5005	1120-A-24-0	24" (609.6 mm)	Black	4.38	3.77	3.29

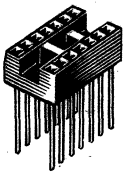
ICN Series Wire Wrap Sockets



Types with WB in Mfr.'s Type number are wire wrap sockets and include terminal barbs which allow self-lock into PC board, rugged socket body design and RN side wipe contact design. **PCB hole:** .037 ± .002″ (.94 ± .05 mm). Socket leads are offset .018″ (.46 mm) from IC leads. Suffix "T" denotes tin contact finish. "TG" denotes gold on contacts, tails tin plated. **Temperature range:** – 65°C to + 125°C.

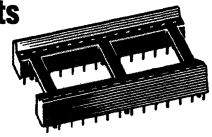
ICN Series Solder DIP Production Sockets



The ICN Series features the RN dual leaf side wipe contact design which increases the contact area by 100% over edge-bearing type contacts. The S4 series configuration offers the E-Z entry feature to help guide leads on large LSI devices into the contact area. The contacts are protected from damage by closed entry mold design. Contacts are designed to accept leads up to .015 inch thick. The S4 series has rib type body structure which improves convection cooling. Are supplied with anti-wicking wafers and standoffs for easy flux removal. **Body Material:** black polyester, glass-filled. **Contact Material:** phosphor bronze. **Contact Finish:** Suffix G, 10μinch (.254m) min. gold over 50μ inch (1.27μm) min. nickel. Suffix T, 30μ inch (.762μm) min. hot tin dip and wipe. **Temperature range:** – 65°C to + 125°C. **Flammability:** UL 94V-0. **PCB Hole:** .035″ ± .002″ (0.89 ± 0.05 mm). Socket leads are offset .026″ (0.66 mm) from IC leads.

ICA Series Screw Machine Sockets

Feature four finger Beryllium copper contacts with high retention design. Low profile body with mounting holes. "S" in Mfr.'s Type number indicates solder dip sockets. "WB" in Mfr.'s Type number indicates 3-level wire wrap. Body material is glass-filled black polyester. PCB hole .035″ ± .002″. IC lead and socket leads are coincident. **Plating:** TG30 has 30μ inch minimum gold on contact area. 200μ inch minimum tin in the terminal area; GG30 has 30μ inch minimum gold on contact area. 10μ inch minimum gold on terminal area. Both options include an underplate of 50μ inch minimum nickel. **Temperature range:** – 65°C to + 125°C.

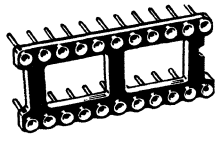
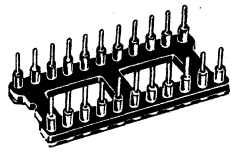
ICT Series of Open Frame IC Sockets





Feature four finger Beryllium copper contacts with high retention design. Open frame body for excellent connection cooling. "S" in Mfr.'s Type number indicates solder dip sockets. Body material is glass-filled black nylon. PCB hole .035″ ± .002″. IC lead and socket leads are coincident. **Plating:** TG30 has 30μ inch minimum gold on contact area. 200μ inch minimum tin in the terminal area; GG30 has 30μ inch minimum gold on contact area. 10μ inch minimum gold on terminal area. Both options include an underplate of 50μ inch minimum nickel. **Temperature range:** – 65°C to + 125°C.

Solder DIP

Note: Tin Plated Contacts available.

ICO Series Solder DIP Production Sockets

Dual contact, low profile socket allows dense board-to-board spacing. Features closed bottom body design and self-locking tail. Dual wiping contact design offers high compression for gas-tight reliability. Phosphor bronze contacts. **Body:** black polyester, glass-filled. **Contact Finishes:** contact Area, 10μ inch min. electro tin over 50μ inch min. nickel. **Temperature Range Rating:** −65°C to +105°C. **PCB Hole Mounting:** .040° ±.002″ dia.

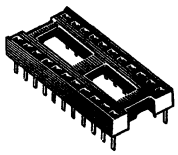
6

ICL Series Solder DIP Production Sockets



Designed primarily for high volume applications. Low profile (.150″) allows very dense board-to-board spacing; the socket is stackable side-to-side and end-to-end to optimize board surface usage. The body material is glass-filled black polyester. **Contacts:** Beryllium Copper. Suffix "T" denotes tin contact finish, "TG" denotes gold over nickel contact finish. **Temperature range:** −65°C to +125°C. **PCB hole:** .031 ±.002″ (.79 ±.05 mm). IC leads and socket leads are coincident. **Temperature range:** −65°C to +125°C.

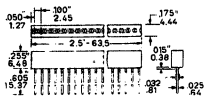
SB and WB Series Strip Sockets



SB Series. Solder dip strip socket. Accepts .015″ dia. pins. Body material is black polyester, glass-filled. Contact material is phosphor bronze and contact finish is gold. **Mounting instructions. PCB hole:** .035 ±.002″ (0.89 ±0.05mm). Socket is offset .026″ (.66mm) from IC leads. **Temperature range:** −65°C to +125°C. **WB Series.** Wire wrap strip socket. Can be mounted end-to-end maintaining .100″ spacing. Body material is black polyester, glass-filled. Contacts are phosphor bronze with gold over nickel contact finish. **Temperature range:** −65°C to +125°C. **Mounting instructions. PCB hole:** .037 ±.002″ (0.94 ±.05mm). Socket leads are offset .018″ (0.46mm) from IC leads.

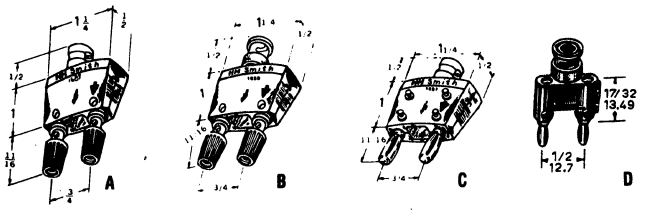
Dual Instrument Adapters



Exellent quality male, female dual binding post adapters. Insulated 5-way binding posts for efficient, reliable service in an infinite amount of applications. Come with red and black heads on 3/4" centers except *1/2" centers. Banana jack holes are provided for side stacking. Packages of 1. Strong molded ABS body to resist breakage or splitting that often occurs due to temperature variations. Brass conductor; beryllium copper spring, molded Lexan head. **Ratings:** Current is 15 amps (*5 amps) AC for 10°C, rise is continuous duty except where limited by coaxial connectors; voltage is 5kV (*2kV) 60 cycle AC. *Miniature. Av. shpg. wt. 1 oz.

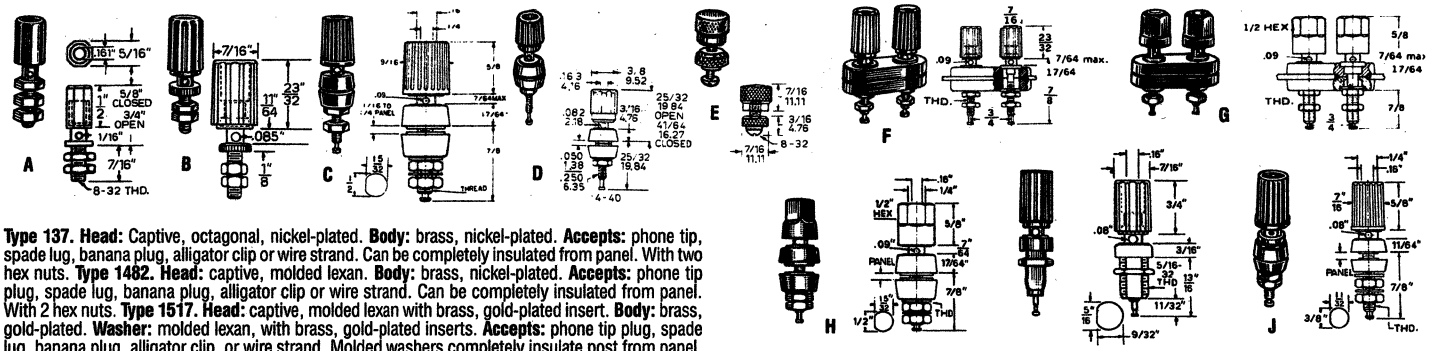
Single And Dual Binding Posts



Type 137. Head: Captive, octagonal, nickel-plated. **Body:** brass, nickel-plated. **Accepts:** phone tip, spade lug, banana plug, alligator clip or wire strand. Can be completely insulated from panel. With two hex nuts. **Type 1482. Head:** captive, molded lexan. **Body:** brass, nickel-plated. **Accepts:** phone tip plug, spade lug, banana plug, alligator clip or wire strand. Can be completely insulated from panel. With 2 hex nuts. **Type 1517. Head:** captive, molded lexan with brass, gold-plated insert. **Body:** brass, gold-plated. **Washer:** molded lexan, with brass, gold-plated inserts. **Accepts:** phone tip plug, spade lug, banana plug, alligator clip, or wire strand. Molded washers completely insulate post from panel. Miniature washers and narrow fluted head require min. panel space. Mounts in 3/8" round or "D" hole in panel as indicated. Wrap-around solder terminal on stud for direct connection. **Type 899:** Standard multiple connection insulated Hex Head Binding Post, mounts in 1/2" round or D hole, includes all mounting hardware. **Type 3015:** Miniature multiple connection insulated binding post, mounts in 1/4" round or D hold, includes all mounting hardware. **Type 110:** All metal binding post, brass nickel-plated, mounts in #6 clearance hole, includes all mounting hardware. **Type 459:** Standard multiple connection all insulated fluted head binding post, mounts in 1/2" round or D hole, includes all mounting hardware. Accepts standard banana plugs, .080 phone tips, wire, alligator clips and spade lug. Accepts miniature banana plugs, .080 phone tips, wire, alligator clips and spade lug. 1 K volts 60 cycle AC continous working voltage, when insulated from panel as recommended. **Capacitance:** 5.0 mmfd. (Type 1517, 3.0 mmfd).

Dual Binding Posts Type 1477 and 269: Standard dual insulated binding posts, mounts in two 1/2" holes on 3/4" centers, panels up to 1/4" thick, includes all mounting hardware.

Unshielded Jumpers

Big selection of unshielded jumper cords with a variety of clip and plug styles. All leads are #18 AWG 10 kB insulated wire (except 606, 658—20 AWG). Cadmium-plated steel clips; nickel-plated brass tips; vinyl plastic boots. **Handles:** †Molded butyrate. Types 606 and 658 supplied as pairs—1 red, 1 black. **Weight:** 5 oz.

5-Way Binding Posts

#BP31 Series have LEXAN polycarbonate resin insulating parts. All others have nylon plastic per MIL-P-20693A, Type IV. All metal grounding type designed for rapid ground connections. Made of machined brass, gold plated and polished. Design complements other hex nut 5-way binding post. Hex and fluted nut types are rated for 30 Amps, 1000 Volts working, except BP21 which is 15 Amps. UL recognized standard 1244. IEC 348.p.30 ANSI C39.5-1974. Double assembly type are for use where binding posts are mounted on 3/4" (19 mm) centers. Rated for 30 Amps, 1000 Volts working.

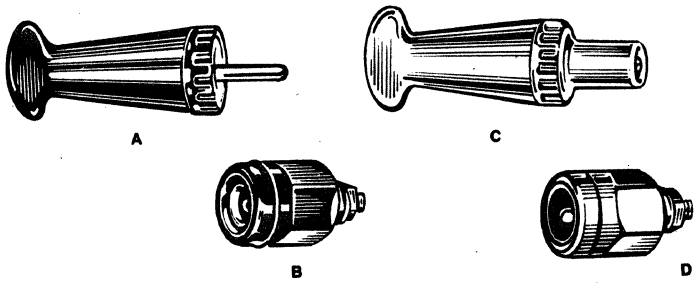
*Nickel plated.

NOTE: Also available from factory in White, Blue, Yellow, and Green. Also available as double assembly (1 black and 1 red) and with nickel or tin plated current carrying brass parts.

Supercon Electrical Connectors



For safe, quick positive panelboard connections. Available in 25, 50, 100, and 250 Amp capacities. 25, 50, and 100 Amp types are rated 125-250 VAC or DC current interrupting; 600 V unenergized connector disconnect use only. CSA certified, File #LR-17812. 250 Amp types rated 600 V unenergized connect or disconnect use only. **Plugs:** Wiring connections to the same plugs can be either soldered or solderless. Cable fastening screws are provided for accommodation of a wide range of cable sizes. Grips are two-piece threaded construction. **Receptacles:** Color-matched nylon caps and bodies. Wiring connection is made to a threaded stud by wire wrap-around, lug, or bus bar connection.

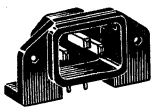
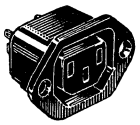
Primary Power Receptacles

UL and CSA Approved, International Standard CCE-22

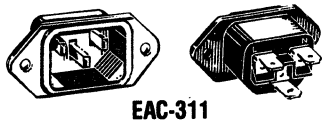


EAC-303



EAC-306

EAC-309



EAC-311

Shell: Black glass reinforced thermoplastic polyester. UL flammability rating 94 V-O, yellow card #E45575. **Pins:** silver-plated brass. **Terminals:** electrotinned brass except EAC-303, silver-plated brass.
EAC-303: 3-pin male receptacle with right angle housing for PC board mount. Rear of panel mounting. PC terminals project .125" to extend through PC board. Ground pin is integral with the ground solder lug on rear of receptacle. Two additional .136" holes for fastening to panel or chassis. **EAC-309:** 3-pin male receptacle with standard lug terminals. Mounts from front or rear of panel with two #5 screws or .125" rivets (not supplied). **EAC-310:** 3-pin male receptacle, similar to EAC-309 except higher current rating. **EAC-311:** 3-pin male receptacle with FASTON terminals. Mounts from front or rear of panel with two #5 screws or .125" diameter rivets (not supplied). **EAC-312:** 3-pin male receptacle, similar to EAC-311, except with a higher current rating. **EAC-306:** 3-contact female receptacle; front mount with two #4 screws or .094" rivets (not supplied).

Male and Female Audio Connectors

Plugs and receptacles offer up to 5-contact versatility by means of up to four circuit contacts plug electrically integrated ground terminal on shell. Neoprene cable strain relief bushing keyed to shell; ribbed for easy access to male plugs. Die-cast zinc alloy with satin-nickel finish. Receptacles will mate with all standard audio connectors. Right angle configuration reduces "cable clutter." 2 oz.

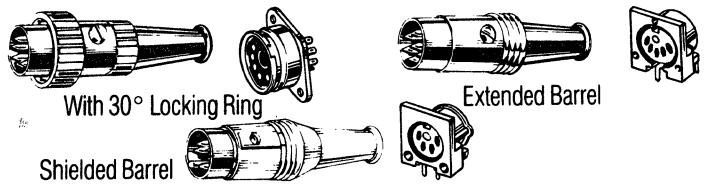
DIN Plugs and Sockets



DIN is the name given to this high-quality family of versatile miniature audio connectors. Features include solder lug or PC terminations, as well as bright nickel-plated or colorful plastic snap-on shells. Designed for audio circuitry, they are also ideal for test equipment, computers and other types of low level circuits. Precision manufactured. The parts listed are a small representation of a large and growing family. Call the closest sales office for parts not shown.

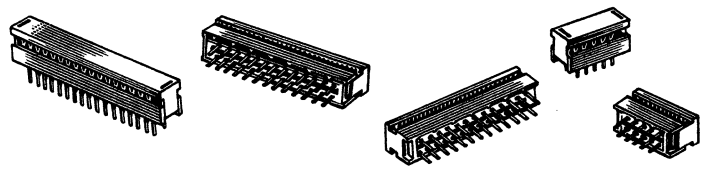
For 622-1005, 1015 and 1025. Series Card Edge Connectors
515-1330. Type 622-0005 ..... **EACH 0.07**

Slimline PCB Solder Transition Connectors



Design Characteristics

- **Available In Solder Tail Lengths For .062" (1.57mm) or .125" (3.18mm) Board Thicknesses**
- **Narrower In Width Than Standard Ansley® PCB Solder Transition Connectors; Designed To Fit Into A Standard .100 x 100" (2.54 x 2.54mm) Male Header Grid Pattern**
- **Ridges In Connector Top Align With Ansley® Flat Cable**
- **PCB Connectors Are Soldered For Permanent Flat Cable Transition From Printed Circuit Boards**

For .062" (1.57mm) PC Boards

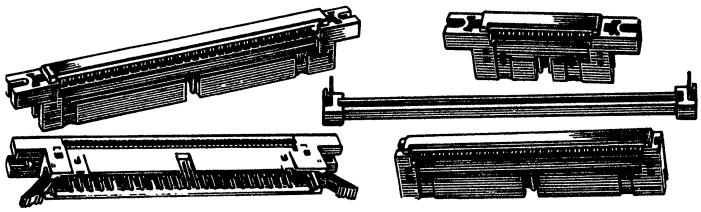
Male Connectors



Ansley® Male Connectors are designed to mate with female socket transition connectors. Used primarily for in-line cable splice and "T" tap applications, they are available with optional mounting ears for I/O applications, as well as optional retainer/ejector latches for ease of disconnect. **SPECIFICATIONS. Insulation Material:** Glass reinforced thermo-plastic, rated 94 V-O. **Contact Material:** Beryllium copper. **Contact Plating:** Gold over nickel. **Current Rating:** 1 A. **Insulation Resistance:** $>1 \times 10^9$ Ohms @ 500 VDC. **DWV:** >500 V rms (Sea level). **Temperature Rating:** −55° to +125°C. **Color:** Blue.

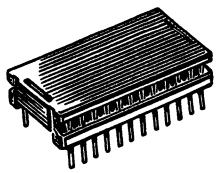
Low Profile DIP Plugs With Heavy Duty Pins

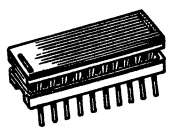


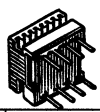
Description/Application

Ansley® Low Profile DIP Plug Connectors are primarily used as a disconnectable interface to DIP sockets. Dip plugs with heavy duty contacts are used in disconnect applications with DIP sockets. DIP Plugs with tin plated contacts provide a permanent flatcable transition to printed circuit boards.

Design Characteristics

- **Low Profile Design**
- **Available In 9 Contact Sizes 8-48 In Both Heavy Duty and Tin Plated Versions**
- **One-Piece Connector Design With Mechanical Side Latches**
- **Strain Relief Available For 24 and 40 Position Configurations**
- **Ridges In Connector Top Align With Ansley® Flat Cable**





With Gold Plated Pins

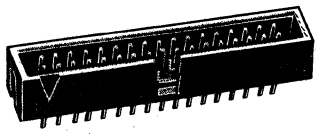
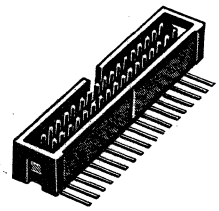
Ansley® Standard PCB Male Headers





These headers mate with socket transition connectors with center polarization tab as well as dual bump polarization female socket transition connectors. Parts with an "E" suffix have ears for female sockets without strain relief. Parts with an "ES" suffix have ears for female sockets with strain relief.

Female Socket Connectors

► Polarization Keyways Standard, Polarization Tabs Optional
► Snap-On Strain Reliefs (Optional)
► One-Piece Connector Design With Mechanical Side Latches
► Positive Cable Stop Design
► Ridges In Connector Top Align With Ansley® Flat Cable
► 30 Microinches (Minimum) Gold Plating In Contact Mating Area

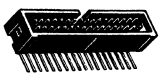
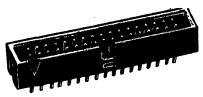
PCB Male Headers, Low Profile With Lock and Eject Option





Design Characteristics

► Center Polarizaiton Slot Mates With Center Polarization Tab On Ansley® Female Socket Transition Connectors
► 30 Microinches (Minimum) Gold Plating In Contact Mating Area
► Fully-Shrouded (Four-Walled) Header For Maximum Protection Of .025" (.635mm) Square Mating Pins
► Ansley Low-Profile Headers Are Also Available In Ejector/Retainer-Versions, Add Suffix "E" For Headers With Ears To Accommodate Female Socket Without Strain Relief; Add Suffix "ES" For Header With Ears To Accommodate Female Socket With Strain Reliefs.

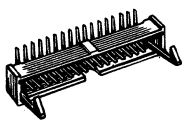
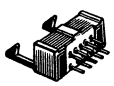
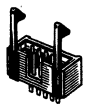
Vertical Ejector Headers







Description/Application

The Ansley® Vertical Ejector Header Connects with Standard Female Socket Transition Connectors in PC board applications requiring repeated disconnect/reconnect cycles. While retaining all the advantages of conventional ejector header designs, if maximizes PC board real estate. Unlike conventional designs, where the ear swing radius is out at the ends, the swing radius of the vertical ejector headers is up at the side. This permits headers to be butted end to end with no wasted board space.

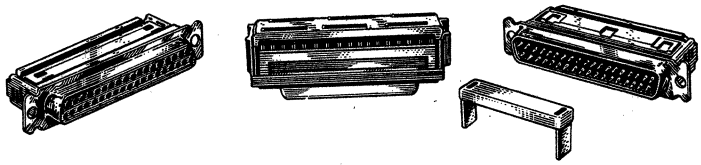
"D" Connectors, Metal Shell (Tin)



Description/Application
Ansley® Metal Shell "D" Connectors have been designed to aid in electronic system EMI/RFI suppression, as mandated by recent FCC directives. Used in panel-mounted I/O applications, they provide the same mass termination benefits as Ansley® plastic "D" Connector, and terminate to all types of Ansley flat cable including shields, jacketed shielded and ground plane cable for spurious signal suppression in intercabinet applications. Backshell strain reliefs and a full complement of mounting hardware accessories are available for this series.

Design Characteristics
Available in 9, 15, 23, 37 and 50 position configurations. Pin connector and socket connector versions available. Choice of zinc or tin-plated metal shell. SPREAD PITCH™ contact design enables mass termination to .050" (1.27 mm) pitch flat cable while maintaining I/O compatibility with .109" (2.77 mm) industry standard "D" connectors. Ridges in connector top align with Ansley® flat cable. One-piece connectors are design with mechanical side latches.

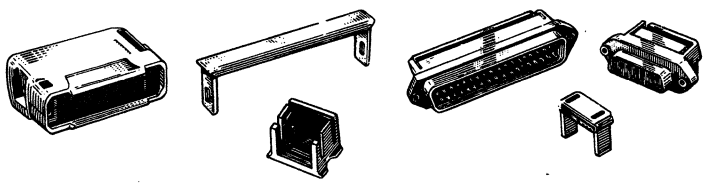
"D" Connectors, Plastic



Description/Application
Ansley® Plastic "D" Connectors are used in panel-mounted I/O applications, providing mass termination IDC convenience and integrity while maintaining compatibility with all industry standard "D" connectors. Backshell strain reliefs and a full complement of mounting hardware accessories are available for this series. Strain Reliefs are included with these connectors.

Design Characteristics
Available in 9, 15, 25, 27 and 50 position configurations. Pin connector and socket connector versions also available. Backshell strain relief in straight and right angle styles. SPREAD PITCH™ contact design enables mass termination to .050" (1.27 mm) pitch flat cable while maintaining I/O compatible with .109" (1.27 mm) industry standard "D" connectors. One-piece connectors are designed with mechanical side latches. Ridges in the connectors are top aligned with Ansley® flat cable.

Backshell Screwlock Assembly. Used with backshell strain relief to retain two "D" connectors to each other through a Panel or PC Board. Stainless steel.
515-4020. Type 609-005 ..... **EACH 5.40**

Jacksocket Assembly. Used with 609-002 for Front Panel Mounting or 609-004. Stainless steel.
515-4010. Type 609-003 ..... **EACH 2.43**

Jackscrew Assembly. Used with 609-003 to retain Two "D" connectors (Plastic only) to each other as a mated pair cable splice. Stainless steel.
515-4005. Type 609-002 ..... **EACH 2.73**

Screwlock Assembly. To retain two "D" connectors (Plastic only) to each other through a Panel or PC Board. Stainless steel.
515-4000. Type 609-001 ..... **EACH 3.23**

Slide Lock Post. Used with slide lock retainer assembly 609-50-SL. Discard flat washer for 3/32" panel; retain for 1/16" panel. Discard lock washer when No. 609-008-50 is used with No. 609-50S-M(1) or 609-50P-M(2).
515-4040. Type 609-008-50 ..... **EACH 1.50**

Backshell Jackscrew Assembly. Used with Backshell Strain Relief and 609-003 to retain two "D" connectors to each other as a mated pair cable splice. Stainless steel.
515-4015. Type 609-004 ..... **EACH 4.11**

Rear Panel Mount Jacksocket Assembly. 609-006 for .090 In. panels, 609-007 for .125 In. panels.
515-4025. Type 609-006-1 ..... **EACH 3.36**
515-4030. Type 609-007-1 ..... **EACH 3.36**

Slide Lock Retainer. Used to lock a mated pair of 50-position "D" connectors. Must be used with slide lock post 609-008-50. Discard lock washers when 609-50SL is used with 609-50S-M(1) or 609-50P-M(2).
515-4035. Type 609-50SL ..... **EACH 2.79**

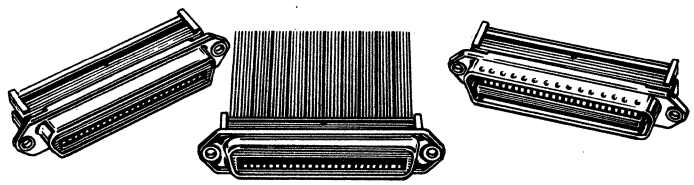
Jacksocket. Used to lock a 50-position "D" connector to a metal shell "D" connector with jackscrew. Mounting holes in panel are 3.99" + .05" (.157" + .002") diameter.
515-4045. Type 609-009-50 ..... **EACH 1.50**

Bale Lock Assembly. To lock a mated pair of 50-position "D" connectors with a backshell. **Bracket Material:** Stainless steel, spring temper. **Screw:** Zinc-plated.
515-4050. Type 609-50BL ..... **EACH 1.76**

Installation Tools
Type 779-6210. Retaining Ring Tool for No. 609-002 and 609-004 Jackscrews.
515-4150 ..... **EACH 6.34**

Type 515-779-6211. Retaining Ring Tool for No. 609-001 and 609-005 screwlocks.
515-4155 ..... **EACH 6.34**

Metal Shell Ribbon Connectors



Ansley® Metal Shell Ribbon Connectors are designed primarily for I/O applications where EMI/RFI suppression is required. They provide maximum installation versatility by maintaining I/O compatibility with all industry standard Ribbon Connectors while mass terminating to Ansley® flat cable. **Specifications. Insulation Material:** Glass reinforced thermoplastic, rated 94V-0. **Contact Plating:** Gold over nickel. **Current Rating:** 1A. **Insulation Resistance:** > 1×10^9 Ohms @ 500 VDC. **DWV:** > 500 V rms (Sea level). **Temperature Rating:** – 55° to + 125°C. **Color:** Blue.

Plastic Chip Carrier Sockets

Description/Application
This state-of-the art series of Ansley® Chip Carrier sockets provides for high performance interconnection of microprocessors, gate arrays, and other high density semiconductor devices.

Design Characteristics — Plastic Chip Carrier Socket
► Accepts EIA/JEDEC Leaded Plastic Packages on .050" Center Lines
► Operating Temperature Range: −40°C to 105°C
► Contacts Solder Tails on .100" Square Grid Pattern
► Overall installed height of socket above the PC Board is only .390"
► .015" nominal standoffs for cleaning

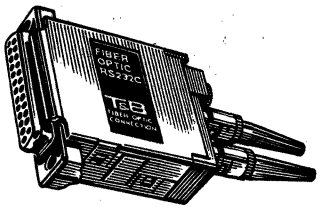
RS-232-C Fiber Optic Data Interface Connector



The RS-232-C Fiber Optic Data Interface Connector links data communication equipment and fiber optic cable. For use in computer, terminal and printer applications, it accommodates either duplex plastic or glass fiber optic cables. Data rates up to 19.2 kBaud (async) can be accommodated.

Installation is user-friendly, on-site; ground loops are eliminated; and no modifications are required for existing RS-232-C equipment. The T&B RS-232-C is competitively priced with shielded copper cables, and designed to bring all the advantages of fiber optics to compatible RS-232-C equipment.

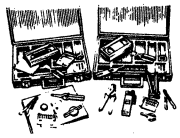
Installation Kits



The Thomas & Betts installation kits provide all components necessary for complete assembly of the Pre-Cap™ Series Connectors multimode connectors. Durable, compact and lightweight, the termination kits are ideal for in-field, laboratory and production/assembly connector terminations. **Contents:** polishing plate, polishing fixtures, 6-3 micron polishing films, 6 approximately .3 micron polishing films, cleaving wipes, hand cleve tool.

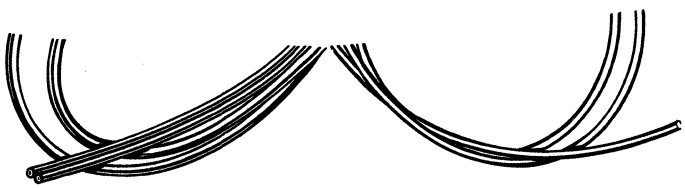
Plastic Fiber Optic Cable



Thomas & Betts Plastic Fiber Optic Cable consists of a PMMA core, polymer clad with a durable black polyethylene jacket.

The cable is compatible with a complete line of T&B connector products which include: the T&B PCB Data Link System, Active duplex Connector, Bulkhead connector, RS-232-C Modem and Splice Kit.

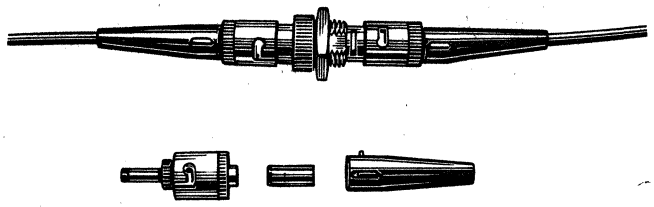
ST* Compatible Connector



The PRE-CAP™ Series ST* compatible connector combines the rugged construction advantages of a durable composite polymer alloy with the precision manufacturing tolerance of a glass capillary for high-performance and durability in multimode fiber applications.

The connector is easily mounted via a polarized and spring-loaded quarter-turn bayonet lock. The lock ensures positive connector contact.

These connectors are for glass optical fiber. They feature a 1 micron tolerance, 10 mm long glass capillary for superior alignment matches the thermal stability of the cable. Termination is by crimp and polish which results in a smooth, flat non-concave fiber and surface. Suitable for use with automated polishing equipment. Can be terminated on all styles of optical fiber cables available from the major cable manufacturers.

SMA-Compatible Connectors

The Pre-Cap™ Series SMA-compatible connector is intermateable with SMA connectors designed to EIA-475-01 standards.

No heat curing of epoxies are required. It incorporates a knurled nut for easy thread-on connection, and thermally-matched glass capillary and fiber. The uniform surface of the capillary and fiber increases installer yield, and is suitable for both manual and automated polishing.

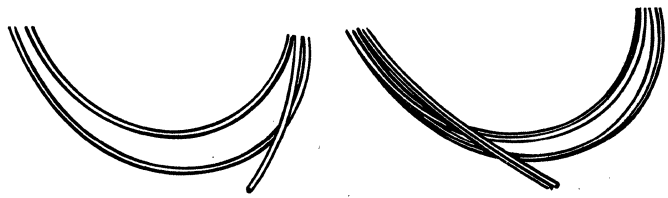
Glass Fiber Optic Cable



Cables are available in simplex and duplex polyurethane jacket constructions, with 900 micron, mechanically-strippable buffer coating. Strain relief is achieved via high-strength aramid yarns stranded around the buffered fiber. Fiber diameters available include 50/125, 62.5/125 and 100/140 (micron). The fiber is completely compatible with the Pre-Cap™ Series Glass Fiber Optic Connectors in the most popular designs (SMA, ST* and FC types).

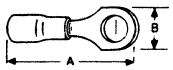
These same terminals are available in larger, bulk packaging at substantial savings. Add 1 to the Allied stock number to get the same part in bulk.

Vinyl Insulated Ring—Insulation Support



STA-KON terminals and tools exceed test specification requirements of military, UL and CSA. These ring terminals are insulated with a PVC insulation sleeve of extra length to give protection and relieve bending stress at wire's flex point. Brazed seam barrel is serrated to obtain high pull-out value. Terminal is made of high conductivity electrolytic copper, electro-tin plated. Insulation material is color-coded.

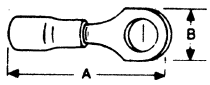
Nylon Insulated Ring—Insulation Grip



Self-insulated with high dielectric-strength nylon sleeves, these ring terminals are recommended for temperatures up to 105°C. An inner bronze insulation grip sleeve lengthens the flexing radius of the conductor and eliminates conductor creep. The nylon jacket is color-coded.

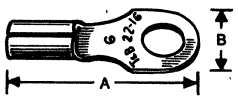
Non-insulated Ring



These non-insulated ring terminals are made of electrolytic copper for high conductivity and have a brazed seam barrel which provides maximum tensile strength. The wire barrel is serrated which increases grip on wire.

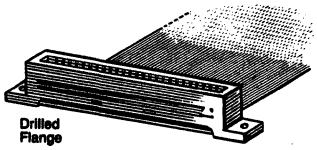
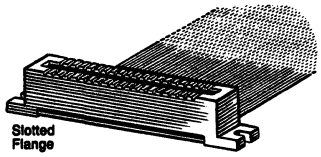
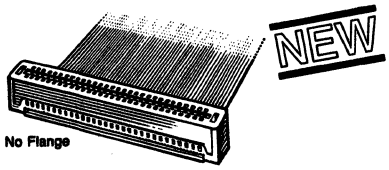
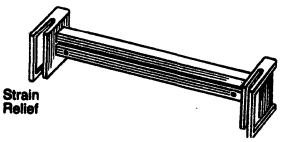
Card Edge Connectors









Rugged overall construction and bifurcated beryllium copper contacts, plated with 30 μ gold, in the card wiping area, provide high reliability in performance and assembly. All sizes are available with slotted flange, hole flange or without flange.

With Drilled Flange

D Subminiature Connectors

Connectors are fully compatible with all .050" spaced flat cables with 26 and 28 AWG solid/stranded or 30 AWG solid wire. The low profile tin-plated metal shell ensures long-term reliability and EMI/ESD reduction. Pins and wiping leaf are plated with 30 μ gold.

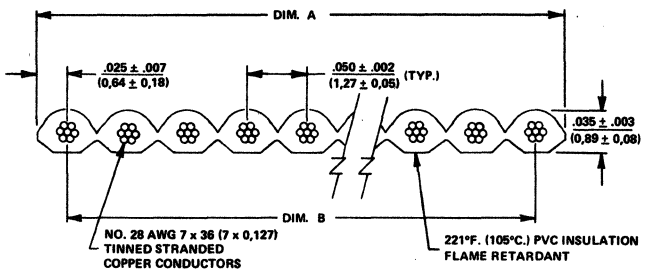
Scotchflex Flat Cable

Flat Cable



Easily zippable gray flat cable is on .050" (1.27 mm) spacing with #1 conductor colored red, 28 AWG, 7/36" stranded, tinned copper wire; flame retardant PVC insulator. **Voltage Rating:** 300 V. **Insulation:** .1 × 10^{10} ohms (3 m). **Nominal Thickness:** .035".

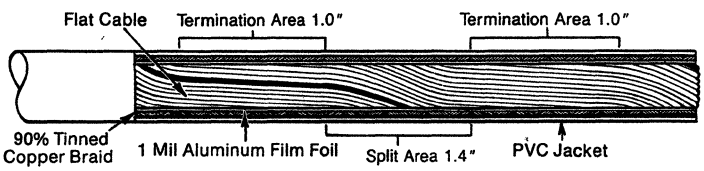
Round, Jacketed, Flat Cable with Shield



The inner 3365 Series gray flat cable has repeating areas of split and unsplit lengths to accommodate discrete or flat cable terminations. The flat cable is folded, wrapped with an aluminum/polyester film foil and then enclosed in a round, tinned copper braid for complete EMI/ESD protection. The outer jacket is flexible PVC. Combines the flexibility of round cable with the labor/cost efficiency of flat cable.

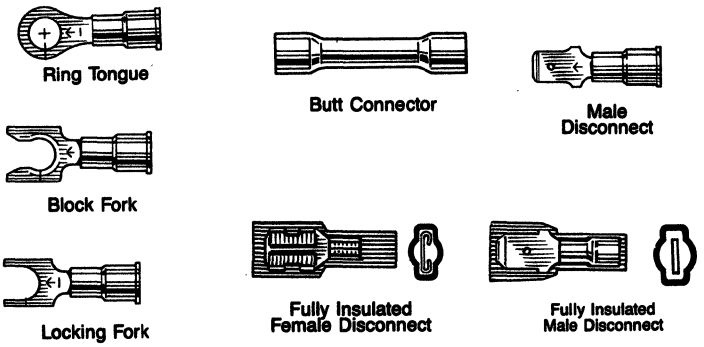
Vinyl Insulated Terminals



All insulated terminals feature funnel entry construction to prevent strand hangup and a crimp ridge for proper tool location. Nylon insulated terminals and connectors have butted seam barrels with insulation grip sleeves. All terminal barrels feature "U" grooves for maximum conductor retention.

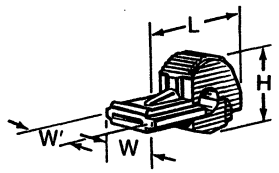
Female T-Tap Disconnect



► Nylon Insulated ► Self Stripping

T-Tap Disconnects have a unique disconnectable T-Tap design that covers 22-12 AWG.

951, 952 and 953 T-Tap Disconnects speed installation, reduce conductor damage and make fast work of otherwise time-consuming mid-span taps. The disconnectable tap leg simplifies hookup and increases flexibility. T-Tap Disconnects assure a fully insulated connection when used with a fully insulated .250" male disconnect terminal.

IDC Electrical Connectors

No strip, no twist—just squeeze. These IDC connectors have productivity built right in, reducing wire waste on the job. No special tools are needed. Make quick work of tap, inline and pigtail connections. Connectors are constructed of flame retardant materials. (For use on copper conductors only).

Scotchcode® Write-On Dispensers and Marking Pens

The disposable write-on tape dispenser contains 250 die-cut markers and comes complete with marking pens. Writing area measures 3/4" × 5/16". O.D. range of each marker is 22-6 ang. (.090"-.315"). Vinyl tape is resistant to oils and solvents and has a high-tack acrylic adhesive. Additional marking pens can be ordered in red or black permanent ink.

Scotchkote® Electrical Coating

Provides fast-drying extra coating protection for a tough outer seal on electrical insulation subjected to abnormal weathering or moisture conditions. Non-aerosol. Resistant to oil, moisture and aliphatic hydrocarbons. 16 oz. container with brush-top applicator.

617-4740. SCOTCHKOTE (14853) ..... **EACH 11.33**

Scotchlok® Electrical Spring Connectors

The original color-coded wire connectors, featuring three-part construction with live spring action for outstanding performance. Flexible vinyl insulator won't cut or abrade wire. Steel inner shell allows for spring expansion/contraction to compensate for heat rise. Flared design aids wire insulation.

EMI/RFI Foil Shielding Tapes

Copper foil electrical tapes provide an easy-to-apply, timesaving, cost-effective way to shield against EMI/RFI radiation. Foil tapes are conductive through the adhesive and offer mechanical, electrical and thermal values to meet your shielding effectiveness and frequency requirements.

Type 1181 (27551). Copper Foil with smooth finish 1/2" × 18 yds.

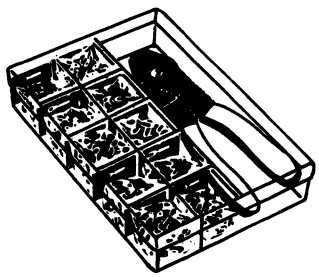
- Carrying Case
- Rugged Crimper

MODEL 4900-63. Popular assortment contains 440 insulated single-grip solderless terminals, plus rugged combination cutter-crimper tool for correct installation. Package includes: 20 different types and sizes of terminals; plus Type 1963 high-grade steel service tool. Compact heavy duty plastic carrying/storage case measures 13 1/2" long, 9 1/2" wide and 2 1/4" deep. **Shipping Weight:** 7 lbs.
975-4063 .....**EACH 96.72**



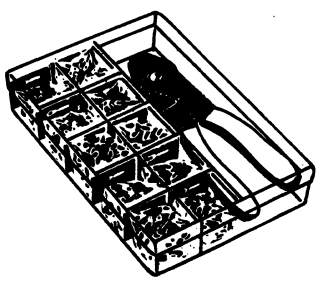
Non-Insulated Electronic Service Kit

MODEL 2195-63. 10 assorted single grip terminal styles recommended for radio, TV and other general purpose applications. Includes No. 1963 crimping tool with bolt slicer and 160 total terminals of the following: 11205, 11206, 11210, 11305, 11306, 11310 ring tongue, 14206, 13306, 13310 spade tongue, 15208 hook tongue.
975-3671.....**EACH 24.92**

Assorted Terminals Servicing Outfit

- 160 Solderless Terminals
- TDY1900 Crimper

MODEL 2195. Handy kit contains approximately 160 solderless terminals in most popular sizes, in addition to a Type 1900 crimper/cutter which handles 18-22, 14-16 and 10-12 wires. Also strips insulation from No. 22 to 10 wire, cuts wire and bolts. Assortment and tool are supplied in convenient clear plastic case with slotted compartments. **Overall case size:** 8 3/4" × 5 7/8" × 1 3/4". **Shipping Weight:** 1 lb.
975-3670.....**EACH 23.02**



Model 1963 All-Purpose Crimping and Cutting Tool

- Cuts, Strips, Crimps, Slices

The only tool you need to make excellent electrical connections without solder. Cuts and strips wire; slices bolts; has crimping dies for insulated and non-insulated terminals. Wire cutter located at tip of tool for close work. Stripping notches for Nos. 10, 12, 14, 16, 18, 20, 22 wire. Slices bolts 10-32, 6-32, 10-24, 8-32 and 4-40. Has plastic-insulated handles. Rugged, treated-steel construction. **Weight:** 1 lb.

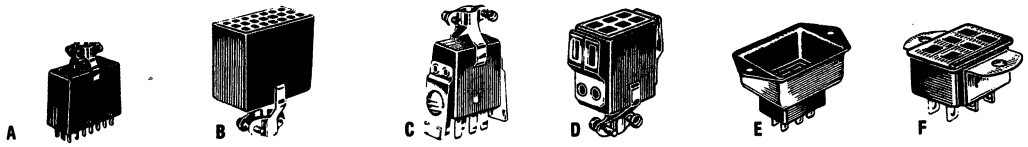
Series 3300 Connectors



Series 3300 connectors are interchangeable with Series 300 types and are designed for panel and cable mounting. **Specifications.** Current Rating (individual contacts): 10 amps. Voltage Rating, rms: 750 volts, 250 volts (UL). **Plug Contact Material:** brass, cadmium plated. **Socket Contact:** phosphor bronze, cadmium plated. **Pre-grounding Contact Material:** heavy-duty plated brass. **Base Insulating Material:** high-grade phenolic, black. **Backshell:** thermoplastic. **Finishes:** Cable clamp, screws, latch and keeper, angle bracket—steel, bright nickel electroplated. Deep Bracket—steel, baked black wrinkle enamel finish over zinc chromate plating.

Series 5400 15 AMP

Cable clamp top connectors are designed for use in panel and cable mounting applications. They are interchangeable with Series 2400 or 400 type connectors. **Current Rating (individual contacts):** 15 amps. **Voltage Rating:** 1750 volts; 250 volts (UL rated at 250 V, AC or DC max. between adjacent contacts). **Plug Contact Material:** brass, cadmium plated. **Socket Contact:** phosphor bronze, cadmium plated. **Pre-grounding Contact Rating:** up to 30 amps at rated voltages. **Pre-grounding Contact Material:** heavy-duty plated brass. **Base Insulating Material:** high-grade phenolic, black. Thermoplastic backshell. Includes steel, bright nickel eletroplated cable clamp and screws. UL recognized, File No. E34763. CSA certified, File No. 22156.

Series 72000 Single Row Terminal Strips

Single row types have the terminals imbedded into the walls of the insulator on both sides. This provides a pull-out strength over twice as great as competitive designs. High barrier construction offer lower overall height. **Specifications. Terminal Centers:** 3/8". **Current Rating (UL):** 20 amps. **Voltage Rating (rms):** UL recognized, **Class B: Class C:** 150. **CSA Certified:** 300 @ 20 amps. **Withstand Volts, rms:** 10500. **Insulator Material:** thermoplastic, glass-filled. UL temp. index, 95°C. UL flame retardant rating 94V-0. Black. **Width × Height:** 5/8 × 21/32". **Max. AWG:** 14. **Terminal Screws:** No. 6-32 × 1/4" binding head screws. Steel, cadmium plated. PC bottom terminals are brass, bright electro-tinned.

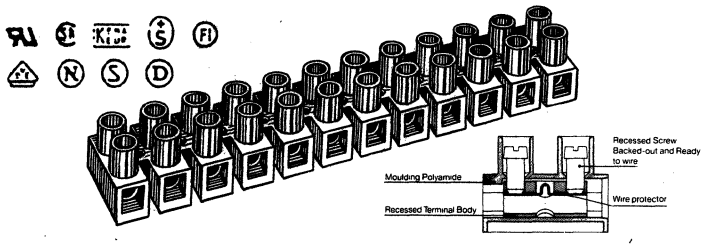
Socket Terminal Strips for Panel/Chassis Mounting

► **Dead front design: Screws and terminal body recessed in polyamide insulating moulding for safety and to prevent short circuiting.**
► **Voltage: up to 600 V. Amperage up to 80 A. Wire range: 22-6 AWG.**
► **Wire protector prevents damage to finely stranded wires**
► **Modular Design: Flexible and easy to cut. Polyamide moulding. Mounting hole between every circuit.**
► **Recessed screws backed-out and ready to wire**
► **Tubular wire entry for stripped, unterminated solid or stranded wire.**

International Approvals:



Terminal strips are used for connecting stripped, unterminated, stranded or solid copper wires; ranging from 22-6 AWG, depending on product type selected. Each strip has 12 circuits and can easily be field cut to required number of poles. Mounting hole provided between each circuit. Terminal screws are backed-out and ready for wiring.

Each circuit has a wire protector to prevent damage to wire from the turning screw. All metal parts of terminal are completely recessed in flexible polyamide 5 moulding. This dead-front design ensures safety and prevents short circuiting. Flexible construction allows use on uneven surfaces.

Material. Moulding: Flexible natural polamide, white color. **Upper temperature limit:** Short-time—140°C-160°C; Continuous—80°C-100°C; Cold resistant to −40°C. **Terminal Body:** Nickel-plated brass. **Wire Protector:** Stainless steel strip. **Screw:** Zinc-plated steel, yellow chromated.

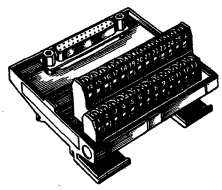
D-Subminiature Interface Modules Sub-D

9-50 Poles



Technical Data
► **Rated Voltage: 125.**
► **Rated Current: 1.5A**

Benefits
► **Easy connections between process/field equipment and computer system.**
► **Interface D connector plug or receptacle equipped cable with up to #12 AWG discrete wires.**
► **Quick snap-on of modules to DIN mounting rails.**
► **Saves time on system design.**

Connection Data. D-Subminiature Connectors used; Siemens SBM 383. Module Height H above edge of base 25 mm/0.98 in. Modules are supplied with two locking feet each for DIN EN 50 022 mounting rails.

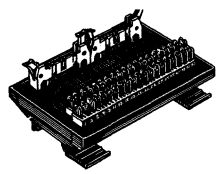
Interface Modules UGM 10, UGM 64, UGM 2×16, UGM 2×28



Technical Data
► **Dielectric strength: >500 VDC**
► **Rated current: 1 A**
► **Connection data: 97 EDS—up to 2.5 mm²; 14 AWG**
► **Height H above edge of base: with 97 EDS—25 mm/0.98 in.**

UGM interface modules make it easy to change from ribbon cable systems to screw or flat plug connectors. Standard models are modules having 10-64 connections with DIN 41651 plug strips and ejectors for spring strips with strain relief clamps. When plugged, the ejectors lock the plug in place. The flat cable connection is made with DIN 41651 female connector strips with strain relief. Single wire connection is made via 97 EDS terminal block.

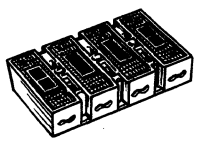
Quick Clamp Connector for Panel/Chassis Mounting

- 12 Circuits
- UL recognized File No.: EG9841; 10 A, 300 V, max. 10 AWG
- CSA certified File No.: LR24322; 20 A, 300V, 18-16 AWG



Connects up to four copper conductors per circuit. Simply insert wire, a steel clamp provides them for secure contact and retention of wire.

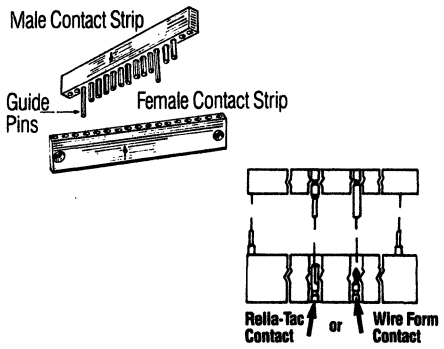
221-Series Strip Connectors



Use full length as is, or cut to specific length. Two or more strips can be stacked or epoxied together for multirow connector. When stacked, contact centers are .100" for both connectors. Use guide pins at least every 3" for mating alignment and keying. Guide pins replace both pin and socket contact. Supplied less contacts and guide pins; listed below. Spacing .100" except *.075". Av. wt. 1 oz. Use "Relia-Tac" contacts.

Controlled Time Spray Developer

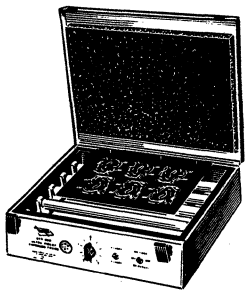
Model BTD-201. Designed to spray develop exposed photosensitive coatings requiring solvent based chemistry. 1 to 1½ minutes developing cycles are controlled with a 10 minute electrical timer activating the spray pumps. If the cover is opened when the chemical sprays are operating a lid safety switch disconnects electrical power to the pumps. Panels are supported in a vertical fashion inside the developing chamber and sprayed from both sides. The drain tube allows for the 4 gal. (15.14 l) chemical sump to be easily changed. Full PVC plastic construction except for metal tank. **Electrical requirements:** 115 VAC, 4 amps, 60 Hz. **Size:** 22 × 15 × 20″ (55.8 × 381 × 508mm). **Wt.:** 60 lbs. (27.21 kg).
835Q1025 ..... **EACH 950.00**

Controlled Time Spray Developer For Alkaline Chemistry

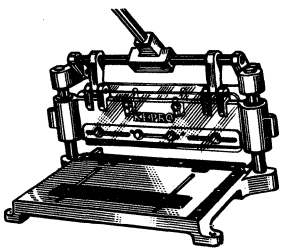
Model BTD-201B. Full plastic construction, without metal tank, designed for ALKALINE CHEMISTRY. This unit has the same operating features as above, but utilizes brass pumps, a 1000 watt grounded titanium heater thermostatically controlled to 105°F (±5°) with heater on/off switch. **Electrical requirements:** 115 VAC, 15 amp, 60 Hz. **Shipping weight:** 60 lbs.
835Q1030 ..... **EACH 1088.00**

6

Ultra-Violet Exposure Frame



Model BTX-200A. Allows exposure of photosensitive coatings in less than 2 min. An adjustable 10 minute timer extinguishes high output UV lamps at the end of the exposure cycle. Heavy foam padding provides excellent contact pressure between the negative and the light sensitive surface to be exposed. A pin registry rail is provided for easy 2 side pattern registration. Four .125″ (3.17 mm) dia. pins are positioned on 0″, 4″ (101.6 mm), 6″ (152.4 mm) and 10″ (254 mm) centers. Hole patterns punched with the PH-6 shear attachment by Kepro, match this pin rail. Constructed of 16 gauge painted steel. 115 VAC, 3 amp, 60 Hz. 19½ × 16½ × 6″ (495.3 × 419 × 152.4 mm). **Wt.:** 30 lbs. (13.62 kg).
835Q1040 ..... **EACH 563.00**



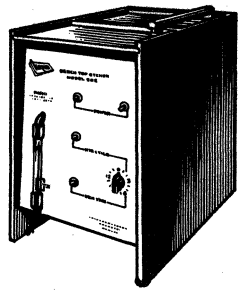
Printed Circuit Board/Sheet Metal Shear

Multi-6 MS-6. A bench-top hand tool that will perform a variety of circuit board and sheet metal fabricating functions. Basically for cutting clad or unclad plastic materials such as FR-4 glass epoxy, FR—2 phenolic, FR—3 paper-base epoxy and mat polyesters up to 3/32″ (2.38 mm) thick or sheet metals up to .040″ (1.01 mm) thick. Only 15″ (381 mm) wide and 13″ (330.2 mm) deep, but will shear panels up to 12″ (304.8 mm) wide. With squaring gauge and adjustable back length gauge. **Wt.:** 24 lbs. (10.89 kg)
835-0218 ..... **EACH 445.00**

A Model NA-1. Notching Attachment. Mounts on pressure rail of shear for use in cutting corner notches of up to 1 × 1″ (25.4 × 25.4 mm) in laminate materials up to 1/16″ (1.58 mm) thick. **Wt.:** 3 lbs. (1.36 kg).
835-0239 ..... **EACH 101.75**

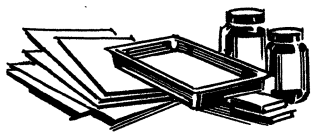
B Model PB-1. Press Brake Attachment. Forms 90° bends in soft aluminum up to 18 gauge or sheet metal up to 22 gauge. Set includes one 12″ (304.8 mm) brake die section, three brake rails for sections up to 6″ (152.4 mm) long. **Wt.:** 3 lbs. (1.36 kg).
835-0280 ..... **EACH 80.35**

Multi-Use Bench-Top Spray Etcher



Model BTE-202. Construction material compatible with most commonly used chemistry. Do not use chromic etchants or additives. Etch single or double-clad copper PC boards in less than 3 min. Etch nameplates or chem-milled parts. Adaptable lift-out racks take rigid panels up to 12 × 12″ (304.8 × 304.8 mm) or thin flexible materials. Non-warping transparent lift-up cover permits constant observation, power is cut when cover is lifted. 4 gal. (15.14 l) capacity chamber empties and loads easily. **Front-panel controls:** Function switches with pilots, heater cycling pilot light timer controls pumps, liquid level sight gauge. 115/120 VAC, 15 amp. 60 cycles. Complete with 1000 W Titanium heater, two pumps. **Wt.:** 60 lbs. (27.21 kg).
835Q1032 ..... **EACH 945.00**

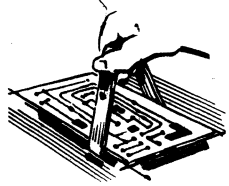
Photo Reversing Kit



FK-701. Two easy steps prepare line negatives and positives from taped or ink artwork; or to reverse existing negatives and positives. Needs no darkroom, tanks or trays. Includes two pieces or reversing film 10 × 24″, plus all processing chemicals necessary. **Shipping Wt.:** 1½ lbs.
835-0154 ..... **EACH 19.95**

RF-1024. 2 mil. Green Reversing Film. For use with above. **Size:** 10 × 24.″ **Shipping Wt.:** 8 oz.
835-0488 ..... **EACH 10.65**

Immersion Tin Plating Kit



ITP-801A. Immerse etched PC boards in electroless tin solution for 5 minutes. Oxide-free copper surface of boards obtain a tin plating approx. .00002″ thick. Plastic tong handles panels to 7″ wide. complete with thermometer, heat resistant tray for heating solution to 150°F, suffiaient solution to tin plate approx. 25 sq. ft. of etched circuit boards. Heat with burner or electric plate, not supplied. **Wt.:** 10 lbs.
835-0161 ..... **EACH 27.65**

Professional Photoresist Etched Circuit Board Kit

P-101A. Etched circuit kit utilizes photo engraving process to produce professional-quality etched circuits. Negative of layout can be produced photographically or mechanically with materials supplied. A sensitized sheet of FR-2 phenolic copper-clad is exposed through your prepared negative, then developed and etched. Includes materials for completely processing three single-clad panels, 3 × 6″ copper-clad.
835-0475 ..... **EACH 12.85**

P-101AG Professional Etched Circuit Kit. As above, but FR-4 glass epoxy boards instead of FR-2 paper-base phenolic boards. **Wt.:** 3 lbs.
835-0480 ..... **EACH 13.60**

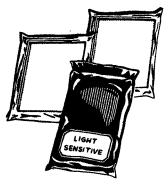
Etched Circuit Copper-Foil Clad Materials



Laminated 1-oz. (.00135) and 2-oz. (.0127) copper-clad materials. Available in 1/16″ FR-2 paper base phenolic and FR-4 glass epoxy with foil on two sides, except types marked with *, clad one side only. Meet NEMA grade tolerances. Supplied unsensitized for screen processes parts and photosensitized for photo processed boards. Photosensitized materials are ready for exposure with no further sensitizing required.

910-2205	276-149	1 27/32 × 2 27/32″	356	.99

B. Universal PC Board. Type 276-168. Accepts ICs up to 40 pins. Total of 750 indexed, solder-ringed holes. Two busses, one grounding strip. Mounting holes at corners. 3 3/8 × 2 7/8″.
910-2194 .....EACH 2.29

C. IC/LSI Board. Type 276-162. For LSI ICs up to 40 pins. 750 holes with solder ring, indexed on both sides. DIP centers. 2 13/16 × 3 3/4″.
910-2193 .....EACH 2.29

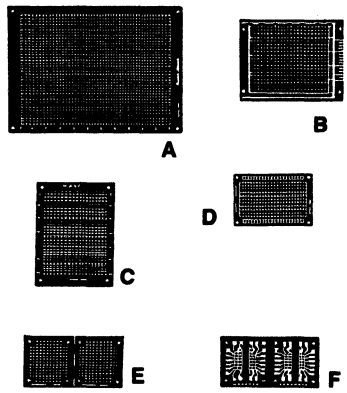
D. Multi-Purpose Bus Board. Type 276-150. Two bus strips at the center. PC pattern traced on component side speeds building. 417 solder points. 1 27/32 × 2 27/32″.
910-2188 .....EACH .99

E. Dual Mini General-Purpose Board. Type 276-148. 213 holes. 1 3/4 × 3 5/8″. Can be snapped in half.
910-2187 .....EACH 1.39

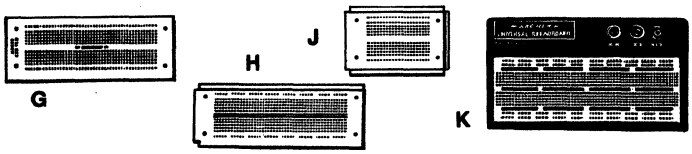
F. Dual IC Board. Type 276-159. Accepts two 6 to 20-pin DIPs. Four connecting points for each IC pin. 1 3/4 × 3 3/8″.
910-2191 .....EACH 1.49

Three-Voltage Source Plug-In Board. Type 276-154. LOW PRICE! Like Fig. M, but has three busses. Ideal for op-amp circuits.
910-2190 .....EACH 3.49

44-Position Card Edge Socket. Type 276-1551. For Fig. M above.
910-2200 .....EACH 2.99



Experimenter's Solderless Breadboards



The fast efficient way to design your own solid-state circuits. The modular breadboards are reusable and accept a wide variety of components. When you have your circuit working properly, it's easy to transfer it to the matching PC board for a soldered, permanent version.

G. Experimenter's PC Board. Type 276-170. Layout matches modular breadboard. 550 pre-drilled connection points. 2 1/16 × 5-7/16 × 1/16″.
910-2197 .....EACH 2.79

H. Modular IC Breadboard Socket. Type 276-174. Snap together horizontally or vertically for more complex designs. Silver-nickel contacts accepts 30 to 22 gauge solid wire. Feature two bus strips and 550 indexed connection points. 2 1/8 × 6″.
910-6707 .....EACH 11.95

J. Modular IC Breadboard Socket. Type 276-175. Smaller version of 276-174 with 270 indexed connection points. 2 1/8 × 3 5/8″.
910-6708 .....EACH 7.49

K. Universal Breadboard. Type 276-169. Our Finest! The 2 1/4 × 6 1/2″ breadboard is mounted on a 7 × 4″ 'stay put' steel base with rubber feet. Accepts DIPs, discrete components and up to 22 gauge wire. Total of 640 plug-in tie points. 3 binding posts for power hookup, etc.
910-2196 .....EACH 19.95

Power Transformers

Seven popular values for new equipment or replacement use. The miniature types may be PC board mounted. The standard and heavy-duty types have steel frames with lugs for chassis mounting. All primaries are for 120 VAC, 60 Hz.

Resist Marking Pen

► **Fast Drying Black Ink**
► **Fine Point Marks Easily**

Type 276-1530. The fine point of this pen allows you to do delicate drawings and design your own printed circuit patterns directly on copper-clad boards. The fast drying black ink of this pen will not smear, leaving your work neat and readable. Marks easily, gives an even flow of ink which means no need to trace over drawings or designs to make them clear. Has handy pocket clip. **Shpg. wt.:** 2 oz.
910-6717 .....EACH 1.79

Archer® Printed Circuit Kit has Everything You Need

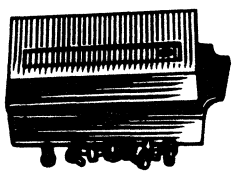
This kit contains everything you need to design and make printed circuit boards. Two printed circuit boards, resist ink pen, 6-oz. bottle of etchant, 2-oz. bottle of resist ink solvent, 1/16″ drill bit. 7 1/8 × 5 1/8 × 2″ plastic box. **Shpg. wt.:** 2 lbs.
910-6726. Type 276-1576 .....EACH 9.95

Printed Circuit Etchant Solution

► **Takes Copper Off Perfboard...**
► **Safe, Easy and Fast to Use**
► **16 fl. oz.**

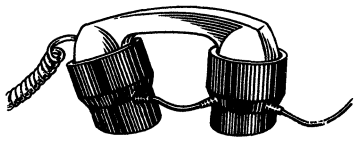
A PC 'must' for hobbyists, builders, experimenters! A special ferric chloride solution removes copper completely without damage to board material. **Shpg. wt.:** 1 1/2 lbs.
910-6715. Type 276-1535 .....EACH 2.69

Box With PC Board



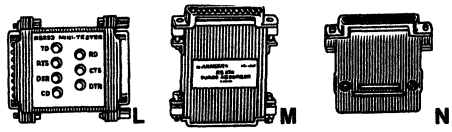
2 × 3 1/8″ board accepts DIP ICs. With labels, feet and hardware. 3 7/16 × 2 5/16 × 1 3/16″.
910-9033. Type 270-291 .....EACH 4.99

Acoustic Coupler for Portable Computers



Acoustic Coupler 2. Ideal for use when direct connection isn't possible. Accommodates round or square handsets. 8-pin plug for portable computers or the DCM-6 Modem (above). Full or half-duplex.
910-9986. Type 26-3818 .....EACH 59.95

RS232 Testing and Connections



L. RS232 Mini Tester. Diagnose interface problems yourself, without costly repair calls. Dual-color LEDs indicate status of TD, RTS, DSR, CD, RD, CTS, and DTR lines. Connects inline.
910-9034. Type 276-1401 .....EACH 14.95
M. RS232 Surge Absorber. AC line protection is not enough! Use RS232 surge absorber at each EIA port to stop spikes cold. Shielded.
910-9035. Type 276-1402 .....EACH 11.88
N. RS232 Modular Jack Adapter Kit. End cable confusion! Relocate computer equipment as easily as plugging in a telephone. Six user-programmable data lines.
910-9036. Type 276-1405 .....EACH 2.99

ACE All-Circuit Evaluators

Twelve assembled breadboards for quick build-up and check-out of experimental circuits. All models have integral voltage distribution system with solderless, plug-in tie-points on universal .100 × .100″ matrix for excellent circuit design flexibility. These ACEs accept all DIPs, TO-5s, discrete components and solid wire patch cords to .032″. Use buses for voltage, ground, reset and clock lines, shift command, etc. Five-way binding posts. Aluminum base serves as ground and has gold-anodized protective surface. Multi-tie-point terminals are non-corrosive nickel silver. Four rubber feet included.

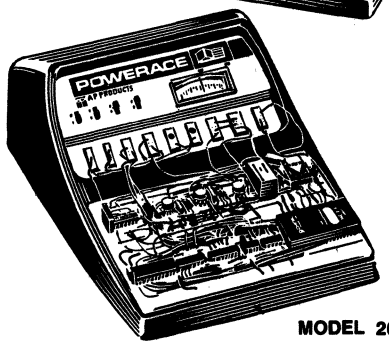
MODEL 202



MODEL 203

PowerACE Self-Contained Breadboarding Labs

Power Supplies with Breadboards
Models below feature: 1680 solderless, plug-in tie-points...will hold up to 18 14-DIPs. Breadboard elements accepts all DIP sizes including RTL, DTL, TTL and CMOS devices, TO-5s and discretes with leads up to .032″ dia. All connections to/from switches, indicators, power supplies and meters are made via solderless, plug-in, tie-point blocks on control panels. Interconnect with any solid 20 to 30 AWG wire. Breadboard elements are mounted on ground planes...ideal for high-frequency and high-speed/low-noise circuits. Short-circuit-proof fused power supplies. Operate on 110 to 130 VAC at 60 Hz. Space-age compact styling and high-grade components permit convenient, organized and quick prototyping. Both models are 7 1/2″ (19.05 cm) wide, 11 1/2″ (29.21 cm) deep and 4.0″, (10.16 cm) high at rear but only 3/4″ (1.9 cm) high at the front for working-level convenience. **Weight:** 2 1/2 lbs. (1.13 kg). The 200-Series models are grey and feature removable breadboards.

Model 202 Complete Digital Prototyping Labs with a Built-In Pulse Detector
Power supply is regulated + 5 VDC at 1 amp. Ripple/noise is ≤ 1% at full load. Line and load regulation is ≤ 1%. Pulse Detection with memory is built in. Will detect positive or negative going pulses as short as 10 nanoseconds. Memory is reset by momentary switch on control panel. Three logic indicators (LEDs) have buffered inputs that require 1 microamp max. Two logic switches, momentary, with debounce circuitry. Both Q and Q outputs can sink 15 mA and source 5 mA. Four data switches with logic 1 or logic 0 outputs have unlimited sinking capabilities and can source 10 mA. Clock generator has the following frequencies available: 1 Hz, 10 Hz, 100 Hz, 1 kHz and 100 kHz with a 50% duty cycle. C output will sink 15 mA and source 5 mA. C output will sink or source 50 mA. One-shot pulse generator has output of 7 mS pulse, positive or negative going. Both Q and Q outputs can sink 15 mA and source 400 microamps.

25-49 ..... **EACH 161.05** **50-99** ..... **EACH 148.79**

Model 203 Triple-Output Power Supplies for Prototyping Both Linear and Digital Circuits
Triple-output power supply has outputs of: + 5 VDC at 750 mA, + 15 VDC at 250 mA, and − 15 VDC at 250 mA. Ripple/noise is ≤ 10 mV at full load for all outputs. Line and load regulation is ≤ 1% for all outputs. ± 15-volt outputs track. Meter is built in 15-0-15 VDC. Input is accessible at tie-point block on control panel which allows monitoring power supplies or circuits. Meter accuracy is 5% of full scale. Two logic indicators (LEDs) have buffered inputs that require 1 microamp max. Two logic switches, momentary, with debounce circuitry. Both Q and Q outputs can sink 15 mA, and source 5 mA. Two data switches with logic 1 and logic 0 outputs have unlimited sinking capabilities and can source 10 mA.

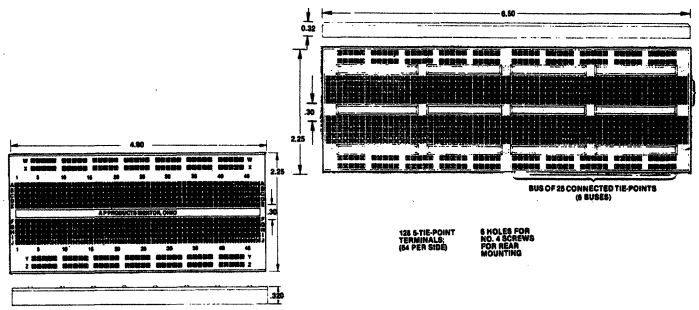
Super-Strips and Circuit Strips



Super-Strips and Circuit Strips give all the advantages of terminal and distribution strips in a single unit. They can be used alone or grouped with any other of ESP's solderless breadboarding strips. Circuit Strip has about three-fourths the capacity of Super-Strip. Super-Strip has a molded-in alpha-numeric grid for faster and easier identification of tie-points. All sizes of DIPs and discrete components with lead diameters up to .032″ can be accommodated. Use solid hookup wire for interconnections; #22 AWG is recommended. They can be permanently mounted with the integral non-shorting instant-mounting backing or mounted with screws on panels up to 1/8″ thick. Hardware and mounting templates are provided with every strip.

SOIC* Test Clips

Now normally hard-to-access SOICs can be connected to test probes quickly and easily without the risk of shorting out chips or damaging other board components. SOIC test clips are available in different pin sizes to accommodate a wide range of requirements. Industry standard .025″ square contact pins on .050″ centers are staggered to permit easy attachment of IDC socket connectors or wire wrapping and help prevent shorting of adjacent probes. With these smaller test clips, you can stack SOICs as close as .050″ end-to-end. Like our other test clips, the SOIC series features heavy duty helical compression springs that provide firm, positive contact pressure, an insulating contact comb to prevent accidental shorts and a patented wiping action to ensure integrity in testing. The steel hinge pin and tough glass-filled polyester body, UL rated 94V-0, provide long service life. Available in gold or alloy 764, SOIC test clips from 3M offer solutions for all your test and prototype needs.

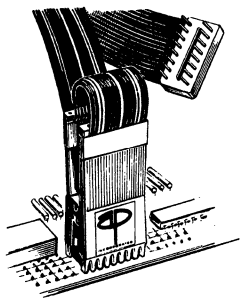
Logical Connections

Logical connections are ideal for connection of remote testing equipment to DIP circuitry. On one end a connector-compatible test clip is mated with a pair of single row socket connectors. 1½″ cable loop between connections "A" and "B" allows for free actuation of the test clip. Probe holes in the backs of all connectors provide access to individual lines. Connectors are molded onto cable ends for optimum electrical integrity and rugged strain relief. Available unterminated or with DIP connector on remote end of the 18″ flat ribbon cable. Each unit is a complete, tested and ready-to-use assembly.



DIP Termination. Logical Connections (Test Clip and Jumper)

Intra Connectors

The Intra-Connector allows access to previously inaccessible lines. In use, the connector is interjected between mating system connectors to provide external pin contacts that can be probed individually or connected to another cable assembly; pins also can be used to facilitate daisy chaining from a single connector end.

PLCC* Test Clips

Our new Surface Mount Test Clip is truly the state-of-the-art for testing Plastic Leaded Chip Carrier (PLCC) style integrated circuits. The unique action wedge design—with all four sides opening simultaneously—provides a faster and easier attachment to the PLCC. The helical compression spring and insulating contact combs ensure integrity in contact when testing. Our narrow body design allows components to be tested with as little as .100″ lead-to-lead spacing, side stackable at .200″ lead-to-lead spacing. Probe access points are immediately visible for fast and safe individual lead testing, while staggered contact rows on .100″ centers allow for easy probe attachment and help prevent accidental shorting of adjacent probes. Industry standard .025″ square contact pins permit easy attachment of female socket connectors or wire wrapping.

Test Clips

The narrow-nose design makes it easy to attach on high-density boards, fits onto ICs with only 0.1″ between leads and adjacent components. "Duck bill" contacts are flat, won't roll off IC leads. Open-nose construction enables probe at IC leg. Pin rows are offset for easy attachment of probes. "Contact comb" construction separates contacts with precision. No shorts. Heavy duty, industrial-grade springs for firm contact pressure. Steel pivot pin. The standard models have "nail-head" leads which keep probes and test leads from sliding off. The connector-compatible models have headless leads .025″ long to allow attachment of cable assemblies (see Logical Connections below, this page). Leads are .031″ in diameter on .100″ centers on both models.

Multilayer, High Speed Circuit Packaging System

The Easiest Route from Drawing Board (or CRT) to Finished Circuit

0.055″ diameter holes on 0.1″ grids. High speed, high density multilayer boards—available in standard DIN sizes with a wide range of options to meet your needs:

- **Two circuit patterns: Schottky (SCH) and High Speed Universal (HSU)**
- **The Schottky (SCH) family, with redundant power and ground layers, is ideal for various integrated circuits, such as Schottky and CMOS, operating at or above 20 MHZ**
- **High Speed Universal (HSU) boards feature four independent layers—for greater speeds, HSU versions meet specifications for ECL (Emitter Coupled Logic), and can be used to mix different types of integrated circuits (such as ECL, TTL and analog) within the same package**
- **High density socket pin configurations with large grid array mounting area**
- **High density grid allows minimum wire lengths for maximum performance**
- **Massive copper planes on multiple layers provide minimum current return paths and reduce ringing and crosstalk**
- **Surface Mounted Decoupling Capacitors (installed as an option)**
- **Accepts DIP devices with 0.300″, 0.400″, 0.500″, 0.600″, 0.900″ and 1.200″ lead spacings without adapters.**
- **Four finger pins (standard) in DIP IC mounting areas; six finger pins (low insertion force) in PGA mounting area**
- **For Wire Wrap or Stitch Wire applications**
- **Available uncommitted or with connector committments for VMEbus, Multibus -II, Futurebus and Nubus**
- **Compatible with DIN and IEC international standards**
- **0.125″ epoxy glass, flame-retardant construction (edges milled to 0.062″)**
- **Supported by a complete line of Europackaging Products: including backplanes, subracks, extender cards and accessories.**

Ordering Information

L	F	6	22	S	-	3	T	1
A	B	C	D	E	F	G	H	J

A—VECTORBORD plus™
logic panel standard

B—Socket Pins
P = socket pins loaded for I.C.s only
F = socket pins loaded for I.C.s and PGAs

C—Board Height Code
3 = 3U (3.94″ 100 mm)
6 = 6U (9.19″ 233.4 mm)
9 = 9U (14.44″ 366.7 mm)

D—Board Depth Code
16 = 160 mm (6.30″)
22 = 220 mm (8.66″)
28 = 280 mm (11.02″)
40 = 400 mm (15.75″)

E—Construction
S = SCH (4 layer)
U = HSU (4 layer)

F
- = no capacitors
C = with capacitors

G—Pin Type
2 = Wire Wrap Socket 2 level
3 = Wire Wrap Socket 3 level
4 = Wire Wrap Socket 4 low profile

H—Plating
T = Tin, Gold
G = Gold, Gold

J—Connector V/G Commitment
1 = STD DIN, no commitment
2 = STD DIN, VME
3 = STD DIN, IEEE 896
4 = STD DIN, Multibus II
5 = NUBUS

Extenders

(For In-System Testing of Functioning Circuits)
Construction is either FR4 epoxy glass or epoxy glass composite with nickel/gold plated edge contacts, and gold plated socket contacts. Receptacles are installed and connected to 2 ounce etched circuit line on the board. Receptacle tabs in most models are designed to accept test clips or probes.

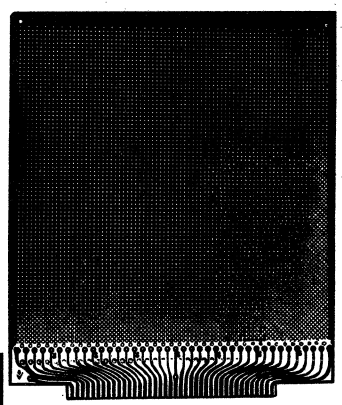
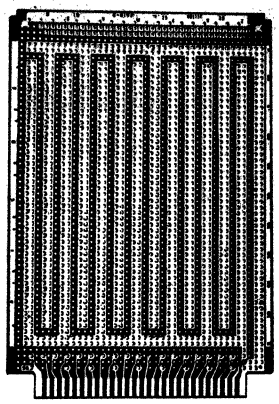
Vectorbord® Plugbords™

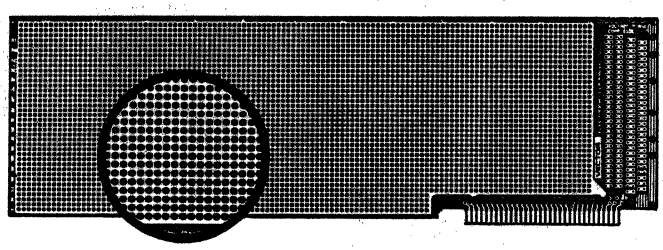
► General Purpose Applications ► Eurocard Metric Prototyping Boards ► Bus Specific Architectures.



Contacts Only Pattern: Boards are bare except for edge connector contacts.

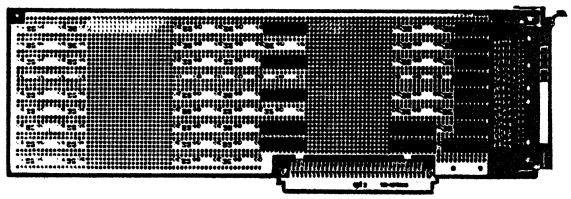


Pads & Planes™ Pattern: Full voltage and ground planes, holes are 0.042″ diameter, plated-thru on 0.1″ grid with 0.080″ diameter, isolated solder pads both sides. Positions for SMD decoupling capacitors.



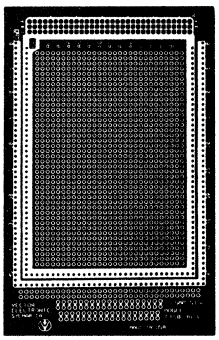
Bus Patterns: Bus patterns may be incorporated into an overall pattern, combined with another pattern, or may stand alone. Three patterns:

Interleaved Bus: Voltage and ground travel in opposite directions along the board perimeter, the across board surface in alternating rows.

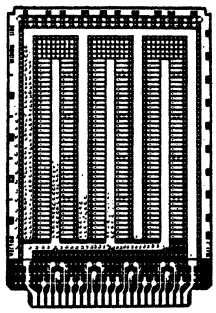


Voltage/Ground Plane Pattern: Overall power and ground planes on opposite board sides, with 0.085″ diameter clearance pads around holes, both sides.

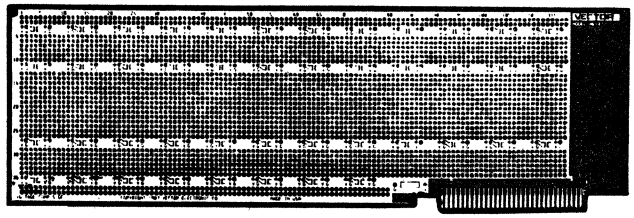
Peripheral Bus: Voltage and ground bus lines trace a path around board perimeter.



Pad-Per-Hole Pattern: 0.042″ diameter holes with 0.80″ diameter, isolated solder pads. PTH holes except for 8801-6, 8007, 8003, 45P80-1.



3-Hole Solder Pad Pattern: 3-hole, solder coated pads provide convenient connectors; interleaved buses are accessible over entire board.



Vectorbord plus™ Pattern: Full voltage and ground planes, holes are 0.055″ diameter on 0.1″ grid, with 0.085″ diameter clearance pad on both sides. SMD decoupling capacitors installed for reduced crosstalk, increased signal performance.

R600 Series Wire Wrap and Solder Tail Edge Card Connectors For 0.062" Thick Printed Circuit Boards

Designed for low insertion force, minimum wear on circuit board edge contacts. Mating contacts are gold/nickel plated for reliability. Highly efficient, 30Mv maximum contact resistance drop at 3 amps rated current. Insulation resistance is 5000 Megohms at 500V DC. Vectorbord Edge Card Connectors are supplied with between-contact polarizing keys. R630 and R644 connectors supplied with in-contact polarizing keys.

96-Pin DIN Connectors

For solder or Wire Wrap applications with DIN specification 41612. DIN Connectors, essential components of the DIN/Eurocard Standard, are also used with many bus specific and uncommitted architectures, including VMEbus and Multibus. Superior, two-piece design features gold/nickel plated copper alloy contacts and glass-filled polycarbonate or polyether sulphone insulating material. Excellent electrical properties.

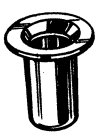
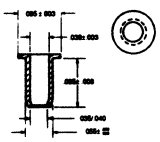
977-0595	K32/C	.250	.650	4.49

T123 Solder Eyelets

- Used to commit holes to power and ground planes, for printed circuit boards with clearance areas isolating holes from planes
- Simulates plated-thru hole
- Reduces diameter of 0.055" holes to 0.042"
- Also can be used in I/O connector area on many Vectorbord prototyping boards

977-8106. T123/500.....EACH 19.95





T124 Solder Washers

Multi-functional washer kits, Vector Part No. T124, with three sizes of washers. Different sizes provided to fit over sockets and tails of most Vector socket pins and wiring terminals. Ideal tools for committing pins to voltage and ground planes in Vectorbord patterns, such as Voltage/Ground Plane and Vectorboard plus, that have clearance area isolating holes from planes.

977-8110. T124/M.....EACH 84.49

T125, T126 Wire Wrap Terminals

- Pressfit Wire Wrap terminals, ideal for voltage and ground holes in Vectorbord plus and Pads & Planes patterns
- Two-level terminals: Part No. T125
- Three-level terminals: Part No. T126
- 0.025" square posts
- Secure contact in plated-thru holes for soldering

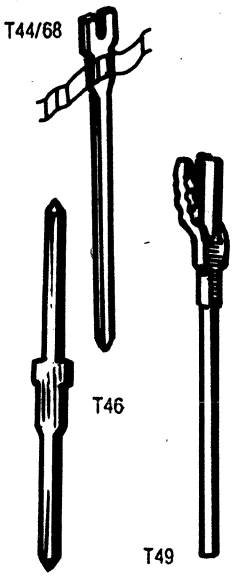
Terminals



T44, T68 Bifurcated Miniwrap Terminals
- Wire Wrap Tail with two-pronged receptacle for wires or leads
- 0.025" square posts
- Rectangular terminal with stepped shank presses securely into plated or unplated holes, requires no staking or soldering
- Bifurcated end holds soldered leads securely
- T44: maximum 0.021" diameter leads or 24 gage wires
- T68: maximum 0.032" diameter leads or 20 gage wires

T46 Press-In Terminals
- Single- and double-tailed (accessible from both sides) Wire Wrap terminals ► 0.025" square posts
- Provides secure contact without soldering or staking
- Rectangular base with stepped shank presses into plain or plated-thru holes and is retained without etching or soldering
- Pointed ends slide neatly into all wrapping bits

T49 Trifurcated Klipwrap Terminals
- Wire Wrap tail with three-pronged receptacle for wires or leads
- 0.025" square posts
- Wires or leads are crimped into receptacle on component side, secured for soldering
- Holds 0.018"-0.025" diameter leads or 22 gauge wires in lower slot.
- Terminal: Tin Plate Part No. 0.032"-0.040" diameter leads or 17 gage wires in upper slot

Push In Terminals

T28 Push-In Terminals
- Wiring terminals for mounting leads or wires horizontally or vertically (though board holes)
- Connections require no staking for most applications
- Vertical (longitudinal) slot holes 0.025" diameter leads or .22 gage wires
- Includes 0.018" diameter tab hole which accepts transistor wires, can be used to hold an anchoring wire

T42 Push-In Terminals
- Wiring terminals for mounting leads or wires horizontally or vertically (through board hole)
- Connections require no staking for most applications
- Horizontal slot holds up to seven wires, depending upon thickness of wire

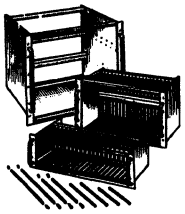
Subracks for Prototyping Cards



Complete selection of 19″ subracks, will accept all listed cards and Vector high performance backplanes. Discrete connectors may be used with adapter strips (see table). Card guides, backplanes, and connectors must be ordered separately. Aluminum side panels and cross pieces are brushed anodized aluminum with a clear conductive finish. Cards may be mounted on any increment of 0.4″ centers using snap-in card guides.

EFP Module

Ideal for High Profile Applications and for Mounting EFP Modules
Card guides spaced at 2.0″ intervals, accepts maximum 8 EFP modules, 2.0″ wide by 6.6″ long. Modules, purchased separately, hold 4.5″ x 6.4″ circuit cards and slide into rack. Module front panels are 5.25″ high and have captive 10-32 thumb screw fastener. Mating connectors for modules mount easily onto 4-way adjustable rear struts without drilling. **Module cage dimensions:** 5.25″H x 9.6″D x 19″W.
977-0320. CMA13-20.....EACH 99.95

EFP Modules
Modules for the above cages are anodized aluminum. Supplied unassembled, including slide off side covers.
977-0340. EFP204A66.....EACH 18.95
977-8244. EFP204A66F. Full cut out.....EACH 19.95

Extender Cards for VME/DIN Standard Prototyping Boards

Low noise and minimum crosstalk is achieved with patented signal trace shielding and 3-layer construction. Jumpers are provided for interrupting all signal lines. J1 and J2 extenders may be joined with an optional bracket. Available from 160 mm and 220 mm depth subracks.

Stock No.	Mfr.'s Type	Description	Height In. (mm)	Width In. (mm)	EACH
977-4080	VMEEJ1	Extender	3.94 (100)	12.8 (325)	189.95
977-4085	VMEEJ2	Extender	3.94 (100)	12.8 (325)	189.95

DIN Standard Connectors

High quality, Class II type DIN connectors, feature gold-plate male and female contacts and tinned tails (0.025″ square), unless otherwire noted. Contacts are in three rows (32 per row) on 0.1″ centers.

Stock No.	Mfr.'s Type	Description	EACH
977-8178	RE96MWR	Male, right-angle WW	8.99
977-8180	RE96MSD	Male, solder tail	6.89
977-8182	RE96FSD	Female, solder tail	8.99
977-8184	RE96FW	Female WW	8.99

DIN-Based Prototyping Boards

Designed for efficient prototyping and construction of cards to plug into VME, Multibus II, and other DIN backplanes—or into individually mounted 96 pin DIN connectors. All boards are 0.062″ thick FR4 epoxy glass per MIL-P-13949, with solder plating, and have drilled holes on 0.1″ grids for mounting DIP components. Right-angle 96 pin DIN connectors mount in etched pads on bottom edge; D-Sub or 0.2″ x 0.1″ headers mount in I/O areas on top.

Board signal areas in three patterns:

Buses Only: 0.042″ diameter holes on 0.1″ grid with solderplated, peripheral buses. **Pad-Per-Hole:** With plated-thru 0.042″ diameter holes on 0.1″ grid and 0.080″ diameter isolated solder pads around each hole (both sides). **Voltage/Ground Plane:** 0.055″ diameter holes surrounded by clearance area of 0.085″ diameter, with overall voltage/ground planes.

VME Backplanes

Featuring high speed, low noise, six layer construction; controlled impedance design; and "off board termination." Off board termination allows:

- 21 slot backplanes
- Termination on extender board
- Special termination

Ten different sizes of VME J1 and J2 backplanes are available. All J1 backplanes use a patented shielding technique that prevents crosstalk. High quality, 96 pin press-fit connectors with 3-level wire wrap tails are installed on 0.8″ centers. Multiple Mate 'N Lock power connectors are installed.

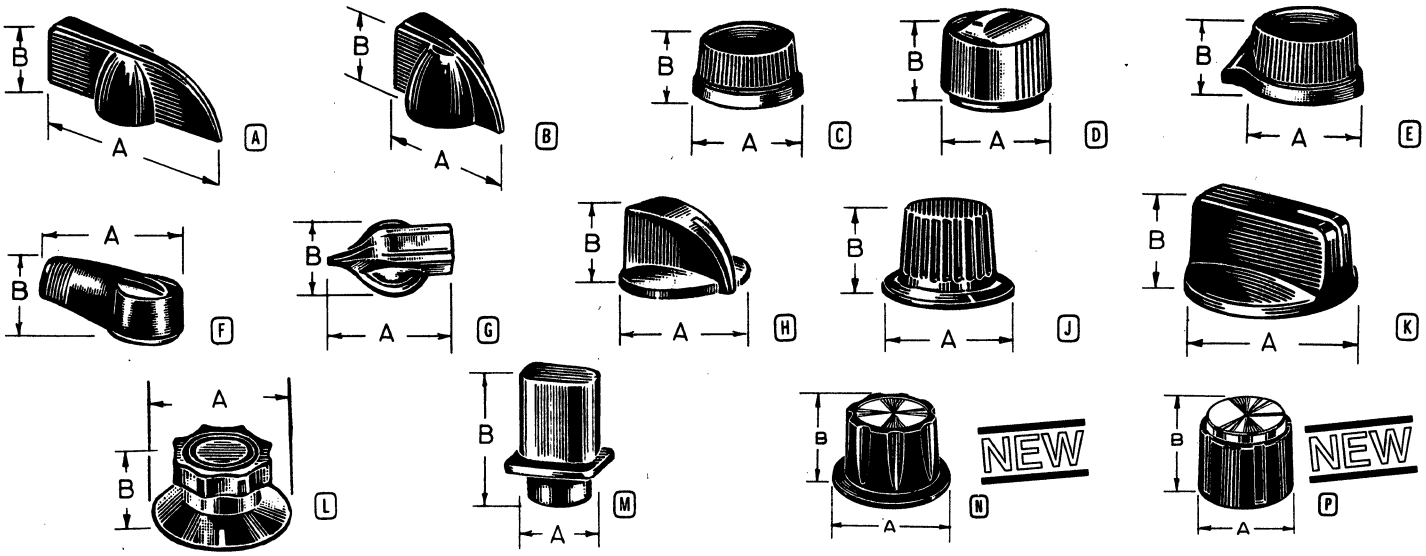
Rotating and Lever Knobs



A full line of high quality knobs for use throughout the industry. This style selection will meet most commercial and industrial applications. Choose from grooved, round, pointer bar. All are quality plastic knobs of sturdy, long-lasting phenolic plastic, with a high gloss finish. Standard setscrew construction provides one cup point slotted head setscrew. All setscrews are hardened steel cadmium plated, iridite finish. Female inserts are half hard brass rod. Mounting keys: *1/4" diameter molded hole and slotted setscrew; §1/4" diameter female brass insert and slotted setscrew; ‡self locating friction fit for use on flat wire shaft. .050 × .187".

Plastic Cases and Panels

Molded plastic cases (Figure A) and matching plastic panels (Figure B) for mounting test equipment. . .Meters fit into cases with flanges. Cases accept sizes up to 4 5/8 × 4 3/16". Cases have recessed corner bosses — flush mounting with cover. All cases require 1/2," No. 6 self-tapping screws,except Type 220 which requires 4-36 × 1/2" screws and Type 280 which requires (6) 6-32 screws. Walls and covers of cases are made of firm 1/8" thick plastic. **Shpg. weight:** Cases, 1 1/2 lbs., Panels, 1lb.

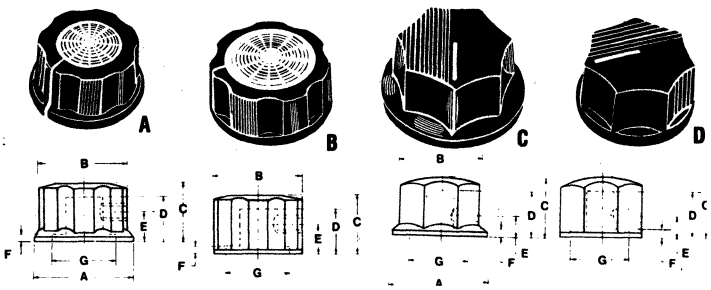
TS and TSA Series Control Knobs



TSA Series knobs are constructed of rugged thermoset plastic and feature a black high gloss finish with a decorative spun aluminum inlay on top, easy grip fluted surfaces, and indicator markings. TS Series same, but does not have inlay. All knobs are supplied with brass inserts and one slotted head setscrew. The appealing geometry and low-profile of the knobs provide for high aesthetic value in all applications. Knobs are available with Dial Skirt—black plastic with contrasting white indicator line on top and white dot on dial skirt. Without Dial Skirt—black plastic with contrasting white indicator line on top. **Applications:** Knobs are designed for commercial and industrial instrumentation, medical, and appliance applications. **Specifications. Material:** Phenolic Plastic. **Maximum Temperature:** 300°C. **Insert:** Brass, .252″ +.002 −.000 or .127″ +.002 −.000 shaft hole diameter. **Setscrew:** Brass, slotted head. **Note:** Dimension "F" is clearance for panel nut.

Galaxy III Systems—TRA Series

The additional elegance of a spun aluminum disc, recessed and protected for wearability, enhances the appearance of these knobs. The knob body is molded in black phenolic plastic with a semi-gloss finish. Round and ring base knobs are available with or without a black indicator line of the aluminum disc top. All knobs have brass insert and two brass slotted-head screws.

70 Series Self Locking: Push-to-Turn Devices

- **PTE knobs are free to rotate in unengaged mode and therefore are not recommended for use when calibration markings must be fixed in the unengaged mode**
- **PT knobs are locked in the unengaged mode and are recommended for use with calibration markings.**
- **These knobs are available in gray by special order.**
- **Mounting hardware supplied with knobs.**
- **All knobs are in matte finish.**

PPC's "Self-Locking Push-to-Turn" devices are designed for applications in which control settings must be maintained under conditions of shock and vibration. The setting cannot be changed accidently since the knob must be fully depressed before movement.

Easy to install, the "Push-to-Turn" knob, having zero backlash, allows the operator infinite resolution of setting yet locks positively when released.

The design is exactly the same as the standard line of control knobs and allows uniformity of panel design when used in conjunction with other types.

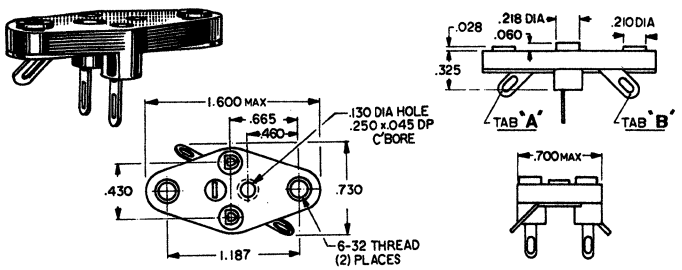
One-Piece All Molded Transistor Sockets For TO-3 Case



All-in-one mounting plate and solder tabs for complete electrical isolation of solder tab connection. **Material:** Insulating base filled reinforced polyester — 94V-0 rating. **Contacts:** Phosphor bronze tin plate. **Mounting Bracket:** Brass cadmium plate. **Rating:** 5 amps DC continous; 15 amps DC intermittent. Model 4513 features transistor lead-in insulating shoulders.

Stock No.	Mfr.'s Type	EACH

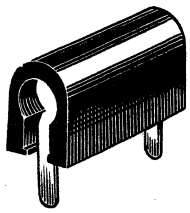
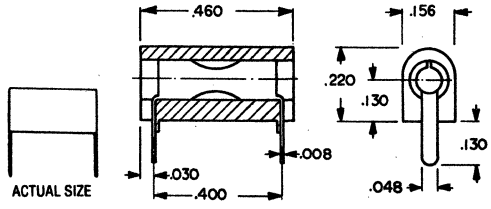
Low Profile Horizontal PC Test Jack





Allows dense packaging on .160" centers. Side by side mounting. Closed entry design for tips less than .084" — will accept probes of .074" minimum diameter. Mounts on .400" centers on .052" holes. **Current Rating:** 5A. **WVAC:** 1500V max. **Contact Resistance:** 0.01 ohms max. **Material:** Body — Nylon per ASTM D4066; Contact — Beryllium copper, gold plated. Choice of colors (see table below).

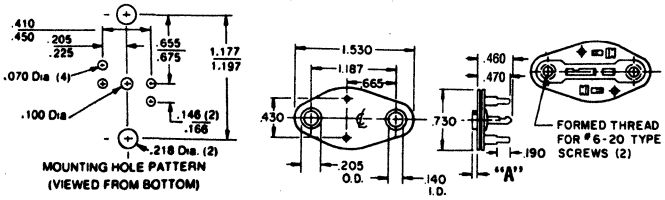
Sockets For To-3



Various Molded Boss Heights. Held underneath chassis — semiconductor is inserted into the contacts of the socket holding the assembly in position. 6-20 screws engage the formed holes in collector plate to complete the mounting. **Top Plate:** Molded nylon. **Base:** Phenolic.

Stock No.	Mfr.'s Type	Dim. "A"	EACH

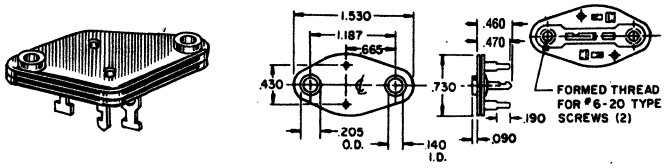
PC Sockets For TO-3



Easy to assemble — eliminates wiring. Stops on PC terminals provide spacing between socket and PC board for proper assembly of transistor to socket. Can be screwed down tightly to heat sink. **Top Plate:** Molded nylon. **Base:** Phenolic.
